The Governor shall immediately appoint a successor.

**182.020 Notice of meetings of boards and commissions; reporting of absences.** The secretary or clerk of every state board and commission shall:

(2) Report to the Governor the names of all members who fail to attend any meeting of the board or commission.

**182.030 Employment of persons advocating violent overthrow of the Government of the United States or Oregon prohibited.** (1) No state department, board or commission shall knowingly employ any person who either directly or indirectly carries on, advocates, teaches, justifies, aids or abets a program of sabotage, force and violence, sedition or treason against the Government of the United States or of the State of Oregon.

(2) Any person employed by any state department, board or commission shall immediately be discharged from employment when it becomes known to the appointing employer that such person has, during the period of employment, committed any offense set forth in subsection (1) of this section.

(3) Any person denied employment or discharged pursuant to this section shall have a right of appeal in accordance with the provisions of the State Personnel Relations Law.

**182.035 Criminal records checks to be conducted through Department of State Police.** (1) If an agency of state government, as defined in ORS 174.111, conducts a criminal records check of a person for the purposes of employment by the agency, the agency shall conduct the criminal records check through the Department of State Police.

(2) A criminal records check conducted through the Law Enforcement Data System

**Note:** 182.035 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 182 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**182.040 Boards and commissions to pay counties for services; exceptions.** (1) All state boards and commissions that are supported by fees, fines, licenses or taxes or other forms of income not derived from a direct tax on tangible property shall pay the various counties of the State of Oregon the same fees required of others for services rendered.

(2) ORS 182.040 to 182.060 do not apply to:

(a) Except for those fees required in ORS 205.320, services rendered for the Bureau of Labor and Industries on wage claims assigned to it for collection.

**182.050 Time and manner of payment to counties.** No state board or commission affected by the provisions of ORS 182.040 and 182.060 shall be required at the time of ordering the performance of any services for which a fee or charge may be collected by the county to pay the collectible fee or charge in advance or at the time the services are rendered. The county clerk or other officer performing the service, upon request made by the board or commission, shall charge to the board or commission the amount of the fee or charge, and thereafter on the first days of January, April, July and October of each calendar year supply to the board or commission an itemized statement of all services performed upon order of the board or commission for the three months preceding, together with the legal charge collectible therefor. The board or commission, upon receipt of the statement, promptly shall pay the amount due the county.

**182.060 County clerk to record instruments affecting realty for state boards and commissions.** When requested by a state board or commission, the county clerk shall record in the office of the clerk any instrument affecting real property and shall return to the board or commission a receipt for the instrument showing the legal charge for the recording of the instrument. [Amended by 1999 c.654 §12]

**182.065** [1977 c.739 §1; 1979 c.593 §5; renumbered 183.025]

**182.070** [1953 c.527 §2; 1961 c.167 §21; 1979 c.215 §1; repealed by 1995 c.69 §12]

**182.072 Payment for licenses issued by county or other public body on behalf of state agency.** If an agency of the executive department, as defined in ORS 174.112, enters into a contract with a county or other public body, as defined in ORS 174.109, for the purpose of issuing licenses on behalf of the agency, the agency, by rule, shall provide that payment for the licenses be made directly to the agency if:

(1) The agency has implemented a functioning licensing software system that is approved by the Oregon Department of Administrative Services; and

(2) The agency pays to the county or other public body the same amounts under the contract that the county or other public body would have received if the county or other public body had collected the license fees. [2007 c.768 §61]

**Note:** 182.072 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 182 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**182.080 Effect of repeal or amendment of statute authorizing state agency to collect, receive and expend moneys.** (1) The repeal of a statute or the deletion by amendment of a part thereof that granted or conferred power to any state officer, board, commission, corporation, institution, department, agency or other state organization to collect, receive and expend moneys for or on behalf of the state or for any purpose authorized by law does not affect or impair any act done, or right accruing, accrued or acquired, or liability, or obligation to pay the state a license or other fee, or payment exacted or required by law to be made or authorized by the repealed or amended statute and the rules, regulations and orders, if any, promulgated thereunder and in effect at the time of the repeal or amendment, unless otherwise specifically provided by law. In the event of such repeal or amendment of a statute, the Secretary of State may determine, collect and disburse any moneys due the state, or payable by or through the state, representing such license or other fee, or payment exacted or required by law in accordance with the provisions of such repealed or amended statute and such rules, regulations and orders promulgated thereunder, and as otherwise provided by law, in order to secure the full force, effect and operation of such statute up to the time of its repeal or amendment, but not thereafter.

(2) Upon repeal or amendment of a statute as described in subsection (1) of this section, so much as may be necessary, and no more, of the balance in the General Fund appropriated for the use, operation and func-

tion of the state officer, board, commission, corporation, institution, department, agency or other state organization is transferred to the Secretary of State for the payment of all expenses incurred by the Secretary of State in winding up and concluding administration of the repealed or amended statute, as authorized in subsection (1) of this section. If the balance of the unexpended appropriation is insufficient to cover the costs and expenses of the Secretary of State in administering and concluding the operation of the repealed or amended statute, the secretary may request transfer or appropriation of any funds, accounts and receipts belonging to the state in the custody or control of such state officer, board, commission, corporation, institution, department, agency or other state organization, to cover in full the costs of winding up and concluding the administration of the statute. [1955 c.73 §1; 2005 c.755 §3]

**182.090 State agency to pay attorney fees and expenses when court finds for petitioner and that agency acted unreasonably.** (1) In any civil judicial proceeding involving as adverse parties a state agency, as defined in ORS 291.002, and a petitioner, the court shall award the petitioner reasonable attorney fees and reasonable expenses if the court finds in favor of the petitioner and also finds that the state agency acted without a reasonable basis in fact or in law.

(2) Amounts allowed under this section for reasonable attorney fees and expenses shall be paid from funds available to the state agency. The court may withhold all or part of the attorney fees from any award to a petitioner if the court finds that the state agency has proved that its action was substantially justified or that special circumstances exist which make the award of all or a portion of the attorney fees unjust.

(3) As used in this section, "civil judicial proceeding" means any proceeding, other than a criminal proceeding as defined in ORS 131.005 (7), conducted before a court of this state. [1981 c.871 §2; 1983 c.763 §61]

**182.100 Affirmative action policy; implementation on appointments.** (1) It is declared to be the policy of Oregon that this state shall be a leader in affirmative action. All appointive authorities for state boards, commissions and advisory bodies shall implement this policy of affirmative action in their appointments, subject to the legal requirements for each appointment.

(2) The Director of Affirmative Action shall assist all persons who have appointing authority at the state level for boards, commissions or advisory bodies in carrying out the state policy stated in subsection (1) of this section and ORS 236.115.

(3) As used in this section, “affirmative action” means a method of eliminating the effects of past and present discrimination, intended or unintended, on the basis of race, religion, national origin, age, sex, marital status or physical or mental disabilities, that are evident or indicated by analysis of present appointment patterns, practices and policies. [1981 c.255 §1; 1989 c.224 §10; 1997 c.539 §2]

**182.105 Information concerning tax benefits of providing child care under employee benefit plan.** Any state agency may provide information to employers concerning the tax benefits of providing child care, as defined in ORS 329A.250, under an employee benefit plan. [1985 c.753 §5; 1995 c.278 §28]

**182.109 Agency actions to carry out state policies for persons with disabilities.** In carrying out the policies stated in ORS 410.710, state agencies shall:

(1) Review their rules and policies and may revise them as necessary to reflect a positive approach to persons with disabilities.

(2) Encourage and promote education of state employees, state officials and the public in general about the worth and capacity of persons with disabilities.

(3) In all state correspondence and publications, avoid the use of stereotypes and negative labels such as “victim,” “afflicted,” “crippled” and “handicapped” except as such terms are required by statute or federal law and regulation.

(4) Use the preferred and more positive term “person with a disability” instead of “disabled person,” “handicapped” or other negative words except as such terms are required by statute or federal law and regulation.

(5) In implementing subsections (1) to (4) of this section, develop and seek input regarding terminology and portrayal of persons with disabilities from persons who have disabilities and their advocates.

(6) Foster corrective measures and avoid stereotypes and negative labeling in texts used by schools, newspapers, magazines, radio and television by encouraging review and analysis of these media by publishers, company owners or appropriate agencies.

(7) Use the term “person with a disability” to the extent consistent with state and federal law in rules adopted on or after January 1, 2006. [1989 c.224 §2; 2005 c.411 §2; 2007 c.70 §48]

**182.110** [1959 c.501 §1; repealed by 1959 c.501 §10]

**182.112 Title to property acquired by state agency in name of state.** A state agency, as defined in ORS 279A.250, authorized by law to acquire real or personal prop-

erty or any interest therein shall take title to the property or the interest therein in the name of the State of Oregon. [2003 c.794 §192]

(5) If the activity can be carried out by a lower level of government or by the family itself;

### (Adoption of Rules)

#### **183.325 Delegation of rulemaking authority to named officer or employee.**

Unless otherwise provided by law, an agency may delegate its rulemaking authority to an officer or employee within the agency. A delegation of authority under this section must be made in writing and filed with the Secretary of State before the filing of any rule adopted pursuant to the delegation. A delegation under this section may be made only to one or more named individuals. The delegation of authority shall reflect the name of the authorized individual or individuals, and be signed in acknowledgment by the named individuals. Any officer or employee to whom rulemaking authority is delegated under this section is an "agency" for the purposes of the rulemaking requirements of this chapter. [1979 c.593 §10; 1993 c.729 §1]

**183.330 Description of organization; service of order; rules coordinator; order not final until put in writing.** (1) In addition to other rulemaking requirements im-

posed by law, each agency shall publish a description of its organization and the methods whereby the public may obtain information or make submissions or requests.

(2) Each state agency that adopts rules shall appoint a rules coordinator and file a copy of that appointment with the Secretary of State. The rules coordinator shall:

(a) Maintain copies of all rules adopted by the agency;

(b) Provide to the public, upon request, information pertaining to:

(A) All rulemaking proceedings of the agency;

(B) The status of the agency's rules; and

(C) All certificates and rules filed by the agency with the Secretary of State; and

(c) Keep and make available the mailing list required by ORS 183.335 (8).

(3) An order shall not be effective as to any person or party unless it is served upon the person or party either personally or by mail. This subsection is not applicable in favor of any person or party who has actual knowledge of the order.

(4) An order is not final until it is reduced to writing. [1957 c.717 §2; 1971 c.734 §4; 1975 c.759 §3; 1979 c.593 §8; 1993 c.729 §2; 2001 c.220 §3; 2017 c.518 §1]

**183.332 Policy statement; conformity of state rules with equivalent federal laws and rules.** It is the policy of this state that agencies shall seek to retain and promote the unique identity of Oregon by considering local conditions when an agency adopts policies and rules. However, since there are many federal laws and regulations that apply to activities that are also regulated by the state, it is also the policy of this state that agencies attempt to adopt rules that correspond with equivalent federal laws and rules unless:

(1) There is specific statutory direction to the agency that authorizes the adoption of the rule;

(2) A federal waiver has been granted that authorizes the adoption of the rule;

(3) Local or special conditions exist in this state that warrant a different rule;

(4) The state rule has the effect of clarifying the federal rules, standards, procedures or requirements;

(5) The state rule achieves the goals of the federal and state law with the least impact on public and private resources; or

(6) There is no corresponding federal regulation. [1997 c.602 §2]

**183.333 Policy statement; public involvement in development of policy and drafting of rules; advisory committees.** (1) The Legislative Assembly finds and declares that it is the policy of this state that whenever possible the public be involved in the development of public policy by agencies and in the drafting of rules. The Legislative Assembly encourages agencies to seek public input to the maximum extent possible before giving notice of intent to adopt a rule. The agency may appoint an advisory committee or use any other means of obtaining public views that will assist the agency in drafting the rule. The membership of an advisory committee appointed under this subsection must represent the interests of persons and communities likely to be affected by the rule.

(2) Any agency in its discretion may develop a list of interested parties and inform those parties of any issue that may be the subject of rulemaking and invite the parties to make comments on the issue.

(3) If an agency appoints an advisory committee for consideration of a rule under subsection (1) of this section, the agency shall seek the committee's recommendations on whether the rule will have a fiscal impact, what the extent of that impact will be and whether the rule will have a significant adverse impact on small businesses. If the committee indicates that the rule will have a significant adverse impact on small businesses, the agency shall seek the committee's recommendations on compliance with ORS 183.540.

(4) An agency shall consider an advisory committee's recommendations provided under subsection (3) of this section in preparing the statement of fiscal impact required by ORS 183.335 (2)(b)(E).

(5) If an agency does not appoint an advisory committee for consideration of a permanent rule under subsection (1) of this section and 10 or more persons likely to be affected by the rule object to the agency's statement of fiscal impact as required by ORS 183.335 (2)(b)(E) or an association with at least 10 members likely to be affected by the rule objects to the statement, the agency shall appoint a fiscal impact advisory committee to provide recommendations on whether the rule will have a fiscal impact and what the extent of that impact will be. The membership of the fiscal impact advisory committee must represent the interests of persons and communities likely to be affected by the rule. An objection under this subsection must be made not later than 14 days after the notice required by ORS 183.335 (1) is given. If the agency determines that the statement does not adequately reflect the rule's fiscal impact, the agency shall extend

the period for submission of data or views under ORS 183.335 (3)(a) by at least 20 days. The agency shall include any recommendations from the committee in the record maintained by the agency for the rule.

(6) An agency may appoint the Small Business Rules Advisory Committee established in ORS 183.407 as the advisory committee or fiscal impact advisory committee for purposes of this section.

(7) Subsection (5) of this section does not apply to any rule adopted by an agency to comply with a judgment or a settlement of a judicial proceeding.

(8) If an agency is required by law to appoint an advisory committee or a fiscal impact advisory committee under this section, the agency may not appoint an officer, employee or other agent of the agency to serve as a member of the advisory committee or fiscal impact advisory committee. [2003 c.749 §4; 2005 c.807 §4; 2013 c.273 §1; 2018 c.20 §3; 2021 c.463 §1]

**183.335 Notice; content; public comment; temporary rule adoption, amendment or suspension; substantial compliance required.** (1) Prior to the adoption, amendment or repeal of any rule, the agency shall give notice of its intended action:

(a) In the manner established by rule adopted by the agency under ORS 183.341 (4), which provides a reasonable opportunity for interested persons to be notified of the agency's proposed action;

(3)(a) When an agency proposes to adopt, amend or repeal a rule, it shall give interested persons reasonable opportunity to submit data or views. Opportunity for oral hearing shall be granted upon request received from 10 persons or from an association having not less than 10 members before the earliest date that the rule could become effective after the giving of notice pursuant to subsection (1) of this section. An agency holding a hearing upon a request made under this subsection shall give notice of the hearing at least 21 days before the hearing to the person who has requested the hearing, to persons who have requested notice pursuant to subsection (8) of this section and to the persons specified in subsection (15) of this section. The agency shall publish notice of the hearing in the bulletin referred to in ORS 183.360 at least 14 days before the hearing. The agency shall consider fully any written or oral submission.

(b) If an agency is required to conduct an oral hearing under paragraph (a) of this subsection, and the rule for which the hearing is to be conducted applies only to a limited geographical area within this state, or affects only a limited geographical area within this state, the hearing shall be conducted within the geographical area at the place most convenient for the majority of the residents within the geographical area. At least 14 days before a hearing conducted under this paragraph, the agency shall publish notice of the hearing in the bulletin referred to in ORS 183.360 and in a newspaper of general circulation published within the geographical area that is affected by the rule or to which the rule applies. If a newspaper of general circulation is not published within the geographical area that is affected by the rule or to which the rule applies, the publication shall be made in the newspaper of general circulation published closest to the geographical area.

(c) Notwithstanding paragraph (a) of this subsection, the Department of Corrections and the State Board of Parole and Post-Prison Supervision may adopt rules limiting participation by adults in custody in the proposed adoption, amendment or repeal of any rule to written submissions.

(d) If requested by at least five persons before the earliest date that the rule could become effective after the agency gives notice pursuant to subsection (1) of this section, the agency shall provide a statement

that identifies the objective of the rule and a statement of how the agency will subsequently determine whether the rule is in fact accomplishing that objective.

(e) An agency that receives data or views concerning proposed rules from interested persons shall maintain a record of the data or views submitted. The record shall contain:

(A) All written materials submitted to an agency in response to a notice of intent to adopt, amend or repeal a rule.

(B) A recording or summary of oral submissions received at hearings held for the purpose of receiving those submissions.

(C) Any public comment received in response to the request made under subsection (2)(b)(H) of this section and the agency's response to that comment.

(D) Any statements provided by the agency under paragraph (d) of this subsection.

(4) Upon request of an interested person received before the earliest date that the rule could become effective after the giving of notice pursuant to subsection (1) of this section, the agency shall postpone the date of its intended action no less than 21 nor more than 90 days in order to allow the requesting person an opportunity to submit data, views or arguments concerning the proposed action. Nothing in this subsection shall preclude an agency from adopting a temporary rule pursuant to subsection (5) of this section.

(5) Notwithstanding subsections (1) to (4) of this section, an agency may adopt, amend or suspend a rule without prior notice or hearing or upon any abbreviated notice and hearing that it finds practicable, if the agency prepares:

(e) For an agency specified in ORS 183.530, a housing cost impact statement as defined in ORS 183.534.

(6)(a) A rule adopted, amended or suspended under subsection (5) of this section is temporary and may be effective for a period of not longer than 180 days. The adoption of a rule under this subsection does not preclude the subsequent adoption of an identical rule under subsections (1) to (4) of this section.

(b) A rule temporarily suspended shall regain effectiveness upon expiration of the temporary period of suspension unless the rule is repealed under subsections (1) to (4) of this section.

(7) Notwithstanding subsections (1) to (4) of this section, an agency may amend a rule without prior notice or hearing if the amendment is solely for the purpose of:

(a) Changing the name of an agency by reason of a name change prescribed by law;

(b) Changing the name of a program, office or division within an agency as long as the change in name does not have a substantive effect on the functions of the program, office or division;

(e) Correcting statutory or rule references;

(f) Correcting addresses or telephone numbers referred to in the rules; or

(8)(a) Any person may request in writing that an agency send to the person copies of the agency's notices of intended action issued under subsection (1) of this section. The person must provide an address where the person elects to receive notices. The address provided may be a postal mailing address or, if the agency provides notice by electronic mail, may be an electronic mailing address.

(b) A request under this subsection must indicate that the person requests one of the following:

(A) The person may request that the agency mail paper copies of the proposed rule and other information required by subsection (2) of this section to the postal mailing address.

(B) If the agency posts notices of intended action on a website, the person may request that the agency mail the information required by subsection (2)(a) of this section to the postal mailing address with a reference to the website where electronic copies of the proposed rule and other information required by subsection (2) of this section are posted.

(C) The person may request that the agency electronically mail the information required by subsection (2)(a) of this section to the electronic mailing address, and either provide electronic copies of the proposed rule and other information required by subsection (2) of this section or provide a reference to a website where electronic copies of the proposed rule and other information required by subsection (2) of this section are posted.

(c) Upon receipt of any request under this subsection, the agency shall acknowledge the request, establish a mailing list and maintain a record of all mailings made pursuant to the request. Agencies may establish procedures for establishing the mailing lists and keeping the mailing lists current. Agencies by rule may establish fees necessary to defray the costs of mailings and maintenance of the lists.

(d) Members of the Legislative Assembly who receive notices under subsection (15) of this section may request that an agency furnish paper copies of the notices.

(9) This section does not apply to rules establishing an effective date for a previously effective rule or establishing a period during which a provision of a previously effective rule will apply.

(10) This section does not apply to ORS 279.835 to 279.855, 279A.140 to 279A.161, 279A.250 to 279A.290, 279A.990, 279B.050 to 279B.085, 279B.200 to 279B.240, 279B.270, 279B.275, 279B.280, 279C.360, 279C.365, 279C.370, 279C.375, 279C.380, 279C.385, 279C.500 to 279C.530, 279C.540, 279C.545, 279C.550 to 279C.570, 279C.580, 279C.585, 279C.590, 279C.600 to 279C.625, 279C.650 to 279C.670 and 279C.800 to 279C.870 relating to public contracts and purchasing.

(11)(a) Except as provided in paragraph (c) of this subsection, a rule is not valid unless adopted in substantial compliance with the provisions of this section in effect on the date that the notice required under subsection (1) of this section is delivered to the Secretary of State for the purpose of publication in the bulletin referred to in ORS 183.360.

(b) In addition to all other requirements with which rule adoptions must comply, a rule other than a rule amended for a purpose described in subsection (7) of this section is not valid if the rule has not been submitted to the Legislative Counsel in the manner required by ORS 183.355 and 183.715.

(c) A rule is not subject to judicial review or other challenge by reason of failing to comply with subsection (2)(a)(A) of this section.

(12)(a) Notwithstanding the provisions of subsection (11) of this section, but subject to

paragraph (b) of this subsection, an agency may correct its failure to substantially comply with the requirements of subsections (2) and (5) of this section in adoption of a rule by an amended filing, as long as the non-compliance did not substantially prejudice the interests of persons to be affected by the rule.

(b) An agency may use an amended filing to correct a failure to include a fiscal impact statement in a notice of intended action, as required by subsection (2)(b)(E) of this section, or to correct an inaccurate fiscal impact statement, only if the agency developed the fiscal impact statement with the assistance of an advisory committee or fiscal impact advisory committee appointed under ORS 183.333.

(13) Unless otherwise provided by statute, the adoption, amendment or repeal of a rule by an agency need not be based upon or supported by an evidentiary record.

(14) When an agency has established a deadline for comment on a proposed rule under the provisions of subsection (3)(a) of this section, the agency may not extend that deadline for another agency or person unless the extension applies equally to all interested agencies and persons. An agency shall not consider any submission made by another agency after the final deadline has passed.

(15) The notices required under subsections (1) and (3) of this section must be given by the agency to the following persons:

(a) If the proposed adoption, amendment or repeal results from legislation that was passed within two years before notice is given under subsection (1) of this section, notice shall be given to the legislator who introduced the bill that subsequently was enacted into law, and to the chair or co-chairs of all committees that reported the bill out, except for those committees whose sole action on the bill was referral to another committee.

(b) If the proposed adoption, amendment or repeal does not result from legislation that was passed within two years before notice is given under subsection (1) of this section, notice shall be given to the chair or co-chairs of any interim or session committee with authority over the subject matter of the rule.

(c) If notice cannot be given under paragraph (a) or (b) of this subsection, notice shall be given to the Speaker of the House of Representatives and to the President of the Senate who are in office on the date the notice is given.

(2) Prior to the adoption of a federal rule or regulation under subsection (1) of this section, the agency shall give notice of the adoption of the rule or regulation, the effective date of the rule or regulation in this state and the subject matter of the rule or regulation in the manner established in ORS 183.335 (1).

(3) After giving notice the agency may adopt the rule or regulation by filing a copy

Notice of such adoption shall be filed with the Secretary of State in the manner provided by ORS 183.355 for the filing of rules. The model rules may be amended from time to time by an adopting agency or the Attorney General after notice and opportunity for hearing as required by rulemaking procedures under this chapter.

(2) Except as provided in ORS 183.630, all agencies shall adopt rules of procedure to be utilized in the adoption of rules and conduct of proceedings in contested cases or, if exempt from the contested case provisions of this chapter, for the conduct of proceedings.

(b) Unless otherwise provided by rule adopted by the Secretary of State, an agency adopting a rule incorporating published standards by reference is not required to file a copy of those standards with the Secretary of State if:

(A) The standards adopted are unusually voluminous and costly to reproduce; and

(B) The rule filed with the Secretary of State identifies the location of the standards so incorporated and the conditions of their availability to the public.

(3) Each rule is effective upon filing as required by subsection (2) of this section, except that:

(a) If a later effective date is required by statute or specified in the rule, the later date is the effective date.

(b) A temporary rule becomes effective upon filing with the Secretary of State, or at a designated later date, only if the statement required by ORS 183.335 (5) is filed with the rule. The agency shall take appropriate measures to make temporary rules known to the persons who may be affected by them.

However, if an agency, in disposing of a contested case, announces in its decision the adoption of a general policy applicable to the case and subsequent cases of like nature the agency may rely upon the decision in disposition of later cases.

(7) The Secretary of State shall, upon request, supply copies of rules, or orders or designated parts of rules or orders, in the format requested, making and collecting therefor fees prescribed by ORS 177.130. All receipts from the sale of copies shall be deposited in the State Treasury to the credit of the Secretary of State Miscellaneous Receipts Account established under ORS 279A.290.

(8) The Secretary of State shall establish and collect fees from agencies filing rules under this section. tion shall be supplemented or revised as often as necessary. Such compilation supersedes any other rules. The Secretary of State may make such compilations of other material published in the bulletin as are desirable. The Secretary of State may copyright the compilations prepared under this subsection, and may establish policies for the revision, clarification, classification, arrangement, indexing, printing, binding, publication, sale and distribution of the compilations.

(2) The Secretary of State has discretion to omit from the compilation, if published in print, rules the publication of which would be unduly cumbersome or expensive if the rule in printed or processed form is made available on application to the adopting agency, and if the compilation contains a notice summarizing the omitted rule and stating how a copy of the omitted rule may be obtained. In preparing the compilation the Secretary of State may not alter the sense, meaning, effect or substance of any rule, but may renumber sections and parts of sections of the rules, change the wording of headnotes, rearrange sections, change reference numbers to agree with renumbered chapters, sections or other parts, substitute the proper subsection, section or chapter or other division numbers, change capitalization for the purpose of uniformity, and correct manifest clerical or typographical errors.

(a) Provide public access to the information described in subsection (1) of this section;

(b) Provide technical assistance to state agencies; and

(c) Ensure that the information resources needed to implement subsection (1) of this section are addressed along with the needs of the individual agencies.

(5) Personal information concerning a person who accesses the information identified in subsection (1) of this section may be maintained only for the purpose of providing service to the person.

(6) No fee or other charge may be imposed by the Secretary of State as a condition of accessing the information identified in subsection (1) of this section.

(7) No action taken pursuant to this section shall be deemed to alter or relinquish any copyright or other proprietary interest or entitlement of the State of Oregon relative to any of the information made available pursuant to subsection (1) of this section. [1995 c.614 §5; 2017 c.518 §5]

Other copies of the bulletins and compilations shall be distributed by the Secretary of State at a cost determined by the Secretary of State. The Attorney General shall prescribe by rule the form for such petitions and the procedure for their submission, consideration and disposition. Not later than 90 days after the date of submission of a petition, the agency either shall deny the petition in writing or shall initiate rulemaking proceedings in accordance with ORS 183.335.

(2) If a petition requesting the amendment or repeal of a rule is submitted to an agency under this section, the agency shall invite public comment upon the rule, and shall specifically request public comment on whether options exist for achieving the rule's substantive goals in a way that reduces the negative economic impact on businesses.

(3) In reviewing a petition subject to subsection (2) of this section, the agency shall consider:

(a) The continued need for the rule;

(b) The nature of complaints or comments received concerning the rule from the public;

(c) The complexity of the rule;

(d) The extent to which the rule overlaps, duplicates or conflicts with other state rules or federal regulations and, to the extent feasible, with local government regulations;

(e) The degree to which technology, economic conditions or other factors have changed in the subject area affected by the rule; and

(f) The statutory citation or legal basis for the rule. [1957 c.717 §5; 1971 c.734 §8; 2003 c.749 §6]

**183.400 Judicial determination of validity of rule.**

(1) The validity of any rule may be determined upon a petition by any person to the Court of Appeals in the manner provided for review of orders in contested cases. The court shall have

jurisdiction to review the validity of the rule whether or not the petitioner has first requested the agency to pass upon the validity of the rule in question, but not when the petitioner is a party to an order or a contested case in which the validity of the rule may be determined by a court.

(2) The validity of any applicable rule may also be determined by a court, upon review of an order in any manner provided by law or pursuant to ORS 183.480 or upon enforcement of such rule or order in the manner provided by law.

(3) Judicial review of a rule shall be limited to an examination of:

(a) The rule under review;

(b) The statutory provisions authorizing the rule; and

(c) Copies of all documents necessary to demonstrate compliance with applicable rulemaking procedures.

(4) The court shall declare the rule invalid only if it finds that the rule:

(a) Violates constitutional provisions;

(b) Exceeds the statutory authority of the agency; or

(c) Was adopted without compliance with applicable rulemaking procedures.

(5) In the case of disputed allegations of irregularities in procedure which, if proved, would warrant reversal or remand, the Court of Appeals may refer the allegations to a master appointed by the court to take evidence and make findings of fact. The court's review of the master's findings of fact shall be de novo on the evidence.

(6) The court shall not declare a rule invalid solely because it was adopted without compliance with applicable rulemaking procedures after a period of two years after the date the rule was filed in the office of the Secretary of State, if the agency attempted to comply with those procedures and its failure to do so did not substantially prejudice the interests of the parties. [1957 c.717 §6; 1971 c.734 §9; 1975 c.759 §9; 1979 c.593 §17; 1987 c.861 §3]

**Note:** 183.403 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 183 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**183.405 Agency review of rules; report by Secretary of State.** (1) Not later than five years after adopting a rule, an agency shall review the rule for the purpose of determining:

(b) Whether the anticipated fiscal impact of the rule was underestimated or overestimated;

(c) Whether subsequent changes in the law require that the rule be repealed or amended;

(2) Upon request of an agency, the Small Business Rules Advisory Committee established in ORS 183.407 may agree to complete the review and reporting required by this section for the agency.

(3) Upon request of an agency, the committee shall serve as the advisory committee or fiscal impact advisory committee for re-

viewing an agency's proposed administrative rules under ORS 183.333.

(4) Upon request of an agency, the committee may agree to complete the rules review and reporting required by ORS 183.405 in place of the agency.

A declaratory ruling is binding between the agency and the petitioner on the state of facts alleged, unless it is altered or set aside by a court. However, the agency may, where the ruling is adverse to the petitioner, review the ruling and alter it if requested by the petitioner. Binding rulings provided by this section are subject to review in the Court of Appeals in the manner provided in ORS 183.480 for the review of orders in contested cases. The Attorney General shall prescribe by rule the form for such petitions and the procedure for

their submission, consideration and disposition. The petitioner shall have the right to submit briefs and present oral argument at any declaratory ruling proceeding held pursuant to this section. [1957 c.717 §7; 1971 c.734 §10; 1973 c.612 §5]

**Note:** 183.411 was added to and made a part of ORS chapter 183 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**183.413 Notice to parties before hearing of rights and procedure; failure to provide notice.** (1) The Legislative Assembly finds that parties to a contested case hearing have a right to be informed as to the procedures by which contested cases are heard by state agencies, their rights in hearings before state agencies, the import and effect of hearings before state agencies and their rights and remedies with respect to actions taken by state agencies. Accordingly, it is the purpose of subsections (2) and (3) of this section to set forth certain requirements of state agencies so that parties to contested case hearings shall be fully informed as to these matters when exercising their rights before state agencies.

(2) Prior to the commencement of a contested case hearing before any agency including those agencies identified in ORS 183.315, the agency shall serve personally or by mail a written notice to each party to the hearing that includes the following:

(m) Whether there exists an opportunity for an adjournment at the end of the hearing if the party then determines that additional evidence should be brought to the attention of the agency and the hearing reopened.

(n) Whether there exists an opportunity after the hearing and prior to the final determination or order of the agency to review and object to any proposed findings of fact, conclusions of law, summary of evidence or recommendations of the officer presiding at the hearing.

Bar or the Oregon Military Department for more information. The statement must include the toll-free telephone numbers for the Oregon State Bar and the Oregon Military Department and the Internet address for the United States Armed Forces Legal Assistance Legal Services Locator website.

(3) The failure of an agency to give notice of any item specified in subsection (2) of this section does not invalidate any determination or order of the agency unless upon an appeal from or review of the determination or order a court finds that the failure affects the substantial rights of the complaining party. In the event of such a finding, the court shall remand the matter to the agency for a reopening of the hearing and shall direct the agency as to what steps it shall take to remedy the prejudice to the rights of the complaining party. [1979 c.593 §§37,38,39; 1995 c.79 §63; 2007 c.288 §1; 2013 c.295 §1]

[1971 c.734 §13; 1979 c.593 §18; 1985 c.757 §1; 1997 c.837 §2; 1999 c.849 §§27,28; 2003 c.75 §29; 2007 c.288 §2; 2013 c.295 §3]

**183.417 Procedure in contested case hearing.** (1) In a contested case proceeding, the parties may elect to be represented by counsel and to respond and present evidence and argument on all issues properly before the presiding officer in the proceeding.

(2) Agencies may adopt rules of procedure governing participation in contested case proceedings by persons appearing as limited parties.

(3)(a) Unless prohibited by law, informal disposition may be made of any contested case by stipulation, agreed settlement, consent order or default. Informal settlement may be made in license revocation proceedings by written agreement of the parties and the agency consenting to a suspension, fine or other form of intermediate sanction.

(b) Any informal disposition of a contested case, other than an informal disposition by default, must be in writing and signed by the party or parties to the contested case. The agency shall incorporate that disposition into a final order. An order under this paragraph is not subject to ORS 183.470. The agency shall deliver or mail a copy of the order to each party and to the attorney of record if the party is represented. An order that incorporates the informal disposition is a final order in a contested case, but is not subject to judicial review. A party may petition the agency to set aside a final order that incorporates the informal disposition on the ground that the informal disposition was obtained by fraud or duress.

(4) An order adverse to a party may be issued upon default only if a prima facie case is made on the record. The record on a default order includes all materials submitted by the party. The record on a default order may be made at the time of issuance of the order. If the record on the default order consists solely of an application and other materials submitted by the party, the agency shall so note in the order.

(5) At the commencement of a contested case hearing, the officer presiding at the hearing shall explain the issues involved in the hearing and the matters that the parties must either prove or disprove.

(6) Testimony at a contested case hearing shall be taken upon oath or affirmation of the witness. The officer presiding at the hearing shall administer oaths or affirmations to witnesses.

(7) The officer presiding at the hearing shall place on the record a statement of the substance of any written or oral ex parte communication on a fact in issue made to the officer during the pendency of the proceeding and notify the parties of the communication and of their right to rebut the

communication. If an ex parte communication is made to an administrative law judge assigned from the Office of Administrative Hearings established under ORS 183.605, the administrative law judge must comply with ORS 183.685.

(8) The officer presiding at the hearing shall ensure that the record developed at the hearing shows a full and fair inquiry into the facts necessary for consideration of all issues properly before the presiding officer in the case and the correct application of the law to those facts.

(9) The record in a contested case shall include:

(a) All pleadings, motions and intermediate rulings.

(b) Evidence received or considered.

(c) Stipulations.

(h) Any proposed, intermediate or final order prepared by the agency or an administrative law judge.

(10) A verbatim oral, written or mechanical record shall be made of all motions, rulings and testimony in a contested case proceeding. The record need not be transcribed unless requested for purposes of rehearing or court review. The agency may charge the party requesting transcription the cost of a copy of transcription, unless the party files an appropriate affidavit of indigency. Upon petition, a court having jurisdiction to review under ORS 183.480 may reduce or eliminate the charge upon finding that it is equitable to do so, or that matters of general interest would be determined by review of the order of the agency. [2007 c.288 §4]

**183.418** [1973 c.386 §6; 1989 c.224 §11; 1991 c.750 §5; repealed by 1999 c.1041 §9]

**183.420** [1957 c.717 §8 (1); repealed by 1971 c.734 §21]

Depositions may also be taken by the use of audio or audio-visual re-

cordings. The petition shall set forth the name and address of the witness whose testimony is desired, a showing of the materiality of the testimony of the witness, and a request for an order that the testimony of such witness be taken before an officer named in the petition for that purpose. If the witness resides in this state and is unwilling to appear, the agency may issue a subpoena as provided in ORS 183.440, requiring the appearance of the witness before such officer.

(2) An agency may, by rule, prescribe other methods of discovery which may be used in proceedings before the agency. [1971 c.734 §14; 1975 c.759 §11; 1979 c.593 §19; 1997 c.837 §6]

**183.430 Hearing on refusal to renew license; exceptions.** (1) In the case of any license which must be periodically renewed, where the licensee has made timely application for renewal in accordance with the rules of the agency, such license shall not be deemed to expire, despite any stated expiration date thereon, until the agency concerned has issued a formal order of grant or denial of such renewal. In case an agency proposes to refuse to renew such license, upon demand of the licensee, the agency must grant hearing as provided by this chapter before issuance of order of refusal to renew. This subsection does not apply to any emergency or temporary permit or license.

(2) In any case where the agency finds a serious danger to the public health or safety and sets forth specific reasons for such findings, the agency may suspend or refuse to renew a license without hearing, but if the licensee demands a hearing within 90 days after the date of notice to the licensee of such suspension or refusal to renew, then a hearing must be granted to the licensee as soon as practicable after such demand, and the agency shall issue an order pursuant to such hearing as required by this chapter confirming, altering or revoking its earlier order. Such a hearing need not be held where the order of suspension or refusal to renew is accompanied by or is pursuant to, a citation for violation which is subject to judicial determination in any court of this state, and the order by its terms will terminate in case of final judgment in favor of the licensee. [1957 c.717 §8 (3), (4); 1965 c.212 §1; 1971 c.734 §11]

**183.435 Period allowed to request hearing for license refusal on grounds other than test or inspection results.** When an agency refuses to issue a license required to pursue any commercial activity, trade, occupation or profession if the refusal is based on grounds other than the results of a test or inspection that agency shall grant the person requesting the license 60

days from notification of the refusal to request a hearing. [Formerly 670.285]

**183.440 Subpoenas in contested cases.**

(1) An agency may issue subpoenas on its own motion in a contested case. In addition, an agency or hearing officer in a contested case may issue subpoenas upon the request of a party to a contested case upon a showing of general relevance and reasonable scope of the evidence sought. A party entitled to have witnesses on behalf of the party may have subpoenas issued by an attorney of record of the party, subscribed by the signature of the attorney. Witnesses appearing pursuant to subpoena, other than the parties or officers or employees of the agency, shall receive fees and mileage as prescribed by law for witnesses in ORS 44.415 (2).

(2) If any person fails to comply with any subpoena so issued or any party or witness refuses to testify on any matters on which the party or witness may be lawfully interrogated, the judge of the circuit court of any county, on the application of the hearing officer, the agency or the party requesting the issuance of or issuing the subpoena, shall compel obedience by proceedings for contempt as in the case of disobedience of the requirements of a subpoena issued from such court or a refusal to testify therein. [1957 c.717 §8 (2); 1971 c.734 §12; 1979 c.593 §20; 1981 c.174 §4; 1989 c.980 §10a; 1997 c.837 §3; 1999 c.849 §30]

**183.445 Subpoena by agency or attorney of record of party when agency not subject to ORS 183.440.** (1) In any proceeding before an agency not subject to ORS 183.440 in which a party is entitled to have subpoenas issued for the appearance of witnesses on behalf of the party, a subpoena may be issued by an attorney of record of the party, subscribed by the signature of the attorney. A subpoena issued by an attorney of record may be enforced in the same manner as a subpoena issued by the agency.

(2) In any proceeding before an agency not subject to ORS 183.440 in which a party is entitled to have subpoenas issued by the agency to compel the appearance of witnesses on behalf of the party, the agency may issue subpoenas on its own motion. [1981 c.174 §6; 1997 c.837 §4; 1999 c.849 §32]

**183.450 Evidence in contested cases.** In contested cases:

(1) Irrelevant, immaterial or unduly repetitious evidence shall be excluded but erroneous rulings on evidence shall not preclude agency action on the record unless shown to have substantially prejudiced the rights of a party. All other evidence of a type commonly relied upon by reasonably prudent persons in conduct of their serious affairs shall be admissible. Agencies and hearing officers shall

give effect to the rules of privilege recognized by law. Objections to evidentiary offers may be made and shall be noted in the record. Any part of the evidence may be received in written form.

