Predictive Services Discussion:

Breezy and dry southwest sustained winds of 12-25 mph with gusts 25-35 mph amid relative humidity of 5-20% and above normal temperatures will develop across eastern Oregon, northern California, the northern Great Basin, southwest Montana, and western Wyoming. Areas of elevated to critical conditions are expected, with a period of dry, northwesterly winds likely after midnight across far northwest California and southwest Oregon. Dry, northerly winds are expected in the Okanogan Valley today and tonight, as well. Very dry conditions will continue in interior California, with poor overnight recovery of 20-40% for mid-slopes and ridges that will extend into eastern Oregon and much of the Great Basin. Isolated to scattered mainly wet thunderstorms are forecast near and east of the Divide in the Rockies from Montana south to Colorado and much of Arizona, while few thunderstorms are expected in New Mexico tomorrow. Isolated mixed wet and dry thunderstorms may develop on the western fringe of the moisture in portions of southeast Idaho, Utah, and western Wyoming with new ignitions likely.

Heavy rain and extensive, possibly catastrophic, flooding will continue in much of eastern Georgia and the Carolinas due to Tropical Storm Debby. Dry and hot southerly flow will continue the southern Plains with winds of 10-20 mph gusting to 20-30 mph amid minimum relative humidity of 10-25%. Otherwise, scattered showers and thunderstorms are likely in the northern Plains, Great Lakes, and Northeast. Strong, downslope Chinook winds will continue in the southeast Interior of Alaska with temperatures well into the 80s.
