

**Incident Management Situation Report**  
**Friday, October 13, 2023 – 0730 MDT**  
**National Preparedness Level 1**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (47 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires: **	12
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1
<a href="#">Complex IMTs</a> committed:	1

Nationally, there are three fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

A reporting problem exists with the source data for year-to-date figures\*. Troubleshooting is underway. This report will resume when it is resolved.

## **Predictive Services Discussion:**

Dry and breezy post-frontal conditions will develop in portions of the southern Plains today and spread into much of Texas and through the Lower Mississippi Valley tomorrow. Dry and breezy conditions are expected to continue on the southern Plains and into the Southeast through Monday. Little to no precipitation will fall from the southern Plains through the Southeast through mid-next week. Widespread showers and thunderstorms are expected across much of the Midwest and Great Lakes today, with heavier more widespread precipitation shifting to the Mid-Atlantic tomorrow. Lingering showers are expected across portions of the Midwest, Great Lakes, and Mid-Atlantic through the weekend. Precipitation will begin by Saturday and continue through early next week along and west of the Cascades and spread across portions of the Inland Northwest, northern Great Basin, and northern Rockies Monday – Tuesday. Dry and breezy conditions are likely to develop from the Desert Southwest onto the southern Plains mid-next week. Offshore winds are likely along coastal California mid to late next week, with the lowest relative humidity and strongest winds in southern California. The Hawaiian Islands will remain mostly dry through mid-next week, and multiple lows will move through the Gulf of Alaska providing consistent precipitation from the Aleutians through the Panhandle.