(2) All evidence shall be offered and made a part of the record in the case, and except for matters stipulated to and except as provided in subsection (4) of this section no other factual information or evidence shall be considered in the determination of the case. Documentary evidence may be received in the form of copies or excerpts, or by incorporation by reference. The burden of presenting evidence to support a fact or position in a contested case rests on the proponent of the fact or position.

(3) Every party shall have the right of cross-examination of witnesses who testify and shall have the right to submit rebuttal evidence. Persons appearing in a limited party status shall participate in the manner and to the extent prescribed by rule of the agency.

(4) The hearing officer and agency may take notice of judicially cognizable facts, and may take official notice of general, technical or scientific facts within the specialized knowledge of the hearing officer or agency. Parties shall be notified at any time during the proceeding but in any event prior to the final decision of material officially noticed and they shall be afforded an opportunity to contest the facts so noticed. The hearing officer and agency may utilize the hearing officer's or agency's experience, technical competence and specialized knowledge in the evaluation of the evidence presented.

(5) No sanction shall be imposed or order be issued except upon consideration of the whole record or such portions thereof as may be cited by any party, and as supported by, and in accordance with, reliable, probative and substantial evidence. [1957 c.717 §9; 1971 c.734 §15; 1975 c.759 §12; 1977 c.798 §3; 1979 c.593 §21; 1987 c.833 §1; 1995 c.272 §5; 1997 c.391 §1; 1997 c.801 §76; 1999 c.448 §5; 1999 c.849 §34]

(a) The Attorney General has consented to the representation of the agency by an agency representative in the particular hearing or in the class of hearings that includes the particular hearing; and

(b) The agency, by rule, has authorized an agency representative to appear on its behalf in the particular type of hearing being conducted.

(3) An agency representative acting under the provisions of this section may not give legal advice to an agency, and may not present legal argument in contested case hearings, except to the extent authorized by subsection (4) of this section.

(4) The officer presiding at a contested case hearing in which an agency representative appears under the provisions of this section may allow the agency representative to present evidence, examine and cross-examine witnesses, and make arguments relating to the:

(b) Actions taken by the agency in the past in similar situations;

(c) Literal meaning of the statutes or rules at issue in the contested case;

(d) Admissibility of evidence; and

(e) Proper procedures to be used in the contested case hearing.

(5) Upon judicial review, no limitation imposed under this section on an agency representative is the basis for reversal or remand of agency action unless the limitation resulted in substantial prejudice to a party.

(6) The Attorney General may prepare model rules for agency representatives authorized under this section. [1999 c.448 §3]

**Note:** 183.452 was added to and made a part of 183.413 to 183.470 by legislative action but was not added to any other series. See Preface to Oregon Revised Statutes for further explanation.

ject to the provisions of subsection (2) of this section. (c) Preserves the textual attributes of the document, including the manner in which the document is paginated and any boldfaced, italicized or underlined writing in the document.

(2) The Oregon State Bar may request that an agency provide the Oregon State Bar, or its designee, with electronic copies of final orders issued by the agency in contested cases. (3) Notwithstanding ORS 192.324, an agency may not charge a fee for the first two

### (Judicial Review)

**183.480 Judicial review of agency orders.** (1) Except as provided in ORS 183.417 (3)(b), any person adversely affected or aggrieved by an order or any party to an agency proceeding is entitled to judicial review of a final order, whether such order is affirmative or negative in form. A petition for rehearing or reconsideration need not be filed as a condition of judicial review unless specifically otherwise provided by statute or agency rule.

(2) Judicial review of final orders of agencies shall be solely as provided by ORS 183.482, 183.484, 183.490 and 183.500.

(3) No action or suit shall be maintained as to the validity of any agency order except a final order as provided in this section and ORS 183.482, 183.484, 183.490 and 183.500 or except upon showing that the agency is proceeding without probable cause, or that the party will suffer substantial and irreparable harm if interlocutory relief is not granted.

(4) Judicial review of orders issued pursuant to ORS 813.410 shall be as provided by ORS 813.410. [1957 c.717 §12; 1963 c.449 §1; 1971 c.734 §18; 1975 c.759 §14; 1979 c.593 §23; 1983 c.338 §901; 1985 c.757 §4; 1997 c.837 §5; 2007 c.288 §11]

**183.482 Jurisdiction for review of contested cases; procedure; scope of court authority.** (1) Jurisdiction for judicial review of contested cases is conferred upon the Court of Appeals. Proceedings for review shall be instituted by filing a petition in the Court of Appeals. The petition shall be filed within 60 days only following the date the order upon which the petition is based is served unless otherwise provided by statute. If a petition for rehearing has been filed, then the petition for review shall be filed within 60 days only following the date the order denying the petition for rehearing is served. If the agency does not otherwise act, a petition for rehearing or reconsideration shall be deemed denied the 60th day following the date the petition was filed, and in such cases, petition for judicial review shall be filed within 60 days only following such date. Date of service shall be the date on which the agency delivered or mailed its order in accordance with ORS 183.470.

(2) The petition shall state the nature of the order the petitioner desires reviewed, and shall state whether the petitioner was a party to the administrative proceeding, was denied status as a party or is seeking judicial review as a person adversely affected or aggrieved by the agency order. In the latter

case, the petitioner shall, by supporting affidavit, state the facts showing how the petitioner is adversely affected or aggrieved by the agency order. Before deciding the issues raised by the petition for review, the Court of Appeals shall decide, from facts set forth in the affidavit, whether or not the petitioner is entitled to petition as an adversely affected or an aggrieved person. Copies of the petition shall be served by registered or certified mail upon the agency, and all other parties of record in the agency proceeding.

(3)(a) The filing of the petition shall not stay enforcement of the agency order, but the agency may do so upon a showing of:

(A) Irreparable injury to the petitioner; and

(B) A colorable claim of error in the order.

(b) When a petitioner makes the showing required by paragraph (a) of this subsection, the agency shall grant the stay unless the agency determines that substantial public harm will result if the order is stayed. If the agency denies the stay, the denial shall be in writing and shall specifically state the substantial public harm that would result from the granting of the stay.

(c) When the agency grants a stay, the agency may impose such reasonable conditions as the giving of a bond, irrevocable letter of credit or other undertaking and that the petitioner file all documents necessary to bring the matter to issue before the Court of Appeals within specified reasonable periods of time.

(d) Agency denial of a motion for stay is subject to review by the Court of Appeals under such rules as the court may establish.

(4) Within 30 days after service of the petition, or within such further time as the court may allow, the agency shall transmit to the reviewing court the original or a certified copy of the entire record of the proceeding under review, but, by stipulation of all parties to the review proceeding, the record may be shortened. Any party unreasonably refusing to stipulate to limit the record may be taxed by the court for the additional costs. The court may require or permit subsequent corrections or additions to the record when deemed desirable. Except as specifically provided in this subsection, the cost of the record shall not be taxed to the petitioner or any intervening party. However, the court may tax such costs and the cost of agency transcription of record to a party filing a frivolous petition for review.

(5) If, on review of a contested case, before the date set for hearing, application is made to the court for leave to present addi-

tional evidence, and it is shown to the satisfaction of the court that the additional evidence is material and that there were good and substantial reasons for failure to present it in the proceeding before the agency, the court may order that the additional evidence be taken before the agency upon such conditions as the court deems proper. The agency may modify its findings and order by reason of the additional evidence and shall, within a time to be fixed by the court, file with the reviewing court, to become a part of the record, the additional evidence, together with any modifications or new findings or orders, or its certificate that the agency elects to stand on its original findings and order, as the case may be.

(6) At any time subsequent to the filing of the petition for review and prior to the date set for hearing the agency may withdraw its order for purposes of reconsideration. If an agency withdraws an order for purposes of reconsideration, the agency shall, within such time as the court may allow, affirm, modify or reverse its order. If the petitioner is dissatisfied with the agency action after withdrawal for purposes of reconsideration, the petitioner may refile the petition for review and the review shall proceed upon the revised order. An amended petition for review shall not be required if the agency, on reconsideration, affirms the order or modifies the order with only minor changes. If an agency withdraws an order for purposes of reconsideration and modifies or reverses the order in favor of the petitioner, the court shall allow the petitioner costs, but not attorney fees, to be paid from funds available to the agency.

(7) Review of a contested case shall be confined to the record, and the court shall not substitute its judgment for that of the agency as to any issue of fact or agency discretion. In the case of disputed allegations of irregularities in procedure before the agency not shown in the record which, if proved, would warrant reversal or remand, the Court of Appeals may refer the allegations to a master appointed by the court to take evidence and make findings of fact upon them. The court shall remand the order for further agency action if the court finds that either the fairness of the proceedings or the correctness of the action may have been impaired by a material error in procedure or a failure to follow prescribed procedure, including a failure by the presiding officer to comply with the requirements of ORS 183.417 (8).

(8)(a) The court may affirm, reverse or remand the order. If the court finds that the agency has erroneously interpreted a provision of law and that a correct interpreta-

tion compels a particular action, the court shall:

(A) Set aside or modify the order; or

(B) Remand the case to the agency for further action under a correct interpretation of the provision of law.

(b) The court shall remand the order to the agency if the court finds the agency's exercise of discretion to be:

(A) Outside the range of discretion delegated to the agency by law;

(B) Inconsistent with an agency rule, an officially stated agency position, or a prior agency practice, if the inconsistency is not explained by the agency; or

(C) Otherwise in violation of a constitutional or statutory provision.

(c) The court shall set aside or remand the order if the court finds that the order is not supported by substantial evidence in the record. Substantial evidence exists to support a finding of fact when the record, viewed as a whole, would permit a reasonable person to make that finding. [1975 c.759 §15; 1977 c.798 §4; 1979 c.593 §24; 1985 c.757 §2; 1989 c.453 §1; 1991 c.331 §44; 2007 c.659 §§2,5]

**183.484 Jurisdiction for review of orders other than contested cases; procedure; scope of court authority.** (1) Jurisdiction for judicial review of orders other than contested cases is conferred upon the Circuit Court for Marion County and upon the circuit court for the county in which the petitioner resides or has a principal business office. Proceedings for review under this section shall be instituted by filing a petition in the Circuit Court for Marion County or the circuit court for the county in which the petitioner resides or has a principal business office.

(2) Petitions for review shall be filed within 60 days only following the date the order is served, or if a petition for reconsideration or rehearing has been filed, then within 60 days only following the date the order denying such petition is served. If the agency does not otherwise act, a petition for rehearing or reconsideration shall be deemed denied the 60th day following the date the petition was filed, and in such case petition for judicial review shall be filed within 60 days only following such date. Date of service shall be the date on which the agency delivered or mailed its order in accordance with ORS 183.470.

(3) The petition shall state the nature of the petitioner's interest, the facts showing how the petitioner is adversely affected or aggrieved by the agency order and the

ground or grounds upon which the petitioner contends the order should be reversed or remanded. The review shall proceed and be conducted by the court without a jury.

(4) At any time subsequent to the filing of the petition for review and prior to the date set for hearing, the agency may withdraw its order for purposes of reconsideration. If an agency withdraws an order for purposes of reconsideration, it shall, within such time as the court may allow, affirm, modify or reverse its order. If the petitioner is dissatisfied with the agency action after withdrawal for purposes of reconsideration, the petitioner may refile the petition for review and the review shall proceed upon the revised order. An amended petition for review shall not be required if the agency, on reconsideration, affirms the order or modifies the order with only minor changes. If an agency withdraws an order for purposes of reconsideration and modifies or reverses the order in favor of the petitioner, the court shall allow the petitioner costs, but not attorney fees, to be paid from funds available to the agency.

(5)(a) The court may affirm, reverse or remand the order. If the court finds that the agency has erroneously interpreted a provision of law and that a correct interpretation compels a particular action, it shall:

(A) Set aside or modify the order; or

(B) Remand the case to the agency for further action under a correct interpretation of the provision of law.

(b) The court shall remand the order to the agency if it finds the agency's exercise of discretion to be:

(A) Outside the range of discretion delegated to the agency by law;

(B) Inconsistent with an agency rule, an officially stated agency position, or a prior agency practice, if the inconsistency is not explained by the agency; or

(C) Otherwise in violation of a constitutional or statutory provision.

(c) The court shall set aside or remand the order if it finds that the order is not supported by substantial evidence in the record. Substantial evidence exists to support a finding of fact when the record, viewed as a whole, would permit a reasonable person to make that finding.

(6) In the case of reversal the court shall make special findings of fact based upon the evidence in the record and conclusions of law indicating clearly all aspects in which the agency's order is erroneous. [1975 c.759 §16; 1979 c.284 §121; 1979 c.593 §25a; 1985 c.757 §3; 1999 c.113 §1]

**183.485 Decision of court on review of contested case.** (1) The court having jurisdiction for judicial review of contested cases shall direct its decision, including its judgment, to the agency issuing the order being reviewed and may direct that its judgment be delivered to the circuit court for any county designated by the prevailing party for entry in the circuit court's register.

(2) Upon receipt of the court's decision, including the judgment, the clerk of the circuit court shall enter a judgment in the register of the court pursuant to the direction of the court to which the appeal is made. [1973 c.612 §7; 1981 c.178 §11; 1985 c.540 §39; 2003 c.576 §193]

**183.486 Form and scope of decision of reviewing court.** (1) The reviewing court's decision under ORS 183.482 or 183.484 may be mandatory, prohibitory, or declaratory in form, and it shall provide whatever relief is appropriate irrespective of the original form of the petition. The court may:

(a) Order agency action required by law, order agency exercise of discretion when required by law, set aside agency action, remand the case for further agency proceedings or decide the rights, privileges, obligations, requirements or procedures at issue between the parties; and

(b) Order such ancillary relief as the court finds necessary to redress the effects of official action wrongfully taken or withheld.

(2) If the court sets aside agency action or remands the case to the agency for further proceedings, it may make such interlocutory order as the court finds necessary to preserve the interests of any party and the public pending further proceedings or agency action.

(3) Unless the court finds a ground for setting aside, modifying, remanding, or ordering agency action or ancillary relief under a specified provision of this section, it shall affirm the agency action. [1979 c.593 §27]

**183.490 Agency may be compelled to act.** The court may, upon petition as described in ORS 183.484, compel an agency to act where it has unlawfully refused to act or make a decision or unreasonably delayed taking action or making a decision. [1957 c.717 §13; 1979 c.593 §28]

**183.495** [1975 c.759 §16a; repealed by 1985 c.757 §7]

**183.497 Awarding costs and attorney fees when finding for petitioner.** (1) In a judicial proceeding designated under subsection (2) of this section the court:

(a) May, in its discretion, allow a petitioner reasonable attorney fees and costs if the court finds in favor of the petitioner.

(b) Shall allow a petitioner reasonable attorney fees and costs if the court finds in favor of the petitioner and determines that the state agency acted without a reasonable basis in fact or in law; but the court may withhold all or part of the attorney fees from any allowance to a petitioner if the court finds that the state agency has proved that its action was substantially justified or that special circumstances exist that make the allowance of all or part of the attorney fees unjust.

(2) The provisions of subsection (1) of this section apply to an administrative or judicial proceeding brought by a petitioner against a state agency, as defined in ORS 291.002, for:

(a) Judicial review of a final order as provided in ORS 183.480 to 183.484;

(b) Judicial review of a declaratory ruling provided in ORS 183.410; or

(c) A judicial determination of the validity of a rule as provided in ORS 183.400.

(3) Amounts allowed under this section for reasonable attorney fees and costs shall be paid from funds available to the state agency whose final order, declaratory ruling or rule was reviewed by the court. [1981 c.871 §1; 1985 c.757 §5]

**Note:** 183.497 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 183 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

### (Appeals From Circuit Courts)

**183.500 Appeals.** Any party to the proceedings before the circuit court may appeal from the judgment of that court to the Court of Appeals. Such appeal shall be taken in the manner provided by law for appeals from the circuit court in suits in equity. [1957 c.717 §14; 1969 c.198 §76; 2003 c.576 §394]

### (Alternative Dispute Resolution)

**183.502 Authority of agencies to use alternative means of dispute resolution; model rules; amendment of agreements and forms; agency alternative dispute resolution programs.** (1) Unless otherwise prohibited by law, agencies may use alternative means of dispute resolution in rulemaking proceedings, contested case proceedings, judicial proceedings in which the agency is a party, and any other decision-making process in which conflicts may arise. The alternative means of dispute resolution may be arbitration, mediation or any other collaborative problem-solving process designed to encourage parties to work together to develop mutually agreeable solutions to disputes. Use of alternative means of dispute resolution by an agency does not affect the

application of ORS 192.311 to 192.478 to the agency, or the application of ORS 192.610 to 192.705 to the agency.

(2) An agency that elects to utilize alternative means of dispute resolution shall inform and may consult with the Mark O. Hatfield School of Government, the Department of Justice and the Oregon Department of Administrative Services in developing a policy or program for implementation of alternative means of dispute resolution.

(3) The Attorney General, in consultation with the Mark O. Hatfield School of Government and the Oregon Department of Administrative Services, may develop for agencies model rules for the implementation of alternative means of dispute resolution. An agency may adopt all or part of the model rules by reference without complying with the rulemaking procedures of ORS 183.325 to 183.410. Notice of the adoption of all or part of the model rules must be filed by the agency with the Secretary of State in the manner provided by ORS 183.355 for the filing of rules.

(4) When an agency reviews the standard agreements, forms for contracts and forms for applying for grants or other assistance used by the agency, the agency shall determine whether the agreements and forms should be amended to authorize and encourage the use of alternative means of dispute resolution in disputes that arise under the agreement, contract or application.

(5) The Department of Justice, the Mark O. Hatfield School of Government, the Oregon Department of Administrative Services and the Governor shall collaborate to increase the use of alternative dispute resolution to resolve disputes involving the State of Oregon by:

(a) Assisting agencies to develop a policy for alternative means of dispute resolution;

(b) Assisting agencies to develop or expand flexible and diverse agency programs that provide alternative means of dispute resolution; and

(c) Providing assistance in the efficient and effective selection of mediators or facilitators.

(2) “Rule” has the meaning given that term in ORS 183.310.

(3) “State agency” means an agency as defined in ORS 183.310. [Formerly 171.705; 2009 c.81 §1]

**Note:** 183.710 to 183.730 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 183 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**183.715 Submission of adopted rule to Legislative Counsel required.** If a state agency adopts, amends or repeals a rule, the Secretary of State shall electronically submit a copy of the adopted, amended or repealed rule to the Legislative Counsel within 10 days after the agency files the rule in the office of the Secretary of State as provided in ORS 183.355. The electronic transmission of an amended rule that is submitted to the Legislative Counsel must show all changes to the rule by striking through material to be deleted and underlining all new material,

or by any other method that clearly shows all new and deleted material. [Formerly 171.707; 1991 c.94 §1; 1999 c.167 §1; 2005 c.18 §2; 2017 c.518 §7]

**Note:** See note under 183.710.

**183.720 Procedure for review of agency rule; reports on rules claimed to be duplicative or conflicting.** (1) The Legislative Counsel may review, or shall review at the direction of the Legislative Counsel Committee, a proposed rule or an adopted rule of a state agency.

(2) The Legislative Counsel may review an adopted rule of a state agency upon the written request of any person affected by the rule. The Legislative Counsel shall review a proposed or adopted rule of a state agency upon the written request of any member of the Legislative Assembly. The written request for review must identify the specific objection or problem with the rule.

(3) When reviewing a rule of a state agency pursuant to subsection (1) or (2) of this section, the Legislative Counsel shall:

(a) Determine whether the rule appears to be within the intent and scope of the enabling legislation purporting to authorize its adoption; and

(b) Determine whether the rule raises any constitutional issue other than described in paragraph (a) of this subsection, and if so, the nature of the issue.

(4) In making a determination under subsection (3)(a) of this section, the Legislative Counsel shall, wherever possible, follow generally accepted principles of statutory construction.

(5) The Legislative Counsel shall prepare written findings on a rule reviewed, setting forth the determinations made under subsection (3) of this section.

(6) When a review of a rule is made by the Legislative Counsel, the Legislative Counsel shall send a copy of the determinations made under subsection (3) of this section to the appropriate interim committee or, if the review was requested by a member of the Legislative Assembly or by a person affected by the rule, to the person requesting the review. If the Legislative Counsel determines that a rule is not within the intent and scope of the enabling legislation purporting to authorize the state agency's adoption of the rule, or that the rule raises a constitutional issue, the Legislative Counsel shall also send a copy of the determination to the agency. The Legislative Counsel may request that the state agency respond in writing to the determinations or appear at the meeting of the interim committee at which the committee will consider the determinations. The interim committee may direct the Legislative Counsel to send a copy of the

determinations to the presiding officer of a house of the Legislative Assembly, who may refer the determinations to any legislative committee concerned.

(7)(a) A member of the Legislative Assembly may request that Legislative Counsel prepare a report on a rule adopted by a state agency that the member asserts is duplicative of or conflicts with another rule. A person affected by a rule adopted by a state agency may request that Legislative Counsel prepare a report on the rule if the person asserts that the rule is duplicative of or conflicts with another rule. A request for a report must be in writing and contain copies of the two rules that are claimed to be duplicative or conflicting. The second rule may be either a rule adopted by a state agency or a rule or regulation adopted by a federal agency.

(b)(A) Upon receipt of a written request by a member of the Legislative Assembly, the Legislative Counsel shall prepare a report to the interim committee that contains:

(i) A copy of the request, including copies of the two rules that the member asserts are conflicting or duplicative; and

(ii) Legislative Counsel's analysis of the requirements of the two rules.

(B) Upon receipt of a written request by a person affected by a rule adopted by a state agency, the Legislative Counsel may prepare a written report to the person and each state agency concerned that contains the Legislative Counsel's analysis of the requirements of the two rules.

(8) Upon receipt of a report under subsection (7)(b)(A) of this section, the interim committee may issue a determination that a rule is duplicative of or conflicts with the other cited rule.

(9) When a report on a rule is made by the Legislative Counsel under subsection (7)(b)(A) of this section, the Legislative Counsel shall send a copy of the report and any determinations made under subsection (8) of this section to each state agency concerned. The interim committee may direct the Legislative Counsel to send a copy of the determinations to the presiding officer of a house of the Legislative Assembly, who may refer the determinations to any legislative committee concerned. [Formerly 171.709; 1993 c.729 §7; 1997 c.602 §4; 2001 c.156 §1; 2009 c.81 §4]

**Note:** See note under 183.710.

**183.722 Required agency response to Legislative Counsel determination; consideration of determination by interim committee.** (1)(a) If the Legislative Counsel determines under ORS 183.720 (3) that a proposed or adopted rule is not within the intent and scope of the enabling legislation

purporting to authorize the rule's adoption, or that the rule is not constitutional, and the Legislative Counsel has provided a copy of that determination to the state agency pursuant to 183.720 (6), the agency shall either make a written response to the determination or appear at the meeting of the interim committee at which the committee will consider the determinations. The response of the state agency shall indicate if the agency intends to repeal, amend or take other action with respect to the rule.

(b) The interim committee shall consider the Legislative Counsel determination described in paragraph (a) of this subsection and any state agency response to the determination. If the interim committee adopts the Legislative Counsel determination, the Legislative Counsel shall post the determination on the Legislative Counsel website. Adopted determinations that are posted on the website shall be organized by OAR number and shall remain on the website until the earlier of the date that:

(A) The rule is modified and the Legislative Counsel determines that the modified rule is within the intent and scope of the enabling legislation;

(B) A court makes a final determination that the rule is within the intent and scope of the enabling legislation and is otherwise constitutional, all appeals of the court's determination are exhausted and the state agency notifies the Legislative Counsel of the determination; or

(C) The Legislative Assembly modifies the enabling legislation so as to bring the rule within the intent and scope of the enabling legislation, any other constitutional defect in the rule is cured and the state agency notifies the Legislative Counsel of the modification or cure.

(2) If the Legislative Counsel determines under ORS 183.720 (3) that a proposed or adopted rule is not within the intent and scope of the enabling legislation purporting to authorize the rule's adoption, or that the rule is not constitutional, and the interim committee is not satisfied with the response to those issues made by the state agency, the committee may request that one or more representatives of the agency appear at a subsequent meeting of the committee along with a representative of the Oregon Department of Administrative Services for the purpose of further explaining the position of the agency.

(3) If a state agency is requested under subsection (2) of this section to appear at a subsequent meeting of the interim committee along with a representative of the Oregon Department of Administrative Services, the agency shall promptly notify the department

of the request. The notification to the department must be in writing, and must include a copy of the determinations made by the Legislative Counsel and a copy of any written response made by the state agency to the determinations. [1997 c.602 §7; 1999 c.31 §2; 2009 c.81 §5]

**Note:** See note under 183.710.

**183.724 Designation of interim committees for purposes of considering rule reports.** (1) As soon as is practicable after the end of each odd-numbered year regular legislative session, the Legislative Counsel shall develop a list of state agencies with areas of responsibility that are primarily within the subject-matter jurisdiction of interim committees of the Legislative Assembly. The Legislative Counsel shall assign all state agencies to at least one interim committee. The Legislative Counsel may modify the list to reflect changes in interim committees. The Legislative Counsel shall distribute the list to all state agencies whenever the list is developed or modified.

(2) If an interim committee of one house of the Legislative Assembly has overlapping subject-matter jurisdiction with an interim committee of the other house, the Legislative Counsel may assign a state agency to either committee or to both committees. The Legislative Counsel shall strive to assign state agencies so as to ensure that the rule review workload is approximately equally distributed between the interim committees of both houses of the Legislative Assembly.

(3) The consideration of the written findings prepared by the Legislative Counsel on a rule by any one interim committee of either house of the Legislative Assembly satisfies the requirements of ORS 183.710 to 183.730. [2009 c.81 §3; 2011 c.545 §13]

**Note:** See note under 183.710.

**183.725** [Formerly 171.713; 1993 c.729 §8; 1997 c.602 §5; 1999 c.31 §1; 2009 c.81 §6; repealed by 2017 c.518 §9]

The request must specify the disclosure or exemption that is of concern.

(3) The committee shall include in the plan or schedule for review established under ORS 192.511 an adopted rule of a state

**MISCELLANEOUS MATTERS**

---

**PUBLIC RECORDS POLICY**

**192.001 Policy concerning public records.** (1) The Legislative Assembly finds that:

(a) The records of the state and its political subdivisions are so interrelated and interdependent that the decision as to what records are retained or destroyed is a matter of statewide public policy.

(b) The interest and concern of citizens in public records recognizes no jurisdictional boundaries and extends to such records wherever they may be found in Oregon.

(c) As local programs become increasingly intergovernmental, the state and its political subdivisions have a responsibility to ensure orderly retention and destruction of all public records, whether current or non-current, and to ensure the preservation of public records of value for legal, administrative, fiscal, tribal cultural, historical or research purposes.

(2) The purpose of ORS 192.005 to 192.170 and 357.805 to 357.895 is to provide direction for the retention or destruction of public records in Oregon in order to ensure the retention of records essential to meet the needs of the Legislative Assembly, the state, its political subdivisions and its citizens, insofar as the records affect the administration of government, legal rights and responsibilities, and the accumulation of information of value for research purposes of all kinds, and in order to ensure the prompt destruction of records without continuing value. All records not included in types described in this subsection shall be destroyed in accordance with rules adopted by the Secretary of State. [Amended by 1961 c.160 §12; 1971 c.508 §2; 1991 c.671 §7; 2023 c.35 §6]

(1) “Report” means informational matter that is published as an individual document at state expense or as required by law. “Report” does not include documents prepared strictly for agency administrative or operational purposes.

(2) “State agency” has the meaning given that term in ORS 192.311. [1991 c.842 §1; 2001 c.153 §1]

**Note:** 192.230 to 192.250 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 192 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**192.235 Policy for ORS 192.230 to 192.250.** (1) The Legislative Assembly finds that:

(a) Many state agency reports are published for reasons that are historical and no longer based on the public's need to be informed.

(b) The format of many state agency reports is not economical or well suited to providing needed information in easily understandable form.

(c) State agency reports containing information that is useful but not to the general public should be placed on a self-supporting schedule.

(2) It is the policy of the Legislative Assembly to encourage state agencies to inform the public, the Legislative Assembly and the Governor of matters of public interest and concern. It is further the policy of this state to guarantee to its citizens the right to know about the activities of their government, to benefit from the information developed by state agencies at public expense and to enjoy equal access to the information services of state agencies. It is further state policy to encourage agencies to consider whether needed information is most effectively and economically presented by means of printed reports. [1991 c.842 §2]

**Note:** See note under 192.230.

**192.240 Duties of state agency issuing report.** To comply with the state policy relating to reports outlined in ORS 192.235, a state agency shall do the following:

(3) Insure that public documents are furnished to the State Librarian, as required in ORS 357.090. [1991 c.842 §3; 1995 c.69 §10; 2003 c.794 §212]

If

a statute or rule requires a state agency to issue a printed report, that requirement is satisfied if the state agency makes the report available on the Internet. A state agency may issue printed copies of a report upon request.

(2) The Oregon Department of Administrative Services shall adopt rules in accordance with subsection (1) of this section requiring each state agency to make available on the Internet any report that the state agency is required by law to publish.

(3) This section may not be construed to require the disclosure of a public record that is exempt from disclosure under ORS 192.311 to 192.478 or other law. [2001 c.153 §3]

**Note:** See note under 192.230.

**192.245 Form of report to legislature.**

(1) Whenever a law of this state requires a written report be submitted to the Legislative Assembly, the requirement shall be met by distribution of an executive summary of no more than two pages sent to every member of the Legislative Assembly by electronic mail and one copy of the report to the Legislative Administrator. This requirement does not preclude providing a copy of any report to a specific legislative committee if required by law. The requirements of this subsection are not met if the executive summary is distributed to members of the Legislative Assembly in paper format.

(2) The executive summary described in subsection (1) of this section shall include an explanation of how a member of the Legislative Assembly may obtain a copy of the report. If the report is also available on the Internet, the executive summary shall include the online location of the report.

(3) Notwithstanding subsection (1) of this section, if a member of the Legislative Assembly requests a paper copy of a report or executive summary, the agency or other entity responsible for submitting the report or executive summary to the Legislative Assembly shall supply a paper copy of the report or executive summary to the member. copy of a public record that the person knows relates to the proceeding or notice, the person must submit the request in writing to the custodian and, at the same time, to the attorney for the public body.

(b) For purposes of this subsection:

(A) The attorney for a state agency is the Attorney General in Salem.

(B) "Person" includes a representative or agent of the person. [Formerly 192.420]

**192.318 Functions of custodian of public records; rules.** (1) The custodian of any public records, including public records maintained in machine readable or electronic form, unless otherwise expressly provided by statute, shall furnish proper and reasonable opportunities for inspection and examination of the records in the office of the custodian and reasonable facilities for making memoranda or abstracts therefrom, during the usual business hours, to all persons having occasion to make examination of them. If the public record is maintained in machine readable or electronic form, the custodian shall furnish proper and reasonable opportunity to assure access.

(2) The custodian of the records may adopt reasonable rules necessary for the protection of the records and to prevent interference with the regular discharge of duties of the custodian. [Formerly 192.430]

**192.324 Copies or inspection of public records; public body response; fees; procedure for records requests.** (1) A public body that is the custodian of any public record that a person has a right to inspect shall give the person, upon receipt of a written request:

(a) A copy of the public record if the public record is of a nature permitting copying; or

(b) A reasonable opportunity to inspect or copy the public record.

(2) If an individual who is identified in a public body's procedure described in subsection (7)(a) of this section receives a written request to inspect or receive a copy of a public record, the public body shall within five business days after receiving the request acknowledge receipt of the request or complete the public body's response to the request. An acknowledgment under this subsection must:

(a) Confirm that the public body is the custodian of the requested record;

(b) Inform the requester that the public body is not the custodian of the requested record; or

(c) Notify the requester that the public body is uncertain whether the public body is the custodian of the requested record.

(3) If the public record is maintained in a machine readable or electronic form, the public body shall provide a copy of the public record in the form requested, if available. If the public record is not available in the form requested, the public body shall make the public record available in the form in which the public body maintains the public record.

(4)(a) The public body may establish fees reasonably calculated to reimburse the public body for the public body's actual cost of making public records available, including costs for summarizing, compiling or tailoring the public records, either in organization or media, to meet the request.

(b) The public body may include in a fee established under paragraph (a) of this subsection the cost of time spent by an attorney for the public body in reviewing the public records, redacting material from the public records or segregating the public records into exempt and nonexempt records. The public body may not include in a fee established under paragraph (a) of this subsection the cost of time spent by an attorney for the public body in determining the application of the provisions of ORS 192.311 to 192.478.

(c) The public body may not establish a fee greater than \$25 under this section unless the public body first provides the requester with a written notification of the estimated amount of the fee and the requester confirms that the requester wants the public body to proceed with making the public record available.

(d) Notwithstanding paragraphs (a) to (c) of this subsection, when the public records are those filed with the Secretary of State under ORS chapter 79 or ORS 80.100 to 80.130, the fees for furnishing copies, summaries or compilations of the public records are the fees established by the Secretary of State by rule under ORS chapter 79 or ORS 80.100 to 80.130.

(5) The custodian of a public record may furnish copies without charge or at a substantially reduced fee if the custodian determines that the waiver or reduction of fees is in the public interest because making the record available primarily benefits the general public.

(6) A requester who believes that there has been an unreasonable denial of a fee waiver or fee reduction may petition the Attorney General or the district attorney in the same manner as a requester who petitions when inspection of a public record is denied under ORS 192.311 to 192.478. The Attorney General, the district attorney and the court have the same authority in instances when a fee waiver or reduction is denied as when inspection of a public record is denied.

(7) A public body shall make available to the public a written procedure for making public records requests that includes:

(a) The name of one or more individuals within the public body to whom public records requests may be sent, with addresses; and

(b) The amounts of and the manner of calculating fees that the public body charges for responding to requests for public records.

(8) This section does not apply to signatures of individuals submitted under ORS chapter 247 for purposes of registering to vote as provided in ORS 247.973. [Formerly 192.440]

**192.329 Public body's response to public records request.** (1) A public body shall complete its response to a written public records request that is received by an individual identified in the public body's procedure described in ORS 192.324 as soon as practicable and without unreasonable delay.

(2) A public body's response to a public records request is complete when the public body:

(a) Provides access to or copies of all requested records within the possession or custody of the public body that the public body does not assert are exempt from public disclosure, or explains where the records are already publicly available;

(b) Asserts any exemptions from disclosure that the public body believes apply to any requested records and, if the public body cites ORS 192.355 (8) or (9), identifies the state or federal law that the public body relied on in asserting the exemptions;

(c) Complies with ORS 192.338;

(d) To the extent that the public body is not the custodian of records that have been requested, provides a written statement to that effect;

(e) To the extent that state or federal law prohibits the public body from acknowledging whether any requested record exists or that acknowledging whether a requested record exists would result in the loss of federal benefits or imposition of another sanction, provides a written statement to that effect, citing the state or federal law that the public body relies on, unless the written statement itself would violate state or federal law; and

(f) If the public body asserts that one or more requested records are exempt from public disclosure, includes a statement that the requester may seek review of the public body's determination pursuant to ORS 192.401, 192.411, 192.415, 192.418, 192.422, 192.427 and 192.431.

(3)(a) If a public body has informed a requester of a fee permitted under ORS 192.324

(4), the obligation of the public body to complete its response to the request is suspended until the requester has paid the fee, the fee has been waived by the public body pursuant to ORS 192.324 (5) or the fee otherwise has been ordered waived.

(b) If the requester fails to pay the fee within 60 days of the date on which the public body informed the requester of the fee, or fails to pay the fee within 60 days of the date on which the public body informed the requester of the denial of the fee waiver, the public body shall close the request.

(4)(a) A public body may request additional information or clarification from a requester of public records for the purpose of expediting the public body's response to the request. If the public body has requested additional information or clarification in good faith, the public body's obligation to further complete its response to the request is suspended until the requester provides the requested information or clarification or affirmatively declines to provide that information or clarification.

(b) If the requester fails to respond within 60 days to a good faith request from the public body for information or clarification, the public body shall close the request.

(5) As soon as reasonably possible but not later than 10 business days after the date by which a public body is required to acknowledge receipt of the request under ORS 192.324, a public body shall:

(a) Complete its response to the public records request; or

(b) Provide a written statement that the public body is still processing the request and a reasonable estimated date by which the public body expects to complete its response based on the information currently available.

(6) The time periods established by ORS 192.324 and subsection (5) of this section do not apply to a public body if compliance would be impracticable because:

(a) The staff or volunteers necessary to complete a response to the public records request are unavailable;

(b) Compliance would demonstrably impede the public body's ability to perform other necessary services; or

(c) Of the volume of public records requests being simultaneously processed by the public body.

(7) For purposes of this section, staff members or volunteers who are on leave or are not scheduled to work are considered to be unavailable.

(8) A public body that cannot comply with the time periods established by ORS

192.324 and subsection (5) of this section for a reason listed in subsection (6) of this section shall, as soon as practicable and without unreasonable delay, acknowledge a public records request and complete the response to the request. [2017 c.456 §4]

**192.335 Immunity from liability for disclosure of public record; effect of disclosure on privilege.** (1) A public body that, acting in good faith, discloses a public record in response to a request for public records is not liable for any loss or damages based on the disclosure unless the disclosure is affirmatively prohibited by state or federal law or by a court order applicable to the public body. Nothing in this subsection shall be interpreted to create liability on the part of a public body, or create a cause of action against a public body, based on the disclosure of a public record.

(2) A public body that discloses any information or record in response to a written request for public records under ORS 192.311 to 192.478 that is privileged under ORS 40.225 to 40.295 does not waive its right to assert the applicable privilege to prevent the introduction of the information or record as evidence pursuant to ORS 40.225 to 40.295. [2017 c.456 §8]

**Note:** See note under 192.329.

**192.338 Exempt and nonexempt public record to be separated.** If any public record contains material which is not exempt under ORS 192.345 and 192.355, as well as material which is exempt from disclosure, the public body shall separate the exempt and nonexempt material and make the nonexempt material available for examination. [Formerly 192.505]

**Note:** 192.338, 192.345 and 192.355 were made a part of 192.311 to 192.478 by legislative action but were not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

The catalog must be as comprehensive as reasonably possible and must be freely available to the public in an electronic format that facilitates sorting and searching of the catalog.

(2) The catalog required by subsection (1) of this section must include the following information for each exemption:

(a) A citation to the Oregon statute or statutes creating the exemption from the disclosure requirements of ORS 192.311 to 192.478;

(b) The relevant text of each statute creating the exemption;

(c) If the exemption has been construed by a decision of the Oregon Supreme Court or Court of Appeals, a citation to that decision;

(d) To the extent that the exemption is specific to a particular public body or particular types of public bodies, a description of the public body or bodies to which the exemption relates; and

(e) Additional information as the Attorney General deems appropriate.

(3) To help ensure that the catalog required by subsection (1) of this section is as comprehensive as possible:

(a) The Legislative Counsel shall provide the Attorney General with an electronic copy of any Act passed by the Legislative Assembly that, in the judgment of the Legislative Counsel, creates an exemption from the disclosure requirements of ORS 192.311 to 192.478; and

(b) When a district attorney issues an order pursuant to ORS 192.415, the district attorney shall send the Attorney General an electronic copy of that order.

(4) The purpose of the catalog required by subsection (1) of this section is to assist public officials and members of the public in ascertaining what information is exempt from the public disclosure requirements of ORS 192.311 to 192.478. The catalog is not intended to provide legal advice to public bodies or to members of the public.

(5) A public body may assert that an Oregon statute exempts a public record in the custody of the public body from disclosure even if that statute is not listed in the catalog or the catalog does not include that public body in the catalog's description of the public bodies to which that exemption applies. [2017 c.456 §7]

**Note:** See note under 192.329.

**192.345 Public records conditionally exempt from disclosure.** The following public records are exempt from disclosure under ORS 192.311 to 192.478 unless the public interest requires disclosure in the particular instance:

(1) Records of a public body pertaining to litigation to which the public body is a party if the complaint has been filed, or if the complaint has not been filed, if the public body shows that such litigation is reasonably likely to occur. This exemption does not apply to litigation which has been concluded,

and nothing in this subsection shall limit any right or opportunity granted by discovery or deposition statutes to a party to litigation or potential litigation.

