

Incident Management Situation Report
Thursday, May 30, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (144 fires)
New large incidents:	0
Large fires contained:	2
Uncontained large fires:	6
CIMTs committed:	2
NIMOs committed:	0

Nationally, there are three fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

Predictive Services Discussion:

Very warm and dry conditions are forecast across the Southwest, with minimum relative humidity of 3-15% followed by poor overnight recovery. Cooler temperatures are forecast across much of the Great Basin, northern and central Rockies, and Inland Northwest. However, hot and dry northerly winds are expected across much of the Sacramento Valley today, with locally breezy and warm conditions into the Bay Area as well. Hot temperatures will continue across much of Florida where minimum relative humidity will fall below 35%, with isolated afternoon thunderstorms likely across south Florida. Showers and thunderstorms will develop on the Plains today, with scattered thunderstorms extending into the Lower Mississippi Valley. Some of the storms on the southern Plains may be severe with heavy rain. Isolated thunderstorms are forecast for the Alaska Interior along with temperatures a little above normal, while moderate trade winds continue for Hawai'i.
