Incident Management Situation Report Friday, June 7, 2024 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (102 fires)
New large incidents:	3
Large fires contained:	4
Uncontained large fires:	5
CIMTs committed:	2
NIMOs committed:	0

Nationally, there are six fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Understanding the IMSR

IMSR Map

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Predictive Services Discussion:

Well above normal temperatures will continue across much of the West through the weekend, with the hottest temperatures of 100-112°F today across portions of California, southern Nevada, southern Utah, Arizona, southern New Mexico, and far west Texas. Minimum relative humidity will fall to 5-25% each afternoon as well, with breezy southwesterly winds today and Sunday across the southern Great Basin into northern Arizona creating elevated fire weather conditions. Isolated mixed wet and dry thunderstorms will also develop across much of the Intermountain West as well, with the greatest coverage of storms Saturday afternoon and evening. Scattered wet thunderstorms are more likely along the Front Range central and southern High Plains, especially Sunday. Hot temperatures with isolated afternoon thunderstorms are also forecast across Florida through the weekend. A cold front will bring scattered showers and thunderstorms to the central Plains to the Great Lakes and Ohio and Tennessee Valleys this weekend. A warming and drying trend is forecast for the Alaska Interior, with breezy easterly winds creating elevated fire weather conditions over the weekend.

National Predictive Services Outlook

6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is **Proper Use of Trigger Points**.