(2) Trade secrets. "Trade secrets," as used in this section, may include, but are not limited to, any formula, plan, pattern, process, tool, mechanism, compound, procedure, production data, or compilation of information which is not patented, which is known only to certain individuals within an organization and which is used in a business it conducts, having actual or potential commercial value, and which gives its user an opportunity to obtain a business advantage over competitors who do not know or use it.

(3) Investigatory information compiled for criminal law purposes. The record of an arrest or the report of a crime shall be disclosed unless and only for so long as there is a clear need to delay disclosure in the course of a specific investigation, including the need to protect the complaining party or the victim. Nothing in this subsection shall limit any right constitutionally guaranteed, or granted by statute, to disclosure or discovery in criminal cases. For purposes of this subsection, the record of an arrest or the report of a crime includes, but is not limited to:

(5) Information consisting of production records, sale or purchase records or catch records, or similar business records of a private concern or enterprise, required by law to be submitted to or inspected by a governmental body to allow it to determine fees or assessments payable or to establish production quotas, and the amounts of such fees or assessments payable or paid, to the extent that such information is in a form that would permit identification of the individual concern or enterprise. This exemption does not include records submitted by long term care facilities as defined in ORS 442.015 to the state for purposes of reimbursement of expenses or determining fees for patient care. Nothing in this subsection shall limit the use that can be made of such information for regulatory purposes or its admissibility in any enforcement proceeding.

**192.407 When petition for review of public records request allowed; order granting petition; penalty.** (1) A person who has submitted a written public records request in compliance with a public body's policy may seek review of the following, in the same manner as a person petitions when inspection of a public record is denied under ORS 192.311 to 192.478:

(a) The failure of a public body to provide the response required by ORS 192.329 within the prescribed period. A failure of the public body to timely respond shall be treated as a denial of the request unless the public body demonstrates that compliance was not required under ORS 192.329.

(b) An estimate of time provided by a public body pursuant to ORS 192.329, if the person believes that the estimated time frame for the response is unreasonably long and will result in undue delay of disclosure.

(c) Any other instance in which the person believes that the public body has failed to comply with ORS 192.329.

(2) Except as provided in subsection (3) of this section, the Attorney General, the district attorney and the court have the same authority with respect to petitions under this section as when inspection of a public record is denied.

(3) If the Attorney General, the district attorney or a court grants a petition filed under this section, the order granting the petition:

(a) May require disclosure of nonexempt material responsive to the request within seven days, or within any other period that the Attorney General, district attorney or court concludes is appropriate to comply with ORS 192.329;

(b) May require the public body to pay a penalty of \$200 to the requester if the Attorney General, district attorney or court determines that the public body responded to the request with undue delay or failed to respond to the request; and

(c) May order a fee waiver or a fee reduction if a public body has responded to the request with undue delay or has failed to respond to the request in the time and manner prescribed in ORS 192.329. Nothing in this subsection prohibits a reviewing body from finding an unreasonable denial of a fee waiver or a fee reduction on other grounds.

(4) Nothing in this section limits the authority of a court to act under ORS 192.431. [2017 c.456 §5; 2019 c.205 §1]

Except as provided in ORS 192.401 (2), the Attorney General shall issue an order denying or granting the petition, or denying it in part and granting it in part, within seven days from the day the Attorney General receives the petition.

(2) If the Attorney General grants the petition and orders the state agency to disclose the public record, or if the Attorney General grants the petition in part and orders the state agency to disclose a portion of the public record, the state agency shall comply with the order in full within seven days after issuance of the order, unless within the seven-day period it issues a notice of its intention to institute proceedings for injunctive or declaratory relief in the Circuit Court for Marion County or, as provided in ORS 192.401 (3), in the circuit court of the county where the public record is held. Copies of the notice shall be sent to the Attorney General and by certified mail to the petitioner at the address shown on the petition. The state agency shall institute the proceedings within seven days after it issues its notice of intention to do so. If the Attorney General denies the petition in whole or in part, or if the state agency continues to withhold the public record or a part of it notwithstanding an order to disclose by the Attorney General, the person seeking disclosure may institute such proceedings.

(3) The Attorney General shall serve as counsel for the state agency in a suit filed under subsection (2) of this section if the suit

arises out of a determination by the Attorney General that the public record should not be disclosed, or that a part of the public record should not be disclosed if the state agency has fully complied with the order of the Attorney General requiring disclosure of another part or parts of the public record, and in no other case. In any case in which the Attorney General is prohibited from serving as counsel for the state agency, the agency may retain special counsel. [Formerly subsections (1) to (3) of 192.450]

(b) Any suit filed must be filed in the circuit court for the county described in paragraph (a) of this subsection; and

(c) The district attorney may not serve as counsel for the public body, in the cases permitted under ORS 192.411 (3), unless the district attorney ordinarily serves as counsel for the public body.

(2) Disclosure of a record to the district attorney in compliance with subsection (1) of this section does not waive any privilege or claim of privilege regarding the record or its contents.

(3) Disclosure of a record or part of a record as ordered by the district attorney is a compelled disclosure for purposes of ORS 40.285. [Formerly 192.460]

**192.418 Effect of failure of Attorney General, district attorney or elected official to take timely action on inspection petition.** (1) The failure of the Attorney General or district attorney to issue an order under ORS 192.401, 192.411 or 192.415 denying, granting, or denying in part and granting in part a petition to require disclosure within seven days from the day of receipt of the petition shall be treated as an order denying the petition for the purpose of determining whether a person may institute proceedings for injunctive or declaratory relief under ORS 192.401, 192.411 or 192.415.

(2) The failure of an elected official to deny, grant, or deny in part and grant in part a request to inspect or receive a copy of a public record within seven days from the day of receipt of the request shall be treated as

(15) “Health care provider” has the meaning given that term in ORS 192.556.

(16) “Identifiable” means capable of being linked to the individual or a blood relative

of the individual from whom the DNA sample or genetic information was obtained.

(18) “Identifier” means data elements that directly link a DNA sample or genetic information to the individual or a blood relative of the individual from whom the sample or information was obtained. Identifiers include, but are not limited to, names, telephone numbers, electronic mail addresses, Social Security numbers, driver license numbers and fingerprints.

(23) “Retain a DNA sample” means the act of storing the DNA sample.

(24) “Retain genetic information” means making a record of the genetic information.

(25) “Unidentified” means deidentified or not identifiable. [Formerly 659.700; 2003 c.333 §1; 2005 c.678 §1; 2007 c.800 §6]

**Note:** 192.531 to 192.549 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 192 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

### **192.533 Legislative findings; purposes.**

(1) The Legislative Assembly finds that:

(a) The DNA molecule contains information about the probable medical future of an individual and the individual’s blood relatives. This information is written in a code that is rapidly being broken.

(b) Genetic information is uniquely private and personal information that generally should not be collected, retained or disclosed without the individual’s authorization.

(c) The improper collection, retention or disclosure of genetic information can lead to significant harm to an individual and the individual’s blood relatives, including stigmatization and discrimination in areas such as employment, education, health care and insurance.

(d) An analysis of an individual’s DNA provides information not only about the individual, but also about blood relatives of the individual, with the potential for impacting family privacy, including reproductive decisions.

(e) Current legal protections for medical information, tissue samples and DNA samples are inadequate to protect genetic privacy.

(f) Laws for the collection, storage and use of identifiable DNA samples and private genetic information obtained from those samples are needed both to protect individual and family privacy and to permit and encourage legitimate scientific and medical research.

(2) The purposes of the genetic privacy statutes are as follows:

(a) To define the rights of individuals whose genetic information is collected, retained or disclosed and the rights of the individuals’ blood relatives.

(b) To define the circumstances under which an individual may be subjected to genetic testing.

(c) To define the circumstances under which an individual’s genetic information may be collected, retained or disclosed.

(d) To protect against discrimination by an insurer or employer based upon an individual’s genetic characteristics.

(e) To define the circumstances under which a DNA sample or genetic information may be used for research. [Formerly 659.705; 2003 c.333 §2]

**Note:** See note under 192.531.

**192.535 Informed consent for obtaining genetic information.** (1) A person may not obtain genetic information from an individual, or from an individual’s DNA sample, without first obtaining informed consent of the individual or the individual’s representative, except:

(a) As authorized by ORS 181A.155 or comparable provisions of federal criminal law relating to the identification of persons, or for the purpose of establishing the identity of a person in the course of an investigation conducted by a law enforcement agency, a district attorney, a medical examiner or the Criminal Justice Division of the Department of Justice;

(b) For anonymous research or coded research conducted under conditions described in ORS 192.537 (2), after notification pursuant to ORS 192.538 or pursuant to ORS 192.547 (7)(b);

(c) As permitted by rules of the Oregon Health Authority for identification of deceased individuals;

(d) As permitted by rules of the Oregon Health Authority for newborn screening procedures;

(e) As authorized by statute for the purpose of establishing parentage; or

(f) For the purpose of furnishing genetic information relating to a decedent for medical diagnosis of blood relatives of the decedent.

(2) Except as provided in subsection (3) of this section, a physician licensed under ORS chapter 677 shall seek the informed consent of the individual or the individual's representative for the purposes of subsection (1) of this section in the manner provided by ORS 677.097. Except as provided in subsection (3) of this section, any other licensed health care provider or facility must seek the informed consent of the individual or the individual's representative for the purposes of subsection (1) of this section in a manner substantially similar to that provided by ORS 677.097 for physicians.

(3) A person conducting research shall seek the informed consent of the individual or the individual's representative for the purposes of subsection (1) of this section in the manner provided by ORS 192.547.

However, except as otherwise provided in ORS 192.583 to 192.607, nothing in ORS 192.583 to 192.607 shall preclude financial institutions from giving such notice to customers. A court may order a financial institution to withhold notification to a customer of the receipt of a summons, subpoena or search warrant when the court finds that notice to the customer would impede the investigation being conducted by the state or local agency.

(c) When disclosure is sought under ORS 192.597, the reasonable period of time shall be that period of time required by the circumstances but in no case more than 10 days from the date upon which the financial institution receives or is served with a subpoena under ORS 192.597.

These costs include, but are not limited to, personnel costs, reproduction costs and travel expenses. The following charges shall be considered reasonable costs:

**192.620 Policy.** The Oregon form of government requires an informed public aware of the deliberations and decisions of governing bodies and the information upon which such decisions were made. It is the intent of ORS 192.610 to 192.705 that decisions of governing bodies be arrived at openly. [1973 c.172 §1]

**192.630 Meetings of governing body to be open to public; location of meetings; accommodation for person with disability; interpreters.** (1) All meetings of the governing body of a public body shall be open to the public and all persons shall be permitted to attend any meeting except as otherwise provided by ORS 192.610 to 192.705.

(3) A governing body may not hold a meeting at any place where discrimination on the basis of race, color, creed, sex, sexual orientation, gender identity, national origin, age or disability is practiced. However, the fact that organizations with restricted membership hold meetings at the place does not restrict its use by a public body if use of the place by a restricted membership organization is not the primary purpose of the place or its predominant use.

(4)(a) Meetings of the governing body of a public body shall be held:

(A) Within the geographic boundaries over which the public body has jurisdiction;

(c) A joint meeting of two or more governing bodies or of one or more governing bodies and the elected officials of one or more federally recognized Oregon Indian tribes shall be held within the geographic boundaries over which one of the participating public bodies or one of the Oregon Indian tribes has jurisdiction or at the nearest practical location.

The sole remedy for discrimination on the basis of disability shall be as provided in ORS 192.680.

(e) As used in this subsection, "good faith effort" includes, but is not limited to, contacting the department or other state or local agency that maintains a list of qualified interpreters and arranging for the referral of one or more qualified interpreters to provide interpreter services. [1973 c.172 §3; 1979 c.644 §2; 1989 c.1019 §1; 1995 c.626 §1; 2003 c.14 §95; 2005 c.663 §12; 2007 c.70 §52; 2007 c.100 §21; 2009 c.595 §173; 2017 c.482 §1; 2019 c.286 §1; 2021 c.367 §12]

(2) If an executive session only will be held, the notice shall be given to the members of the governing body, to the general public and to news media which have requested notice, stating the specific provision of law authorizing the executive session.

(3) No special meeting shall be held without at least 24 hours' notice to the members of the governing body, the news media which have requested notice and the general public. Instead of written minutes, a record of any executive session may be kept in the form of a sound or video tape or digital recording, which need not be transcribed unless otherwise provided by law. If the disclosure of certain material is inconsistent with the purpose for which a meeting under ORS 192.660 is authorized to be held, that material may be excluded from disclosure. However, excluded materials are authorized to be examined privately by a court in any legal action and the court shall determine their admissibility.

**GENERAL PROVISIONS**

**469.010 Policy.** The Legislative Assembly finds and declares that:

(1) Continued growth in demand for nonrenewable energy forms poses a serious and immediate, as well as future, problem. It is essential that future generations not be left a legacy of vanished or depleted resources, resulting in massive environmental, social and financial impact.

(2) It is the goal of Oregon to promote the efficient use of energy resources and to develop permanently sustainable energy resources. The need exists for comprehensive state leadership in energy production, distribution and utilization. It is, therefore, the policy of Oregon:

(a) That development and use of a diverse array of permanently sustainable energy resources be encouraged utilizing to the highest degree possible the private sector of our free enterprise system.

(b) That through state government example and other effective communications, energy conservation and elimination of wasteful and uneconomical uses of energy and materials be promoted. This conservation must include, but not be limited to, resource recovery and materials recycling.

(c) That the basic human needs of every citizen, present and future, shall be given priority in the allocation of energy resources, commensurate with perpetuation of a free and productive economy with special attention to the preservation and enhancement of environmental quality.

(d) That state government assist every citizen and industry in adjusting to a diminished availability of energy.

(e) That energy-efficient modes of transportation for people and goods shall be encouraged, while energy-inefficient modes of transportation shall be discouraged.

(f) That cost-effectiveness be considered in state agency decision-making relating to energy sources, facilities or conservation, and that cost-effectiveness be considered in all agency decision-making relating to energy facilities.

(g) That state government shall provide a source of impartial and objective information in order that this energy policy may be enhanced. [1975 c.606 §1; 1979 c.723 §1]

**Note:** Section 1, chapter 376, Oregon Laws 2021, provides:

**Sec. 1. Legislative findings about offshore wind energy.** (1) The Legislative Assembly finds that:

(a) Oregon offshore wind holds tremendous potential and promise for this state to diversify its energy portfolio.

(b) Oregon has an opportunity to participate in a growing global market by contributing to the development of the nascent offshore wind energy supply chain.

(c) An intergovernmental task force led by the Bureau of Ocean Energy Management has reengaged and is expected to reveal offshore wind call areas in 2021 for the development of floating offshore wind energy within the federal waters off the Oregon coast.

(d) Oregon has an opportunity to participate in holistic west coast planning for the strategic integration of floating offshore wind energy within the next decade

and to position itself for potential market expansion thereafter.

(e) The Department of Land Conservation and Development has an established role as the lead state agency coordinating with the federal process for floating offshore wind development and, as the lead agency of the federally approved Oregon Coastal Management Program, the department implements the state's federal consistency authority pursuant to the Coastal Zone Management Act of 1972 and associated federal regulations. The department implements federal consistency review by evaluating federal activities for compliance with state enforceable policies and their reasonably foreseeable effects to coastal uses and resources of the Oregon coastal zone, and the department will coordinate with networked agency and local government partners to evaluate floating offshore wind development activities for consistency with the Oregon Coastal Management Program.

(f) The Oregon Business Development Department has established a leadership role in facilitating attracting the floating offshore wind energy industry to this state and in facilitating floating offshore wind energy supply chain development.

(g) Understanding the impacts, benefits, opportunities and barriers of floating offshore wind energy with respect to Oregon's fishing communities, ocean and shore-side recreational users, tribes, ports, coastal ecosystems, natural resources, manufacturing industry, maritime sector, disaster recovery planning, workforce development and electricity ratepayers can maximize the benefits to this state, while minimizing the conflicts between floating offshore wind energy, the ocean ecosystem and ocean users.

(h) Defining a pathway for Oregon to take advantage to the fullest extent possible of the federal offshore wind investment tax credit and other federal infrastructure investment programs that could benefit Oregon's ports and transmission system can facilitate immediate economic investments as well as long term ratepayer savings.

(i) Understanding the feasibility of using offshore wind as a clean power source for the future in-state generation of renewable fuel such as renewable hydrogen will strengthen state and regional energy decarbonization planning scenarios.

(j) Investigating potential mechanisms to integrate floating offshore wind energy into Oregon's future energy mix will strengthen state and regional energy decarbonization strategies.

(2) In furtherance of the findings set forth in subsection (1) of this section, the Legislative Assembly finds and declares that:

(a) It is the goal of this state to plan for the development of up to three gigawatts of floating offshore wind energy projects within the federal waters off the Oregon coast by 2030;

(b) It is further the goal of this state that the planning described in this subsection be conducted in a manner that will maximize benefits to this state while minimizing conflicts between floating offshore wind energy, the ocean ecosystem and ocean users; and

(c) Consistent with applicable federal law, it shall be the policy position of the State of Oregon that:

(A) Any federal planning or permitting process for offshore energy research and development in federal waters off the Oregon coast and for any related transmission and other facilities, particularly those that transverse Oregon's territorial sea, shall adequately consider the prompt decommissioning of any offshore facility after permanent cessation of use of the facility; and

(B) Adequate consideration as described in this paragraph must include consideration of the removal or decommissioning of anchors, cables and any other equipment related to the facility in a manner that will serve to avoid future conflicts between the equipment and fishing operations conducted by persons who hold licenses issued pursuant to the commercial fishing laws. [2021 c.376 §1]

**469.040 Director; duties; appointment; rules.** (1) The State Department of Energy shall be under the supervision of the Director of the State Department of Energy, who shall:

(2) If the test methods for products required to be tested under this section are not provided for in ORS 469.233 or in the state building code, the State Department of Energy shall adopt test methods for these pro-

ducts. The department shall use test methods approved by the United States Department of Energy or, in the absence of federal test methods, other appropriate nationally recognized test methods for guidance in adopting test methods. The State Department of Energy may periodically review and revise its test methods.

(3) A manufacturer of a product regulated pursuant to ORS 469.229 to 469.261 shall certify to the State Department of Energy that the products are in compliance with the minimum energy efficiency standards specified in ORS 469.233. The department shall establish rules governing the certification of these products and may coordinate with the certification and testing programs of other states and federal agencies with similar standards.

(4)(a) The department shall establish rules governing the identification of the products that comply with the minimum energy efficiency standards specified in ORS 469.233. The rules shall be coordinated to the greatest extent practicable with the labeling programs of other states and federal agencies with equivalent efficiency standards.

(b) Identification required under paragraph (a) of this subsection shall be by means of a mark, label or tag on the product and packaging at the time of sale or installation.

(c) The department shall waive marking, labeling or tagging requirements for products marked, labeled or tagged in compliance with federal requirements or for products certified pursuant to subsection (3) of this section, unless the department determines that state marking, labeling or tagging is required to provide adequate energy efficiency information to the consumer. (2)(a) After the review pursuant to subsection (1) of this section and notwithstanding ORS 469.233, the Director of the State Department of Energy may adopt rules to update the minimum energy efficiency standards specified in ORS 469.233 if the director

determines that the standards need to be updated:

(A) To promote energy conservation in the state;

(B) To achieve cost-effectiveness for consumers; or

(C) Due to federal action or to the outcome of collaborative consultations with manufacturers and the energy departments of other states.

(b)(A) In addition to the rules adopted under paragraph (a) of this subsection, the director may postpone by rule the operative date of any of the minimum energy efficiency standards specified in ORS 469.233 if the director determines that:

(i) Adjoining states with similar minimum energy efficiency standards have postponed the operative date of their corresponding minimum energy efficiency standards; or

(ii) Failure to modify the operative date of any of the minimum energy efficiency standards would impose a substantial hardship on manufacturers, retailers or the public.

(B)(i) The director may not postpone the operative date of a minimum energy efficiency standard under subparagraph (A) of this paragraph for more than one year.

(ii) If at the end of the first postponement period the director determines that adjoining states have further postponed the operative date of minimum energy efficiency standards and the requirements of subparagraph (A) of this paragraph continue to be met, the director may postpone the operative date for not more than one additional year.

(c) After the review pursuant to subsection (1) of this section, the director may adopt rules to establish new minimum energy efficiency standards if the director determines that new standards are needed:

(A) To promote energy conservation in the state;

(B) To achieve cost-effectiveness for consumers; or

(C) Due to federal action or to the outcome of collaborative consultations with manufacturers and the energy departments of other states.

(d) If the director adopts rules under paragraph (a) of this subsection to update the minimum energy efficiency standards specified in ORS 469.233 or under paragraph (c) of this subsection to establish new minimum energy efficiency standards:

(A) The rules may not take effect until one year following their adoption by the director; and

(B) The Governor shall cause to be introduced at the next Legislative Assembly a bill to conform the statutory minimum energy efficiency standards to the minimum energy efficiency standards adopted by the director by rule.

(3) Notwithstanding ORS 469.229 and 469.233 and the requirements of subsection (2) of this section, and after consultation with the appropriate advisory boards to the Department of Consumer and Business Services, the director may adopt rules to update the minimum energy efficiency standards or test methods specified in ORS 469.233 to a more recent version, including any product definitions associated with the standard or test method, if the director determines that the standard or test method needs to be updated to maintain or improve consistency with other comparable standards in other states. Rules adopted under this subsection shall take effect on or after the effective date of a similar standard or test method adopted by another state.

(4) If the director determines that implementation of a state minimum energy efficiency standard requires a waiver of federal preemption, the director shall apply for a waiver of federal preemption pursuant to 42 U.S.C. 6297(d). [2005 c.437 §8; 2007 c.375 §7; 2007 c.649 §6a; 2021 c.108 §6]

[2023 c.442 §8]

**Note:** 469.275 to 469.291 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469.276** [1989 c.926 §33; repealed by 1999 c.880 §2]

**469.277 Department adoption of performance standards; enforcement; rules.**

(1)(a) Not later than December 31, 2024, the State Department of Energy, in consultation with the Department of Consumer and Business Services, shall adopt rules that use the American National Standards Institute’s standards for Energy Efficiency in Existing Buildings (ANSI/ASHRAE/IES Standard 100) as an initial model for specifying an energy performance standard for covered commercial buildings. In rulemaking proceedings to adopt or update rules under this paragraph, the State Department of Energy shall disclose the sources of information, including the model described in this paragraph and any peer-reviewed science, that the department relies on in developing or updating the energy performance standard. The department shall update the energy performance standard not later than July 1, 2029, and by the same month and day in each successive period of five years.

(b) The energy performance standard described in paragraph (a) of this subsection must:

(A) Comply with the requirements of ORS 469.275 to 469.279;

(B) Seek to maximize reductions in greenhouse gas emissions from covered commercial buildings;

(C) Include energy use intensity targets that apply to specific types of buildings; and

(D) Provide for methods to achieve conditional compliance with an applicable en-

ergy use intensity target, which must, at a minimum, require:

(i) Preparing an energy management plan;

(ii) Developing a program for building operations and maintenance that aims at achieving the applicable energy use intensity target;

(iii) Making investments in energy use efficiency measures that aim at achieving the applicable energy use intensity target; and

(iv) Submitting to energy use audits, which may be based upon or linked to ASHRAE Standard 211 audits.

(c) Adoption of the energy performance standard described in paragraph (a) of this subsection does not change eligibility criteria for, or benefits or incentives available under, other programs for energy efficiency demand response.

(2)(a) In adopting the energy performance standard described in subsection (1) of this section, the department:

(A) Shall:

(i) Develop energy use intensity targets that are not more stringent than the average energy use intensity for each covered commercial building occupancy classification, adjusting as necessary for a covered commercial building’s unique energy-using features;

(ii) Consider, for the purpose of establishing energy use intensity targets, regional and local data that identifies building energy use, such as existing benchmarking data from the Energy Star program established under 42 U.S.C. 6294a;

(iii) Consider, for the purpose of establishing the energy performance standard, federal and local programs that relate to energy efficiency standards, aligning where possible requirements under the energy performance standard to avoid duplicative work by regulators and eligible building owners;

(iv) Develop energy use intensity targets for two or more climate zones that represent energy use in a year with normal weather;

(v) Develop energy use intensity targets that exclude energy delivered through electric vehicle supply equipment; and

(vi) Adopt a conditional compliance method that:

(I) Requires eligible building owners of covered commercial buildings that do not meet an energy use intensity target to take action to reduce energy use; and

(II) Specifies investment criteria that meet the requirements set forth in paragraph (b) of this subsection and that ensure prog-

ress toward meeting the energy use intensity target; and

(B) May:

(i) Consider building occupancy classifications set forth in ANSI/ASHRAE/IES Standard 100 and the United States Environmental Protection Agency's Energy Star portfolio manager;

(ii) Base energy use intensity targets for recently constructed covered commercial buildings on statewide energy codes that were in effect at the time the covered commercial building was constructed; and

(iii) Require utilities, eligible building owners and other entities to aggregate data for covered commercial buildings that have multiple meters and to report or, as appropriate, provide the aggregated data for reports under ORS 469.279.

(b)(A) Investment criteria the department specifies as part of a conditional compliance method under paragraph (a) of this subsection must:

(i) Ensure that an eligible building owner meets the covered commercial building's energy use intensity target by implementing energy efficiency measures identified in energy use audits; and

(ii) Except as provided in subparagraph (B) of this paragraph, require an eligible building owner to implement an optimized bundle of energy efficiency measures that provide maximum energy savings without resulting in a savings to investment ratio of less than 1.0 or require the eligible building owner to achieve the energy use intensity target by means of an implementation plan that:

(I) Is based on an energy use audit and life-cycle cost analysis from ANSI/ASHRAE/IES Standard 211 that accounts for the period during which a bundle of energy efficiency measures provide savings;

(II) Reflects the eligible building owner's net costs of implementing energy efficiency measures, excluding any costs that utility or government grants cover;

(III) Allows an exclusion of energy efficiency measures that do not pay back the cost of the energy efficiency measure over the useful life of the energy efficiency measure;

(IV) Allows an exclusion of energy efficiency measures that are excluded under subparagraph (B) of this paragraph; and

(V) Allows for phased implementation in which an eligible building owner need not replace a system or equipment before the useful life of the system or equipment ends.

(B) An eligible building owner need not meet an energy efficiency requirement that would compromise the historical integrity of a covered commercial building or part of a covered commercial building that:

(i) Is listed on a state or national register of historic places;

(ii) Is designated as an historic property under a state or local statute, ordinance, rule or other legislative act or a survey conducted under a statute, ordinance, rule or other legislative act;

(iii) Is certified as a contributing resource within a historic district that is listed on a national register or is locally designated as a historic district; or

(iv) A state historic preservation officer or the keeper of the national register of historic places has determined in an opinion or certification is eligible to be listed on the national or state register of historic places either as an individual building or as a building that contributes to a historic district.

(3) The department shall create a database of eligible building owners and covered commercial buildings that are subject to the requirements of ORS 469.275 to 469.279 based on records the department obtains from each county assessor and on other information available to the department.

(4)(a) Not later than July 1, 2025, the department shall notify eligible building owners of the requirement to comply with the provisions set forth for tier 1 buildings in ORS 469.275 to 469.279.

(b) The department may approve an eligible building owner's use of a conditional compliance method in lieu of full compliance with an energy use intensity target if the department determines that the eligible building owner has the capacity to take the actions and make the investments required under the conditional compliance method and otherwise qualifies to use the conditional compliance method.

(5) A municipality, as defined in ORS 455.010, may by ordinance, rule or land use process, adopt an energy performance standard and greenhouse gas emission reduction standards that are more stringent, or that have broader application, than the energy performance standard that the department adopts under this section, provided:

(a) The standard does not exceed the energy efficiency requirements of the state building code for new buildings, except where permitted under ORS 455.040;

(b) The standard does not apply to buildings that are less than six years old, meas-

ured from the date of the building's certificate of occupancy; and

(c) The municipality cooperates with the department in aligning, where practicable, the energy performance standard the municipality adopts with the energy performance standard the department adopts under this section.

(6) Construction work performed to comply with the provisions of ORS 469.275 to 469.279 must comply with all applicable provisions of the state building code and permitting procedures that apply to the construction work.

(7) Except as provided in subsection (5) of this section, this section does not affect or supersede the provisions of ORS 455.040. [2023 c.442 §9]

**Note:** See note under 469.275.

**469.278** [1989 c.926 §34; repealed by 1999 c.880 §2]

The eligible building owner shall submit the report in accordance with the schedule specified in subsection (4) of this section and shall submit a new report at the end of every successive five-year period. Each report the eligible building owner submits must include documentation that demonstrates that:

(a) The tier 1 building's weather normalized energy use intensity during the previous calendar year is less than or equal to the applicable energy use intensity target;

(b) The eligible building owner is taking actions and making investments in accordance with a conditional compliance method the department approved; or

(c) The tier 1 building is exempt from an energy performance standard that otherwise would apply to the tier 1 building because:

(i) Factory group F; or

(ii) High hazard group H;

(E) The tier 1 building is an agricultural building; or

(F) The eligible building owner or the tier 1 building has undergone or is undergoing financial hardship, as measured in accordance with the following criteria:

(i) Within the 24 months that precede the date on which the eligible building owner's report is due, a city or county listed the tier 1 building on the city's or county's annual tax lien sale list because of arrears in property taxes or water or wastewater charges;

(ii) A court appointed receiver controls the tier 1 building because of financial distress;

(iii) A financial institution owns the tier 1 building because of a borrower's default;

(iv) Within the 24 months that precede the date on which the eligible building owner's report is due, the eligible building owner acquired the tier 1 building by means of a deed in lieu of foreclosure;

(v) The tier 1 building has a senior mortgage that is subject to a notice of default; or

(vi) Other criteria that the department specifies by rule as indicative of financial hardship.

(2) The department shall develop methods and procedures for administering reports that eligible building owners of tier 1 buildings submit to the department under subsection (1) of this section.

(3)(a) The department shall provide a support program to eligible building owners of covered commercial buildings that includes, at a minimum, information and periodic training, technical assistance and telephone and electronic mail support that will assist eligible building owners in complying with the energy performance standard, applicable energy use intensity targets and reporting requirements under ORS 469.275 to 469.279.

(b) As part of the support program described in paragraph (a) of this subsection, the department may encourage eligible building owners to seek for maintenance staff accreditation from the U.S. Green Building Council's Green Janitors Education Program.

(4) An eligible building owner must comply with the energy performance standard

adopted under ORS 469.277 by the following dates:

(a) If the eligible building owner's tier 1 building has a gross floor area of 200,000 square feet or more, not later than June 1, 2028;

(c) If the eligible building owner's tier 1 building has a gross floor area of 35,000 square feet or more but less than 90,000 square feet, not later than June 1, 2030.

(5)(a) The department shall notify an eligible building owner of a tier 1 building of a failure to comply with ORS 469.275 to 469.279 if the eligible building owner fails to:

(A) Submit the report described in subsection (1) of this section by the date required or in a form and manner the department requires;

(B) Meet the energy performance standard or an applicable energy use intensity target or, in lieu of meeting the standard or target, fails to obtain the department's approval to use a conditional compliance method;

(C) Provide accurate reporting that meets the requirements of ORS 469.275 to 469.279; or

(D) Demonstrate as provided in subsection (1)(c) of this section that the eligible building owner is exempt from an otherwise applicable energy performance standard.

(b) In the notice described in paragraph (a) of this subsection, the department may specify a date by which the eligible building owner of a tier 1 building must correct the failure the department identified in the notice. In addition, the department shall specify the date by which the eligible building owner's failure to comply or failure to correct a lack of compliance will subject the eligible building owner to a civil penalty under subsection (6) of this section.

(c) At an eligible building owner's request, the department shall cite the specific legal authority upon which the department relied as a basis for issuing a notice to the eligible building owner under paragraph (a) of this subsection.

(6)(a) The department may impose a civil penalty as provided in ORS 183.745 upon an eligible building owner of a tier 1 building to which the department issued a notice under subsection (5) of this section if the department determines that the eligible building owner:

(A) Has not complied with the requirement set forth in the notice or has not cor-

rected a lack of compliance by the date for correction that the department specifies in the notice; or

(B) Otherwise violated a provision of ORS 469.275 to 469.279 or a rule the department adopted under ORS 469.275 to 469.279.

(b) A civil penalty the department imposes under paragraph (a) of this subsection may not exceed \$5,000 plus an amount for the duration of a continuing violation, which may not exceed a daily amount that the department calculates by multiplying \$1 per year per square foot of gross floor area of the tier 1 building that is the subject of the department's notice.

(c) The department shall deposit the proceeds of any civil penalty the department imposes and collects under this subsection into the State Department of Energy Account established under ORS 469.120 and shall allocate the proceeds for the purpose of administering the department's energy efficiency programs. For an applicant that proposes to provide the physical facilities for the installation of standby generators, the requirement of this subparagraph may be met by agreeing to require such a term in the lease contract for the facility; and

(C) The standby generators are electrically incapable of being interconnected to the transmission grid. For an applicant that proposes to provide the physical facilities for the installation of standby generators, the requirement of this subparagraph may be met by agreeing to require such a term in the lease contract for the facility.

(3) The Energy Facility Siting Council may review and, if necessary, revise the fuel chargeable to power heat rate value set forth in subsection (2)(c)(B) of this section. In making its determination, the council shall ensure that the fuel chargeable to power heat rate value for facilities set forth in subsection (2)(c)(B) of this section remains significantly lower than the fuel chargeable to power heat rate value for the best available, commercially viable thermal power plant technology at the time of the revision.

(4)(a)(A) Any person who proposes to construct or enlarge an energy facility and who claims an exemption under subsection (2)(a), (c) or (f) of this section from the requirement to obtain a site certificate shall request the Energy Facility Siting Council to determine whether the proposed facility qualifies for the claimed exemption.

(B) The council may not require a person who operates or proposes to construct or enlarge an energy facility to request that the council determine whether the proposed facility qualifies for exemption under subsection (2)(g) of this section.

(b) The council shall make its determination within 60 days after the request for exemption is filed. An appeal from the council's determination on a request for exemption shall be made under ORS 469.403, except that the scope of review by the Supreme Court shall be the same as a review by a circuit court under ORS 183.484. The record on review by the Supreme Court shall be the record established in the council proceeding on the exemption.

(5) Notwithstanding subsection (1) of this section, a separate site certificate shall not be required for:

(a) Transmission lines, storage facilities, pipelines or similar related or supporting facilities, if such related or supporting facilities are addressed in and are subject to a site certificate for another energy facility;

(b) Expansion within the site or within the energy generation area of a facility for which a site certificate has been issued, if the existing site certificate has been amended to authorize expansion; or

(c) Expansion, either within the site or outside the site, of an existing council certified surface facility related to an underground gas storage reservoir, if the existing site certificate is amended to authorize expansion.

(6) If the substantial loss of the steam host causes a facility exempt under subsection (2)(c) of this section to substantially fail to meet the exemption requirements under subsection (2)(c) of this section, the electric generating facility shall cease to operate one

year after the substantial loss of the steam host unless an application for a site certificate has been filed in accordance with the provisions of ORS 469.300 to 469.563.

(7) As used in this section:

(a) "Standby generation facility" means an electric power generating facility, including standby generators and the physical structures necessary to install and connect standby generators, that provides temporary electric power in the event of a power outage and that is electrically incapable of being interconnected with the transmission grid.

(b) "Total energy output" means the sum of useful thermal energy output and useful electrical energy output.

(c) "Useful thermal energy" means the verifiable thermal energy used in any viable industrial or commercial process, heating or cooling application.

(8)(a) If the developer of a facility elects, or the governing body of the local government after consulting with the developer elects, to defer regulatory authority to the Energy Facility Siting Council, the developer of a facility shall obtain a site certificate, in the manner provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992, for a facility that, notwithstanding the definition of "energy facility" in ORS 469.300, is:

(A) An electric power generating plant with an average electric generating capacity of less than 50 megawatts produced from wind energy at a single energy facility or within a single energy generation area;

(B) An associated transmission line; or

(C) A solar photovoltaic power generation facility that is not an energy facility as defined in ORS 469.300 (11)(a)(D).

(b) An election by a developer or a local government under this subsection is final.

(c) An election by a local government under this subsection is not a land use decision as defined in ORS 197.015.

(d) A local government may not make an election under this subsection after a permit application has been submitted under ORS 215.416 or 227.175. **469.330 Notice of intent to file application for site certificate; public notice; standards, application requirements and study requirements; project order; rules.**

(1) Each applicant for a site certificate shall submit to the Energy Facility Siting Council a notice of intent to file an application for a site certificate. The notice of intent must

provide information about the proposed site and the characteristics of the facility sufficient for the preparation of the State Department of Energy's project order.

(2) The council shall cause public notice to be given upon receipt of a notice of intent by the council. The public notice shall provide a description of the proposed site and facility in sufficient detail to inform the public of the location and proposed use of the site.

(3) Following review of the notice of intent and any public comments received in response to the notice of intent, the department may hold a preapplication conference with state agencies and local governments that have regulatory or advisory responsibility with respect to the facility. After the preapplication conference, the department shall issue a project order establishing the statutes, administrative rules, council standards, local ordinances, application requirements and study requirements for the site certificate application. A project order is not a final order.

(4) A project order issued under subsection (3) of this section may be amended at any time by either the department or the council. [Formerly 453.335; 1977 c.794 §9; 1989 c.88 §1; 1993 c.569 §5; 1995 c.505 §8]

**469.350 Application for site certificate; comment and recommendation.** (1) Applications for site certificates shall be made to the Energy Facility Siting Council in a form prescribed by the council and accompanied by the fee required by ORS 469.421.

(2) Copies of the notice of intent and of the application shall be sent for comment and recommendation within specified deadlines established by the council to the Department of Environmental Quality, the Water Resources Commission, the State Fish and Wildlife Commission, the Water Resources Director, the State Geologist, the State Forestry Department, the Public Utility Commission of Oregon, the State Department of Agriculture, the Department of Land Conservation and Development, the Oregon Department of Aviation, any other state agency that has regulatory or advisory responsibility with respect to the facility and any city or county affected by the application.

(3) Any state agency, city or county that is requested by the council to comment and make recommendations under this section shall respond to the council by the specified deadline. If a state agency, city or county determines that it cannot respond to the council by the specified deadline because the state agency, city or county lacks sufficient

resources to review and comment on the application, the state agency, city or county shall contract with another entity to assist in preparing a response. A state agency, city or county that enters into a contract to assist in preparing a response may request funding to pay for that contract from the council pursuant to ORS 469.360.

(4) The State Department of Energy shall notify the applicant whether the application is complete. When the department determines an application is complete, the department shall notify the applicant and provide notice to the public. [Formerly 453.345; 1977 c.794 §10; 1989 c.88 §2; 1993 c.569 §6; 1995 c.505 §9; 2001 c.683 §10; 2009 c.399 §4]

**469.360 Evaluation of notice of intent, site application or expedited review request; costs; payment.** (1) The Energy Facility Siting Council shall evaluate each notice of intent, site certificate application or request for expedited review.

(2) Pursuant to a written contract or agreement, the council may compensate a state agency or a local government affected by the application for expenses directly related to participation by the compensated agency or local government in the following evaluation activities:

(a) Consultation initiated by an applicant after payment of the fee under ORS 469.421 (2) for the notice of intent or request for expedited review but prior to submittal of the notice or request;

(b) Review of the notice of intent, the application or a request for an expedited review; and

(c) Participation in a council proceeding, excluding legal expenses of the agency or local government incurred as a result of participation by the state agency or local government as a party in a contested case conducted by the council pursuant to ORS 469.370 (5).

