

Incident Management Situation Report
Friday, June 14, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (92 fires)
New large incidents:	6
Large fires contained:	2
Uncontained large fires:	11
CIMTs committed:	1
NIMOs committed:	0

Nationally, there are eight fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Southwest Area (PL 3)

Fire Activity and Teams Assigned

Totals

New fires:	8
New large incidents:	1
Uncontained large fires:	5

Bear, Fort Apache Agency, BIA. Thirty miles southwest of Show Low, AZ. Brush and timber. Minimal fire behavior with backing and smoldering. Road closures in effect.

Top, San Carlos Agency, BIA. Four miles northeast of Cutter, AZ. Grass and brush. Moderate fire behavior with smoldering.

Blue 2, Lincoln NF, USFS. Nine miles northwest of Ruidoso, NM. Timber, grass and brush. Minimal fire behavior. Area, road and trail closures in effect.

North, Pima Agency, BIA. Ten miles south of Chandler, AZ. Grass. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

Sourdough, Colorado River Agency, BIA. Four miles northeast of Ehrenberg, AZ. Brush and grass. Minimal fire behavior.

* **Cienega Creek**, Apache-Sitgreaves NF, USFS. Nine miles southwest of Alpine, AZ. Heavy slash, grass and chaparral. Moderate fire behavior with backing, flanking and isolated torching. Last narrative report unless significant activity occurs.

Predictive Services Discussion:

A trough of low pressure off the Pacific Northwest begins to track inland today, bringing cooler temperatures to the Northwest, although above average temperatures will remain in place over much of the Great Basin, Southern California and the Southwest. Ahead of the trough, an increase in westerly, downslope flow and dry, breezy conditions are likely from the northern Sierra Nevada and western Nevada into much of Oregon and Washington with development of strong downslope flow and gap winds. Areas of the Southwest and southern California will also experience dry, breezy conditions, most notably in southeastern Arizona into western New Mexico, which overlaps with an area of potential for isolated dry thunderstorms in central Arizona. Widespread wetting rain is forecast in the Pacific Northwest, west of the Cascades, and there is a chance of rain and thunderstorms over much of New Mexico, Colorado and the High Plains, extending into the Upper Mississippi Valley. Storms to the east of the Divide are more likely to be accompanied by wetting rain. Southern Florida will continue to receive widespread thunderstorms and areas of heavy rain; up to 2.5 inches in some areas.

A dry airmass will begin to flow over Alaska's eastern interior off the Arctic Ocean, potentially producing dry thunderstorms over the northeastern interior. Showers are likely to continue over the southwest and south-central portions of the state.
