

**Incident Management Situation Report
Tuesday, June 27, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (86 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires: **	3
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are six fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

Geographic Area Reports

Understanding the IMSR

Six incident management teams, 23 fire suppression crews, 40 smokejumpers and 26 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	2	495	3	3	1	80	0
NWCC	3	1,137	2	19	1	139	0

SACC	4	16,992	0	1	0	27	-21
Total	27	100,316	36	103	13	1,731	-122

Southwest Area (PL 3)

Fire Activity and Teams Assigned	Total
New fires:	10
New large incidents:	0
Uncontained large fires:	1

Rico, Las Cruces Field Office, BLM. One mile north of Pinos Altos, NM. Light slash and timber. Minimal fire behavior. Numerous structures and community of Pinos Altos threatened. Communication infrastructure threatened. Reduction in acreage due to more accurate mapping.

Pass, Gila NF, USFS. Forty miles northwest of Winston, NM. Timber and grass. Moderate fire behavior with creeping, single tree torching and backing. Structures threatened. Trail closures in effect. Last narrative report unless significant activity occurs.

Ten Year Average	Total
Fires (2013 – 2022 as of today)	25,919
Acres (2013 – 2022 as of today)	1,664,199

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Elevated to critical conditions continue across the Southwest into the greater Four Corners area where southwest winds 15 - 35 mph with gusts 30-50 mph and minimum relative humidity 5-15% are forecast. A potential also exists for isolated dry thunderstorms in portions of western New Mexico and eastern Arizona. Well above normal temperatures will continue across much of Texas, Oklahoma, and the Lower Mississippi Valley while minimum relative humidity is forecast to drop below 35%, and below 20% in south and west Texas. Scattered showers and thunderstorms are likely across northern California, the Inland Northwest, the northern/central Great Basin, and Northern Rockies and into the central Great Plains where there is a slight chance for severe thunderstorm development. An upper low will slowly move through the Great Lakes and Northeast with widespread showers and thunderstorms in the eastern Great Lakes and along the East Coast. In Alaska, afternoon isolated wet thunderstorms will occur again over the Interior, while the southern half of the state will be mostly cloudy with occasional precipitation.