(3) Compensation for consultation expenses under subsection (2)(a) of this section shall be limited to the expenses established in an estimate provided by the council and agreed to by the applicant. The applicant may request that the estimate be revised to allow for additional consultation activities at any time prior to submitting the notice of intent.

(4) Pursuant to a written agreement, the council may compensate a tribe identified by the Commission on Indian Services as affected by the application for expenses directly related to the tribe's review of a notice of intent, site certificate application or request for expedited review.

(5) As part of its evaluation, the council also may commission an independent study

by an independent contractor, state agency, local government or any other person, of any aspect of the proposed facility within its statutory authority to review. The council may commission an independent study under this subsection only after the council makes a determination that the council is unable to fully evaluate the application without assistance and identifies specific issues to be addressed and only pursuant to a written contract or agreement with the independent contractor, state agency, local government or other person. The council shall compensate the independent contractor, state agency, local government or other person only to the extent the costs are directly related to issues identified by the council.

(6) The council shall provide funding to state agencies, cities or counties required to contract with another entity to complete comments and recommendations pursuant to ORS 469.350.

(7) In addition to compensating state agencies, tribes and local governments pursuant to this section, the council may provide funding to the Department of Environmental Quality for the department to conduct modeling and provide technical assistance to expedite preparation, submission and review of applications for permits under ORS 468A.040 required for energy facilities. [Formerly 453.355; 1987 c.450 §1; 1989 c.88 §3; 1993 c.569 §7; 1995 c.505 §10; 2001 c.683 §11; 2015 c.488 §1]

**469.370 Draft proposed order for hearing; issues raised; final order; expedited processing.** (1) Based on its review of the application and the comments and recommendations on the application from state agencies and local governments, the State Department of Energy shall prepare and issue a draft proposed order on the application.

(2) Following issuance of the draft proposed order, the Energy Facility Siting Council shall hold one or more public hearings on the application for a site certificate in the affected area and elsewhere, as the council considers necessary. Notice of the hearing shall be mailed at least 20 days before the hearing. The notice shall, at a minimum:

(a) Comply with the requirements of ORS 197.797 (2), with respect to the persons notified;

(b) Include a description of the facility and the facility's general location;

(c) Include the name of an agency representative to contact and the telephone number where additional information may be obtained;

(d) State that copies of the application and draft proposed order are available for

inspection at no cost and will be provided at a reasonable cost; and

(e) State that failure to raise an issue in person or in writing prior to the close of the record of the public hearing with sufficient specificity to afford the decision maker an opportunity to respond to the issue precludes consideration of the issue in a contested case.

(3) Any issue that may be the basis for a contested case shall be raised not later than the close of the record at or following the final public hearing prior to issuance of the department's proposed order. Such issues shall be raised with sufficient specificity to afford the council, the department and the applicant an adequate opportunity to respond to each issue. A statement of this requirement shall be made at the commencement of any public hearing on the application.

(4) After reviewing the application, the draft proposed order and any testimony given at the public hearing and after consulting with other agencies, the department shall issue a proposed order recommending approval or rejection of the application. The department shall issue public notice of the proposed order, that shall include notice of a contested case hearing specifying a deadline for requests to participate as a party or limited party and a date for the prehearing conference.

(5) Following receipt of the proposed order from the department, the council shall conduct a contested case hearing on the application for a site certificate in accordance with the applicable provisions of ORS chapter 183 and any procedures adopted by the council. The applicant shall be a party to the contested case. The council may permit any other person to become a party to the contested case in support of or in opposition to the application only if the person appeared in person or in writing at the public hearing on the site certificate application. Issues that may be the basis for a contested case shall be limited to those raised on the record of the public hearing under subsection (3) of this section, unless:

(a) The department failed to follow the requirements of subsection (2) or (3) of this section; or

(b) The action recommended in the proposed order, including any recommended conditions of the approval, differs materially from that described in the draft proposed order, in which case only new issues related to such differences may be raised.

(6) If no person requests party status to challenge the department's proposed order, the proposed order shall be forwarded to the

council and the contested case hearing shall be concluded.

(7) At the conclusion of the contested case, the council shall issue a final order, either approving or rejecting the application based upon the standards adopted under ORS 469.501 and any additional statutes, rules or local ordinances determined to be applicable to the facility by the project order, as amended. The council shall make its decision by the affirmative vote of at least four members approving or rejecting any application for a site certificate. The council may amend or reject the proposed order, so long as the council provides public notice of its hearing to adopt a final order, and provides an opportunity for the applicant and any party to the contested case to comment on material changes to the proposed order, including material changes to conditions of approval resulting from the council's review. The council's order shall be considered a final order for purposes of appeal.

(8) Rejection or approval of an application, together with any conditions that may be attached to the certificate, shall be subject to judicial review as provided in ORS 469.403.

(9) The council shall either approve or reject an application for a site certificate:

(a) Within 24 months after filing an application for a nuclear installation, or for a thermal power plant, other than that described in paragraph (b) of this subsection, with a nameplate rating of more than 200,000 kilowatts;

(b) Within nine months after filing of an application for a site certificate for a combustion turbine power plant, a geothermal-fueled power plant or an underground storage facility for natural gas;

(c) Within six months after filing an application for a site certificate for an energy facility, if the application is:

(A) To expand an existing industrial facility to include an energy facility;

(B) To expand an existing energy facility to achieve a nominal electric generating capacity of between 25 and 50 megawatts; or

(C) To add injection or withdrawal capacity to an existing underground gas storage facility; or

(d) Within 12 months after filing an application for a site certificate for any other energy facility.

(10) At the request of the applicant, the council shall allow expedited processing of an application for a site certificate for an energy facility with an average electric generating capacity of less than 100 megawatts. No notice of intent shall be required. Fol-

lowing approval of a request for expedited review, the department shall issue a project order, which may be amended at any time. The council shall either approve or reject an application for a site certificate within six months after filing the site certificate application if there are no intervenors in the contested case conducted under subsection (5) of this section. If there are intervenors in the contested case, the council shall either approve or reject an application within nine months after filing the site certificate application. For purposes of this subsection, the generating capacity of a thermal power plant is the nameplate rating of the electrical generator proposed to be installed in the plant.

(11) Failure of the council to comply with the deadlines set forth in subsection (9) or (10) of this section shall not result in the automatic issuance or denial of a site certificate.

(12) The council shall specify in the site certificate a date by which construction of the facility must begin.

(13) For a facility that is subject to and has been or will be reviewed by a federal agency under the National Environmental Policy Act, 42 U.S.C. Section 4321, et seq., the council shall conduct its site certificate review, to the maximum extent feasible, in a manner that is consistent with and does not duplicate the federal agency review. Such coordination shall include, but need not be limited to:

(a) Elimination of duplicative application, study and reporting requirements;

(b) Council use of information generated and documents prepared for the federal agency review;

(c) Development with the federal agency and reliance on a joint record to address applicable council standards;

(d) Whenever feasible, joint hearings and issuance of a site certificate decision in a time frame consistent with the federal agency review; and

(e) To the extent consistent with applicable state standards, establishment of conditions in any site certificate that are consistent with the conditions established by the federal agency. **469.373 Expedited processing for certain natural gas energy facilities.** (1) Notwithstanding the expedited review process

established pursuant to ORS 469.370, an applicant may apply under the provisions of this section for expedited review of an application for a site certificate for an energy facility if the energy facility:

(a) Is a combustion turbine energy facility fueled by natural gas or is a reciprocating engine fueled by natural gas, including an energy facility that uses petroleum distillate fuels for backup power generation;

(b) Is a permitted or conditional use allowed under an applicable local acknowledged comprehensive plan, land use regulation or federal land use plan, and is located:

(A) At or adjacent to an existing energy facility; or

(B)(i) At, adjacent to or in close proximity to an existing industrial use; and

(ii) In an area currently zoned or designated for industrial use;

(c)(A) Requires no more than three miles of associated transmission lines or three miles of new natural gas pipelines outside of existing rights of way for transmission lines or natural gas pipelines; or

(B) Imposes, in the determination of the Energy Facility Siting Council, no significant impact in the locating of associated transmission lines or new natural gas pipelines outside of existing rights of way;

(d) Requires no new water right or water right transfer;

(e) Provides funds to a qualified organization in an amount determined by the council to be sufficient to produce any required reduction in emissions as specified in ORS 469.503 (2)(c)(C) and in rules adopted under ORS 469.503 for the total carbon dioxide emissions produced by the energy facility for the life of the energy facility; and

(f)(A) Discharges process wastewater to a wastewater treatment facility that has an existing National Pollutant Discharge Elimination System permit, can obtain an industrial pretreatment permit, if needed, within the expedited review process time frame and has written confirmation from the wastewater facility permit holder that the additional wastewater load will be accommodated by the facility without resulting in a significant thermal increase in the facility effluent or without requiring any changes to the wastewater facility National Pollutant Discharge Elimination System permit;

(B) Plans to discharge process wastewater to a wastewater treatment facility owned by a municipal corporation that will accommodate the wastewater from the energy facility and supplies evidence from the municipal corporation that:

(i) The municipal corporation has included, or intends to include, the process wastewater load from the energy facility in an application for a National Pollutant Discharge Elimination System permit; and

(ii) All conditions required of the energy facility to allow the discharge of process wastewater from the energy facility will be satisfied; or

(C) Obtains a National Pollutant Discharge Elimination System or water pollution control facility permit for process wastewater disposal, supplies evidence to support a finding that the discharge can likely be permitted within the expedited review process time frame and that the discharge will not require:

(i) A new National Pollutant Discharge Elimination System permit, except for a storm water general permit for construction activities; or

(ii) A change in any effluent limit or discharge location under an existing National Pollutant Discharge Elimination System or water pollution control facility permit.

(2) An applicant seeking expedited review under this section shall submit documentation to the State Department of Energy, prior to the submission of an application for a site certificate, that demonstrates that the energy facility meets the qualifications set forth in subsection (1) of this section. The department shall determine, within 14 days of receipt of the documentation, on a preliminary, non-binding basis, whether the energy facility qualifies for expedited review.

(3) If the department determines that the energy facility preliminarily qualifies for expedited review, the applicant may submit an application for expedited review. Within 30 days after the date that the application for expedited review is submitted, the department shall determine whether the application is complete. If the department determines that the application is complete, the application shall be deemed filed on the date that the department sends the applicant notice of its determination. If the department determines that the application is not complete, the department shall notify the applicant of the deficiencies in the application and shall deem the application filed on the date that the department determines that the application is complete. The department or the council may request additional information from the applicant at any time.

(4) The State Department of Energy shall send a copy of a filed application to the Department of Environmental Quality, the Water Resources Department, the State Department of Fish and Wildlife, the State Department of Geology and Mineral Indus-

tries, the State Department of Agriculture, the Department of Land Conservation and Development, the Public Utility Commission and any other state agency, city, county or political subdivision of the state that has regulatory or advisory responsibility with respect to the proposed energy facility. The State Department of Energy shall send with the copy of the filed application a notice specifying that:

(a) In the event the council issues a site certificate for the energy facility, the site certificate will bind the state and all counties, cities and political subdivisions in the state as to the approval of the site, the construction of the energy facility and the operation of the energy facility, and that after the issuance of a site certificate, all permits, licenses and certificates addressed in the site certificate must be issued as required by ORS 469.401 (3); and

(b) The comments and recommendations of state agencies, counties, cities and political subdivisions concerning whether the proposed energy facility complies with any statute, rule or local ordinance that the state agency, county, city or political subdivision would normally administer in determining whether a permit, license or certificate required for the construction or operation of the energy facility should be approved will be considered only if the comments and recommendations are received by the department within a reasonable time after the date the application and notice of the application are sent by the department.

(5) Within 90 days after the date that the application was filed, the department shall issue a draft proposed order setting forth:

(a) A description of the proposed energy facility;

(b) A list of the permits, licenses and certificates that are addressed in the application and that are required for the construction or operation of the proposed energy facility;

(c) A list of the statutes, rules and local ordinances that are the standards and criteria for approval of any permit, license or certificate addressed in the application and that are required for the construction or operation of the proposed energy facility; and

(d) Proposed findings specifying how the proposed energy facility complies with the applicable standards and criteria for approval of a site certificate.

(6) The council shall review the application for site certification in the manner set forth in subsections (7) to (10) of this section and shall issue a site certificate for the facility if the council determines that the fa-

cility, with any required conditions to the site certificate, will comply with:

(a) The requirements for expedited review as specified in this section;

(b) The standards adopted by the council pursuant to ORS 469.501 (1)(a), (c) to (e), (g), (h) and (L) to (o);

(c) The requirements of ORS 469.503 (3); and

(d) The requirements of ORS 469.504 (1)(b).

(7) Following submission of an application for a site certificate, the council shall hold a public informational meeting on the application. Following the issuance of the proposed order, the council shall hold at least one public hearing on the application. The public hearing shall be held in the area affected by the energy facility. The council shall mail notice of the hearing at least 20 days prior to the hearing. The notice shall comply with the notice requirements of ORS 197.797 (2) and shall include, but need not be limited to, the following:

(a) A description of the energy facility and the general location of the energy facility;

(b) The name of a department representative to contact and the telephone number at which people may obtain additional information;

(c) A statement that copies of the application and proposed order are available for inspection at no cost and will be provided at reasonable cost; and

(d) A statement that the record for public comment on the application will close at the conclusion of the hearing and that failure to raise an issue in person or in writing prior to the close of the record, with sufficient specificity to afford the decision maker an opportunity to respond to the issue, will preclude consideration of the issue, by the council or by a court on judicial review of the council's decision.

(8) Prior to the conclusion of the hearing, the applicant may request an opportunity to present additional written evidence, arguments or testimony regarding the application. In the alternative, prior to the conclusion of the hearing, the applicant may request a contested case hearing on the application. If the applicant requests an opportunity to present written evidence, arguments or testimony, the council shall leave the record open for that purpose only for a period not to exceed 14 days after the date of the hearing. Following the close of the record, the department shall prepare a draft final order for the council. If the applicant requests a contested case hearing, the

council may grant the request if the applicant has shown good cause for a contested case hearing. If a request for a contested case hearing is granted, subsections (9) to (11) of this section do not apply, and the application shall be considered under the same contested case procedures used for a nonexpedited application for a site certificate.

(9) The council shall make its decision based on the record and the draft final order prepared by the department. The council shall, within six months of the date that the application is deemed filed:

(a) Grant the application;

(b) Grant the application with conditions;

(c) Deny the application; or

(d) Return the application to the site certification process required by ORS 469.320.

(10) If the application is granted, the council shall issue a site certificate pursuant to ORS 469.401 and 469.402. Notwithstanding subsection (6) of this section, the council may impose conditions based on standards adopted under ORS 469.501 (1)(b), (f) and (i) to (k), but may not deny an application based on those standards.

(11) Judicial review of the approval or rejection of a site certificate by the council under this section shall be as provided in ORS 469.403. [2001 c.683 §15; 2011 c.298 §1]

**Note:** 469.373 was added to and made a part of 469.300 to 469.563 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.375 Required findings for radioactive waste disposal facility certificate.** The Energy Facility Siting Council shall not issue a site certificate for a waste disposal facility for uranium mine overburden or uranium mill tailings, mill wastes or mill by-product or for radioactive waste or radioactively contaminated containers or receptacles used in the transportation, storage, use or application of radioactive material, unless, accompanying its decision it finds:

(1) The site is:

(a) Suitable for disposal of such wastes, and the amount of the wastes, intended for disposal at the site;

(b) Not located in or adjacent to:

(A) An area determined to be potentially subject to river or creek erosion within the lifetime of the facility;

(B) Within the 500-year floodplain of a river, taking into consideration the area determined to be potentially subject to river or creek erosion within the lifetime of the facility;

(D) An area of ancient, recent or active mass movement including land sliding, flow or creep;

(E) An area subject to ocean erosion; or

(F) An area having experienced volcanic activity within the last two million years.

(2) There is no available disposal technology and no available alternative site for disposal of such wastes that would better protect the health, safety and welfare of the public and the environment;

(3) The disposal of such wastes and the amount of the wastes, at the site will be compatible with the regulatory programs of federal government for disposal of such wastes;

(4) The disposal of such wastes, and the amount of the wastes, at the site will be coordinated with the regulatory programs of adjacent states for disposal of such wastes;

(5) That following closure of the site, there will be no release of radioactive materials or radiation from the waste;

(6) That suitable deed restrictions have been placed on the site recognizing the hazard of the material; and

(7) That, where federal funding for remedial actions is not available, a surety bond in the name of the state has been provided in an amount determined by the State Department of Energy to be sufficient to cover any costs of closing the site and monitoring it or providing for its security after closure and to secure performance of any site certificate conditions. The bond may be withdrawn when the council finds that:

(a) The radioactive waste has been disposed of at a waste disposal facility for which a site certificate has been issued; and

(b) A fee has been paid to the State of Oregon sufficient for monitoring the site after closure.

(8) If any section, portion, clause or phrase of this section is for any reason held to be invalid or unconstitutional the remaining sections, portions, clauses and phrases shall not be affected but shall remain in full force or effect, and to this end the provisions of this section are severable. **469.378 Land use compatibility statement for energy facility.** Notwithstanding ORS 197.180, when a state agency action or recommendation concerning an energy facility requires a land use compatibility statement prior to the action being completed, the state agency shall satisfy any applicable requirement of ORS 197.180 by conditioning

the agency action or recommendation on a determination by either the Energy Facility Siting Council or the applicable city or county that the energy facility as affected by the state agency action satisfies, or will continue to satisfy, the applicable requirements of ORS 197.180. [2001 c.683 §17]

**Note:** 469.378 was added to and made a part of 469.300 to 469.563 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.380** [Formerly 453.375; 1977 c.794 §12; 1977 c.895 §2; 1993 c.569 §9; repealed by 1995 c.505 §32]

**469.390** [Formerly 453.385; repealed by 1993 c.569 §31]

**469.400** [Formerly 453.395; 1977 c.794 §13; 1977 c.895 §3; repealed by 1993 c.569 §10 (469.401 and 469.403 enacted in lieu of 469.400)]

**469.401 Energy facility site certificate; conditions; effect of issuance on state and local government agencies.** (1) Upon approval, the site certificate or any amended site certificate with any conditions prescribed by the Energy Facility Siting Council shall be executed by the chairperson of the council and by the applicant. The certificate or amended certificate shall authorize the applicant to construct, operate and retire the facility subject to the conditions set forth in the site certificate or amended site certificate. The duration of the site certificate or amended site certificate shall be the life of the facility.

(2) The site certificate or amended site certificate shall contain conditions for the protection of the public health and safety, for the time for completion of construction, and to ensure compliance with the standards, statutes and rules described in ORS 469.501 and 469.503. The site certificate or amended site certificate shall require both parties to abide by local ordinances and state law and the rules of the council in effect on the date the site certificate or amended site certificate is executed, except that upon a clear showing of a significant threat to the public health, safety or the environment that requires application of later-adopted laws or rules, the council may require compliance with such later-adopted laws or rules. For a permit addressed in the site certificate or amended site certificate, the site certificate or amended site certificate shall provide for facility compliance with applicable state and federal laws adopted in the future to the extent that such compliance is required under the respective state agency statutes and rules.

(3) Subject to the conditions set forth in the site certificate or amended site certificate, any certificate or amended certificate signed by the chairperson of the council shall bind the state and all counties and cities and political subdivisions in this state as

to the approval of the site and the construction and operation of the facility. After issuance of the site certificate or amended site certificate, any affected state agency, county, city and political subdivision shall, upon submission by the applicant of the proper applications and payment of the proper fees, but without hearings or other proceedings, promptly issue the permits, licenses and certificates addressed in the site certificate or amended site certificate, subject only to conditions set forth in the site certificate or amended site certificate. After the site certificate or amended site certificate is issued, the only issue to be decided in an administrative or judicial review of a state agency or local government permit for which compliance with governing law was considered and determined in the site certificate or amended site certificate proceeding shall be whether the permit is consistent with the terms of the site certificate or amended site certificate. Each state or local government agency that issues a permit, license or certificate shall continue to exercise enforcement authority over the permit, license or certificate.

(4) Nothing in ORS chapter 469 shall be construed to preempt the jurisdiction of any state agency or local government over matters that are not included in and governed by the site certificate or amended site certificate. Such matters include but are not limited to employee health and safety, building code compliance, wage and hour or other labor regulations, local government fees and charges or other design or operational issues that do not relate to siting the facility. [1993 c.569 §11 (469.401 and 469.403 enacted in lieu of 469.400); 1995 c.505 §12; 1999 c.385 §2]

**469.402 Delegation of review of future action required by site certificate.** If the Energy Facility Siting Council elects to impose conditions on a site certificate or an amended site certificate, that require subsequent review and approval of a future action, the council may delegate the future review and approval to the State Department of Energy if, in the council's discretion, the delegation is warranted under the circumstances of the case. [1995 c.505 §27; 1999 c.385 §3]

**Note:** 469.402 was added to and made a part of 469.300 to 469.563 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.403 Rehearing on approval or rejection of application for site certificate or amendment; appeal; judicial review vested in Supreme Court; stay of order.**

(1) Any party to a contested case proceeding may apply for rehearing within 30 days from the date the approval or rejection is served. The date of service shall be the date on

which the Energy Facility Siting Council delivered or mailed its approval or rejection in accordance with ORS 183.470. The application for rehearing shall set forth specifically the ground upon which the application is based. No objection to the council's approval or rejection of an application for a site certificate or a site certificate amendment shall be considered on rehearing without good cause shown unless the basis for the objection is urged with reasonable specificity before the council in the site certificate or amended site certificate process. Upon such application, the council shall have the power to grant or deny rehearing or to abrogate or modify its order without further hearing. Unless the council acts upon the application for rehearing within 30 days after the application is filed, the application shall be considered denied. The filing of an application for rehearing shall not, unless specifically ordered by the council, operate as a stay of the site certificate or amended site certificate for the facility.

(2) Any party to a contested case proceeding on a site certificate or amended site certificate application may appeal the council's approval or rejection of the site certificate or amended site certificate application. Issues on appeal shall be limited to those raised by the parties to the contested case proceeding before the council.

(3) Jurisdiction for judicial review of the council's approval or rejection of an application for a site certificate or amended site certificate is conferred upon the Supreme Court. Proceedings for review shall be instituted by filing a petition in the Supreme Court. The petition shall be filed within 60 days after the date of service of the council's final order or within 30 days after the date the petition for rehearing is denied or deemed denied. Date of service shall be the date on which the council delivered or mailed its order in accordance with ORS 183.470.

(4) The filing of a petition for judicial review may not stay the order, except that a party to the contested case may apply to the Supreme Court for a stay upon a showing that there is a colorable claim of error and that:

(a) The petitioner will suffer irreparable injury; or

(b) Construction of the energy facility will result in irreparable harm to resources protected by applicable council standards or applicable agency or local government standards.

(5) If the Supreme Court grants a stay pursuant to subsection (4) of this section, the court:

(a) Shall require the petitioner requesting the stay to give an undertaking in the amount of \$5,000.

(b) May grant a stay in whole or in part.

(c) May impose other reasonable conditions on the stay.

(6) Except as otherwise provided in ORS 469.320 and this section, the review by the Supreme Court shall be the same as the review by the Court of Appeals described in ORS 183.482. The Supreme Court shall give priority on its docket to such a petition for review and shall render a decision within six months of the filing of the petition for review.

(7) The following periods of delay shall be excluded from the six-month period within which the court must render a decision under subsection (6) of this section:

(a) Any period of delay resulting from a motion properly before the court; or

(b) Any reasonable period of delay resulting from a continuance granted by the court on the court's own motion or at the request of one of the parties, if the court granted the continuance on the basis of findings that the ends of justice served by granting the continuance outweigh the best interests of the public and the other parties in having a decision within six months.

(8) No period of delay resulting from a continuance granted by the Supreme Court under subsection (7)(b) of this section shall be excluded from the six-month period unless the court sets forth, in the record, either orally or in writing, its reasons for finding that the ends of justice served by granting the continuance outweigh the best interests of the public and the other parties in having a decision within six months. The factors the court shall consider in determining whether to grant a continuance under subsection (7)(b) of this section are:

(a) Whether the failure to grant a continuance in the proceeding would be likely to make a continuation of the proceeding impossible or result in a miscarriage of justice; or

(b) Whether the case is so unusual or so complex, due to the number of parties involved or the existence of novel questions of fact or law, that it is unreasonable to expect adequate consideration of the issues within the six-month period.

(9) No continuance under subsection (7)(b) of this section shall be granted because of general congestion of the court calendar or lack of diligent preparation or attention to the case by any member of the court or any party. [1993 c.569 §12 (469.401 and 469.403 enacted in lieu of 469.400); 1995 c.505 §13; 1999 c.385 §4; 2001 c.683 §12]

**469.405 Amendment of site certificate; judicial review; exemption; rules.** (1) A site certificate may be amended with the approval of the Energy Facility Siting Council. The council may establish by rule the type of amendment that must be considered in a contested case proceeding. Judicial review of an amendment to a site certificate shall be as provided in ORS 469.403.

(2) Notwithstanding ORS 34.020 or 197.825, or any other provision of law, the land use approval by an affected local government of a proposed amendment to a facility and the recommendation of the special advisory group of applicable substantive criteria shall be subject to judicial review only as provided in ORS 469.403. If the applicant elects to show compliance with the statewide planning goals by demonstrating that the facility has received local land use approval, the provisions of this section shall apply only to proposed projects for which the land use approval by the local government occurs after the date an application for amendment is submitted to the State Department of Energy.

(3) An amendment to a site certificate is not required for a pipeline less than 16 inches in diameter and less than five miles in length that is proposed to be constructed to test or maintain an underground gas storage reservoir. If the proposed pipeline will connect to a council certified surface facility related to an underground gas storage reservoir or to a council certified gas pipeline, whether the proposed pipeline is to be located inside or outside the site of a council certified facility, the certificate holder must obtain, prior to construction, the approval of the department for the construction, operation and retirement of the proposed pipeline. The department shall approve such a proposed pipeline if the pipeline meets applicable council substantive standards. Notwithstanding ORS 469.503 (3), the department may not review the proposed pipeline for compliance with other state standards. Notwithstanding ORS 469.503 (4), or any council rule addressing compliance with land use standards, the department shall not review such a proposed pipeline for compliance with land use requirements. Notwithstanding ORS 469.401 (3), the approval by the department of such pipeline shall not bind any state or local agency. The council may adopt appropriate procedural rules for the department review. The department shall issue an order approving or rejecting the proposed pipeline. Judicial review of a department order under this section shall be as provided in ORS 469.403. [1995 c.505 §2; 1999 c.385 §5]

**Note:** 469.405 was added to and made a part of 469.300 to 469.563 by legislative action but was not

added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.407 Amendment of application to increase capacity of facility.** (1) A recipient may by amendment of its application for a site certificate or by amendment of its site certificate increase the capacity of the facility if the Energy Facility Siting Council finds that:

(a) The facility will satisfy the conditions of the 500-megawatt exemption, unless modified by the council;

(b) The enlarged facility does not exceed 500 megawatts and meets the applicable carbon dioxide standard provided for in ORS 469.503 (2) for any increase in capacity beyond the capacity of the 500-megawatt exemption; and

(c) The enlarged facility meets all other applicable council standards.

(2) A recipient is deemed to meet any applicable need standard and carbon dioxide emissions standard for the nominal generating capacity of the 500-megawatt exemption provided that the recipient satisfies the conditions of the 500-megawatt exemption, unless the council modifies the conditions.

(3) As used in this section:

(a) "Recipient" means any base load gas plant, as defined in ORS 469.503, determined by the council to have the lowest net monetized air emissions among the applicants participating in a contested case proceeding.

(b) "500-megawatt exemption" means the council order in which a recipient was determined to have the lowest net monetized air emissions. [1997 c.428 §8]

**Note:** 469.407 and 469.409 were added to and made a part of 469.300 to 469.563 by legislative action but were not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.409 Amendment of site certificate to demonstrate compliance with carbon dioxide emissions standard; binding arbitration to resolve disputes.** Any site certificate holder that is required by its site certificate or by law to demonstrate need for the facility shall instead demonstrate compliance with the carbon dioxide emissions standard applicable to the type of facility subject to the site certificate before beginning construction. Such a demonstration shall be made as an amendment to the site certificate. Notwithstanding ORS 469.405 or any council rule, if the site certificate holder proceeds pursuant to ORS 469.503 (2)(c)(A) or (C), or both, the Energy Facility Siting Council shall not conduct a contested case hearing on such amendment and the council's order shall not be subject to judicial review. Any dispute about the site cer-

tificate holder's demonstration of compliance with the applicable carbon dioxide emissions standard shall be settled through binding arbitration. [1997 c.428 §7]

**Note:** See note under 469.407.

**469.410 Energy facility site certificate applications filed or under construction prior to July 2, 1975; conditions of site certificate; monitoring programs.** (1) Any applicant for a site certificate for an energy facility shall be deemed to have met all the requirements of ORS 176.820, 192.338, 192.345, 192.355, 192.690, 469.010 to 469.155, 469.300 to 469.563, 469.990, 757.710 and 757.720 relating to eligibility for a site certificate and a site certificate shall be issued by the Energy Facility Siting Council for:

(a) Any transmission lines for which application has been filed with the federal government and the Public Utility Commission of Oregon prior to July 2, 1975; and

(b) Any energy facility under construction on July 2, 1975.

(2) Each applicant for a site certificate under this section shall pay the fees required by ORS 469.421 (2) to (9), if applicable, and shall execute a site certificate in which the applicant agrees:

(a) To abide by the conditions of all licenses, permits and certificates required by the State of Oregon or any subdivision in the state to operate the energy facility and issued prior to July 2, 1975; and

(b) On and after July 2, 1975, to abide by the rules of the Director of the State Department of Energy adopted pursuant to ORS 469.040 (1)(d) and rules of the council adopted pursuant to ORS 469.300 to 469.563, 469.590 to 469.619 and 469.930.

(3) The council has continuing authority over the site for which the site certificate is issued and may inspect, or direct the State Department of Energy to inspect, or request another state agency or local government to inspect, the site at any time in order to ensure that the facility is being operated consistently with the terms and conditions of the site certificate and any applicable health or safety standards.

(4) The council shall establish programs for monitoring the environmental and ecological effects of the operation and the decommissioning of energy facilities subject to site certificates issued prior to July 2, 1975, to ensure continued compliance with the terms and conditions of the site certificate and any applicable health or safety standards.

(5) Site certificates executed by the Governor under ORS 469.400 (1991 Edition) prior to July 2, 1975, shall bind successor agencies

created hereunder in accordance with the terms of such site certificates. Any holder of a site certificate issued prior to July 2, 1975, shall abide by the rules of the director adopted pursuant to ORS 469.040 (1)(d) and rules of the council adopted pursuant to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. [1975 c.606 §24; 1983 c.740 §184; 1989 c.88 §5; 1993 c.569 §13; 1995 c.505 §15]

**469.413 Power generation from fossil fuels; requirements for new and amended site certificates.** Notwithstanding ORS 469.320 and 469.405, the Energy Facility Siting Council may not:

(1) Issue a site certificate for a new generating facility that produces electric power from fossil fuels, including natural gas, petroleum, coal or any form of solid, liquid or gaseous fuel derived from such material, unless the council determines that a new generating facility will generate only nonemitting electricity as defined in ORS 469A.400; or

(2) Approve the amendment of a site certificate for an energy facility described under subsection (1) of this section that was granted prior to September 25, 2021, in a manner that would significantly increase the gross carbon dioxide emissions that are reasonably likely to result from the operation of the energy facility. [2021 c.508 §28]

**Note:** 469.413 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469.420** [Formerly 453.405; 1977 c.813 §1; 1979 c.234 §1; 1981 c.792 §3; repealed by 1981 c.792 §4 (469.421 enacted in lieu of 469.420)]

**469.421 Fees; exemptions; assessment of certain utilities and suppliers; penalty.**

(1) Subject to the provisions of ORS 469.441, any person submitting a notice of intent, a request for exemption under ORS 469.320, a request for an expedited review under ORS 469.370, a request for an expedited review under ORS 469.373, a request for the State Department of Energy to approve a pipeline under ORS 469.405 (3), an application for a site certificate or a request to amend a site certificate shall pay all expenses incurred by the Energy Facility Siting Council and the department related to the review and decision of the council. Expenses under this subsection may include:

(a) Legal expenses;

(b) Expenses incurred in processing and evaluating the application;

(c) Expenses incurred in issuing a final order or site certificate;

(d) Expenses incurred in commissioning an independent study under ORS 469.360;

(e) Compensation paid to a state agency, a tribe or a local government pursuant to a written contract or agreement relating to compensation as provided for in ORS 469.360; or

(f) Expenses incurred by the council in making rule changes that are specifically required and related to the particular site certificate.

(2) Every person submitting a notice of intent to file for a site certificate, a request for exemption or a request for expedited review shall pay the fee required under the fee schedule established under ORS 469.441 to the department prior to submitting the notice or request to the council. To the extent possible, the full cost of the evaluation shall be paid from the fee paid under this subsection. However, if costs of the evaluation exceed the fee, the person submitting the notice or request shall pay any excess costs shown in an itemized statement prepared by the council. In no event shall the council incur evaluation expenses in excess of 110 percent of the fee initially paid unless the council provides prior notification to the applicant and a detailed projected budget the council believes necessary to complete the project. If costs are less than the fee paid, the excess shall be refunded to the person submitting the notice or request.

(3) Before submitting a site certificate application, the applicant shall request from the department an estimate of the costs expected to be incurred in processing the application. The department shall inform the applicant of that amount and require the applicant to make periodic payments of the costs pursuant to a cost reimbursement agreement. The cost reimbursement agreement shall provide for payment of 25 percent of the estimated costs when the applicant submits the application. If costs of the evaluation exceed the estimate, the applicant shall pay any excess costs shown in an itemized statement prepared by the council. In no event shall the council incur evaluation expenses in excess of 110 percent of the fee initially estimated unless the council provided prior notification to the applicant and a detailed projected budget the council believes is necessary to complete the project. If costs are less than the fee paid, the council shall refund the excess to the applicant.

(4) Any person who is delinquent in the payment of fees under subsections (1) to (3) of this section shall be subject to the provisions of subsection (11) of this section.

(5) Subject to the provisions of ORS 469.441, each holder of a certificate shall pay an annual fee, due every July 1 following issuance of a site certificate. For each fiscal year, upon approval of the department's bud-

get authorization by an odd-numbered year regular session of the Legislative Assembly or as revised by the Emergency Board meeting in an interim period or by the Legislative Assembly meeting in special session or in an even-numbered year regular session, the Director of the State Department of Energy promptly shall enter an order establishing an annual fee based on the amount of revenues that the director estimates is needed to fund the cost of ensuring that the facility is being operated consistently with the terms and conditions of the site certificate, any order issued by the department under ORS 469.405 (3) and any applicable health or safety standards. In determining this cost, the director shall include both the actual direct cost to be incurred by the council and the department to ensure that the facility is being operated consistently with the terms and conditions of the site certificate, any order issued by the department under ORS 469.405 (3) and any applicable health or safety standards, and the general costs to be incurred by the council and the department to ensure that all certificated facilities are being operated consistently with the terms and conditions of the site certificates, any orders issued by the department under ORS 469.405 (3) and any applicable health or safety standards that cannot be allocated to an individual, licensed facility. Not more than 35 percent of the annual fee charged each facility shall be for the recovery of these general costs. The fees for direct costs shall reflect the size and complexity of the facility, the anticipated costs of ensuring compliance with site certificate conditions, the anticipated costs of conducting site inspections and compliance reviews as described in ORS 469.430, and the anticipated costs of compensating state agencies and local governments for participating in site inspection and compliance enforcement activities at the request of the council.

(6) Each holder of a site certificate executed after July 1 of any fiscal year shall pay a fee for the remaining portion of the year. The amount of the fee shall be set at the cost of regulating the facility during the remaining portion of the year determined in the same manner as the annual fee.

(7) When the actual costs of regulation incurred by the council and the department for the year, including that portion of the general regulation costs that have been allocated to a particular facility, are less than the annual fees for that facility, the unexpended balance shall be refunded to the site certificate holder. When the actual regulation costs incurred by the council and the department for the year, including that portion of the general regulation costs that have been allocated to a particular facility, are

projected to exceed the annual fee for that facility, the director may issue an order revising the annual fee.

(8)(a) In addition to any other fees required by law, each energy resource supplier shall pay to the department annually its share of an assessment to fund the programs and activities of the council and the department.

(b) Prior to filing an agency request budget under ORS 291.208 for purposes related to the compilation and preparation of the Governor's budget under ORS 291.216, the director shall determine the projected aggregate amount of revenue to be collected from energy resource suppliers under this subsection that will be necessary to fund the programs and activities of the council and the department for each fiscal year of the upcoming biennium. After making that determination, the director shall convene a public meeting with representatives of energy resource suppliers and other interested parties for the purpose of providing energy resource suppliers with a full accounting of:

(A) The projected revenue needed to fund each department program or activity; and

(B) The projected allocation of moneys derived from the assessment imposed under this subsection to each department program or activity.

(c) Upon approval of the budget authorization of the council and the department by an odd-numbered year regular session of the Legislative Assembly, the director shall promptly enter an order establishing the amount of revenues required to be derived from an assessment pursuant to this subsection in order to fund programs and activities that the council and the department are charged with administering and authorized to conduct under the laws of this state, including those enumerated in ORS 469.030, for the first fiscal year of the forthcoming biennium. On or before June 1 of each even-numbered year, the director shall enter an order establishing the amount of revenues required to be derived from an assessment pursuant to this subsection in order to fund the programs and activities that the council and the department are charged with administering and authorized to conduct under the laws of this state, including those enumerated in ORS 469.030, for the second fiscal year of the biennium. The order shall take into account any revisions to the biennial budget of the council and the department made by the Emergency Board meeting in an interim period or by the Legislative Assembly meeting in special session or in an even-numbered year regular session.

(d) Each order issued by the director pursuant to paragraph (c) of this subsection

shall allocate the aggregate assessment set forth in the order to energy resource suppliers in accordance with paragraph (e) of this subsection.

(e) The amount assessed to an energy resource supplier shall be based on the ratio which that supplier's annual gross operating revenue derived within this state in the preceding calendar year bears to the total gross operating revenue derived within this state during that year by all energy resource suppliers. The assessment against an energy resource supplier shall not exceed 0.375 percent of the supplier's gross operating revenue derived within this state in the preceding calendar year. The director shall exempt from payment of an assessment any individual energy resource supplier whose calculated share of the annual assessment is less than \$250.

(f) The director shall send each energy resource supplier subject to assessment pursuant to this subsection a copy of each order issued by registered or certified mail or through use of an electronic medium with electronic receipt verification. The amount assessed to the energy resource supplier pursuant to the order shall be considered to the extent otherwise permitted by law a government-imposed cost and recoverable by the energy resource supplier as a cost included within the price of the service or product supplied.

(g) The amounts assessed to individual energy resource suppliers pursuant to paragraph (e) of this subsection shall be paid to the department as follows:

(A) Amounts assessed for the first fiscal year of a biennium shall be paid not later than 90 days following adjournment sine die of the odd-numbered year regular session of the Legislative Assembly; and

(B) Amounts assessed for the second fiscal year of a biennium shall be paid not later than July 1 of each even-numbered year or 90 days following adjournment sine die of the even-numbered year regular session of the Legislative Assembly, whichever is later.

(h) An energy resource supplier shall provide the director, on or before May 1 of each year, a verified statement showing its gross operating revenues derived within the state for the calendar or fiscal year that was used by the energy resource supplier for the purpose of reporting federal income taxes for the preceding calendar or fiscal year. The statement must be in the form prescribed by the director and is subject to audit by the director. The statement must include an entry showing the total operating revenue derived by petroleum suppliers from fuels sold that are subject to the requirements of Article IX, section 3a, of the Oregon Consti-

tion, and ORS 319.020 with reference to aircraft fuel and motor vehicle fuel, and ORS 319.530. The director may grant an extension of not more than 15 days for the requirements of this subsection if:

(A) The energy supplier makes a showing of hardship caused by the deadline;

(B) The energy supplier provides reasonable assurance that the energy supplier can comply with the revised deadline; and

(C) The extension of time does not prevent the council or the department from fulfilling its statutory responsibilities.

