# How's Life in Brazil?

Brazil's current well-being, 2020 or latest available year

Note: This chart shows Brazil's relative strengths and weaknesses in well-being compared to other Latin American countries and OECD countries. Longer bars always indicate better outcomes (i.e. higher well-being), whereas shorter bars always indicate worse outcomes (lower well-being) – including for negative indicators, marked with an *, which have been reverse-scored. Missing data are shaded in white.
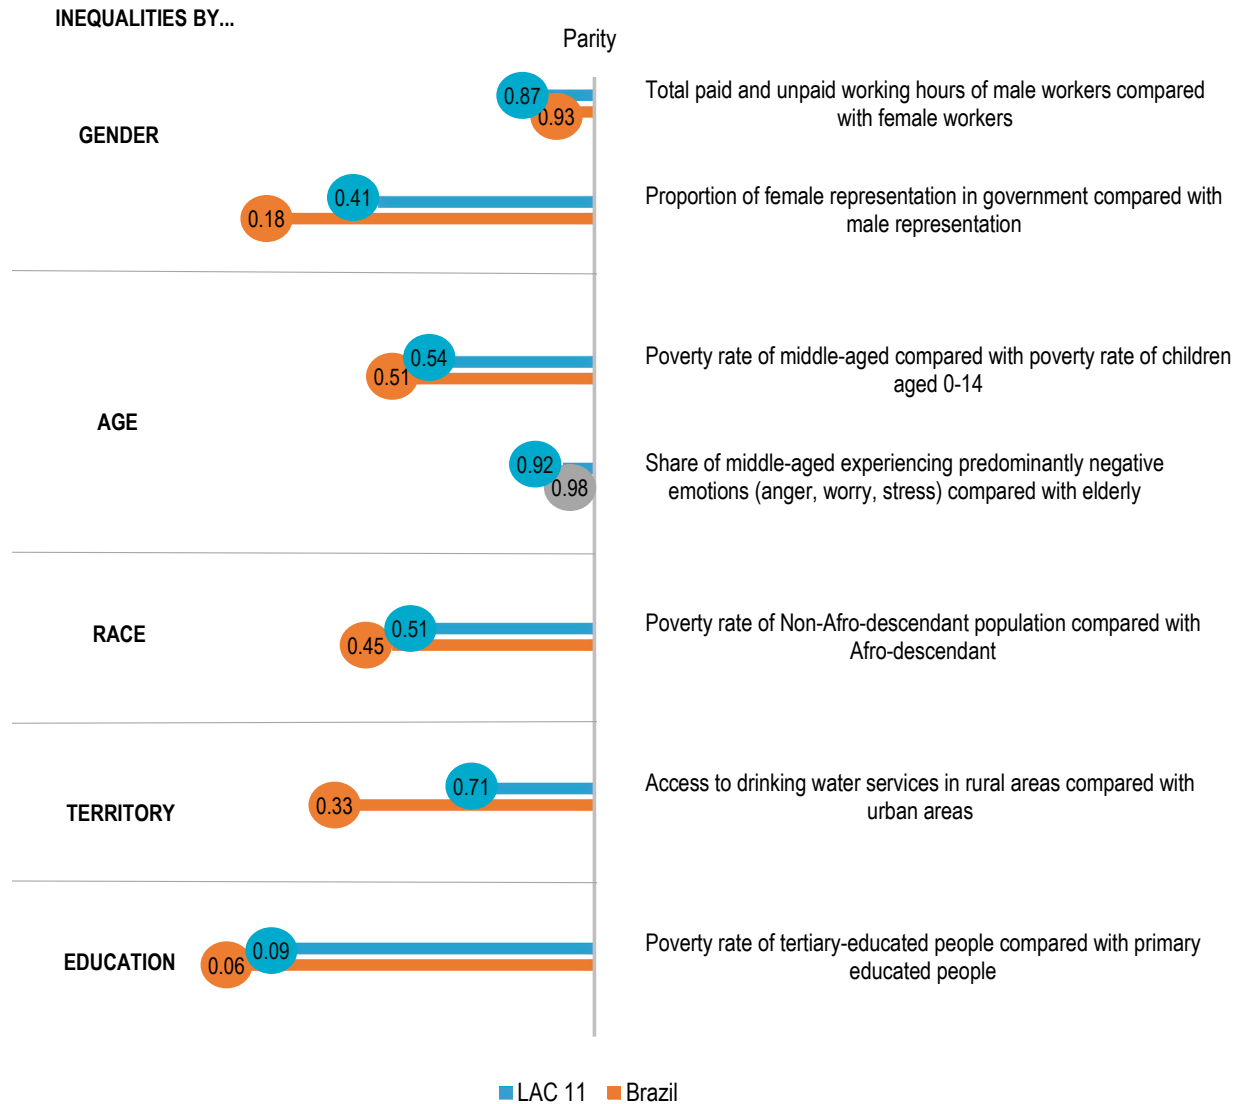

Brazil's resources for future well-being, 2020 or latest available year

Natural Capital		Economic Capital		Human Capital		Social Capital	
Red List Index of threatened species	1 ↔	Gross fixed capital formation	3 ↘	Youth not in employment nor education nor training (NEET)	3 …	Trust in others	3 ↔
Greenhouse gas emissions per capita	1 ↘	Tax revenues	1 ↗	Overweight	1 ↘	Trust in government	2 ↘

Note: ①=top-performing LAC 11 tier, ②=middle-performing LAC 11 tier, ③=bottom-performing LAC 11 tier. ↗ indicates improvement compared to 2000 or earliest available year; ↔ indicates no significant difference compared to 2000 or earliest available year; ↘ indicates deterioration compared to 2000 or earliest available year, and "…" indicates missing data. For methodological details, please contact wellbeing@oecd.org.

Inequalities in Brazil

Inequality ratios (distance from parity) for selected indicators of current well-being, 2019 or latest available year

INEQUALITIES BY...

Parity

GENDER

- 0.87 / 0.93 — Total paid and unpaid working hours of male workers compared with female workers
- 0.41 / 0.18 — Proportion of female representation in government compared with male representation

AGE

- 0.54 / 0.51 — Poverty rate of middle-aged compared with poverty rate of children aged 0-14
- 0.92 / 0.98 — Share of middle-aged experiencing predominantly negative emotions (anger, worry, stress) compared with elderly

RACE

- 0.51 / 0.45 — Poverty rate of Non-Afro-descendant population compared with Afro-descendant

TERRITORY

- 0.71 / 0.33 — Access to drinking water services in rural areas compared with urban areas

EDUCATION

- 0.09 / 0.06 — Poverty rate of tertiary-educated people compared with primary educated people

■ LAC 11   ■ Brazil

Note: A result closer to the parity line indicates greater equality, a result further from the parity line indicates greater inequality, between the groups being compared. Inequality ratios below 1 indicate worse outcomes (i.e. lower well-being) for the most vulnerable group (i.e. women (gender), children or elderly (age), Afro-descendant population (race), rural areas (territory), primary educated people (education)). Inequality ratios above 1 indicate better outcomes for the most vulnerable group. The grey bubble denotes no clear difference between elderly and middle-aged, defined as age ratio within 0.03 points distance to parity.
