

**Incident Management Situation Report**  
**Sunday July 7, 2024 – 0730 MDT**  
**National Preparedness Level 3**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (180 fires)
New large incidents:	7
Large fires contained:	5
Uncontained large fires:	25
CIMTs committed:	12
Type 1 IMTs committed:	2
NIMOs committed:	0

Nationally, there are 47 fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

## **Predictive Services Discussion:**

Hot, record-setting temperatures will continue across the Northwest, California, western Great Basin, and Arizona, with very dry air and poor overnight recovery continuing across much of the West. Breezy northwesterly sustained winds of 12-25 mph and gusts to 25-35 mph will develop across the central and eastern Great Basin into northern Arizona and the West Slope, creating elevated to critical conditions. Isolated mainly dry thunderstorms are forecast across the Mogollon Rim and southeast Arizona into central New Mexico. Isolated thunderstorms are expected east of the Divide in Montana and Wyoming, becoming scattered thunderstorms across much of the Plains into the Upper/Mid-Mississippi Valley, with heavy rain possible across central Oklahoma and Kansas. Scattered showers and thunderstorms are also forecast for the Southeast into Florida. Rain and wind are forecast to increase along the Texas coast overnight due to Tropical Storm Beryl. Breezy, cool, and moist conditions will continue across Alaska, although rainfall overall will be lighter than the past few days.