(i) As used in this section:

(A) "Energy resource supplier" means an electric utility, natural gas utility or petroleum supplier supplying, generating, transmitting or distributing electricity, natural gas or petroleum products in Oregon.

(B) "Gross operating revenue" means gross receipts from sales or service made or provided within this state during the regular course of the energy supplier's business, but does not include either revenue derived from interutility sales within the state or revenue received by a petroleum supplier from the sale of fuels that are subject to the requirements of Article IX, section 3a, of the Oregon Constitution, or ORS 319.020 or 319.530.

(C) "Petroleum supplier" has the meaning given that term in ORS 469.020.

(j) In determining the amount of revenues that must be derived from any class of energy resource suppliers by assessment pursuant to this subsection, the director shall take into account all other known or readily ascertainable sources of revenue to the council and department, including, but not limited to, fees imposed under this section and federal funds, and may take into account any funds previously assessed pursuant to ORS 469.420 (1979 Replacement Part) or section 7, chapter 792, Oregon Laws 1981.

(k) Orders issued by the director pursuant to this section shall be subject to judicial review under ORS 183.484. The taking of judicial review shall not operate to stay the obligation of an energy resource supplier to pay amounts assessed to it on or before the statutory deadline.

(9)(a) In addition to any other fees required by law, each operator of a nuclear fueled thermal power plant or nuclear installation within this state shall pay to the department annually on July 1 an assessment in an amount determined by the director to be necessary to fund the activities of the state and the counties associated with emergency preparedness for a nuclear fueled thermal power plant or nuclear installation. The assessment shall not exceed \$461,250 per

year. Moneys collected as assessments under this subsection are continuously appropriated to the department for this purpose.

(b) The department shall maintain and cause other state agencies and counties to maintain time and billing records for the expenditure of any fees collected from an operator of a nuclear fueled thermal power plant under paragraph (a) of this subsection.

(10) Reactors operated by a college, university or graduate center for research purposes and electric utilities not connected to the Northwest Power Grid are exempt from the fee requirements of subsections (5), (8) and (9) of this section.

(11)(a) All fees assessed by the director against holders of site certificates for facilities that have an installed capacity of 500 megawatts or greater may be paid in several installments, the schedule for which shall be negotiated between the director and the site certificate holder.

(b) Energy resource suppliers or applicants or holders of a site certificate who fail to pay a fee provided under subsections (1) to (9) of this section after it is due and payable shall pay, in addition to that fee, a penalty of two percent of the fee a month for the period that the fee is past due. Any payment made according to the terms of a schedule negotiated under paragraph (a) of this subsection shall not be considered past due. The director may bring an action to collect an unpaid fee or penalty in the name of the State of Oregon in a court of competent jurisdiction. The court may award reasonable attorney fees to the director if the director prevails in an action under this subsection. The court may award reasonable attorney fees to a defendant who prevails in an action under this subsection if the court determines that the director had no objectively reasonable basis for asserting the claim or no reasonable basis for appealing an adverse decision of the trial court. **469.424 Energy resource suppliers; notice regarding comments in proceedings; rules.** (1) As used in this section, “energy resource supplier” has the meaning given that term in ORS 469.421.

(2)(a) If the State Department of Energy submits comments or written or oral testimony in a rulemaking, contested case, ratemaking or other proceeding conducted by another agency, as defined in ORS 183.310, and if the comment or testimony is about a substantive matter at issue in the proceeding, the department shall provide, once for

each proceeding, notice to energy resource suppliers as described in this section.

(b) If the department submits written comments or intervenes in a proceeding conducted by a federal agency, the department shall provide, once for each proceeding, notice to energy resource suppliers as described in this section.

(c) This section does not apply to:

(A) The department’s participation in a procedural matter related to a proceeding described in paragraph (a) or (b) of this subsection;

(B) The department’s participation in a federal facility siting proceeding;

(C) The department’s work with the Energy Facility Siting Council;

(D) The department’s work on nuclear safety and emergency preparedness; or

(E) Federal judicial or legislative proceedings.

(3) The department shall create and maintain a list of energy resource suppliers that request to receive notice described in subsection (2) of this section. The department may create separate lists for the different types of proceedings.

(4) Notice provided under this section may be provided by electronic mail and must include a description of the department’s interest in the proceeding.

(5) Except as provided in subsection (6) of this section, notice must be provided under this section:

(a) No later than seven days before submitting initial comments on a substantive matter at issue in a rulemaking proceeding described in subsection (2)(a) of this section or a proceeding involving the adoption of federal regulations;

(b) No later than 15 days before submitting initial comments or written or oral testimony on a substantive matter at issue in a contested case, ratemaking or other proceeding described in subsection (2)(a) of this section; or

(c) No later than 15 days before submitting initial written comments or written testimony on a substantive matter at issue in a proceeding conducted by a federal agency other than a proceeding involving the adoption of federal regulations.

(6) If providing notice in accordance with subsection (5) of this section is prejudicial to the department’s ability to participate in a rulemaking, contested case, ratemaking or other proceeding described in subsection (2) of this section, the department may provide notice as soon as it is practicable to provide notice. If the department provides notice as

described in this subsection, the department shall include in the notice an explanation of why providing notice in accordance with subsection (5) of this section is prejudicial to the department.

(7) The department may adopt rules as necessary to implement this section. [2013 c.656 §6]

**Note:** 469.424 was added to and made a part of 469.300 to 469.563 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**469.426 Advisory group; energy resource suppliers.** (1) The Director of the State Department of Energy shall convene an advisory work group composed of stakeholders representing energy resource suppliers, the customers who ultimately pay for the energy supplier assessment imposed under ORS 469.421 (8) through their energy bills and other groups that have an interest in the provision and regulation of energy in this state.

(2) The advisory work group shall review and make recommendations on the State Department of Energy's proposals related to:

(a) Planning, policy and technical analysis;

(b) Legislative concepts; and

(c) The department's requested budget.

(3) The work group shall meet at least two times per year at the call of the director. [2013 c.656 §3]

**Note:** 469.426 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469.430 Site inspections; compliance reviews.** (1) The Energy Facility Siting Council has continuing authority over the site for which the site certificate is issued, including but not limited to the authority to:

(a) Inspect, or direct the State Department of Energy to inspect, or request another state agency or local government to inspect, the site at any time in order to ensure that the facility is being operated consistently with the terms and conditions of the site certificate or any order issued by the department under ORS 469.405 (3); and

(b) Periodically review documents, reports and other materials, or direct the State Department of Energy or request another state agency or local government to review documents, reports or other materials, to ensure that the facility continues to comply with all terms and conditions of the site certificate or any order issued by the department under ORS 469.405 (3).

(2) The council shall avoid duplication of effort with site inspections and compliance

reviews by other state and federal agencies and local governments that have issued permits or licenses for the facility.

(3) If the council requests that another state agency or local government conduct a site inspection or compliance review under this section, the council may compensate that state agency or local government for expenses related to the site inspection or compliance review. [Formerly 453.415; 1993 c.569 §15; 1995 c.505 §16; 1999 c.385 §7; 2015 c.488 §3]

**469.440 Grounds for revocation or suspension of certificates.** Pursuant to the procedures for contested cases in ORS chapter 183, a site certificate or an amended site certificate may be revoked or suspended:

(1) For failure to comply with the terms or conditions of the site certificate or amended site certificate;

(2) For violation of the provisions of ORS 469.525 to 469.563, 469.590 to 469.619, 469.930 and 469.992 or rules adopted pursuant to ORS 469.525 to 469.563, 469.590 to 469.619, 469.930 and 469.992; or

(3) If the site certificate was executed prior to July 2, 1975, for violation of the provisions of ORS 469.300 to 469.520 or rules adopted pursuant to ORS 469.300 to 469.520 or for failure to comply with applicable health or safety standards. [Formerly 453.425; 1993 c.569 §16; 1995 c.505 §17; 1999 c.385 §8]

**469.441 Justification of fees charged; judicial review.** (1) All expenses incurred by the Energy Facility Siting Council and the State Department of Energy under ORS 469.360 and 469.421 that are charged to or allocated to the fee paid by an applicant or the holder of a site certificate shall be necessary, just and reasonable. Upon request, the department or the council shall provide a detailed justification for all charges to the applicant or site certificate holder. Not later than January 1 of each odd-numbered year, the council by order shall establish a schedule of fees which those persons submitting a notice of intent, a request for an exemption, a request for a pipeline described in ORS 469.405 (3) or a request for an expedited review must submit under ORS 469.421 prior to submitting the notice of intent, request for exemption, request for pipeline or request for expedited review. The fee schedule shall be designed to recover the council's actual costs of evaluating the notice of intent, request for exemption, request for pipeline or request for expedited review subject to any applicable expenditure limitation in the council's budget. Fees shall be based upon actual, historical costs incurred by the council and department to the extent historical costs are available. The fees established by the schedule shall reflect the size and complexity of the project for which a notice of intent, re-

quest for exemption, request for pipeline or request for expedited review is submitted, whether the notice of intent, request for exemption, request for pipeline or request for expedited review is for a new or existing facility and other appropriate variables having an effect on the expense of evaluation.

(2) If a dispute arises regarding the necessity or reasonableness of expenses charged to or allocated to the fee paid by an applicant or site certificate holder, the applicant or holder may seek judicial review for the amount of expenses charged or allocated in circuit court as provided in ORS 183.480, 183.484, 183.490 and 183.500. If the applicant or holder establishes that any of the charges or allocations are unnecessary or unreasonable, the council or the department shall refund the amount found to be unnecessary or unreasonable. The applicant or holder shall not waive the right to judicial review by paying the portion of the fee or expense in dispute. [1989 c.88 §8; 1993 c.569 §17; 1999 c.385 §9; 2015 c.488 §4]

#### (High Voltage Transmission Lines)

**469.442 Procedure prior to construction of transmission line in excess of 230,000 volts; review committee.** (1) Any person who proposes to construct a transmission line in excess of 230,000 volts capacity that is not otherwise under the jurisdiction of the Energy Facility Siting Council shall:

(a) Give public notice of the proposed action at least six months before beginning any process to obtain local permits required for the proposed transmission line. Notification shall be given:

(A) By publication once a week for four consecutive weeks in a newspaper of general circulation in the county or counties in which the transmission line is to be constructed; and

(B) To the governing bodies and planning directors of cities and counties which are within or partially within the project study area.

(b) Provide an opportunity for public comment on the proposed transmission line and conduct public meetings to review the proposal.

(c) Respond specifically and in writing to local concerns and recommendations regarding the proposed transmission line.

(2) The Director of the State Department of Energy shall establish a committee to include technical experts and members of the public to coordinate public review of a proposed transmission line under subsection (1) of this section when requested to do so by

ordinance or resolution of the affected governing body.

(3) At the conclusion of the public review, the committee shall make a summary report to the affected governing body including public concerns and recommendations concerning the proposed transmission line.

(4) The scope of work and cost of conducting the review shall be negotiated between the State Department of Energy and the project sponsor. The negotiated cost shall be paid by the project sponsor.

(5) Subsections (1) to (4) of this section shall not apply to a person who proposes to construct transmission lines entirely within 500 feet of an existing corridor occupied by transmission lines with a capacity in excess of 230,000 volts. [1987 c.200 §2; 1993 c.569 §18]

**469.445** [1987 c.200 §3; repealed by 1993 c.569 §31]

#### (Administration)

**469.450 Energy Facility Siting Council; appointment; confirmation; term; restrictions.** (1) There is established in the State Department of Energy an Energy Facility Siting Council, consisting of seven public members, who shall be appointed by the Governor, subject to confirmation by the Senate in the manner prescribed in ORS 171.562 and 171.565.

(2) The term of office of each member is four years, but a member serves at the pleasure of the Governor. Before the expiration of the term of a member, the Governor shall appoint a successor whose term begins on July 1 next following. A member is eligible for reappointment, but no member shall serve more than two full terms. If there is a vacancy for any cause, the Governor shall make an appointment to become immediately effective for the unexpired term.

(3) No member of the council shall be an employee, director or retired employee or director of, or a consultant to, or have any pecuniary interest, other than an incidental interest which is disclosed and made a matter of public record at the time of the appointment to the council, in:

(a) Any corporation or utility operating or interested in establishing an energy facility in this state; or

(b) Any manufacturer of equipment related to the operation or establishment of an energy facility in this state.

(4) No member shall for two years after the expiration of the term of the member accept employment with an owner or operator of an energy facility that is subject to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

(5) Employment of a person in violation of this section shall be grounds for revocation of any license issued by this state or an agency of this state that is held by the owner or operator of the energy facility that employs the person.

(6) The State Department of Energy shall provide clerical and staff support to the council and fund the activities of the council through fees collected under ORS 469.421. [Formerly 453.435; 1995 c.551 §12; 2013 c.656 §10]

**469.460 Officers; meetings; compensation and expenses.** (1) The Energy Facility Siting Council shall annually elect from among its members a chairperson and vice chairperson with such powers and duties as the council imposes in accordance with ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. The council may meet as often as it requires at a time and place determined by the council. A majority of the members of the council constitutes a quorum. The Governor or the chairperson of the council may call a special meeting, to be held at any place in this state designated by the person calling the meeting, upon 24 hours' notice to each member and to the public.

(2) Council members shall be entitled to compensation and expenses as provided in ORS 292.495. [Formerly 453.445; 2021 c.110 §1]

**469.470 Powers and duties; rules.** The Energy Facility Siting Council shall:

(1) Conduct and prepare, independently or in cooperation with others, studies, investigations, research and programs relating to all aspects of site selection.

(2) In accordance with the applicable provisions of ORS chapter 183, and subject to the provisions of ORS 469.501 (3), adopt standards and rules to perform the functions vested by law in the council including the adoption of standards and rules for the siting of energy facilities pursuant to ORS 469.501, and implementation of the energy policy of the State of Oregon set forth in ORS 469.010 and 469.310.

(3) Encourage voluntary cooperation by the people, municipalities, counties, industries, agriculture, and other pursuits, in performing the functions vested by law in the council.

(4) Advise, consult, and cooperate with other agencies of the state, political subdivisions, industries, other states, the federal government and affected groups, in furtherance of the purposes of ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

(5) Consult with the Water Resources Commission on the need for power and other areas within the expertise of the council when the Water Resources Commission is

determining whether to allocate water for hydroelectric development.

(6) Perform such other and further acts as may be necessary, proper or desirable to carry out effectively the duties, powers and responsibilities of the council described in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. [Formerly 453.455; 1991 c.480 §7; 1993 c.544 §5; 1993 c.569 §19; 1995 c.505 §18]

**469.480 Local government advisory group; special advisory groups; compensation and expenses; Electric and Magnetic Field Committee; rules.** (1) The Energy Facility Siting Council shall designate as a special advisory group the governing body of any local government within whose jurisdiction the facility is proposed to be located.

(2) In addition to advisory groups required by subsection (1) of this section the council may establish such special advisory groups as are considered necessary. Such advisory groups shall include membership as determined by the council to represent interests and disciplines as needed to carry out the responsibility assigned to such advisory groups, which shall report findings, recommendations and decisions to the council.

(3) Subject to applicable laws regulating travel and other expenses of state officers and employees, members of any advisory committee appointed under subsection (1) of this section shall receive no compensation but may receive their actual and necessary travel and other expenses incurred in the performance of their official duties.

(4) The council by rule shall form an Electric and Magnetic Field Committee which shall meet at the call of the council chair. The committee shall include representatives of the public, utilities, manufacturers and state agencies. The committee shall monitor information being developed on electric and magnetic fields and report the committee's findings to the council. The council shall report the findings of the Electric and Magnetic Field Committee to the Legislative Assembly. [Formerly 453.475; 1991 c.491 §1; 1993 c.569 §20; 1995 c.551 §17]

#### **(Rules; Standards; Compliance)**

**469.490 Adoption of rules; determination of validity.** All rules adopted by the Energy Facility Siting Council pursuant to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992 shall be adopted in the manner required by ORS chapter 183. The validity of any rule adopted by the council may be determined only upon a petition by any person to the Supreme Court. The petition must be filed within 60 days after the date the rule becomes effective under ORS 183.355. The review by the Supreme Court of

the validity of any rule adopted by the council shall otherwise be according to ORS 183.400. The Supreme Court shall give priority on its docket to such a petition for review. [Formerly 453.495; 1995 c.505 §19]

**469.500** [Formerly 453.505; repealed by 1993 c.569 §21 (469.501, 469.503, 469.505 and 469.507 enacted in lieu of 469.500 and 469.510)]

**469.501 Energy facility siting, construction, operation and retirement standards; exemptions; rules.** (1) The Energy Facility Siting Council shall adopt standards for the siting, construction, operation and retirement of facilities. The standards may address but need not be limited to the following subjects:

(a) The organizational, managerial and technical expertise of the applicant to construct and operate the proposed facility.

(b) Seismic hazards.

(c) Areas designated for protection by the state or federal government, including but not limited to monuments, wilderness areas, wildlife refuges, scenic waterways and similar areas.

(d) The financial ability and qualifications of the applicant.

(e) Effects of the facility, taking into account mitigation, on fish and wildlife, including threatened and endangered fish, wildlife or plant species.

(f) Impacts of the facility on historic, cultural or archaeological resources listed on, or determined by the State Historic Preservation Officer to be eligible for listing on, the National Register of Historic Places or the Oregon State Register of Historic Properties.

(g) Protection of public health and safety, including necessary safety devices and procedures.

(h) The accumulation, storage, disposal and transportation of nuclear waste.

(i) Impacts of the facility on recreation, scenic and aesthetic values.

(j) Reduction of solid waste and wastewater generation to the extent reasonably practicable.

(k) Ability of the communities in the affected area to provide sewers and sewage treatment, water, storm water drainage, solid waste management, housing, traffic safety, police and fire protection, health care and schools.

(L) The need for proposed nongenerating facilities as defined in ORS 469.503, consistent with the state energy policy set forth in ORS 469.010 and 469.310. The council may consider least-cost plans when adopting a need standard or in determining whether an applicable need standard has been met. The

council shall not adopt a standard requiring a showing of need or cost-effectiveness for generating facilities as defined in ORS 469.503.

(m) Compliance with the statewide planning goals adopted by the Land Conservation and Development Commission as specified by ORS 469.503.

(n) Soil protection.

(o) For energy facilities that emit carbon dioxide, the impacts of those emissions on climate change. For fossil-fueled power plants, as defined in ORS 469.503, the council shall apply a standard as provided for by ORS 469.503 (2).

(2) The council may adopt exemptions from any need standard adopted under subsection (1)(L) of this section if the exemption is consistent with the state's energy policy set forth in ORS 469.010 and 469.310.

(3)(a) The council may issue a site certificate for a facility that does not meet one or more of the applicable standards adopted under subsection (1) of this section if the council determines that the overall public benefits of the facility outweigh any adverse effects on a resource or interest protected by the applicable standards the facility does not meet.

(b) The council by rule shall specify the criteria by which the council makes the determination described in paragraph (a) of this subsection.

(4) Notwithstanding subsection (1) of this section, the council may not impose any standard developed under subsection (1)(b), (f), (j) or (k) of this section to approve or deny an application for an energy facility producing power from wind, solar or geothermal energy. However, the council may, to the extent it determines appropriate, apply any standards adopted under subsection (1)(b), (f), (j) or (k) of this section to impose conditions on any site certificate issued for any energy facility. [1993 c.569 §22 (469.501, 469.503, 469.505 and 469.507 enacted in lieu of 469.500 and 469.510); 1995 c.505 §20; 1997 c.428 §3; 2001 c.134 §7; 2013 c.263 §1]

**469.503 Requirements for approval of energy facility site certificate; carbon dioxide emissions standard; offset funds; use of offset funds by qualifying organization; rules.** In order to issue a site certificate, the Energy Facility Siting Council shall determine that the preponderance of the evidence on the record supports the following conclusions:

(1) The facility complies with the applicable standards adopted by the council pursuant to ORS 469.501 or the overall public benefits of the facility outweigh any adverse effects on a resource or interest protected by

the applicable standards the facility does not meet.

(2) If the energy facility is a fossil-fueled power plant, the energy facility complies with any applicable carbon dioxide emissions standard adopted by the council or enacted by statute. Base load gas plants shall comply with the standard set forth in subsection (2)(a) of this section. Other fossil-fueled power plants shall comply with any applicable standard adopted by the council by rule pursuant to subsection (2)(b) of this section. Subsections (2)(c) and (d) of this section prescribe the means by which an applicant may comply with the applicable standard.

(a) The net carbon dioxide emissions rate of the proposed base load gas plant shall not exceed 0.70 pounds of carbon dioxide emissions per kilowatt hour of net electric power output, with carbon dioxide emissions and net electric power output measured on a new and clean basis. Notwithstanding the foregoing, the council may by rule modify the carbon dioxide emissions standard for base load gas plants if the council finds that the most efficient stand-alone combined cycle, combustion turbine, natural gas-fired energy facility that is commercially demonstrated and operating in the United States has a net heat rate of less than 7,200 Btu per kilowatt hour higher heating value adjusted to ISO conditions. In modifying the carbon dioxide emission standard, the council shall determine the rate of carbon dioxide emissions per kilowatt hour of net electric output of such energy facility, adjusted to ISO conditions, and reset the carbon dioxide emissions standard at 17 percent below this rate.

(b) The council shall adopt carbon dioxide emissions standards for other types of fossil-fueled power plants. Such carbon dioxide emissions standards shall be promulgated by rule. In adopting or amending such carbon dioxide emissions standards, the council shall consider and balance at least the following principles, the findings on which shall be contained in the rulemaking record:

- (A) Promote facility fuel efficiency;
- (B) Promote efficiency in the resource mix;
- (C) Reduce net carbon dioxide emissions;
- (D) Promote cogeneration that reduces net carbon dioxide emissions;
- (E) Promote innovative technologies and creative approaches to mitigating, reducing or avoiding carbon dioxide emissions;
- (F) Minimize transaction costs;
- (G) Include an alternative process that separates decisions on the form and imple-

mentation of offsets from the final decision on granting a site certificate;

(H) Allow either the applicant or third parties to implement offsets;

(I) Be attainable and economically achievable for various types of power plants;

(J) Promote public participation in the selection and review of offsets;

(K) Promote prompt implementation of offset projects;

(L) Provide for monitoring and evaluation of the performance of offsets; and

(M) Promote reliability of the regional electric system.

(c) The council shall determine whether the applicable carbon dioxide emissions standard is met by first determining the gross carbon dioxide emissions that are reasonably likely to result from the operation of the proposed energy facility. Such determination shall be based on the proposed design of the energy facility. The council shall adopt site certificate conditions to ensure that the predicted carbon dioxide emissions are not exceeded on a new and clean basis. For any remaining emissions reduction necessary to meet the applicable standard, the applicant may elect to use any of subparagraphs (A) to (D) of this paragraph, or any combination thereof. The council shall determine the amount of carbon dioxide or other greenhouse gas emissions reduction that is reasonably likely to result from the applicant's offsets and whether the resulting net carbon dioxide emissions meet the applicable carbon dioxide emissions standard. For purposes of determining the net carbon dioxide emissions, the council shall by rule establish the global warming potential of each greenhouse gas based on a generally accepted scientific method, and convert any greenhouse gas emissions to a carbon dioxide equivalent. Unless otherwise provided by the council by rule, the global warming potential of methane is 23 times that of carbon dioxide, and the global warming potential of nitrous oxide is 296 times that of carbon dioxide. If the council or a court on judicial review concludes that the applicant has not demonstrated compliance with the applicable carbon dioxide emissions standard under subparagraphs (A), (B) or (D) of this paragraph, or any combination thereof, and the applicant has agreed to meet the requirements of subparagraph (C) of this paragraph for any deficiency, the council or a court shall find compliance based on such agreement.

(A) The facility will sequentially produce electrical and thermal energy from the same fuel source, and the thermal energy will be used to displace another source of carbon

dioxide emissions that would have otherwise continued to occur, in which case the council shall adopt site certificate conditions ensuring that the carbon dioxide emissions reduction will be achieved.

(B) The applicant or a third party will implement particular offsets, in which case the council may adopt site certificate conditions ensuring that the proposed offsets are implemented but shall not require that predicted levels of avoidance, displacement or sequestration of greenhouse gas emissions be achieved. The council shall determine the quantity of greenhouse gas emissions reduction that is reasonably likely to result from each of the proposed offsets based on the criteria in sub-subparagraphs (i) to (iii) of this subparagraph. In making this determination, the council shall not allow credit for offsets that have already been allocated or awarded credit for greenhouse gas emissions reduction in another regulatory setting. In addition, the fact that an applicant or other parties involved with an offset may derive benefits from the offset other than the reduction of greenhouse gas emissions is not, by itself, a basis for withholding credit for an offset.

(i) The degree of certainty that the predicted quantity of greenhouse gas emissions reduction will be achieved by the offset;

(ii) The ability of the council to determine the actual quantity of greenhouse gas emissions reduction resulting from the offset, taking into consideration any proposed measurement, monitoring and evaluation of mitigation measure performance; and

(iii) The extent to which the reduction of greenhouse gas emissions would occur in the absence of the offsets.

(C) The applicant or a third party agrees to provide funds in an amount deemed sufficient to produce the reduction in greenhouse gas emissions necessary to meet the applicable carbon dioxide emissions standard, in which case the funds shall be used as specified in paragraph (d) of this subsection. Unless modified by the council as provided below, the payment of 57 cents shall be deemed to result in a reduction of one ton of carbon dioxide emissions. The council shall determine the offset funds using the monetary offset rate and the level of emissions reduction required to meet the applicable standard. If a site certificate is approved based on this subparagraph, the council may not adjust the amount of such offset funds based on the actual performance of offsets. After three years from June 26, 1997, the council may by rule increase or decrease the monetary offset rate of 57 cents per ton of carbon dioxide emissions. Any change to the monetary offset rate shall be based on em-

pirical evidence of the cost of offsets and the council's finding that the standard will be economically achievable with the modified rate for natural gas-fired power plants. Following the initial three-year period, the council may increase or decrease the monetary offset rate no more than 50 percent in any two-year period.

(D) Any other means that the council adopts by rule for demonstrating compliance with any applicable carbon dioxide emissions standard.

(d) If the applicant elects to meet the applicable carbon dioxide emissions standard in whole or in part under paragraph (c)(C) of this subsection, the applicant shall identify the qualified organization. The applicant may identify an organization that has applied for, but has not received, an exemption from federal income taxation, but the council may not find that the organization is a qualified organization unless the organization is exempt from federal taxation under section 501(c)(3) of the Internal Revenue Code as amended and in effect on December 31, 1996. The site certificate holder shall provide a bond or comparable security in a form reasonably acceptable to the council to ensure the payment of the offset funds and the amount required under subparagraph (A)(ii) of this paragraph. Such security shall be provided by the date specified in the site certificate, which shall be no later than the commencement of construction of the facility. The site certificate shall require that the offset funds be disbursed as specified in subparagraph (A) of this paragraph, unless the council finds that no qualified organization exists, in which case the site certificate shall require that the offset funds be disbursed as specified in subparagraph (B) of this paragraph.

(A) The site certificate holder shall disburse the offset funds and any other funds required by sub-subparagraph (ii) of this subparagraph to the qualified organization as follows:

(i) When the site certificate holder receives written notice from the qualified organization certifying that the qualified organization is contractually obligated to pay any funds to implement offsets using the offset funds, the site certificate holder shall make the requested amount available to the qualified organization unless the total of the amount requested and any amounts previously requested exceeds the offset funds, in which case only the remaining amount of the offset funds shall be made available. The qualified organization shall use at least 80 percent of the offset funds for contracts to implement offsets. The qualified organization shall assess offsets for their potential to

qualify in, generate credits in or reduce obligations in other regulatory settings. The qualified organization may use up to 20 percent of the offset funds for monitoring, evaluation, administration and enforcement of contracts to implement offsets.

(ii) At the request of the qualified organization and in addition to the offset funds, the site certificate holder shall pay the qualified organization an amount equal to 10 percent of the first \$500,000 of the offset funds and 4.286 percent of any offset funds in excess of \$500,000. This amount shall not be less than \$50,000 unless a lesser amount is specified in the site certificate. This amount compensates the qualified organization for its costs of selecting offsets and contracting for the implementation of offsets.

(iii) Notwithstanding any provision to the contrary, a site certificate holder subject to this subparagraph shall have no obligation with regard to offsets, the offset funds or the funds required by sub-subparagraph (ii) of this subparagraph other than to make available to the qualified organization the total amount required under paragraph (c) of this subsection and sub-subparagraph (ii) of this subparagraph, nor shall any nonperformance, negligence or misconduct on the part of the qualified organization be a basis for revocation of the site certificate or any other enforcement action by the council with respect to the site certificate holder.

(B) If the council finds there is no qualified organization, the site certificate holder shall select one or more offsets to be implemented pursuant to criteria established by the council. The site certificate holder shall give written notice of its selections to the council and to any person requesting notice. On petition by the State Department of Energy, or by any person adversely affected or aggrieved by the site certificate holder's selection of offsets, or on the council's own motion, the council may review such selection. The petition must be received by the council within 30 days of the date the notice of selection is placed in the United States mail, with first-class postage prepaid. The council shall approve the site certificate holder's selection unless it finds that the selection is not consistent with criteria established by the council. The site certificate holder shall contract to implement the selected offsets within 18 months after commencing construction of the facility unless good cause is shown requiring additional time. The contracts shall obligate the expenditure of at least 85 percent of the offset funds for the implementation of offsets. No more than 15 percent of the offset funds may be spent on monitoring, evaluation and enforcement of the contract to implement the

selected offsets. The council's criteria for selection of offsets shall be based on the criteria set forth in paragraphs (b)(C) and (c)(B) of this subsection and may also consider the costs of particular types of offsets in relation to the expected benefits of such offsets. The council's criteria shall not require the site certificate holder to select particular offsets, and shall allow the site certificate holder a reasonable range of choices in selecting offsets. In addition, notwithstanding any other provision of this section, the site certificate holder's financial liability for implementation, monitoring, evaluation and enforcement of offsets pursuant to this subsection shall be limited to the amount of any offset funds not already contractually obligated. Nonperformance, negligence or misconduct by the entity or entities implementing, monitoring or evaluating the selected offset shall not be a basis for revocation of the site certificate or any other enforcement action by the council with respect to the site certificate holder.

(C) Every qualified organization that has received funds under this paragraph shall, at five-year intervals beginning on the date of receipt of such funds, provide the council with the information the council requests about the qualified organization's performance. The council shall evaluate the information requested and, based on such information, shall make any recommendations to the Legislative Assembly that the council deems appropriate.

(e) As used in this subsection:

(A) "Adjusted to ISO conditions" means carbon dioxide emissions and net electric power output as determined at 59 degrees Fahrenheit, 14.7 pounds per square inch atmospheric pressure and 60 percent humidity.

(B) "Base load gas plant" means a generating facility that is fueled by natural gas, except for periods during which an alternative fuel may be used and when such alternative fuel use shall not exceed 10 percent of expected fuel use in Btu, higher heating value, on an average annual basis, and where the applicant requests and the council adopts no condition in the site certificate for the generating facility that would limit hours of operation other than restrictions on the use of alternative fuel. The council shall assume a 100 percent capacity factor for such plants and a 30-year life for the plants for purposes of determining gross carbon dioxide emissions.

(C) "Carbon dioxide equivalent" means the global warming potential of a greenhouse gas reflected in units of carbon dioxide.

(D) "Fossil-fueled power plant" means a generating facility that produces electric power from natural gas, petroleum, coal or

any form of solid, liquid or gaseous fuel derived from such material.

(E) “Generating facility” means those energy facilities that are defined in ORS 469.300 (11)(a)(A), (B) and (D).

(F) “Global warming potential” means the determination of the atmospheric warming resulting from the release of a unit mass of a particular greenhouse gas in relation to the warming resulting from the release of the equivalent mass of carbon dioxide.

(G) “Greenhouse gas” means carbon dioxide, methane and nitrous oxide.

(H) “Gross carbon dioxide emissions” means the predicted carbon dioxide emissions of the proposed energy facility measured on a new and clean basis.

(I) “Net carbon dioxide emissions” means gross carbon dioxide emissions of the proposed energy facility, less carbon dioxide or other greenhouse gas emissions avoided, displaced or sequestered by any combination of cogeneration or offsets.

(J) “New and clean basis” means the average carbon dioxide emissions rate per hour and net electric power output of the energy facility, without degradation, as determined by a 100-hour test at full power completed during the first 12 months of commercial operation of the energy facility, with the results adjusted for the average annual site condition for temperature, barometric pressure and relative humidity and use of alternative fuels, and using a rate of 117 pounds of carbon dioxide per million Btu of natural gas fuel and a rate of 161 pounds of carbon dioxide per million Btu of distillate fuel, if such fuel use is proposed by the applicant. The council may by rule adjust the rate of pounds of carbon dioxide per million Btu for natural gas or distillate fuel. The council may by rule set carbon dioxide emissions rates for other fuels.

(K) “Nongenerating facility” means those energy facilities that are defined in ORS 469.300 (11)(a)(C) and (E) to (I).

(L) “Offset” means an action that will be implemented by the applicant, a third party or through the qualified organization to avoid, sequester or displace emissions.

(M) “Offset funds” means the amount of funds determined by the council to satisfy the applicable carbon dioxide emissions standard pursuant to paragraph (c)(C) of this subsection.

(N) “Qualified organization” means an entity that:

(i) Is exempt from federal taxation under section 501(c)(3) of the Internal Revenue Code as amended and in effect on December 31, 1996;

(ii) Either is incorporated in the State of Oregon or is a foreign corporation authorized to do business in the State of Oregon;

(iii) Has in effect articles of incorporation that require that offset funds received pursuant to this section are used for offsets that require that decisions on the use of the offset funds are made by a decision-making body composed of seven voting members of which three are appointed by the council, three are Oregon residents appointed by the Bullitt Foundation or an alternative environmental nonprofit organization named by the body, and one is appointed by the applicants for site certificates that are subject to paragraph (d) of this subsection and the holders of such site certificates, and that require nonvoting membership on the body for holders of site certificates that have provided funds not yet disbursed under paragraph (d)(A) of this subsection;

(iv) Has made available on an annual basis, beginning after the first year of operation, a signed opinion of an independent certified public accountant stating that the qualified organization’s use of funds pursuant to this statute conforms with generally accepted accounting procedures except that the qualified organization shall have one year to conform with generally accepted accounting principles in the event of a nonconforming audit;

(v) Has to the extent applicable, except for good cause, entered into contracts obligating at least 60 percent of the offset funds to implement offsets within two years after the commencement of construction of the facility; and

(vi) Has to the extent applicable, except for good cause, complied with paragraph (d)(A)(i) of this subsection.

(3) Except as provided in ORS 469.504 for land use compliance and except for those statutes and rules for which the decision on compliance has been delegated by the federal government to a state agency other than the council, the facility complies with all other Oregon statutes and administrative rules identified in the project order, as amended, as applicable to the issuance of a site certificate for the proposed facility. If compliance with applicable Oregon statutes and administrative rules, other than those involving federally delegated programs, would result in conflicting conditions in the site certificate, the council may resolve the conflict consistent with the public interest. A resolution may not result in the waiver of any applicable state statute.

(4) The facility complies with the statewide planning goals adopted by the Land Conservation and Development Commission. [1993 c.569 §23 (469.501, 469.503, 469.505 and 469.507 en-

acted in lieu of 469.500 and 469.510); 1995 c.505 §21; 1997 c.428 §4; 1999 c.365 §11; 2001 c.134 §10; 2003 c.186 §78; 2011 c.298 §2; 2013 c.263 §2]

**469.504 Facility compliance with statewide planning goals; exception; amendment of local plan and land use regulations; conflicts; technical assistance; rules.** (1) A proposed facility shall be found in compliance with the statewide planning goals under ORS 469.503 (4) if:

(a) The facility has received local land use approval under the acknowledged comprehensive plan and land use regulations of the affected local government; or

(b) The Energy Facility Siting Council determines that:

(A) The facility complies with applicable substantive criteria from the affected local government's acknowledged comprehensive plan and land use regulations that are required by the statewide planning goals and in effect on the date the application is submitted, and with any Land Conservation and Development Commission administrative rules and goals and any land use statutes that apply directly to the facility under ORS 197.646;

(B) For an energy facility or a related or supporting facility that must be evaluated against the applicable substantive criteria pursuant to subsection (5) of this section, that the proposed facility does not comply with one or more of the applicable substantive criteria but does otherwise comply with the applicable statewide planning goals, or that an exception to any applicable statewide planning goal is justified under subsection (2) of this section; or

(C) For a facility that the council elects to evaluate against the statewide planning goals pursuant to subsection (5) of this section, that the proposed facility complies with the applicable statewide planning goals or that an exception to any applicable statewide planning goal is justified under subsection (2) of this section.

(2) The council may find goal compliance for a facility that does not otherwise comply with one or more statewide planning goals by taking an exception to the applicable goal. Notwithstanding the requirements of ORS 197.732, the statewide planning goal pertaining to the exception process or any rules of the Land Conservation and Development Commission pertaining to an exception process goal, the council may take an exception to a goal if the council finds:

(a) The land subject to the exception is physically developed to the extent that the land is no longer available for uses allowed by the applicable goal;

(b) The land subject to the exception is irrevocably committed as described by the rules of the Land Conservation and Development Commission to uses not allowed by the applicable goal because existing adjacent uses and other relevant factors make uses allowed by the applicable goal impracticable; or

(c) The following standards are met:

(A) Reasons justify why the state policy embodied in the applicable goal should not apply;

(B) The significant environmental, economic, social and energy consequences anticipated as a result of the proposed facility have been identified and adverse impacts will be mitigated in accordance with rules of the council applicable to the siting of the proposed facility; and

(C) The proposed facility is compatible with other adjacent uses or will be made compatible through measures designed to reduce adverse impacts.

(3) If compliance with applicable substantive local criteria and applicable statutes and state administrative rules would result in conflicting conditions in the site certificate or amended site certificate, the council shall resolve the conflict consistent with the public interest. A resolution may not result in a waiver of any applicable state statute.

(4) An applicant for a site certificate shall elect whether to demonstrate compliance with the statewide planning goals under subsection (1)(a) or (b) of this section. The applicant shall make the election on or before the date specified by the council by rule.

(5) Upon request by the State Department of Energy, the special advisory group established under ORS 469.480 shall recommend to the council, within the time stated in the request, the applicable substantive criteria under subsection (1)(b)(A) of this section. If the special advisory group does not recommend applicable substantive criteria within the time established in the department's request, the council may either determine and apply the applicable substantive criteria under subsection (1)(b) of this section or determine compliance with the statewide planning goals under subsection (1)(b)(B) or (C) of this section. If the special advisory group recommends applicable substantive criteria for an energy facility described in ORS 469.300 or a related or supporting facility that does not pass through more than one local government jurisdiction or more than three zones in any one jurisdiction, the council shall apply the criteria recommended by the special advisory group. If the special advisory group recommends applicable substantive criteria for an

energy facility as defined in ORS 469.300 (11)(a)(C) to (E) or a related or supporting facility that passes through more than one jurisdiction or more than three zones in any one jurisdiction, the council shall review the recommended criteria and determine whether to evaluate the proposed facility against the applicable substantive criteria recommended by the special advisory group, against the statewide planning goals or against a combination of the applicable substantive criteria and statewide planning goals. In making its determination, the council shall consult with the special advisory group and shall consider:

(a) The number of jurisdictions and zones in question;

(b) The degree to which the applicable substantive criteria reflect local government consideration of energy facilities in the planning process; and

(c) The level of consistency of the applicable substantive criteria from the various zones and jurisdictions.

(6) The council is not subject to ORS 197.180 and a state agency may not require an applicant for a site certificate to comply with any rules or programs adopted under ORS 197.180.

(7) On or before its next periodic review, each affected local government shall amend its comprehensive plan and land use regulations as necessary to reflect the decision of the council pertaining to a site certificate or amended site certificate.

(8) Notwithstanding ORS 34.020 or 197.825 or any other provision of law, the affected local government's land use approval of a proposed facility under subsection (1)(a) of this section and the special advisory group's recommendation of applicable substantive criteria under subsection (5) of this section shall be subject to judicial review only as provided in ORS 469.403. If the applicant elects to comply with subsection (1)(a) of this section, the provisions of this subsection shall apply only to proposed projects for which the land use approval of the local government occurs after the date a notice of intent or an application for expedited processing is submitted to the State Department of Energy.

(9) The State Department of Energy, in cooperation with other state agencies, shall provide, to the extent possible, technical assistance and information about the siting process to local governments that request such assistance or that anticipate having a facility proposed in their jurisdiction. [1997 c.428 §5; 1999 c.385 §10; 2001 c.134 §11; 2003 c.186 §79; 2005 c.829 §12]

**Note:** 469.504 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 469 or any series therein by legislative

action. See Preface to Oregon Revised Statutes for further explanation.

**469.505 Consultation with other agencies.** (1) In making a determination regarding compliance with statutes, rules and ordinances administered by another agency or compliance with requirements of ORS 469.300 to 469.563 and 469.590 to 469.619 where another agency has special expertise, consultation with the other agency shall occur during the notice of intent and site certificate application process. Any permit application for which the permitting decision has been delegated by the federal government to a state agency other than the Energy Facility Siting Council shall be reviewed, whenever feasible, simultaneously with the council's review of the site certificate application. Any hearings required on such permit applications shall be consolidated, whenever feasible, with hearings under ORS 469.300 to 469.563 and 469.590 to 469.619.

(2) Before resolving any conflicting conditions in site certificates or amended site certificates under ORS 469.503 (3) and 469.504, the council shall notify and consult with the agencies and local governments responsible for administering the statutes, administrative rules or substantive local criteria that result in the conflicting conditions regarding potential conflict resolution. [1993 c.569 §24 (469.501, 469.503, 469.505 and 469.507 enacted in lieu of 469.500 and 469.510); 1997 c.428 §9; 1999 c.385 §11]

**469.507 Monitoring environmental and ecological effects of construction and operation of energy facilities.** (1) The site certificate holder shall establish programs for monitoring the environmental and ecological effects of the construction and operation of facilities subject to site certificates to assure continued compliance with the terms and conditions of the certificate. The programs shall be subject to review and approval by the Energy Facility Siting Council.

(2) The site certificate holder shall perform the testing and sampling necessary for the monitoring program or require the operator of the plant to perform the necessary testing or sampling pursuant to guidelines established by the Energy Facility Siting Council or its designee. The council and the Director of the State Department of Energy shall have access to operating logs, records and reprints of the certificate holder, including those required by federal agencies.

(3) The monitoring program may be conducted in cooperation with any federally operated program if the information available from the federal program is acceptable to the council, but no federal program shall be substituted totally for monitoring supervised by the council or its designee.

(4) The monitoring program shall include monitoring of the transportation process for all radioactive material removed from any nuclear fueled thermal power plant or nuclear installation. [1993 c.569 §25 (469.501, 469.503, 469.505 and 469.507 enacted in lieu of 469.500 and 469.510); 1995 c.505 §22]

**469.520 Cooperation of state governmental bodies; adoption of rules by state agencies on energy facility development.**

(1) Each state agency and political subdivision in this state that is concerned with energy facilities shall inform the State Department of Energy, promptly of its activities and programs relating to energy and radiation.

(2) Each state agency proposing to adopt, amend or rescind a rule relating to energy facility development first shall file a copy of its proposal with the council, which may order such changes as it considers necessary to conform to state policy as stated in ORS 469.010 and 469.310.

(3) The effective date of a rule relating to energy facility development, or an amendment or rescission thereof, shall not be sooner than 10 days subsequent to the filing of a copy of such proposal with the council. [Formerly 453.525]

**(Plant Operations; Radioactive Wastes)**

**469.525 Prohibitions on radioactive waste disposal, arrangements for disposal, transportation for disposal and disposal facilities; exceptions; rules.** (1)

Notwithstanding any other provision of this chapter, no radioactive waste shall be disposed of within this state, no person may arrange for disposal of radioactive waste within this state, no person may transport radioactive waste for disposal in this state and no waste disposal facility for any radioactive waste shall be established, operated or licensed within this state, except as follows:

(a) Wastes generated before June 1, 1981, through industrial or manufacturing processes which contain only naturally occurring radioactive isotopes which are disposed of at sites approved by the Energy Facility Siting Council in accordance with ORS 469.375.

(b) Medical, industrial and research laboratory wastes contained in small, sealed, discrete containers in which the radioactive material is dissolved or dispersed in an organic solvent or biological fluid for the purpose of liquid scintillation counting and experimental animal carcasses shall be disposed of or treated at a hazardous waste disposal facility licensed by the Department of Environmental Quality and in a manner

consistent with rules adopted by the Department of Environmental Quality after consultation with and approval by the Oregon Health Authority.

(c) Maintenance of radioactive coal ash at the site of a thermal power plant for which a site certificate has been issued pursuant to this chapter shall not constitute operation of a waste disposal facility so long as such coal ash is maintained in accordance with the terms of the site certificate as amended from time to time as necessary to protect the public health and safety.

(2) The Energy Facility Siting Council shall, in accordance with the applicable provisions of ORS chapter 183, adopt standards and rules as necessary to prevent the disposal of radioactive waste within this state.

(3) For purposes of this section, disposal does not include the temporary storage of:

(a) Radioactive waste used or generated pursuant to a license granted under ORS 453.635;

(b) Radioactive waste from a nuclear-fueled thermal power plant for which a site certificate has been issued pursuant to this chapter, on the site of that plant, until a permanent storage site is made available by the federal government; or

The department shall review the county procedures to determine whether they are compatible with the rules of the department. [1983 c.586 §46]

**469.535 Governor may assume control of emergency operations during nuclear accident or catastrophe.** Notwithstanding ORS chapter 401, when an emergency exists because of an accident or catastrophe in the operation of a nuclear power plant or nuclear installation or in the transportation of radioactive material, the Governor, for the duration of the emergency, may:

(1) Assume complete control of all emergency operations in the area affected by the accident or catastrophe, direct all rescue and salvage work and do all things deemed advisable and necessary to alleviate the immediate conditions.

(2) Assume control of all police and law enforcement activities in such area, including the activities of all local police and peace officers.

(3) Close all roads and highways in such area to traffic or by order of the Director of the State Department of Energy limit the travel on such roads to such extent as the director deems necessary and expedient.

(4) Designate persons to coordinate the work of public and private relief agencies operating in such area and exclude from such area any person or agency refusing to cooperate with other agencies engaged in emergency work.

[Formerly 453.770]

**469.540 Reductions or curtailment of operations for violation of safety standards; notice; time period for repairs; transport and disposal of radioactive materials.** (1) In instances where the Director of the State Department of Energy determines either from the monitoring or surveillance of the director that there is danger of violation of a safety standard adopted under ORS 469.501 from the continued operation of a plant or installation, the director may order temporary reductions or curtailment of operations until such time as proper safety precautions can be taken.

(2) An order of reduction or curtailment shall be entered only after notice to the thermal power plant or installation and only after a reasonable time, considering the extent of the danger, has been allowed for repairs or other alterations that would bring the plant or installation into conformity with applicable safety standards.

(3) The director may order compliance or impose other safety conditions on the transport or disposal of radioactive materials or wastes if the director believes that ORS 469.300 to 469.619 and 469.930 or rules adopted pursuant thereto are being violated or are in danger of being violated. [Formerly 453.545; 1989 c.6 §2; 1993 c.569 §26; 2003 c.186 §31]

**469.550 Order for halt of plant operations or activities with radioactive material; notice.** (1) Whenever in the judgment of the Director of the State Department of Energy from the results of monitoring or surveillance of operation of any nuclear-fueled thermal power plant or nuclear installation or based upon information from the Energy Facility Siting Council there is cause to believe that there is clear and immediate danger to the public health and safety from continued operation of the plant or installation, the director shall, in cooperation with appropriate state and federal agencies, without hearing or prior notice, order the operation of the plant halted by service of the order on the plant superintendent or other person charged with the operation thereof. Within 24 hours after such order, the director must appear in the appropriate circuit court to petition for the relief afforded under ORS 469.563 and may commence proceedings for revocation of the site certificate if grounds therefor exist.

(2) Whenever, in the judgment of the director based upon monitoring or surveillance by the director, or based upon information from the council, there is cause to believe that there is clear and immediate danger to the public health and safety from the accu-

mulation or storage of radioactive material located at a nuclear-fueled thermal power plant or a nuclear installation, the director shall in cooperation with appropriate state and federal agencies, without hearing or prior notice, order such accumulation, storage, disposal or transportation halted or immediately impose safety precautions by service of the order on the officer responsible for the accumulation, storage, disposal or transportation. Within 24 hours after such an order, the director must appear in the appropriate circuit court to petition for the relief afforded under ORS 469.563.

(3)(a) If the director believes there is a clear and immediate danger to public health or safety, the director shall halt the transportation or disposal of radioactive material or waste.

(b) The director shall serve an order to halt the transportation or disposal of radioactive material on the person responsible for the transport or disposal. The order may be served without prior hearing or notice.

(c) Within 24 hours after the director serves an order under paragraph (b) of this subsection, the director shall petition the appropriate circuit court for relief under ORS 469.563.

The council is authorized to assess fees in accordance with ORS 469.421 in connection with site certificates applied for or issued under this section. [1979 c.283 §7; 1987 c.633 §1; 1993 c.569 §27; 1995 c.505 §25]

**469.556 Rules governing uranium-related activities.** The Energy Facility Siting Council shall adopt rules governing the location, construction and operation of uranium mills and uranium mill tailings disposal

facilities and the treatment, storage and disposal of uranium mine overburden for the protection of the public health and safety and the environment. [1979 c.283 §8]

**469.559 Cooperative agreements authorized between council and federal officials and agencies; rules; powers of Governor; exception for inactive or abandoned site.** (1) Notwithstanding the authority of the Oregon Health Authority pursuant to ORS 453.605 to 453.800 to regulate radiation sources or the requirements of ORS 469.525, the Energy Facility Siting Council may enter into and carry out cooperative agreements with the Secretary of Energy pursuant to Title I and the Nuclear Regulatory Commission pursuant to Title II of the Uranium Mill Tailings Radiation Control Act of 1978, Public Law 95-604, and perform or cause to be performed any and all acts necessary to be performed by the state, including the acquisition by condemnation or otherwise, retention and disposition of land or interests therein, in order to implement that Act and rules, standards and guidelines adopted pursuant thereto. The Energy Facility Siting Council may adopt, amend or repeal rules in accordance with ORS chapter 183 and may receive and disburse funds in connection with the implementation and administration of this section.

(2) The Energy Facility Siting Council and the State Department of Energy may enter into and carry out cooperative agreements and arrangements with any agency of the federal government implementing the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, 42 U.S.C. section 9601 et seq., to clean up wastes and contaminated material, including overburden, created by uranium mining before June 29, 1989. Any such project need not obtain a site certificate from the council, but shall nevertheless comply with all applicable, relevant or appropriate state standards including but not limited to those set forth in ORS 469.375 and rules adopted by the council and other state agencies to implement such standards.

(3) The Governor may do any and all things necessary to implement the requirements of the federal Acts referred to in subsections (1) and (2) of this section.

(4) Notwithstanding ORS 469.553, after June 25, 1979, no site certificate is required for the cleanup and disposal of an inactive or abandoned uranium mill tailings site as authorized under subsection (1) of this section and Title I of the Uranium Mill Tailings Radiation Control Act of 1978, Public Law 95-604. If the person establishes that any of the charges are unnecessary or unreasonable, the department shall refund the amount found to be unnecessary or unreasonable. The person may not waive the right to judicial review by paying the portion of the fee or expense in dispute. [2021 c.38 §4]

### (Oregon Hanford Cleanup Board)

**469.566 Legislative findings.** (1) The Legislative Assembly finds and declares that Oregon is not assured that the United States Department of Energy will:

(a) Consider the unique features of Oregon and the needs of the people of Oregon when assessing the Hanford Nuclear Reservation as a potentially suitable location for the long-term disposal of high-level radioactive waste; or

(b) Ensure adequate opportunity for public participation in the assessment process.

(2) Over the past 45 years, the United States has developed and produced nuclear weapons at the Hanford Nuclear Reservation and during this period large quantities of radioactive hazardous and chemical wastes have accumulated at the Hanford Nuclear Reservation, and the waste sites pose an immediate and serious long-term threat to the environment and to public health and safety.

(3) Therefore, the Legislative Assembly declares that it is in the best interests of the State of Oregon to establish an Oregon Hanford Cleanup Board to serve as a focus for the State of Oregon in the development of a state policy to be presented to the federal government, to ensure a maximum of public participation in the assessment and cleanup process. [1987 c.514 §1; 1991 c.562 §3; 2001 c.104 §204; 2003 c.186 §33]

**Note:** 469.566 to 469.583 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**Note:** See note under 469.566.

#### (Federal Site Selection)

**469.584 Findings.** The Legislative Assembly and the people of the State of Oregon find that:

(1) In order to solve the problem of high-level radioactive waste disposal, Congress established a process for selecting two sites for the safe, permanent and regionally equitable disposal of such waste.

(2) The process of selecting three sites as final candidates, including the Hanford Nuclear Reservation in the State of Washington, for a first high-level nuclear waste repository by the United States Department of Energy violated the intent and the mandate of Congress.

(3) The United States Department of Energy has prematurely deferred consideration of numerous potential sites and disposal media that its own research indicates are more appropriate, safer and less expensive.

(4) Placement of a repository at Hanford without methodical and independently verified scientific evaluation threatens the health and safety of the people and the environment of this state.

(5) The selection process is flawed and not credible because it did not include independent experts in the selection of the sites and in the review of the selected sites, as recommended by the National Academy of Sciences.

(6) By postponing indefinitely all site specific work for an eastern repository, the United States Department of Energy has not complied with the intent of Congress expressed in the Nuclear Waste Policy Act, Public Law 97-425, and the fundamental compromise which enabled its enactment. [1987 c.13 §1; 2001 c.104 §211]

**Note:** 469.584 and 469.585 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469.585 Activities of state related to selection of high-level radioactive waste disposal site.** In order to achieve complete compliance with federal law and protect the health, safety and welfare of the people of the State of Oregon, the Legislative Assembly, other statewide officials and state agencies shall use all legal means necessary to:

(1) Suspend the preliminary site selection process for a high-level nuclear waste repository, including the process of site characterization, until there is compliance with the intent of the Nuclear Waste Policy Act;

(2) Reverse the Secretary of Energy's decision to postpone indefinitely all site specific work on locating and developing an eastern repository for high-level nuclear waste;

(3) Insist that the United States Department of Energy's site selection process, when resumed, considers all acceptable geologic

media and results in safe, scientifically justified and regionally and geographically equitable high-level nuclear waste disposal;

(4) Demand that federal budget actions fully and completely follow the intent of the Nuclear Waste Policy Act;

(5) Continue to pursue alliances with other states and interested parties, particularly with Pacific Northwest Governors, legislatures and other parties, affected by the site selection process and transportation of high-level nuclear waste; and

(6) Ensure that Oregon, because of its close geographic and geologic proximity to the proposed Hanford Nuclear Reservation site, be accorded the same status under federal law as a state in which a high-level nuclear repository is proposed to be located. [1987 c.13 §2; 2001 c.104 §212]

**Note:** See note under 469.584.

#### **(Hanford Nuclear Reservation)**

**469.586 Findings.** The Legislative Assembly and the people of the State of Oregon find that:

(1) The maintenance of healthy, unpolluted river systems, airsheds and land are essential to the economic vitality and well-being of the citizens of the State of Oregon and the Pacific Northwest.

(2) Radioactive waste stored at the Hanford Nuclear Reservation is already leaking into and contaminating the water table and watershed of the Columbia River and radioactive materials and toxic compounds have been found in plants, animals and waters downstream from the Hanford Nuclear Reservation and constitute a present and potential threat to the health, safety and welfare of the people of the State of Oregon.

(3) The Hanford Nuclear Reservation is now one of the most radioactively contaminated sites in the world, according to government studies, and will require billions of dollars in costs for cleanup and the ongoing assessment of health effects.

(4) In November 1980, the people of the State of Oregon, by direct vote in a statewide election, enacted a moratorium on the construction of nuclear power plants, and no nuclear power plants are presently operating in the State of Oregon.

(5) In May 1987, the people of the State of Oregon, by direct vote in a statewide election, enacted Ballot Measure 1, opposing the disposal of highly radioactive spent fuel from commercial power plants at the Hanford Nuclear Reservation.

(6) In 1995, the Legislative Assembly resolved that Oregon should have all legal

rights in matters affecting the Hanford Nuclear Reservation, including party status in the Hanford tri-party agreement that governs the cleanup of the reservation.

(7) Throughout the administrations of Presidents Ford, Carter, Reagan and Bush, the policy of the federal government banned the use of plutonium in commercial nuclear power plants due to the risk that the plutonium could be diverted to terrorists and to nations that have not renounced the use of nuclear weapons.

(8) The federal government has announced that it will process plutonium from weapons with uranium to produce mixed oxide fuel for commercial nuclear power plants and other nuclear facilities. The Hanford Nuclear Reservation, located on the Columbia River, is a primary candidate site being considered for the production facilities.

(9) The production of mixed oxide fuel will result in enormous new quantities of radioactive and chemical wastes that will present significant additional disposal problems and unknown costs. [1997 c.617 §1]

**Note:** 469.586 and 469.587 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469.587 Position of State of Oregon related to operation of Hanford Nuclear Reservation.** The Legislative Assembly and the people of the State of Oregon:

(1) Declare that the State of Oregon is unalterably opposed to the use of the Hanford Nuclear Reservation for operations that create more contamination at the Hanford Nuclear Reservation, divert resources from cleanup at the Hanford Nuclear Reservation and make the Hanford Nuclear Reservation cleanup more difficult, such as the processing of plutonium to fuel nuclear power plants, reactors or any other facilities, and further declare that vitrification in a safe manner is the preferred means to dispose of excess plutonium, in order to protect human health and the environment.

(2) Request that the President of the United States and the Secretary of Energy continue their previous policy of banning the use of plutonium to fuel commercial power plants and nuclear facilities.

(3) Request that the federal government honor the federal government's original mandate to implement and complete the cleanup and restoration of the Hanford Nuclear Reservation. [1997 c.617 §2]

**Note:** See note under 469.586.

**(Siting of Nuclear-Fueled Thermal Power Plants)**

**469.590 Definitions for ORS 469.590 to 469.595.** As used in ORS 469.590 to 469.595:

(1) “High-level radioactive waste” means spent nuclear fuel or the radioactive by-products from the reprocessing of spent nuclear fuel.

(2) “Spent nuclear fuel” means nuclear fuel rods or assemblies which have been irradiated in a power reactor and subsequently removed from that reactor. [1981 c.1 §2]

**469.593 Findings.** The people of this state find that if no permanent repository for high-level radioactive waste is provided by the federal government, the residents of the state may face the undue financial burden of paying for construction of a repository for such wastes. Therefore, the people of this state enact ORS 469.590 to 469.601. [1981 c.1 §1]

**469.594 Storage of high-level radioactive waste after expiration of license prohibited; continuing responsibility for storage; implementation agreements.** (1) Notwithstanding the definition of a “waste disposal facility” under ORS 469.300, no high-level radioactive waste should be stored at the site of a nuclear-fueled thermal power plant after the expiration of the operating license issued to the nuclear power plant by the United States Nuclear Regulatory Commission.

(2) Notwithstanding subsection (1) of this section, a person operating a nuclear power plant under a license issued by the United States Nuclear Regulatory Commission shall remain responsible for proper temporary storage of high-level radioactive materials at the site of the nuclear power plant after termination of a license and until such materials are removed from the site for permanent storage.

(3) The State Department of Energy and the operators of nuclear-fueled thermal plants shall pursue agreements with the United States Department of Energy and the United States Nuclear Regulatory Commission to fulfill the provisions of this section. [1985 c.434 §2; 1991 c.480 §11; 1993 c.569 §28; 1995 c.505 §24; 2001 c.134 §12]

**469.595 Condition to site certificate for nuclear-fueled thermal power plant.** Before issuing a site certificate for a nuclear-fueled thermal power plant, the Energy Facility Siting Council must find that an adequate repository for the disposal of the high-level radioactive waste produced by the plant has been licensed to operate by the appropriate agency of the federal government. The repository must provide for the

terminal disposition of such waste, with or without provision for retrieval for reprocessing. [1981 c.1 §3]

## DESIGNATED STATE AGENCY PROGRAMS FOR ENERGY EFFICIENCY IN BUILDINGS

**469.760 Legislative findings; state goals related to adoption and use of heat pump technologies.** (1) The Legislative Assembly finds that:

(a) Energy consumption in residential and commercial buildings accounted for 34 percent of annual greenhouse gas emissions in this state in 2021, according to the Department of Environmental Quality;

(b) Space and water heating account for 64 percent of an average residential building's energy use;

(c) Heat pumps provide both heating and cooling benefits that keep people safe during extreme weather events that are becoming more frequent and more intense as a consequence of climate change;

(d) Electric heat pumps can provide up to three times more heat energy than the electrical energy the heat pumps consume, which makes heat pumps the most energy efficient space heating option available in the market;

(e) Upgrading space and water heating appliances with contemporary heat pump technologies can help people to save money on household energy bills;

(f) Existing and forthcoming state and federal incentive programs will assist in energy efficiency improvements in homes and buildings, including adoption of energy efficient heating and cooling appliances;

(g) Many residents of this state suffer from disproportionately high energy burdens, and environmental justice communities face greater barriers to purchasing and installing heat pumps and other energy efficient appliances; and

(h) Additional support and innovative solutions are necessary to ensure that all households in this state benefit from energy efficient appliances and heating and cooling upgrades.

(2) The Legislative Assembly declares as goals for this state:

(a) That owners, operators or residents of residential or commercial buildings in this state install and use at least 500,000 new heat pumps by 2030;

(b) That the state provide programs and support for accelerating purchases and installations of heat pump technologies to help meet the state's greenhouse gas emissions reduction goals;

(c) That the programs and support described in paragraph (b) of this subsection should prioritize environmental justice communities and individuals who reside in houses and structures that do not have a functioning, adequate or affordable heating or cooling system;

(d) That the state evaluate the adoption and use of heat pump technologies regularly to determine whether the rate of adoption and use will enable the state to meet greenhouse gas emissions reduction goals; and

(e) That the agencies of the executive branch of state government lead by example by acquiring, installing and using heat pump technologies. [2023 c.442 §1]

**Note:** 469.760 to 469.772 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469 or any series therein by leg-

islative action. See Preface to Oregon Revised Statutes for further explanation.

**469.895 Application of ORS 469.890 to 469.900 to publicly owned utility.** (1) ORS 469.890 and 469.900 (3) and this section apply in any calendar year to a publicly owned utility only if during the second preceding calendar year sales of electric energy by the publicly owned utility for purposes other than resale exceeded 750 million kilowatt-hours. For the purpose of ORS 469.890 and 469.900 (3) and this section, a publicly owned utility with sales for nonresale purposes in excess of 750 million kilowatt-hours during the second preceding calendar year shall be known as a "covered publicly owned utility."

(2) ORS 469.890 and 469.900 (3) and this section shall not apply to a covered publicly owned utility if the Director of the State Department of Energy determines that its existing commercial energy conservation services program meets or exceeds the requirements of those sections.

**NORTHWEST INTERSTATE COMPACT  
ON LOW-LEVEL RADIOACTIVE  
WASTE MANAGEMENT**

**469.930 Northwest Interstate Compact on Low-Level Radioactive Waste Management.** The Northwest Interstate Compact on Low-Level Radioactive Waste Management is enacted into law by the State of Oregon and entered into with all other jurisdictions lawfully joining therein in a form as provided for as follows:

---

**ARTICLE I  
Policy and Purpose**

The party states recognize that low-level radioactive wastes are generated by essential activities and services that benefit the citizens of the states. It is further recognized that the protection of the health and safety of the citizens of the party states and the most economical management of low-level radioactive wastes can be accomplished through cooperation of the states in minimizing the amount of handling and transportation required to dispose of such wastes and through the cooperation of the states in providing facilities that serve the region. It is the policy of the party states to undertake the necessary cooperation to protect the health and safety of the citizens of the party states and to provide for the most economical management of low-level radioactive wastes on a continuing basis. It is the purpose of this compact to provide the means for such a cooperative effort among the party states so that the protection of the citizens of the states and the maintenance of the viability of the states' economies will be enhanced while sharing the responsibilities of radioactive low-level waste management.

**ARTICLE II  
Definitions**

As used in this compact:

(1) "Facility" means any site, location,

structure or property used or to be used for the storage, treatment or disposal of low-level waste, excluding federal waste facilities.

(2) "Low-level waste" means waste material which contains radioactive nuclides emitting primarily beta or gamma radiation, or both, in concentrations or quantities which exceed applicable federal or state standards for unrestricted release. Low-level waste does not include waste containing more than 10 nanocuries of transuranic contaminants per gram of material, nor spent reactor fuel, nor material classified as either high-level waste or waste which is unsuited for disposal by near-surface burial under any applicable federal regulations.

(3) "Generator" means any person, partnership, association, corporation or any other entity whatsoever which, as a part of its activities, produces low-level radioactive waste.

(4) "Host state" means a state in which a facility is located.

**ARTICLE III  
Regulatory Practices**

Each party state hereby agrees to adopt practices which will require low-level waste shipments originating within its borders and destined for a facility within another party state to conform to the applicable packaging and transportation requirements and regulations of the host state. Such practices shall include:

(1) Maintaining an inventory of all generators within the state that have shipped or expect to ship low-level waste to facilities in another party state.

(2) Periodic unannounced inspection of the premises of such generators and the waste management activities thereon.

(3) Authorization of the containers in which such waste may be shipped and a requirement that generators use only that type of container authorized by the state.

(4) Assurance that inspections of the carriers which transport such waste are conducted by proper authorities and appropriate enforcement action is taken for violations.

(5) After receiving notification from a host state that a generator within the party state is in violation of applicable packaging or transportation standards, the party state will take appropriate action to assure that such violations do not recur. Such action may include inspection of every individual low-level waste shipment by that generator.

(6) Each party state may impose fees upon generators and shippers to recover the cost of the inspections and other practices

under this Article. Nothing in this Article shall be construed to limit any party state's authority to impose additional or more stringent standards on generators or carriers than those required under this Article.

**ARTICLE IV**  
**Regional Facilities**

(1) Facilities located in any party state, other than facilities established or maintained by individual low-level waste generators for the management of their own low-level waste, shall accept low-level waste generated in any party state if such waste has been packaged and transported according to applicable laws and regulations.

(2) No facility located in any party state may accept low-level waste generated outside of the region comprised of the party states, except as provided in Article V.

(3) Until such time as paragraph (2) of this Article takes effect as provided in Article VI, facilities located in any party state may accept low-level waste generated outside of any of the party states only if such waste is accompanied by a certificate of compliance issued by an official of the state in which such waste shipment originated. Such certificate shall be in such form as may be required by the host state and shall contain at least the following:

- (a) The generator's name and address;
- (b) A description of the contents of the low-level waste container;
- (c) A statement that the low-level waste being shipped has been inspected by the official who issued the certificate or by an agent of the official or by a representative of the United States Nuclear Regulatory Commission, and found to have been packaged in compliance with applicable federal regulations and such additional requirements as may be imposed by the host state; and
- (d) A binding agreement by the state of origin to reimburse any party state for any liability or expense incurred as a result of an accidental release of such waste, during shipment or after such waste reaches the facility.

(4) Each party state shall cooperate with the other party states in determining the appropriate site of any facility that might be required within the region comprised of the party states, in order to maximize public health and safety while minimizing the use of any one party state as the host of such facilities on a permanent basis. Each party state further agrees that decisions regarding low-level waste management facilities in the region will be reached through a good faith process which takes into account the burdens borne by each of the party states as well as the benefits each has received.

(5) The party states recognize that the issue of hazardous chemical waste management is similar in many respects to that of low-level waste management. Therefore, in consideration of the State of Washington allowing access to its low-level waste disposal facility by generators in other party states, party states such as Oregon and Idaho which host hazardous chemical waste disposal facilities will allow access to such facilities by generators within other party states. Nothing in this compact shall be construed to prevent any party state from limiting the nature and type of hazardous chemical or low-level wastes to be accepted at facilities within its borders or from ordering the closure of such facilities, so long as such action by a host state is applied equally to all generators within the region comprised of the party states.

(6) Any host state may establish a schedule of fees and requirements related to its facility to assure that closure, perpetual care, and maintenance and contingency requirements are met, including adequate bonding.

**ARTICLE V**  
**Northwest Low-Level**  
**Waste Compact Committee**

The governor of each party state shall designate one official of that state as the person responsible for administration of this compact. The officials so designated shall together comprise the Northwest low-level waste compact committee. The committee shall meet as required to consider matters arising under this compact. The parties shall inform the committee of existing regulations concerning low-level waste management in their states and shall afford all parties a reasonable opportunity to review and comment upon any proposed modifications in such regulations. Notwithstanding any provision of Article IV to the contrary, the committee may enter into arrangements with states, provinces, individual generators or regional compact entities outside the region comprised of the party states for access to facilities on such terms and conditions as the committee may deem appropriate. However, it shall require a two-thirds vote of all such members, including the affirmative vote of the member of any party state in which a facility affected by such arrangement is located, for the committee to enter into such arrangement.

**ARTICLE VI**  
**Eligible Parties and Effective Date**

(1) Each of the following states is eligible to become a party to this compact: Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington and Wyoming. As to any eligible party, this compact shall become effective

upon enactment into law by that party, but it shall not become initially effective until enacted into law by two states. Any party state may withdraw from this compact by enacting a statute repealing its approval.

(2) After the compact has initially taken effect pursuant to paragraph (1) of this Article any eligible party state may become a party to this compact by the execution of an executive order by the governor of the state. Any state which becomes a party in this manner shall cease to be a party upon the final adjournment of the next general or regular session of its legislature or July 1, 1983, whichever occurs first, unless the compact has by then been enacted as a statute by that state.

(3) Paragraph (2) of Article IV of this compact shall take effect on July 1, 1983, if consent is given by Congress. As provided in Public Law 96-573, Congress may withdraw its consent to the compact after every five-year period.

#### ARTICLE VII Severability

If any provision of this compact, or its application to any person or circumstance, is held to be invalid, all other provisions of this compact, and the application of all of its provisions to all other persons and circumstances, shall remain valid; and to this end the provisions of this compact are severable.

[1981 c.497 §1]

**469.935** [1981 c.497 §3; repealed by 1997 c.632 §14]

#### POWER COSTS AND RATES

**469.950 Authority to enter into interstate cooperative agreements to control power costs and rates; Bonneville Power Administration.** The State of Oregon shall pursue and may enter into an interstate cooperative agreement with the states of Washington, Idaho and Montana for the purpose of making collective efforts to control Bonneville Power Administration wholesale power costs and rates by studying and developing a region-wide response to:

(1) Federal attempts to increase arbitrarily the interest rates on federal funds previously used to build public facilities in the Pacific Northwest.

(2) Federal initiatives to sell the Bonneville Power Administration.

(3) Bonneville Power Administration rate increase and budget expenditure proposals in excess of their actual needs.

(4) Regional uses of surplus firm power, including uses by existing or newly attracted Pacific Northwest industries, to provide

long-term use of the surplus for job development.

(5) Power transmission intertie access. [1985 c.780 §1]

**Note:** 469.950 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 469 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

(b) Provides fair, just and reasonable compensation to the electric company whose service territory is acquired that:

(A) Gives consideration for the service territory rights and the cost of the facility, plant or equipment acquired and for depreciation, fair market value, reproduction cost and any other relevant factor; and

(B) Is based on the present value of the service territory rights and the facility, plant and equipment acquired, including the value of poles, wires, transformers and similar and related appliances necessarily required to provide electric service; and

(c) Pays any stranded costs obligation established pursuant to ORS 757.483.

(2) “Banked renewable energy certificate” means a bundled or unbundled renewable energy certificate that is not used by an electric utility or electricity service supplier to comply with a renewable portfolio standard in a calendar year, and that is carried forward for the purpose of compliance with a renewable portfolio standard in a subsequent year.

(3) Electricity from a hydroelectric facility that became operational before January 1, 1995, may be used to comply with a renewable portfolio standard if the electricity is attributable to efficiency upgrades made on or after January 1, 1995. If an efficiency upgrade is made to a Bonneville Power Administration facility, only that portion of the electricity generation attributable to Oregon's share of the electricity may be used to comply with a renewable portfolio standard.

(4) Subject to the limit imposed by ORS 469A.025 (5), electricity from a hydroelectric facility that became operational before January 1, 1995, may be used to comply with a renewable portfolio standard if the facility is certified as a low-impact hydroelectric facility on or after January 1, 1995, by a national certification organization recognized by the State Department of Energy by rule, and if the facility is either:

(a) Owned by an electric utility; or

(b) Not owned by an electric utility and located in Oregon and licensed by the Federal Energy Regulatory Commission under the Federal Power Act, 16 U.S.C. 791a et seq., or exempt from such license.

(5) Electricity from a generating facility located in this state that uses biomass and that became operational before January 1, 1995, may be used to comply with a renewable portfolio standard if the facility meets the requirements of the federal Public Utility Regulatory Policies Act of 1978 (P.L. 95-617) on March 4, 2010.

[2010 c.17 §4]

**Note:** 469A.027 to 469A.031 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 469A or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**469A.029 Eligibility; registration date for certain generating facilities with tracking system.** To be eligible for renewable energy certificates, the owner or operator of a generating facility that qualifies under ORS 469A.020 (5) and (6) and 469A.025 (6) and (7) must register the generating facility with the Western Renewable Energy Generation Information System or other regional system or trading program designated by the State Department of Energy before January 1, 2011. [2017 c.249 §1]

**Note:** See note under 469A.027.

**(Renewable Portfolio Standards)**

**469A.050 Applicable standard.** (1) Electric utilities must comply with the applicable renewable portfolio standard described in ORS 469A.052 or 469A.055.

(2) Electricity service suppliers must comply with the renewable portfolio standard established under ORS 469A.065. [2007 c.301 §5]

**469A.052 Large utility renewable portfolio standard.** (1) The large utility renewable portfolio standard imposes the following requirements on an electric utility that makes sales of electricity to retail electricity consumers in an amount that equals three percent or more of all electricity sold to retail electricity consumers:

(a) At least five percent of the electricity sold by the electric utility to retail electricity consumers in each of the calendar years 2011, 2012, 2013 and 2014 must be qualifying electricity;

(f) At least 35 percent of the electricity sold by an electric company to retail electricity consumers in each of the calendar years 2030, 2031, 2032, 2033 and 2034 must be qualifying electricity;

(g) At least 45 percent of the electricity sold by an electric company to retail electricity consumers in each of the calendar years 2035, 2036, 2037, 2038 and 2039 must be qualifying electricity; and

(h) At least 50 percent of the electricity sold by an electric company to retail electricity consumers in the calendar year 2040 and subsequent calendar years must be qualifying electricity.

(2) If, on June 6, 2007, an electric utility makes sales of electricity to retail electricity consumers in an amount that equals less than three percent of all electricity sold to

retail electricity consumers, but in any three consecutive calendar years thereafter makes sales of electricity to retail electricity consumers in amounts that average three percent or more of all electricity sold to retail electricity consumers, the electric utility is subject to the renewable portfolio standard described in subsection (3) of this section. The electric utility becomes subject to the renewable portfolio standard described in subsection (3) of this section in the calendar year following the three-year period during which the electric utility makes sales of electricity to retail electricity consumers in amounts that average three percent or more of all electricity sold to retail electricity consumers.

(3) An electric utility described in subsection (2) of this section must comply with the following renewable portfolio standard:

(a) Beginning in the fourth calendar year after the calendar year in which the electric utility becomes subject to the renewable portfolio standard described in this subsection, at least five percent of the electricity sold by the electric utility to retail electricity consumers in a calendar year must be qualifying electricity;

(b) Beginning in the 10th calendar year after the calendar year in which the electric utility becomes subject to the renewable portfolio standard described in this subsection, at least 15 percent of the electricity sold by the electric utility to retail electricity consumers in a calendar year must be qualifying electricity;

(c) Beginning in the 15th calendar year after the calendar year in which the electric utility becomes subject to the renewable portfolio standard described in this subsection, at least 20 percent of the electricity sold by the electric utility to retail electricity consumers in a calendar year must be qualifying electricity; and

(d) Beginning in the 20th calendar year after the calendar year in which the electric utility becomes subject to the renewable portfolio standard described in this subsection, at least 25 percent of the electricity sold by the electric utility to retail electricity consumers in a calendar year must be qualifying electricity. [2007 c.301 §6; 2016 c.28 §5]

**469A.055 Small electric utilities.** (1) Except as provided in this section, an electric utility that makes sales of electricity to retail electricity consumers in an amount that equals less than three percent of all electricity sold to retail electricity consumers is not subject to ORS 469A.005 to 469A.210.

(2) Beginning in calendar year 2025, at least five percent of the electricity sold to

retail electricity consumers in a calendar year by an electric utility must be qualifying electricity if the electric utility makes sales of electricity to retail electricity consumers in an amount that equals less than one and one-half percent of all electricity sold to retail electricity consumers.

(3) Beginning in calendar year 2025, at least 10 percent of the electricity sold to retail electricity consumers in a calendar year by an electric utility must be qualifying electricity if the electric utility makes sales of electricity to retail electricity consumers in an amount that equals or is more than one and one-half percent, and less than three percent, of all electricity sold to retail electricity consumers.

(4) The exemption provided by subsection (1) of this section terminates if an electric utility, or a joint operating entity that includes the electric utility as a member, acquires electricity from an electricity generating facility that uses coal as an energy source or makes an investment on or after June 6, 2007, in an electricity generating facility that uses coal as an energy source. Beginning in the calendar year following the year in which an electric utility's exemption terminates under this subsection, the electric utility is subject to the renewable portfolio standard described in ORS 469A.052 (3) and the provisions of ORS 469A.005 to 469A.210 that apply to ORS 469A.052 (3). This subsection does not apply to:

(a) A wholesale market purchase by an electric utility for which the energy source for the electricity is not known;

(b) BPA electricity;

(c) Acquisition of electricity under a contract entered into before June 6, 2007;

(d) A renewal or replacement contract for a contract for purchase of electricity described in paragraph (c) of this subsection;

(e) A purchase of electricity if the electricity is included in a contract for the purchase of qualifying electricity and is necessary to shape, firm or integrate the qualifying electricity;

(f) Electricity provided to an electric utility under a contract for the acquisition of an interest in an electricity generating facility that was entered into by the electric utility before June 6, 2007, or entered into before June 6, 2007, by an electric cooperative organized under ORS chapter 62 of which the electric utility is a member, without regard to whether the electricity is being used to serve the load of the electric utility on June 6, 2007; or

(g) Investments in an electricity generating facility that uses coal as an energy

source if the investments are for the purpose of improving the facility's pollution mitigation equipment or the facility's efficiency or are necessary to comply with requirements or standards imposed by governmental entities.

(5) The exemption provided by subsection (1) of this section terminates for a consumer-owned utility if the consumer-owned utility acquires service territory of an electric utility without the consent of the electric utility. Except as provided in subsection (6) of this section, beginning in the calendar year following the year in which a consumer-owned utility's exemption terminates under this subsection, the consumer-owned utility is subject to the renewable portfolio standard described in ORS 469A.052 (3) and the provisions of ORS 469A.005 to 469A.210 that apply to ORS 469A.052 (3).

(6) If an electric utility acquires service territory of another electric utility without the consent of the electric utility from which service territory was acquired, then beginning in the calendar year following the acquisition, the percentage of the acquiring electric utility's electricity sold to all retail electricity consumers of the acquiring electric utility that is sold to retail electricity consumers that are located in the acquired service territory is subject to the renewable portfolio standard that is applicable to the electric utility from which service territory was acquired and the provisions of ORS 469A.005 to 469A.210 that apply to the renewable portfolio standard.

(7) The provisions of this section do not authorize the acquisition by a municipal electric utility of service territory of a people's utility district organized under ORS chapter 261.

(8) The provisions of this section do not affect the requirement that electric utilities offer a green power rate under ORS 469A.205. [2007 c.301 §7; 2016 c.28 §8]

**469A.060 Exemptions from compliance with renewable portfolio standard.** (1) Electric utilities are not required to comply with the renewable portfolio standards described in ORS 469A.052 and 469A.055 to the extent that:

(a) Compliance with the standard would require the electric utility to acquire electricity in excess of the electric utility's projected load requirements in any calendar year; and

(b) Acquiring the additional electricity would require the electric utility to substitute qualifying electricity for electricity derived from an energy source other than coal, natural gas or petroleum.

(2)(a) Electric utilities are not required to comply with a renewable portfolio standard to the extent that compliance would require the electric utility to substitute qualifying electricity for electricity available to the electric utility under contracts for electricity from dams that are owned by Washington public utility districts and that are located between the Grand Coulee Dam and the Columbia River's junction with the Snake River. The provisions of this subsection apply only to contracts entered into before June 6, 2007, and to renewal or replacement contracts for contracts entered into before June 6, 2007.

(b) If a contract described in paragraph (a) of this subsection expires and is not renewed or replaced, the electric utility must comply, in the calendar year following the expiration of the contract, with the renewable portfolio standard applicable to the electric utility.

(3) A consumer-owned utility is not required to comply with a renewable portfolio standard to the extent that compliance would require the consumer-owned utility to reduce the consumer-owned utility's purchases of the lowest priced electricity from the Bonneville Power Administration pursuant to section 5 of the Pacific Northwest Electric Power Planning and Conservation Act of 1980, P.L. 96-501, as in effect on June 6, 2007. The exemption provided by this subsection applies only to firm commitments for BPA electricity that the Bonneville Power Administration has assured will be available to a consumer-owned utility to meet agreed portions of the consumer-owned utility's load requirements for a defined period of time. [2007 c.301 §8; 2016 c.28 §26]

**469A.062** [2016 c.28 §13; repealed by 2021 c.508 §16]

**469A.065 Renewable portfolio standard for electricity service suppliers.** An electricity service supplier must meet the requirements of the renewable portfolio standards that are applicable to the electric utilities that serve the territories in which the electricity service supplier sells electricity to retail electricity consumers. The Public Utility Commission shall establish procedures for implementation of the renewable portfolio standards for electricity service suppliers that sell electricity in the service territory of an electric company. If an electricity service supplier sells electricity in territories served by more than one electric company, the commission may provide for an aggregate standard based on the amount of electricity sold by the electricity service supplier in each territory. Pursuant to ORS 757.676, a consumer-owned utility may establish procedures for the implementation of the renewable portfolio standards

for electricity service suppliers that sell electricity in the territory served by the consumer-owned utility. [2007 c.301 §9]

**469A.070 Manner of complying with renewable portfolio standards.** (1) Except as provided in subsection (2) of this section, an electric utility or electricity service supplier must comply with the renewable portfolio standard applicable to the utility or supplier in each calendar year by:

(a) Using bundled renewable energy certificates issued or acquired during the compliance year;

(b) Subject to the limitations described in ORS 469A.140 and 469A.145, using unbundled or banked renewable energy certificates; or

(c) Making alternative compliance payments as described in ORS 469A.180.

(2) Bundled or unbundled renewable energy certificates that are issued or acquired by an electric utility or electricity service supplier on or before March 31 in a calendar year may be used by the utility or supplier to comply with the renewable portfolio standard applicable to the utility or supplier for the preceding calendar year. [2007 c.301 §10]

**469A.075 Electric company plan for meeting requirements; commission review; rules.** (1) An electric company that is subject to a renewable portfolio standard shall describe the electric company's plan for meeting the requirements of the renewable portfolio standard as part of the electric company's integrated resource plan filed with the Public Utility Commission.

(2) At a minimum, a plan for meeting the requirements of the renewable portfolio standard must contain:

(a) Annual targets for acquisition and use of qualifying electricity; and

(b) The estimated cost of meeting the annual targets, including the cost of transmission, the cost of firming, shaping and integrating qualifying electricity, the cost of alternative compliance payments and the cost of acquiring renewable energy certificates.

(3) The commission shall review a plan for meeting the requirements of the renewable portfolio standard and take appropriate action as part of the procedure for acknowledgment of an electric company's integrated resource plan.

(4) The commission shall adopt rules:

(a) Establishing requirements for the content of plans for meeting the requirements of the renewable portfolio standard;

(b) Providing for the least-cost, least-risk acquisition of resources; and

(c) Providing for the evaluation of competitive bidding processes that allow for diverse ownership of renewable energy sources that generate qualifying electricity.

(5) A plan for meeting the requirements of the renewable portfolio standard may include procedures that will be used by the electric company to determine whether the costs of constructing a facility that generates electricity from a renewable energy source, or the costs of acquiring bundled or unbundled renewable energy certificates, are consistent with the renewable portfolio standards of the commission relating to least-cost, least-risk planning for acquisition of resources. [2007 c.301 §11; 2016 c.28 §6; 2023 c.54 §1]

#### (Cost Limitation)

**469A.100 Limits on cost of compliance with renewable portfolio standard.** (1) Electric utilities are not required to comply with a renewable portfolio standard during a compliance year to the extent that the incremental cost of compliance, the cost of unbundled renewable energy certificates and the cost of alternative compliance payments under ORS 469A.180 exceeds four percent of the electric utility's annual revenue requirement for the compliance year.

(2) For each electric company, the Public Utility Commission shall establish the annual revenue requirement for a compliance year no later than January 1 of the compliance year. For each consumer-owned utility, the governing body of the consumer-owned utility shall establish the annual revenue requirement for a compliance year.

(3) The annual revenue requirement for an electric utility shall be calculated based only on the operations of the electric utility relating to electricity. The annual revenue requirement does not include any amount expended by the electric utility for energy efficiency programs for customers of the electric utility or for low income energy assistance, the incremental cost of compliance with a renewable portfolio standard, the cost of unbundled renewable energy certificates or the cost of alternative compliance payments under ORS 469A.180. The annual revenue requirement does include:

(a) The operating expenses of the electric utility during the compliance year, including depreciation and taxes; and

(b) For electric companies, an amount equal to the total rate base of the electric company for the compliance year multiplied by the rate of return established by the commission for debt and equity of the electric company.

(4) For the purposes of this section, the incremental cost of compliance with a renewable portfolio standard is the difference between the levelized annual delivered cost of the qualifying electricity and the levelized annual delivered cost of an equivalent amount of reasonably available electricity that is not qualifying electricity. For the purpose of this subsection, the commission or the governing body of a consumer-owned utility shall use the net present value of delivered cost, including:

(a) Capital, operating and maintenance costs of generating facilities;

(b) Financing costs attributable to capital, operating and maintenance expenditures for generating facilities;

(c) Transmission and substation costs;

(d) Load following and ancillary services costs; and

(e) Costs associated with using other assets, physical or financial, to integrate, firm or shape renewable energy sources on a firm annual basis to meet retail electricity needs.

(5) For the purposes of this section, the governing body of a consumer-owned utility may include in the incremental cost of compliance with a renewable portfolio standard all expenses associated with research, development and demonstration projects related to the generation of qualifying electricity by the consumer-owned utility.

(6) The commission shall establish limits on the incremental cost of compliance with the renewable portfolio standard for electricity service suppliers under ORS 469A.065 that are the equivalent of the cost limits applicable to the electric companies that serve the territories in which the electricity service supplier sells electricity to retail electricity consumers. If an electricity service supplier sells electricity in territories served by more than one electric company, the commission may provide for an aggregate cost limit based on the amount of electricity sold by the electricity service supplier in each territory. Pursuant to ORS 757.676, a consumer-owned utility may establish limits on the cost of compliance with the renewable portfolio standard for electricity service suppliers that sell electricity in the territory served by the consumer-owned utility. [2007 c.301 §12; 2016 c.28 §25]

#### (Cost Recovery)

**469A.120 Cost recovery by electric companies.** (1) Except as provided in ORS 469A.180 (5), all prudently incurred costs associated with complying with ORS 469A.005 to 469A.210 are recoverable in the rates of an electric company, including interconnection costs, costs associated with using

physical or financial assets to integrate, firm or shape renewable energy sources on a firm annual basis to meet retail electricity needs, above-market costs and other costs associated with transmission and delivery of qualifying electricity to retail electricity consumers.

(2)(a) The Public Utility Commission shall establish an automatic adjustment clause as defined in ORS 757.210 or another method that allows timely recovery of costs prudently incurred by an electric company to construct or otherwise acquire facilities that generate electricity from renewable energy sources, costs related to associated electricity transmission and costs related to associated energy storage.

(b) Notwithstanding any other provision of law, upon the request of any interested person the commission shall conduct a proceeding to establish the terms of the automatic adjustment clause or other method for timely recovery of costs. The commission shall provide parties to the proceeding with the procedural rights described in ORS 756.500 to 756.610, including but not limited to the opportunity to develop an evidentiary record, conduct discovery, introduce evidence, conduct cross-examination and submit written briefs and oral argument. The commission shall issue a written order with findings on the evidentiary record developed in the proceeding.

(3)(a) An electric company must file with the commission for approval of a proposed rate change to recover costs under the terms of an automatic adjustment clause or other method for timely recovery of costs established under subsection (2) of this section. As part of an electric company's request for approval under this subsection, the electric company may specify the date or the dates on which the electric company will begin to include in the electric company's rates, in full or in part, the costs recoverable under subsection (2) of this section. The commission may accept or reject the date or dates specified by the electric company.

(b) Notwithstanding any other provision of law, upon the request of any interested person the commission shall conduct a proceeding to determine whether to approve a proposed change in rates under the automatic adjustment clause or other method for timely recovery of costs. The commission shall provide parties to the proceeding with the procedural rights described in ORS 756.500 to 756.610, including but not limited to the opportunity to develop an evidentiary record, conduct discovery, introduce evidence, conduct cross-examination and submit written briefs and oral argument. The commission shall issue a written order with

findings on the evidentiary record developed in the proceeding.

(c) A filing made under this subsection is subject to the commission's authority under ORS 757.215 to suspend a rate, or schedule of rates, for investigation. [2007 c.301 §13; 2010 c.79 §1; 2016 c.28 §11]

#### (Renewable Energy Certificates)

**469A.130 Renewable energy certificates system.** (1) The State Department of Energy shall establish a system of renewable energy certificates that can be used by an electric utility or electricity service supplier to establish compliance with the applicable renewable portfolio standard. The department shall consult with the Public Utility Commission before establishing a system of renewable energy certificates under this section. The department may allow use of renewable energy certificates that are issued, monitored, accounted for or transferred by or through a regional system or trading program, including but not limited to the Western Renewable Energy Generation Information System. The system established by the department shall allow issuance, transfer and use of renewable energy certificates in electronic form.

(2) The validity of a bundled renewable energy certificate for purposes of compliance with the applicable renewable portfolio standard is not affected by the substitution of any other electricity for the qualifying electricity at any point after the time of generation. [2007 c.301 §14]

**469A.132 Thermal renewable energy certificates.** (1) If a facility that generates electricity using biomass also generates thermal energy for a secondary purpose, the State Department of Energy shall provide that renewable energy certificates must be issued for the generation of the thermal energy. Notwithstanding the definition of "qualifying electricity" in ORS 469A.005 or any other provision of law stating or implying that a renewable portfolio standard may be complied with only through the generation of electricity, renewable energy certificates for thermal energy:

(a) Shall be provided for pursuant to this subsection as part of the system established under ORS 469A.130;

(b) Shall be subject to the same requirements for issuance, transfer and use as all other renewable energy certificates created pursuant to the system established under ORS 469A.130; and

(c) May be used to comply with a renewable portfolio standard if:

(A) The facility that generates the thermal energy for which the renewable energy

certificate is issued meets the requirements of ORS 469A.020 and 469A.135 for the electricity generated using biomass at the facility; and

(B) Consistent with the provisions of ORS 469A.025 (3), the thermal energy is not generated through the combustion of wood that has been treated with chemical preservatives such as creosote, pentachlorophenol or chromated copper arsenate.

(2) For purposes of issuing renewable energy certificates under this section, 3,412,000 British thermal units are equivalent to one megawatt-hour. [2016 c.28 §16; 2019 c.76 §1]

**469A.135 Renewable energy certificates that may be used to comply with standards.** (1) A bundled renewable energy certificate may be used to comply with a renewable portfolio standard if:

(a) The facility that generates the qualifying electricity for which the bundled renewable energy certificate is issued is located in the United States and within the geographic boundary of the Western Electricity Coordinating Council; and

(b) The qualifying electricity for which the bundled renewable energy certificate is issued is delivered to:

(A) The Bonneville Power Administration;

(B) The transmission system of an electric utility;

(C) A delivery point designated by the electric utility for the purpose of subsequent delivery to the electric utility; or

(D) A delivery point mutually agreed to by a distribution utility and an electricity service supplier for the purpose of subsequent delivery to the distribution utility serving the customer of the electricity service supplier.

(2) An unbundled renewable energy certificate may be used to comply with a renewable portfolio standard if the facility that generates the qualifying electricity with which the unbundled renewable energy certificate is associated is located within the geographic boundary of the Western Electricity Coordinating Council.

(3) Renewable energy certificates issued for any electricity that the Bonneville Power Administration has designated as environmentally preferred power, or has given a similar designation for electricity generated from a renewable resource, may be used to comply with a renewable portfolio standard without regard to the location of the generating facility.

(4) This section does not affect the obligations or requirements:

(a) Imposed under or agreed to in a contract with a distribution utility;

(b) Imposed under tariff schedules approved by the Public Utility Commission;

(c) Imposed under an approved open access transmission tariff; or

(d) Imposed under rules adopted by the commission under ORS 757.600 to 757.687. [2007 c.301 §15; 2016 c.28 §9]

**469A.140 Use, transfer and banking of certificates.** (1) Renewable energy certificates may be traded, sold or otherwise transferred.

(2) Renewable energy certificates that are not used by a consumer-owned utility to comply with a renewable portfolio standard in a calendar year may be banked and carried forward indefinitely for the purpose of complying with a renewable portfolio standard in a subsequent year. For the purpose of a consumer-owned utility complying with a renewable portfolio standard in any calendar year, banked renewable energy certificates with the oldest issuance date must be used to comply with the renewable portfolio standard before banked renewable energy certificates with more recent issuance dates are used.

(3)(a) Renewable energy certificates issued on or before March 8, 2016, that are not used by an electric company or electricity service supplier to comply with a renewable portfolio standard in a calendar year may be banked and carried forward indefinitely for the purpose of complying with a renewable portfolio standard in a subsequent year.

(b) For qualifying electricity generated from a renewable energy source that becomes operational on or before March 8, 2016, or for qualifying electricity that is acquired under a contract, having a duration of less than 20 years, for the purchase of electricity generated from a renewable energy source that becomes operational between March 8, 2016, and December 31, 2022, renewable energy certificates issued for the qualifying electricity after March 8, 2016, that are not used by an electric company or an electricity service supplier to comply with a renewable portfolio standard in the calendar year in which the renewable energy certificates are issued may be banked and carried forward, for up to five compliance years immediately following the compliance year in which the renewable energy certificates are issued, for the purpose of complying with a renewable portfolio standard in one of those five compliance years.

(c) For qualifying electricity generated from a renewable energy source that becomes operational between March 8, 2016, and December 31, 2022, or for qualifying

electricity that is acquired under a contract, having a duration of 20 years or more, for the purchase of electricity generated from a renewable energy source that becomes operational between March 8, 2016, and December 31, 2022, renewable energy certificates issued for the qualifying electricity during the five-year period after the date the renewable energy source becomes operational that are not used by an electric company or an electricity service supplier to comply with a renewable portfolio standard in the calendar year in which the renewable energy certificates are issued may be banked and carried forward indefinitely for the purpose of complying with a renewable portfolio standard in a subsequent year.

(d) For qualifying electricity generated from a renewable energy source that becomes operational between March 8, 2016, and December 31, 2022, or for qualifying electricity that is acquired under a contract, having a duration of 20 years or more, for the purchase of electricity generated from a renewable energy source that becomes operational between March 8, 2016, and December 31, 2022, renewable energy certificates issued for the qualifying electricity more than five years after the renewable energy source becomes operational that are not used by an electric company or an electricity service supplier to comply with a renewable portfolio standard in the calendar year in which the renewable energy certificates are issued may be banked and carried forward, for up to five compliance years immediately following the compliance year in which the renewable energy certificates are issued, for the purpose of complying with a renewable portfolio standard in one of those five compliance years.

(e) For qualifying electricity generated from a renewable energy source that becomes operational after December 31, 2022, renewable energy certificates issued for the qualifying electricity that are not used by an electric company or an electricity service supplier to comply with a renewable portfolio standard in the calendar year in which the renewable energy certificates are issued may be banked and carried forward, for up to five compliance years immediately following the compliance year in which the renewable energy certificates are issued, for the purpose of complying with a renewable portfolio standard in one of those five compliance years.

(4) An electric utility or electricity service supplier is responsible for demonstrating that a renewable energy certificate used to comply with a renewable portfolio standard is derived from a renewable energy source and that the electric utility or electricity

service supplier has not used, traded, sold or otherwise transferred the renewable energy certificate.

(5) A renewable energy certificate may be used by an electric utility or electricity service supplier to comply with both a federal renewable portfolio standard and a renewable portfolio standard established under ORS 469A.005 to 469A.210. An electric utility or electricity service supplier that uses a renewable energy certificate to comply with a renewable portfolio standard imposed by a state other than this state may not use the same renewable energy certificate to comply with a renewable portfolio standard established under ORS 469A.005 to 469A.210. [2007 c.301 §16; 2016 c.28 §7]

**469A.145 Limitations on use of unbundled certificates to meet renewable portfolio standard.** (1) Except as otherwise provided in this section, unbundled renewable energy certificates, including banked unbundled renewable energy certificates, may not be used to meet more than 20 percent of the requirements of the large utility renewable portfolio standard described in ORS 469A.052 for any compliance year.

(2) The limitation imposed by subsection (1) of this section does not apply to unbundled renewable energy certificates associated with electricity generated in this state from a renewable energy source by a net metering facility, as defined in ORS 757.300, or another generating facility that is not directly connected to a distribution or transmission system.

(3) The limitation imposed by subsection (1) of this section does not apply to unbundled renewable energy certificates associated with electricity generated in this state by a qualifying facility under ORS 758.505 to 758.555.

(4) The limitation imposed by subsection (1) of this section does not apply to an electricity service supplier for purposes of meeting the renewable portfolio standard described in ORS 469A.065 during compliance years before 2021. [2007 c.301 §17; 2016 c.28 §10]

**469A.147 Exemption from limitation on use of unbundled certificates for consumer-owned utilities.** Unless the exemption provided by ORS 469A.055 (1) terminated for the consumer-owned utility pursuant to ORS 469A.055 (5), a consumer-owned utility described in ORS 469A.052 (2) that is subject to the large utility renewable portfolio standard described in ORS 469A.052 (3) may use, notwithstanding ORS 469A.145 (1), unbundled renewable energy certificates, including banked unbundled renewable energy certificates, to meet:

(1) Up to 100 percent of the standard described in ORS 469A.052 (3)(a); and

(2) Up to 75 percent of the standard described in ORS 469A.052 (3)(b) or (c). [2014 c.100 §2]

**469A.150 Multistate electric companies; rules.** The Public Utility Commission by rule shall establish a process for allocating the use of renewable energy certificates by an electric company that makes sales of electricity to retail customers in more than one state. [2007 c.301 §18]

### (Compliance Reports)

**469A.170 Compliance reports; rules.** (1) Each electric utility and electricity service supplier that is subject to a renewable portfolio standard shall make an annual compliance report for the purpose of detailing compliance, or failure to comply, with the renewable portfolio standard applicable in the compliance year. An electric company or electricity service supplier shall make the report to the Public Utility Commission. A consumer-owned utility shall make the report to the members or customers of the utility.

(2) The commission shall review each compliance report filed under this section by an electric company or electricity service supplier for the purposes of determining whether the company or supplier has complied with the renewable portfolio standard applicable to the company or supplier and the manner in which the company or supplier has complied. In reviewing the reports, the commission shall consider:

(a) The relative amounts of renewable energy certificates and other payments used by the company or supplier to meet the applicable renewable portfolio standard, including:

(A) Bundled renewable energy certificates;

(B) Unbundled renewable energy certificates;

(C) Banked renewable energy certificates; and

(D) Alternative compliance payments under ORS 469A.180.

(b) The timing of electricity purchases.

(c) The market prices for electricity purchases and unbundled renewable energy certificates.

(d) Whether the actions taken by the company or supplier are contributing to long term development of generating capacity using renewable energy sources.

(e) The effect of the actions taken by the company or supplier on the rates payable by retail electricity consumers.

(f) Good faith forecasting differences associated with the projected number of retail electricity consumers served and the availability of electricity from renewable energy sources.

(g) For electric companies, consistency with the company's plan under ORS 469A.075 for meeting the requirements of the renewable portfolio standard as described in the company's integrated resource plan and as reviewed by the commission.

(h) Any other factors deemed reasonable by the commission.

(3) The commission by rule may establish requirements for compliance reports submitted by an electric company or electricity service supplier. [2007 c.301 §19; 2023 c.54 §2]

### (Alternative Compliance Payments)

**469A.180 Electric companies; electricity service suppliers.** (1) The Public Utility Commission shall establish an alternative compliance rate for each compliance year for each electric company or electricity service supplier that is subject to a renewable portfolio standard. The rate shall be expressed in dollars per megawatt-hour.

(2) The commission shall establish an alternative compliance rate based on the cost of qualifying electricity, contracts that the electric company or electricity service supplier has acquired for future delivery of qualifying electricity and the number of unbundled renewable energy certificates that the company or supplier anticipates using in the compliance year to meet the renewable portfolio standard applicable to the company or supplier. The commission shall also consider any determinations made under ORS 469A.170 in reviewing the compliance report made by the electric company or electricity service supplier for the previous compliance year. In establishing an alternative compliance rate, the commission shall set the rate to provide adequate incentive for the electric company or electricity service supplier to purchase or generate qualifying electricity in lieu of using alternative compliance payments to meet the renewable portfolio standard applicable to the company or supplier.

(3) An electric company or electricity service supplier may elect to use, or may be required by the commission to use, alternative compliance payments to comply with the renewable portfolio standard applicable to the company or supplier. Any election by an electric company or electricity service supplier to use alternative compliance payments is subject to review by the commission under ORS 469A.170. An electric company or electricity service supplier may not be required to make alternative compliance payments

that would result in the company or supplier exceeding the cost limitation established under ORS 469A.100.

(4) The commission shall determine for each electric company the extent to which alternative compliance payments may be recovered in the rates of the company. Each electric company shall deposit any amounts recovered in the rates of the company for alternative compliance payments in a holding account established by the company. Amounts in the holding account shall accrue interest at the rate of return authorized by the commission for the electric company.

(5) Amounts in holding accounts established under subsection (4) of this section may be expended by an electric company only for costs of acquiring new generating capacity from renewable energy sources, investments in efficiency upgrades to electricity generating facilities owned by the company and energy conservation programs within the company's service area. The commission must approve expenditures by an electric company from a holding account established under subsection (4) of this section. Amounts that are collected from customers and spent by an electric company under this subsection may not be included in the company's rate base.

(6) The commission shall require electricity service suppliers to establish holding accounts and make payments to those accounts on a substantially similar basis as provided for electric companies. The commission must approve expenditures by an electricity service supplier from a holding account established under this subsection. The commission may approve expenditures only for energy conservation programs for customers of the electricity service supplier. [2007 c.301 §20]

**469A.185 Consumer-owned utilities.** The governing body of a consumer-owned utility shall establish an alternative compliance rate for the utility. To the extent possible, the alternative compliance rate shall be determined by the governing body of the consumer-owned utility in a manner similar to that used by the Public Utility Commission in establishing alternative compliance rates under ORS 469A.180. Amounts collected as alternative compliance payments by a consumer-owned utility may be used for the purposes specified in ORS 469A.180 (5) and for the purpose of paying expenses associated with research, development and demonstration projects related to the generation of qualifying electricity by the utility. [2007 c.301 §21]

### (Penalty)

**469A.200 Penalty.** If an electric company or electricity service supplier that is subject to a renewable portfolio standard under ORS 469A.005 to 469A.210 fails to comply with the standard in the manner provided by ORS 469A.005 to 469A.210, the Public Utility Commission may impose a penalty against the company or supplier in an amount determined by the commission. A penalty under this section is in addition to any alternative compliance payment required or elected under ORS 469A.180. Moneys paid for penalties under this section shall be transmitted by the commission to the nongovernmental entity receiving moneys under ORS 757.612 (3)(d) and may be used only for the purposes specified in ORS 757.612 (1). [2007 c.301 §22]

### (Green Power Rate)

**469A.205 Green power rate.** (1) Electric utilities shall allow retail electricity consumers to elect a green power rate. A significant portion of the electricity purchased or generated by a utility that is attributable to moneys paid by retail electricity consumers who elect the green power rate must be qualifying electricity, and the utility must inform consumers of the sources of the electricity purchased or generated by the utility that is attributable to moneys paid by consumers who elect the green power rate. The green power rate shall reasonably reflect the costs of the electricity purchased or generated by the utility that is attributable to moneys paid by retail electricity consumers who elect the green power rate. All prudently incurred costs associated with the green power rate are recoverable in a green power rate offered by an electric company.

(2) Any qualifying electricity procured by an electric utility to provide electricity under a green power rate under subsection (1) of this section or ORS 757.603 (3)(a) may not be used by the utility to comply with the requirements of a renewable portfolio standard.

(3) The provisions of subsection (1) of this section do not apply to electric companies that are subject to ORS 757.603 (3)(a).

(4) An electric utility may comply with the requirements of subsection (1) of this section by contracting with a third-party provider. [2007 c.301 §23; 2021 c.508 §21]

## COMMUNITY-BASED RENEWABLE ENERGY PROJECTS

**469A.210 Goal for community-based renewable energy projects.** (1) The Legislative Assembly finds that community-based renewable energy projects, including but not limited to marine renewable energy resources that are either developed in accor-

dance with the Territorial Sea Plan adopted pursuant to ORS 196.471 or located on structures adjacent to the coastal shorelands, are an essential element of this state's energy future.

(2) For purposes related to the findings in subsection (1) of this section, by the year 2030, at least 10 percent of the aggregate electrical capacity of all electric companies that make sales of electricity to 25,000 or more retail electricity consumers in this state must be composed of electricity generated by one or both of the following sources:

(a) Small-scale renewable energy projects with a generating capacity of 20 megawatts or less that generate electricity utilizing a type of energy described in ORS 469A.025; or

(b) Facilities that generate electricity using biomass that also generate thermal energy for a secondary purpose.

(3) Regardless of the facility's nameplate capacity, any single facility described in subsection (2)(b) of this section may be used to comply with the requirement specified in subsection (2) of this section for up to 20 megawatts of capacity. [2007 c.301 §24; 2010 c.68 §1; 2016 c.28 §14; 2017 c.452 §1; 2021 c.508 §37]

### JOB IMPACT STUDY

**Note:** Sections 25 and 26, chapter 301, Oregon Laws 2007, provide:

**Sec. 25.** (1) The State Department of Energy shall periodically conduct a study to evaluate the impact of sections 1 to 24 of this 2007 Act [469A.005 to 469A.210] on jobs in this state. The study shall assess the number of new jobs created in the renewable energy sector in this state and the average wage rates and the provision of health care and other benefits for those jobs. In addition, the study shall investigate the extent to which workforce training opportunities are being provided to employees to prepare the employees for jobs in the renewable energy sector.

(2) The department shall conduct the first study under this section not later than two years after the effective date of this 2007 Act [June 6, 2007]. [2007 c.301 §25]

**Sec. 26.** Section 25 of this 2007 Act is repealed January 2, 2026. [2007 c.301 §26]

### HYDROGEN POWER STATIONS

**469A.300 Hydrogen power stations; compliance with renewable portfolio standard; cost recovery for prudent energy investments.** To facilitate the creation of hydrogen power stations using anhydrous ammonia as a fuel source to comply with a renewable portfolio standard under ORS 469A.005 to 469A.210, the Public Utility Commission may allow full recovery of costs by public utilities in prudent energy investments related to the planning, financing, construction and operation of hydrogen power stations. These investments may include, but need not be limited to:

(1) Systems designed to synthesize anhydrous ammonia fuel using electricity generated from renewable energy sources listed in ORS 469A.025;

(2) Infrastructure designed to store anhydrous ammonia generated from renewable energy sources as a nonpolluting fuel for electricity generation and any other purpose;

(3) Energy systems designed to use anhydrous ammonia generated from renewable energy sources as a fuel to generate electricity; and

(4) Electronic control and management systems designed to effectively integrate hydrogen power station processes into the electricity transmission grid. [2010 c.17 §2]

### REDUCTION OF GREENHOUSE GAS EMISSIONS ASSOCIATED WITH ELECTRICITY SOLD

**469A.400 Definitions for ORS 469A.400 to 469A.475.** As used in ORS 469A.400 to 469A.475:

(1) "Baseline emissions level" means:

(a) For an electric company, the average annual emissions of greenhouse gas for the years 2010, 2011 and 2012 associated with the electricity sold to retail electricity consumers as reported under ORS 468A.280, or rules adopted pursuant thereto.

(b) Except as provided in paragraph (c) of this subsection, for an electricity service supplier, 0.428 metric tons of carbon dioxide equivalent per megawatt-hour associated with the electricity sold by the electricity service supplier to retail electricity consumers as reported under ORS 468A.280, or rules adopted pursuant thereto.

(c) For an electricity service supplier that is first certified under ORS 757.649 on or after September 25, 2021, the baseline emissions level defined in paragraph (b) of this subsection shall be adjusted downward in the certification of the electricity service supplier under ORS 757.649 to a level that:

(A) Reflects the continual progress made by other electricity service suppliers toward meeting the clean energy targets set forth in ORS 469A.410, as demonstrated under ORS 469A.420 (3); and

(B) Prevents the creation of a competitive disadvantage among electricity service suppliers.

(2) "Community-based renewable energy" means one or more renewable energy systems that interconnect to utility distribution or transmission assets and may be combined with microgrids, storage systems or demand response measures, or energy-related infra-

structure that promotes climate resiliency or other such measures, and that:

(a) Provide a direct benefit to a particular community through a community-benefits agreement or direct ownership by a local government, nonprofit community organization or federally recognized Indian tribe; or

(b) Result in increased resiliency or community stability, local jobs, economic development or direct energy cost savings to families and small businesses.

(3) “Electric company,” “electricity service supplier” and “electric utility” have the meanings given those terms in ORS 757.600.

(4) “Environmental justice” means equal protection from environmental and health hazards and meaningful public participation in decisions that affect the environment in which people live, work, learn, practice spirituality and play.

(5) “Environmental justice communities” includes communities of color, communities experiencing lower incomes, tribal communities, rural communities, coastal communities, communities with limited infrastructure and other communities traditionally underrepresented in public processes and adversely harmed by environmental and health hazards, including seniors, youth and persons with disabilities.

(6) “Greenhouse gas” has the meaning given that term in ORS 468A.210.

(7) “Nonemitting electricity” means electricity, including hydroelectricity, that is generated and may be stored in a manner that does not emit greenhouse gas into the atmosphere.

(9) “Retail electricity provider” means an electric company or electricity service supplier. [2021 c.508 §1]

**469A.405 Policy.** It is the policy of the State of Oregon:

(1) That retail electricity providers rely on nonemitting electricity in accordance with the clean energy targets set forth in ORS 469A.410 and eliminate greenhouse gas emissions associated with serving Oregon retail electricity consumers by 2040;

(2) That electricity generated in a manner that produces zero greenhouse gas emissions also be generated, to the maximum extent practicable, in a manner that provides additional direct benefits to communities in this state in the forms of creating and sustaining meaningful living wage jobs, promot-

ing workforce equity and increasing energy security and resiliency;

(3) That, under existing federal and state law, the state engages in meaningful consultation with federally recognized Indian tribes. This includes consultation on the siting, permitting and construction of new energy facilities as defined in ORS 469.300, and new projects subject to the policy specified in 18 C.F.R. 2.1c, prior to such actions that are likely to adversely impact designated sites of archeological significance as defined in ORS 358.905, or properties of traditional, cultural and religious importance under the National Historical Preservation Act and the 36 C.F.R. 800 implementing regulation; and

**469A.410 Clean energy targets; reduction of greenhouse gas emissions.** (1) A retail electricity provider shall reduce greenhouse gas emissions, measured for an electric company as greenhouse gas emissions reported under ORS 468A.280, and measured for an electricity service supplier as greenhouse gas emissions per megawatt-hour as reported under ORS 468A.280, to the extent compliance is consistent with ORS 469A.400 to 469A.475, by the following targets:

(a) By 2030, 80 percent below baseline emissions level.

(b) By 2035, 90 percent below baseline emissions level.

(c) By 2040, and for every subsequent year, 100 percent below baseline emissions level.

(2) Nothing in ORS 469A.400 to 469A.475 may be construed as establishing a standard that requires a retail electricity provider to track electricity to end use retail customers. [2021 c.508 §3]

**469A.415 Electric companies to develop clean energy plans.** (1) An electric company shall develop a clean energy plan for meeting the clean energy targets set forth in ORS 469A.410 concurrent with the development of each integrated resource plan.

(2) The electric company shall submit the clean energy plan to the Public Utility Commission and the Department of Environmental Quality.

(3)(a) A clean energy plan must be based on or included in an integrated resource plan filing made no earlier than January 1, 2022, and filed no later than 180 days after the integrated resource plan is filed, or developed within an integrated resource planning proc-

ess and incorporated into the integrated resource plan filed with the commission.

(b) Notwithstanding paragraph (a) of this subsection, a clean energy plan developed by a multistate jurisdictional electric company must be based on or contained in other information developed consistent with a cost-allocation methodology approved by the commission.

(c) Include a risk-based examination of resiliency opportunities that includes costs, consequences, outcomes and benefits based on reasonable and prudent industry resiliency standards and guidelines established by the Public Utility Commission;

(d) Examine the costs and opportunities of offsetting energy generated from fossil fuels with community-based renewable energy;

(e) Demonstrate the electric company is making continual progress within the planning period towards meeting the clean energy targets set forth in ORS 469A.410, including demonstrating a projected reduction of annual greenhouse gas emissions; and

(f) Result in an affordable, reliable and clean electric system.

(5) Actions and investments proposed in a clean energy plan may include the development or acquisition of clean energy resources, acquisition of energy efficiency and demand response, including an acquisition required by ORS 757.054, development of new transmission and other supporting infrastructure, retirement of existing generating facilities, changes in system operation and any other necessary action.

(6) The commission shall ensure that an electric company demonstrates continual progress as described in subsection (4)(e) of this section and is taking actions as soon as practicable that facilitate rapid reduction of greenhouse gas emissions at reasonable costs to retail electricity consumers. [2021 c.508 §4]

**469A.420 Emissions verification; baseline emissions determination; clean energy plan acknowledgment; annual report; compliance.** (1)(a) For the purposes of verifying emissions and determining compliance with the clean energy targets set forth

in ORS 469A.410, the Department of Environmental Quality shall determine:

(A) For each electric company, the electric company's baseline emissions level; and

(B) For each retail electricity provider, the amount of emissions reduction necessary for the retail electricity provider to meet the clean energy targets set forth in ORS 469A.410.

(b) The department shall use the method of measuring greenhouse gas emissions set forth in ORS 468A.280 to verify the projected greenhouse gas emissions reductions forecasted in a clean energy plan of an electric company or the information provided by an electricity service supplier under subsection (3) of this section.

(c) The department shall report the department's findings under paragraph (b) of this subsection to the Public Utility Commission and the electric company seeking acknowledgement of a clean energy plan by the commission.

(2) The Public Utility Commission shall acknowledge the clean energy plan if the commission finds the plan to be in the public interest and consistent with the clean energy targets set forth in ORS 469A.410. In evaluating whether a plan is in the public interest, the commission shall consider:

[2021 c.508 §6]

**469A.430 Treatment of generation resources.** For the purposes of determining compliance with ORS 469A.400 to 469A.475, electricity shall have the emission attributes of the underlying generating resource. [2021 c.508 §7]

**469A.435 Determining compliance with clean energy targets; unplanned emissions.** (1)(a) In determining whether a retail electricity provider has complied with the clean energy targets set forth in ORS 469A.410, the Public Utility Commission shall take into consideration unplanned emissions in excess of the amount projected in an electric company's clean energy plan submitted under ORS 469A.415 or the information provided by an electricity service supplier under ORS 469A.420 (3), to the extent:

(A) The emissions are in excess of the clean energy targets set forth in ORS 469A.410;

(B) Generation of electricity from nonemitting resources forecasted to meet electricity demand is less than expected, including variability in the generation, transmission, constraints or other causes; and

(C) The additional emissions are from the generation of electricity necessary to meet load.

(b) A retail electricity provider that continues to be out of compliance with the clean energy targets set forth in ORS 469A.410 for more than 12 months as a result of unplanned emissions as described in paragraph (a)(A) to (C) of this subsection shall include a detailed plan on how the retail electricity provider will return to compliance as soon as practicable, subject to approval by the commission, for an electric company, in a subsequent clean energy plan or, for an electricity service supplier, in a subsequent submission to the commission under ORS 469A.420 (3).

(2) Greenhouse gas emissions associated with electricity acquired from net metering of customer resources or a qualifying facility under the terms of the Public Utility Regulatory Policies Act shall be excluded from the determination of the retail electricity provider's total greenhouse gas emissions.

(3) For purposes of determining whether a retail electricity provider has complied with the clean energy targets set forth in ORS 469A.410, electricity, other than unspecified market power, purchased from the Bonneville Power Administration for delivery to retail electricity consumers shall be deemed to have the Bonneville Power Administration asset controlling supplier emission factor reported to the Department of Environmental Quality under ORS 468A.280, or rules adopted pursuant thereto.

(4)(a) For an electric company subject to ORS 469A.052, the commission shall initiate a process to update the avoided costs calculated pursuant to ORS 758.525 for a qualify-

ing facility under ORS 758.505 to ensure avoided costs accurately reflect the characteristics of generators that contribute to compliance with ORS 469A.400 to 469A.475.

(b) The process initiated by the commission under paragraph (a) of this subsection may commence no sooner than two calendar years before the calendar year identified in the electric company's acknowledged integrated resource plan that shows the electric company will meet or exceed the requirements described in ORS 469A.052 (1)(h) and must conclude no later than the calendar year identified in the acknowledged integrated resource plan that shows the electric company will meet or exceed the requirements described in ORS 469A.052 (1)(h). [2021 c.508 §8]

**469A.440 Temporary exemption; conflicts with reliability.** (1) Upon its own motion or at the request of an electric company, the Public Utility Commission may open an investigation pursuant to ORS 756.515 (1) to determine whether to grant a temporary exemption to an electric company's compliance with one or more of the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475.

(2) The commission may grant a temporary exemption if compliance:

(a) Conflicts with or compromises an electric company's obligation to comply with mandatory reliability standards set by the North American Electric Reliability Corporation;

(b) Violates or significantly impairs a resource adequacy requirement or recommendation of a multistate, regional or national entity;

(c) Violates or significantly impairs an electric company's ability to comply with a Balancing Authority Area declaration of an energy emergency alert under categories 1 through 3, as designated by the North American Electric Reliability Corporation, or successor categories adopted after September 25, 2021;

(d) Results, regardless of best efforts to secure cost-effective nonemitting energy resources or funding for energy efficiency and conservation, in the provision of service at other than fair and reasonable rates; or

(e) Otherwise compromises the power quality or integrity of an electric company's system.

(3) An electric company making a request under this section shall submit to the commission an application that includes:

(a) An explanation of how compliance results in one or more of the issues described under subsection (2) of this section;

(b) A description of how a temporary exemption from compliance with one or more of the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475 will avoid the issues identified under paragraph (a) of this subsection; and

(c) A plan to achieve full compliance with the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475, including an estimate of the time needed to achieve full compliance.

(4) In applying for a temporary exemption under this section, an electric company has the burden of demonstrating that the company's compliance will likely result in one or more of the issues described under subsection (2) of this section.

(5) If, after investigation, the commission determines that compliance with one or more of the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475 will, more likely than not, result in one or more of the issues described under subsection (2) of this section, the commission shall:

(a) Issue an order exempting the electric company from one or more of the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475 for a length of time sufficient to allow the electric company to achieve full compliance in a manner that does not result in one or more of the issues described under subsection (2) of this section.

(b) Direct the electric company to take specific actions to remedy the potential issue or issues identified in the order.

(c) Direct the electric company to file within six months from the date the order is issued, or within a length of time determined by the commission to be reasonable, a report on the company's progress toward achieving full compliance with the requirements of ORS 469A.052 or a clean energy plan adopted pursuant to ORS 469A.400 to 469A.475.

(6) An order issued under subsection (5) of this section may not impose a penalty but may require the use of alternative compliance rates or payments, if applicable, as provided in ORS 469A.180 during the period of time a temporary exemption is in effect.

(7) An electric company may request an extension of a temporary exemption granted under this section. The electric company shall include in the company's request for an extension the same information required under subsection (3) of this section and shall have the burden of proof described under subsection (4) of this section.

(8) The commission shall provide the same opportunity to an electricity service supplier as provided an electric company under this section to receive a temporary exemption from compliance with one or more of the requirements of ORS 469A.052, 469A.065 or 469A.400 to 469A.475, or extension of such a temporary exemption, based on comparable procedures and criteria, to the extent the procedures and criteria under this section apply to an electricity service supplier as applied to an electric company under this section.

(9) The commission may grant an electric company or electricity service supplier a temporary exemption that is comparable to a temporary exemption granted to another electric company or electricity service supplier without conducting a separate investigation under subsection (1) of this section, if the commission determines that the conditions that resulted in the granted temporary exemption holds for the electric company or electricity service supplier.

(10) Nothing in this section is intended to permanently relieve an electric company or electricity service supplier of the obligation to comply with the requirements of ORS 469A.052, 469A.065 or 469A.400 to 469A.475. [2021 c.508 §9]

**469A.445 Cost cap for electric companies; determining compliance costs and rate impact; exemption.** (1) An electric company or an organization that represents broad customer interests and that has a written agreement with an electric company pursuant to ORS 757.072 may request that the Public Utility Commission open an investigation to provide accounting for investments made, costs incurred or forecasted costs estimated by the electric company for the purpose of compliance with ORS 469A.400 to 469A.475. In making a request under this section, the petitioner shall provide information regarding the investments or costs sufficient to determine whether the investments or costs contribute to compliance with ORS 469A.400 to 469A.475.

(2)(a) The commission shall provide parties to the proceeding with the procedural rights described in ORS 756.500 to 756.610, including the opportunity to develop an evidentiary record, conduct discovery, introduce evidence, conduct cross-examination and submit written briefs and oral arguments.

(b) The petitioner shall have the burden of showing, by a preponderance of the evidence, that the investment or cost contributes to compliance with ORS 469A.400 to 469A.475.

(c) The commission shall issue a written order with findings on the evidentiary record development in the proceeding.

(d) Except as provided under ORS 756.610, a determination by the commission that an investment or cost contributes to compliance with ORS 469A.400 to 469A.475 is final and may not be reexamined.

(3) Upon determining that an investment or cost of an electric company contributes to compliance with ORS 469A.400 to 469A.475, the commission shall determine the actual or anticipated rate impact for the investment or cost on the same basis and with the same treatment for similarly situated investments or costs in the most recently approved general rate case or other relevant rate making proceeding. The commission shall use the actual or anticipated rate impact of each investment or cost to calculate the cumulative rate impact and shall:

(a) Cumulatively calculate the rate impact caused by all investments or costs that have been the subject of a proceeding pursuant to this section, and must be included in calculation for the time period that the investment or cost would affect rates, as adjusted by any change in net costs expected or foreseeable at the time of inclusion;

(b) Make any adjustments to the cumulative rate impact if the initial rate treatment was calculated on the basis of forecasted rate impact;

(c) Allow parties to the proceeding to propose alternative rate or accounting treatment of the investment or cost to limit the potential rate impact of the investment or cost; and

(d) Utilize cost allocation methodologies for attributing rate impacts of investments or costs for multistate electric companies.

(4) Upon a determination that the actual or anticipated cumulative rate impact calculated under subsection (3) of this section exceeds six percent of the annual revenue requirement for a year, the commission shall provide an exemption from further compliance with the requirements of ORS 469A.400 to 469A.475. An exemption must be:

(a) Narrowly tailored to otherwise give full force and effect to the requirements of ORS 469A.400 to 469A.475 that can be complied with without regard to the cumulative rate impact; and

(b) Limited in duration to only such time as is necessary to allow for additional investments and actual or forecasted costs to be made or incurred without exceeding the cumulative rate impact.

(5) A determination by the commission made under this section shall have no effect

on and may not be used as collateral or presumptive evidence in any other proceeding that determines rate recovery of the investment or cost, including in a general rate case or in a proceeding under ORS 469A.120.

(6) The commission may, on its own motion pursuant to ORS 756.515, open a proceeding under this section and direct an electric company to make a filing described under subsection (1) of this section. [2021 c.508 §10]

**469A.450 Cost cap for electricity service suppliers; comparable exemption and procedures.** The Public Utility Commission shall provide the same opportunity to an electricity service supplier as provided an electric company under ORS 469A.445 to receive a comparable exemption from further compliance with the requirements of ORS 469A.400 to 469A.475. A comparable exemption shall be provided based on comparable procedures and criteria, to the extent the procedures and criteria apply to an electricity service supplier as applied to an electric company under ORS 469A.445 and adjusted to reflect applicable differences between electricity service suppliers and electric companies. [2021 c.508 §11]

**469A.455 Performance incentive for early compliance.** In furtherance of the clean energy targets set forth in ORS 469A.410, the Public Utility Commission may apply a performance incentive for early compliance with one or more of the clean energy targets. [2021 c.508 §12]

**469A.460 No modification to renewable portfolio standards.** The requirements of ORS 469A.400 to 469A.475 do not replace or modify the requirements of ORS 469A.005 to 469A.210. [2021 c.508 §13]

**469A.465 Rules; costs recovery.** (1) The Public Utility Commission may adopt rules as necessary to implement ORS 469A.400 to 469A.475.

(2) The commission shall review and identify costs incurred by electric companies for obligations not similarly imposed on electricity service suppliers to comply with ORS 469A.400 to 469A.475 that retail electric consumers served by electricity service suppliers may avoid by obtaining electric power through direct access and ensure that the identified costs are recovered from all retail electricity consumers, are calculated and recovered on the basis of electricity consumption and bear a direct relationship to costs borne by retail electricity consumers served by electric companies. [2021 c.508 §14]

**469A.475 Legislative findings; electricity markets; review of greenhouse gas emissions rates.** (1)(a) The Legislative Assembly finds that existing and future elec-

tricity markets will play a critical role in the transformation of the electric sector to non-emitting sources, as well as enabling load serving entities to reduce costs and serve load reliably by accessing resource and load diversity.

(b) The Legislative Assembly further finds that accounting and compliance frameworks designed to further the State of Oregon's policy objectives should support and be consistent with efforts to enhance the access to and scope of existing and potential future electricity markets.

(c) Acknowledging the inherently regional and multistate nature of electricity markets, the State of Oregon should coordinate and collaborate with other states to achieve the goal of aligning accounting methodologies where possible while also ensuring market rules do not undermine state policy objectives.

(d) Over time, the evolution of regional wholesale electricity markets may necessitate the modification of existing accounting and compliance rules to ensure the benefit of market participation are preserved.

(2) The Department of Environmental Quality may periodically review and update its calculation under ORS 468A.280 of the greenhouse gas emissions rates assigned to unspecified power purchases and purchases of power dispatched by centralized market operators to reflect the current resource mix and associated emissions of such purchases. The department shall ensure that the calculation of emissions rates under this section takes into account the potential for the energy imbalance market and other centralized market operations across a wide geographic area to increase the availability of nonemitting resources to serve load in the state. [2021 c.508 §15]

**469A.480 Electric company serving 25,000 or fewer consumers not subject to requirements.** ORS 469A.400 to 469A.475 do not apply to an electric company, as defined in ORS 757.600, that serves electricity to 25,000 or fewer retail electricity consumers, as defined in ORS 757.600, located in this state. [2021 c.508 §17]

## SMALL SCALE LOCAL ENERGY LOAN PROGRAM

(2) The confidentiality provided by subsection (1)(d) of this section does not apply to concluded litigation. Nothing in subsection (1)(d) of this section limits any right granted by discovery statutes to a party to litigation or potential litigation. [1991 c.118 §2; 2005 c.201 §5; 2007 c.71 §152]

**Note:** 470.065 was added to and made a part of ORS chapter 470 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**470.070 Small Scale Local Energy Project Advisory Committee.** (1) The Director of the State Department of Energy shall appoint a Small Scale Local Energy Project Advisory Committee to review applications made under ORS 470.060 and rules adopted under ORS 470.080, other than applications for energy efficiency and sustainable technology loans, and make recommendations regarding those applications to the director.

(2) Nine members shall be appointed to the Small Scale Local Energy Project Advisory Committee. Each member shall be appointed to serve a four-year term, commencing on the date of appointment, and until a successor is appointed and qualified. The members shall represent the interest of the citizens of this state and shall be knowledgeable in the areas of small scale energy technology, natural resource development, environmental protection, finance, agriculture, local government operations and utility operations. At least three members shall reside outside the Willamette Valley.

(3) The committee shall elect its own presiding officer, adopt rules for its procedure and meet on call of the presiding officer or a majority of the members. A majority of the members shall constitute a quorum to do business. The director shall provide administrative facilities and services for the committee.

(4) Members of the Small Scale Local Energy Project Advisory Committee shall be entitled to expenses as provided by ORS 292.495. [1979 c.672 §3; 1987 c.365 §1; 2003 c.186 §56; 2009 c.753 §56; 2009 c.760 §2]

**470.080 Standards for small scale local energy projects; rules; review of applications; referral to committee; committee criteria.** (1) After consultation with the Small Scale Local Energy Project Advisory Committee, the Director of the State Department of Energy shall establish by rule standards and criteria for small scale local

energy projects to be funded under this chapter other than projects funded through energy efficiency and sustainable technology loans. The standards and criteria shall operate to encourage diversity in projects funded, give preference to the maximum extent practical to projects proposed by individuals and small businesses, ensure acceptability of environmental impacts and shall require consideration of the potential contribution of a project if developed at other suitable locations to meeting the energy needs of this state. The standards and criteria shall give the least preference to projects proposed by an eligible federal agency.

(2) All applications submitted under ORS 470.060 shall be reviewed by the State Department of Energy. The department may request that the applicant submit additional information or revise the application. The department shall:

(a) Determine whether the application meets the standards and criteria adopted under subsection (1) of this section; and

(b) Recommend approval or denial of the loan application, and if approval is recommended in what amount the loan should be made.

(3) After concluding its review, unless the application meets the criteria established by the committee under subsection (4) of this section, the department shall refer the application and its findings and recommendation to the committee for its review. The department shall notify the applicant of the date, time and place of any oral presentation to the committee on the application. The committee shall review the application and the department's findings and recommendations and advise the director whether the proposed small scale local energy project meets the criteria established by the director under subsection (1) of this section, whether the project should be financed with moneys from the Small Scale Local Energy Project Loan Fund and in what amount the loan should be made if approved.

(4) The committee may provide for direct referral of an application by the department to the director if the application meets criteria established by the committee. [1979 c.672 §4; 1981 c.50 §3; 1997 c.29 §3; 2003 c.186 §57; 2009 c.753 §57]

**470.085** [1985 c.593 §8; repealed by 1991 c.118 §4]

**470.090 Approval or rejection of project financing by director; certification of amount of loan; findings; notice.** (1) After consideration of the recommendation of the Small Scale Local Energy Project Advisory Committee or the State Department of Energy as provided by ORS 470.080, the Director of the State Department of Energy may approve or reject the financing of a small

scale local energy project described in an application filed as provided in ORS 470.060, using moneys in the Small Scale Local Energy Project Loan Fund. Approval of a loan by the director shall include a certification of the amount of the loan.

(2) The director's approval of a loan for a small scale local energy project shall be based on a finding that:

(a) The proposed small scale local energy project meets established standards and criteria under ORS 470.080;

(b) The proposed project is consistent with the preservation and enhancement of environmental quality;

(c) The proposed project is feasible and a reasonable risk from practical and economic standpoints;

(d) The plan for development of the project is satisfactory;

(e) The applicant is qualified, creditworthy and responsible and is willing and able to enter into a contract with the director for development and repayment as provided in ORS 470.150 or 470.645;

(f) There is a need for the proposed small scale local energy project and the applicant's financial resources are adequate to provide the working capital to maintain the project after completion;

(g) Moneys in the loan fund are or will be available for the development of the proposed small scale local energy project;

(h) A dwelling constructed before January 1, 1979, that will be served by a proposed space heating project is weatherized according to the standards established under ORS 469.155;

(i) Except for a proposed space heating project for a dwelling under paragraph (h) of this subsection, the loan does not finance any project for which the projected economic value of the energy savings of the project during the first year the project is implemented is equal to or greater than the cost of the project; and

(j) The loan will not preclude individuals and small businesses from access to loan moneys.

(3) The director shall notify the applicant and the presiding officer of the committee of the director's action and of the reasons for that action. The director shall inform the applicant of the review procedure established in ORS 470.100. [1979 c.672 §5; 1981 c.50 §4; 1981 c.565 §4; 1983 c.188 §3; 2003 c.186 §58; 2005 c.201 §6; 2009 c.753 §58]

**470.100 Committee review of rejection or approval in different amount; committee appeal to Governor; finality of Governor's action.** (1) If the Director of the

State Department of Energy rejects a loan application or approves a loan amount different than that requested by the applicant, the applicant may request that the Small Scale Local Energy Project Advisory Committee review the director's action.

(2) The committee may review the director's action on its own motion or at the request of the applicant. A majority of the members of the committee may authorize the presiding officer of the committee to appeal the director's action to the Governor.

(3) An appeal of the director's action may be initiated by the presiding officer of the committee no later than 45 days after the date the applicant receives notice of the director's action under ORS 470.090.

(4) The decision of the Governor is final. If the Governor fails to act within 30 days after receiving the appeal, the appeal shall be considered to be denied.

(5) Notwithstanding ORS chapter 183, a decision of the director or the Governor on an application for financing under ORS 470.090 or this section is not subject to judicial review. [1979 c.672 §6; 2003 c.186 §59; 2009 c.753 §59]

**470.110 Gifts credited to Small Scale Local Energy Project Loan Fund.** The Director of the State Department of Energy may accept gifts of money or other property from any source, given for the purposes of ORS 470.050 to 470.120, 470.140 (1) and 470.150 to 470.210. Money so received shall be paid into the Small Scale Local Energy Project Loan Fund. Money or other property so received shall be used for the purposes for which received. [1979 c.672 §12; 2003 c.186 §60; 2009 c.753 §60]

**470.120 Limit on loan to amount not funded by other sources.** If the applicant receives from any source other than the Small Scale Local Energy Project Loan Fund, the Energy Project Supplemental Fund or the Energy Project Bond Loan Fund any moneys to assist in the development of the project, the amount of the loan to the applicant from the Small Scale Local Energy Project Loan Fund, Energy Project Supplemental Fund or Energy Project Bond Loan Fund shall be limited to that amount necessary for the development of those portions of the project not funded by other sources. [1979 c.672 §15; 2009 c.753 §61]

**470.130 Appropriation of Small Scale Local Energy Project Loan Fund.** All moneys in the Small Scale Local Energy Project Loan Fund created by Article XI-J of the Oregon Constitution are appropriated continuously to the State Department of Energy and shall be used for the purposes authorized under this chapter. [1979 c.672 §16; 2003 c.186 §61; 2009 c.753 §62]

**470.135 Administration of small scale local energy project loan program funds and accounts.** The duties of the Director of the Oregon Department of Administrative Services to establish, maintain and keep accounts of, and make disbursements or transfers out of, the funds and accounts established or identified in the two bond indentures, as supplemented, dated June 1, 1981, and September 1, 1985, that relate to the Small Scale Local Energy Project Loan Program established by Article XI-J of the Oregon Constitution and this chapter are transferred to the State Department of Energy. Notwithstanding the transfer of these fiscal functions to the State Department of Energy, in accordance with ORS 291.015 (2), the State Department of Energy's performance of these fiscal functions shall remain subject to the control of the Oregon Department of Administrative Services. [1993 c.496 §2; 2003 c.186 §62]

**470.140 Rulemaking authority; biennial report.** (1) In accordance with the applicable provisions of ORS chapter 183, the Director of the State Department of Energy may adopt rules considered necessary to carry out the purposes of this chapter.

(2) The director shall submit to the Legislative Assembly and the Governor a biennial report of the transactions of the Small Scale Local Energy Project Loan Fund and the Small Scale Local Energy Project Administration and Bond Sinking Fund in such detail as will accurately indicate the condition of the funds. [1979 c.762 §§13,27; 2003 c.186 §63; 2009 c.753 §63]

**470.145 State Department of Energy to develop marketing plan.** The State Department of Energy shall develop, implement and periodically update a marketing plan to inform potential applicants of the availability of small scale local energy project loans. The first priority of the marketing plan shall be to inform individuals and small businesses that small scale local energy project loans are available. [1983 c.188 §9]

#### (Loans and Repayment)

**470.150 Loan contract; security; content.** Except as provided in ORS 470.155 and 470.170, if the Director of the State Department of Energy approves the financing of a small scale local energy project, the director, on behalf of the state, and the applicant may enter into a loan contract, secured by a first lien or by other good and sufficient collateral in the manner provided in ORS 470.155 to 470.210. For purposes of this section, the interest of the State Department of Energy under a lease purchase contract entered into with an eligible federal or state agency or a

municipal corporation may constitute good and sufficient collateral. The contract:

(1) May provide that the director, on behalf of the state, must approve the arrangements made by the applicant for the development, operation and maintenance of the small scale local energy project, using moneys in the Small Scale Local Energy Project Loan Fund for the project development.

(2) Shall provide a plan for repayment by the applicant of moneys borrowed from the loan fund used for the development of the small scale local energy project and interest on those moneys used at a rate of interest the director determines is necessary to provide adequate funds to recover the administrative expenses incurred in connection with the loan. The director shall set the interest rate at an incremental rate above the interest rate on the underlying bonds in an amount sufficient to recover all program-related costs including, but not limited to, implementation, financing, administration and promotional costs for the program. The incremental rate for projects proposed by an eligible federal agency shall be greater than the incremental rate charged to any other governmental borrower. The repayment plan, among other matters:

(a) Shall provide for commencement of repayment by the applicant of moneys used for project development and interest thereon not later than two years after the date of the loan contract or at any other time as the director may provide. In addition to any other prepayment option provided in a borrower's loan agreement, the department shall provide a borrower the opportunity to prepay the borrower's loan, without any additional premium, by defeasing such loan to the call date of the bond or bonds funding the applicable loan, or any refunding bonds linked to the loan, but such defeasance shall occur only if the director finds that after the defeasance, the sinking fund will have sufficient funds to make payments required under ORS 470.300 (1).

(b) May provide for reasonable extension of the time for making any repayment in emergency or hardship circumstances, if approved by the director.

(c) Shall provide for evidence of debt assurance of and security for repayment by the applicant considered necessary or proper by the director.

(d) Shall set forth the period of loan, which may not exceed the usable life of the completed project, or 30 years from the date of the loan contract, whichever is less.

(e) May set forth a procedure for formal declaration of default of payment by the di-

rector, including formal notification of all relevant federal, state and local agencies; and further, a procedure for notification of all relevant federal, state and local agencies that declaration of default has been rescinded when appropriate.

(3) May include provisions satisfactory to the director for field inspection, the director to be the final judge of completion of the project.

(4) May provide that the liability of the state under the contract is contingent upon the availability of moneys in the loan fund for use in the planning and development of the project.

(5) May include further provisions the director considers necessary to ensure expenditure of the funds for the purposes set forth in the approved application.

(6) May provide that the director may institute an appropriate action or suit to prevent use of the project financed by the loan fund by any person who is delinquent in the repayment of any moneys due the sinking fund.

(7) If the project is being financed by an energy efficiency and sustainable technology loan or small scale local energy program loan, in addition to the requirements of subsections (1) to (6) of this section, shall include:

(a) For an energy efficiency and sustainable technology loan that relies on an on-bill financing system for the collection of a loan repayment charge, an agreement by the applicant to notify a person acquiring ownership of, or an interest in, the property from the applicant that the loan repayment charge will be transferred to the utility customer account of the person acquiring the ownership or interest unless the loan is discharged before or at the time the ownership or interest transfers;

(b) A plainly worded acknowledgment by the applicant that failure to make payments as required under the loan agreement may result in the foreclosure of a property lien or other debt collection actions;

(c) A waiver stating that the applicant waives any jurisdictional or other irregularities or defects in:

(A) The energy efficiency and sustainable technology loan program;

(B) A small scale local energy project;

(C) The small scale local energy program loan provisions;

(D) This chapter; or

(E) Department rules that relate in any way to the loan repayment charge, real property lien provisions or any form or com-

bination of loan security or to the requirement to satisfy the loan obligation;

(d) If the applicant is not the owner of the property to be burdened by the loan repayment charge, fixture filing or real property lien, provision for participation by the property owner as a party to the contract or a notarized authorization by the owner for the fixture filing and lien; and

(e) A description of any other conditions required by the department. [1979 c.672 §7; 1985 c.593 §4; 1987 c.365 §2; 1997 c.29 §4; 1997 c.482 §1; 1999 c.365 §8; 2003 c.186 §64; 2009 c.753 §64]

**470.155 Loan contract in form of intergovernmental agreement; provisions.** A loan contract with an eligible state agency for a small scale local energy project may be made in the form of an intergovernmental agreement under ORS chapter 190. The agreement shall set forth, among other matters, that:

(1) The small scale local energy project shall be security for the loan.

(2) The applicant pledges to request each biennium during the term of the loan, spending authorization or appropriation of funds from the Legislative Assembly or pledges to otherwise provide funds sufficient to pay the loan payments due that biennium.

(3) If applicable, the pledge of the applicant to repay the loan shall be contingent upon the continued spending authorization or appropriation by the Legislative Assembly of funds sufficient to pay the loan. [1985 c.593 §6; 1991 c.118 §3; 1997 c.29 §5]

**470.160 Payment from loan funds.** If the Director of the State Department of Energy approves a loan for a small scale local energy project, the State Treasurer shall pay moneys for such project from the Small Scale Local Energy Project Loan Fund or Energy Project Bond Loan Fund in accordance with the terms of the loan contract, as prescribed by the director. [1979 c.672 §8; 2003 c.186 §65; 2009 c.753 §65]

**470.170 Security for loan.** (1)(a) Except as otherwise provided in this subsection, when a loan is made under this chapter to an applicant other than a municipal corporation, the loan shall be secured pursuant to a mortgage, trust deed, security agreement, pledge, assignment or similar instrument, by a security interest or lien on real or personal property in the full amount of the loan or as the Director of the State Department of Energy shall require for adequate security, including but not limited to long-term leasehold interests or equitable interests in real property or personal property. In lieu of, or in addition to, any of the collateral otherwise described in this paragraph, the applicant may secure the loan by providing credit

enhancement, including but not limited to a letter of credit or payment bond, or a guaranty acceptable to the director.

(b) To the extent consistent with any declaration, pledge or agreement for bonds issued under ORS 470.220 to 470.290, an energy efficiency and sustainable technology loan shall be secured as provided in ORS 470.680 or 470.685.

(2) When a loan is made to a municipal corporation for the development of a small scale local energy project under this chapter, the loan shall be secured as the director shall require for adequate security. The security may be in the form of a lien, mortgage, interest under a lease-purchase contract or other form of security acceptable to the director and the municipal corporation.

(3) When a loan made under this chapter is secured by a lien on the real property of the applicant, the director shall perfect the lien by recording as provided by law.

(4) Upon payment of all amounts loaned to an applicant pursuant to this chapter, the director shall file a satisfaction or release notice that indicates repayment of the loan.

(5) The director may cause to be instituted appropriate proceedings to foreclose liens for delinquent loan payments, and shall pay the proceeds of any such foreclosure, less the director's expenses incurred in foreclosing, into the Small Scale Local Energy Project Administration and Bond Sinking Fund if the loan was issued from the Small Scale Local Energy Project Loan Fund, or into the Energy Project Bond Loan Fund if the loan was from the Energy Project Bond Loan Fund. In a foreclosure proceeding the director may bid on property offered for sale in the proceedings and may acquire title to the property on behalf of the state.

(6) The director may take any action, make any disbursement, hold any funds or institute any action or proceeding necessary to protect the state's interest.

(7) The director may settle, compromise or release, for reasons other than uncollectibility as provided in ORS 293.240, all or part of any loan obligation so long as the director's action is consistent with the purposes of this chapter and does not impair the ability to pay the administrative expenses of the State Department of Energy or the obligations of any bonds then outstanding. [1979 c.672 §9; 1981 c.50 §5; 1983 c.188 §4; 1987 c.365 §3; 1999 c.365 §9; 2001 c.584 §10; 2003 c.186 §66; 2009 c.753 §66]

**470.180 Withholding of state funds due to municipal corporation that defaults on loan.** In addition to any other remedy available to the State Department of Energy, if a

municipal corporation entitled by law to share in the apportionment of any state revenues or funds defaults on any payments due to the State of Oregon under a loan contract entered into under ORS 470.150, the State Department of Energy may certify that fact to the Oregon Department of Administrative Services and the Oregon Department of Administrative Services shall withhold payment of any revenues or funds in the State Treasury to which the municipal corporation is entitled, in an amount not to exceed the balance owing on the loan, until the State Department of Energy certifies that the default has been remedied. [1979 c.672 §10; 1987 c.365 §4]

**470.190 Remedies.** If an applicant fails to comply with a contract entered into with the Director of the State Department of Energy for development and repayment as provided in ORS 470.150 or 470.645, the director, in addition to remedies provided in ORS 470.170 and 470.180, may seek other appropriate legal remedies to secure the loan and may contract as provided in ORS 470.150 with any other person for continuance of development and for repayment of moneys from the Small Scale Local Energy Project Loan Fund or from the Energy Project Bond Loan Fund used therefor and interest thereon. [1979 c.672 §11; 2003 c.186 §67; 2009 c.753 §67]

**470.200 Refinancing of project; use of funds.** If any small scale local energy project is refinanced or an additional grant or loan intended to finance the project development is obtained from other sources after the execution of the loan from the state, all such funds shall be used to repay the state unless the Director of the State Department of Energy finds that repayment of the state from the additional grant or loan would be contrary to public interest. [1979 c.672 §14; 1983 c.188 §5]

**470.210 Municipal corporation may enter into loan contract; purchase of municipal corporation's general or revenue obligation.** (1) Notwithstanding any other provision of law, a municipal corporation may enter into a loan contract with the State Department of Energy to finance a small scale local energy project.

(2) In order to finance a small scale local energy project, the Director of the State Department of Energy, on behalf of the state and in lieu of entering into a loan contract under subsection (1) of this section, may purchase or otherwise acquire a municipal corporation's general obligations or revenue obligations, including but not limited to

bonds, notes, certificates of participation, warrants or lease purchase agreements. [1983 c.188 §8; 2003 c.186 §68; 2005 c.201 §7]

### (Bonds)

**470.220 Issuance of bonds.** In order to provide funds for the purposes specified in Article XI-J of the Oregon Constitution, bonds may be issued as provided in ORS 470.220 to 470.290. [1979 c.672 §17; 1981 c.660 §23; 2005 c.201 §8]

**470.225 Procedure for bond issuance.** The State Treasurer shall issue bonds described in ORS 470.220 to 470.290 in accordance with the applicable provisions of ORS chapter 286A. [2005 c.201 §2; 2007 c.783 §207]

**470.230 Bond proceeds credited to Small Scale Local Energy Project Loan Fund; use of funds.** Except as provided in ORS 470.270, all moneys obtained from the sale of general obligation bonds under ORS 470.220 to 470.290 and Article XI-J of the Oregon Constitution shall be credited by the State Treasurer to the Small Scale Local Energy Project Loan Fund. Those moneys shall be used only for the purposes stated in Article XI-J of the Oregon Constitution, including payment of the costs of issuing the bonds and of obtaining credit enhancement for the bonds, and making payments of interest on bonds issued pursuant to the provisions of ORS 470.220 to 470.290 if there are insufficient funds in the Small Scale Local Energy Project Administration and Bond Sinking Fund to make the payments referred to in ORS 470.300 (1). Moneys loaned to municipal corporations but withheld by the State Department of Energy for security or to pay for future project costs may remain in the loan fund. Pending the use of the moneys in the loan fund for the proper purposes, the moneys may be invested in the manner provided by law. [1979 c.672 §18; 1987 c.365 §5; 2003 c.186 §69; 2005 c.201 §9; 2009 c.753 §68]

**470.240 General obligation bonds to include promise to pay principal amount.** All general obligation bonds issued under ORS 470.220 to 470.290 and Article XI-J of the Oregon Constitution shall contain a direct promise of the State of Oregon to pay the principal amount of the bonds, plus any accrued interest and any redemption premium. The principal of and the interest and redemption premium, if any, upon the bonds, when due, shall be paid at the fiscal agency of the State of Oregon. The charges imposed by that agency for its services shall be paid, upon approval by the State Treasurer, from the Small Scale Local Energy Project Administration and Bond Sinking Fund. [1979 c.672 §19; 1993 c.496 §5; 2005 c.201 §10; 2009 c.753 §69]

**470.250** [1979 c.672 §20; 1981 c.50 §6; 1987 c.158 §102; 2003 c.186 §70; repealed by 2005 c.201 §14]

**470.260** [1979 c.672 §23; 1981 c.50 §7; 2003 c.186 §71; repealed by 2005 c.201 §14]

**470.270 General obligation refunding bonds.** (1) After consultation with the State Treasurer, the Director of the State Department of Energy may issue general obligation refunding bonds for the purpose of refunding outstanding bonds issued under ORS 470.220 to 470.290 and Article XI-J of the Oregon Constitution. The refunding bonds may be sold in the same manner as other bonds are sold under ORS 470.220 to 470.290. All moneys obtained from the sale of refunding bonds shall be credited by the State Treasurer to the Small Scale Local Energy Project Administration and Bond Sinking Fund. The refunding bonds may be issued to refund bonds previously issued for refunding purposes. Pending the use of moneys obtained from the sale of refunding bonds for proper purposes, such moneys may be invested in the manner provided by law.

(2) Notwithstanding any provision of ORS 470.150, if the State Department of Energy issues taxable refunding bonds at a lower interest rate to refund outstanding general obligation bonds, and is unable to allow loan recipients to receive a portion of the interest savings, the director shall allow the loan recipient to prepay the outstanding loan balance upon the request of the recipient. The director shall respond to such a request within 30 days after receiving the request by specifying the outstanding principal balance after applying reserves held by the state for the borrower and the prepayment premium as listed in the bond document, loan document or bond purchase agreement.

(3) The department shall pursue opportunities for refunding bonds to reduce interest sums payable by the department. When the department refunds a bond with tax-exempt bonds, the department shall share, on an equitable basis, the savings from any refunding with the borrowers whose loans were made with the proceeds of the refunded bonds in an amount consistent with a finding by the director that the sinking fund has, and will continue to have, sufficient funds to make payments required under ORS 470.300 (1). The department may not refund tax-exempt bonds with taxable bonds, unless the department is able to share the savings associated with such a refunding with the borrowers whose loans are linked to such bonds. At least 120 days before the date on which the department intends to issue refunding bonds, the director shall notify each borrower whose loan was made from the proceeds of the bonds being refunded and shall offer the borrower the opportunity to prepay the borrower's loan. A borrower shall respond within 60 days of the date of the notice described in this subsection if the borrower in-

tends to prepay the borrower's loan. [1979 c.672 §22; 1995 c.282 §1; 1997 c.482 §2; 2003 c.186 §72; 2005 c.201 §11; 2009 c.753 §70]

(2) The State Treasurer shall compute and determine in January of each year, after the sale of bonds under ORS 470.220 to 470.290 and Article XI-J of the Oregon Constitution, the amount of principal, interest and redemption premiums that will fall due during the year on bonds then outstanding and unpaid and shall maintain or hold in the sinking fund sufficient moneys to pay such maturing obligations. [1979 c.672 §§21,24; 2005 c.201 §12; 2009 c.753 §71]

**470.290 Bond indebtedness limited to constitutional limit.** No bonds shall be issued or sold under ORS 470.220 to 470.290 nor indebtedness incurred thereunder, which singly, or in the aggregate with previous debts or liabilities incurred for small scale local energy projects, shall exceed any limitation provided in the Oregon Constitution at the date of the issuance and sale of such bonds. If the maximum aggregate principal sum of bonds authorized to be issued under ORS 470.220 to 470.290 exceeds any limitation provided in the Oregon Constitution, bonds shall be issued under ORS 470.220 to 470.290 in the aggregate principal sum of not to exceed that authorized under the limitation provided in the Oregon Constitution. [1979 c.672 §25]

**470.300 Small Scale Local Energy Project Administration and Bond Sinking Fund; uses; sources.** (1) There hereby is created the Small Scale Local Energy Project Administration and Bond Sinking Fund, separate and distinct from the General Fund, to provide for payment of:

(a) Administrative expenses of the State Department of Energy and the Director of the State Department of Energy in processing applications, investigating potential small scale local energy projects and proposed loans and servicing and collecting outstanding loans made from the Small Scale Local Energy Project Loan Fund, if the expense is not paid directly by the applicant.

(b) Administrative expenses of the State Treasurer in carrying out the duties, functions and powers imposed upon the State Treasurer by this chapter.

(c) Principal, interest and redemption premium, if any, of all bonds issued pursuant

(e) Costs of issuing the bonds and of obtaining credit enhancement for the bonds.

(2) The fund created by subsection (1) of this section shall consist of:

(a) Application fees required by ORS 470.060, unless the department requires the applicant to pay the fee directly for a cost incurred in connection with the application.

(b) Repayment of moneys loaned to applicants from the Small Scale Local Energy Project Loan Fund, including interest on such moneys.

(c) Such moneys as may be appropriated to the fund by the Legislative Assembly.

(d) Moneys obtained from the sale of refunding bonds under ORS 470.220 to 470.290 and any accrued interest on such bonds.

(h) Gifts, grants, donations or other moneys for promoting small scale local energy program loan purposes and goals.

(3) The director, with the approval of the State Treasurer, may transfer moneys from the sinking fund to the loan fund if:

(a) A cash flow projection shows that, for the term of the bonds outstanding at the time the director transfers the moneys, remaining moneys in the sinking fund, together with expected loan contract payments and fund earnings, will improve the financial basis of the program and will continue to be adequate to pay bond principal, interest, redemption premiums, if any, and administration costs; and

(b) The transfer will not create the need for issuance of any bonds.

(4) The director, with the approval of the State Treasurer, may establish separate and distinct accounts within the sinking fund to accomplish the purpose of this section. [1979 c.672 §26; 1981 c.50 §8; 1983 c.188 §6; 1985 c.805 §4; 1987 c.365 §6; 1993 c.496 §6; 2003 c.186 §73; 2005 c.201 §13; 2009 c.753 §72]

**470.310 Procedure if sinking fund inadequate.** (1) If there are insufficient funds in the Small Scale Local Energy Project Administration and Bond Sinking Fund to make

the payments referred to in ORS 470.300 (1), the Director of the State Department of Energy may request the funds necessary for such payments from the Legislative Assembly or the Emergency Board.

(2) When the director determines that moneys in sufficient amount are available in the sinking fund, the State Treasurer shall reimburse the General Fund without interest, in an amount equal to the amount allocated by the Legislative Assembly or the Emergency Board pursuant to subsection (1) of this section. The moneys used to reimburse the General Fund under this subsection shall not be considered a budget item on which a limitation is otherwise fixed by law, but shall be in addition to any specific appropriations or amounts authorized to be expended from continually appropriated moneys. [1979 c.672 §28; 2003 c.186 §74; 2009 c.753 §73]

(2) The goals of the loan program are to:

(a) Provide capital at the lowest possible cost for the purpose of supporting energy efficiency and conservation and renewable energy projects for residential and commercial structures;

(b) Expand, and to simplify taking advantage of, opportunities for small scale local energy project financing;

(c) Leverage multiple sources of public and private capital through a unified and strategic funding mechanism;

(d) Provide technical and financing information to the public and to businesses;

(e) Foster energy savings;

(f) Stimulate job growth; and

(g) Help substantially reduce carbon emissions. [2009 c.753 §2]

**470.505 Delay or suspension of program.** Notwithstanding any other provision of this chapter, if the Director of the State Department of Energy determines that the State Department of Energy is unable to issue a sufficient number of energy efficiency and sustainable technology loans to offset the reasonable cost to the department of operating the loan program, the director may

delay or suspend the energy efficiency and sustainable technology loan program in one or more utility service territories or may delay or suspend any feature of the energy efficiency and sustainable technology loan program. [2009 c.753 §2a; 2013 c.8 §14]

**470.510 State Department of Energy may enter contracts for loan issuance; financing of loans; consent of utility.** (1) Except as provided in subsection (3) of this section, the State Department of Energy may enter into contracts for the issuance of energy efficiency and sustainable technology loans. Except as provided in ORS 470.700, the department shall finance the loans using moneys from the Small Scale Local Energy Project Loan Fund, the Energy Project Supplemental Fund or the Energy Project Bond Loan Fund, or from a combination of those funds.

(2) The sustainable energy project manager may enter into agreements with trade associations and other public and private entities for the promotion or marketing of the energy efficiency and sustainable technology loan program.

(3) The department must obtain the consent of the utility before operating an energy efficiency and sustainable technology loan program within the service territory of:

(a) An investor-owned electric utility that serves fewer than 20,000 customers; or

(b) An investor-owned gas utility that is actively administering an energy conservation program established:

(A) On or before January 1, 2009; and

(B) Without assistance from a nongovernmental entity that receives public purpose charge moneys under ORS 757.612. [2009 c.753 §3]

A loan processed by a person contracting with the department, other than a loan processed by a sustainable energy project manager, must include the department as a party to the loan. [2009 c.753 §5]

**470.525 Quarterly report.** (1) The State Department of Energy shall send a quarterly report to the Small Scale Local Energy Project Advisory Committee. The report shall include, but need not be limited to, a summary of:

- (a) The total amount of energy efficiency and sustainable technology loans issued;
- (b) The types of projects being funded by the loans; and
- (c) The characteristics of loan recipients.

(2) The committee shall review the report to determine whether the goals of the loan program are being implemented and whether applicable rules and statutory standards are met. The committee may send comments regarding the report to the Director of the State Department of Energy. [2009 c.753 §6]

#### (Project Managers)

**470.530 Qualifications; duties; certification program.** (1) Except as provided in subsection (5) of this section, the Director of the State Department of Energy may establish qualifications for sustainable energy project managers and may exercise oversight to ensure compliance with those qualifications. A sustainable energy project manager shall provide the promotion, technical and financial support and verifications necessary to administer an energy efficiency and sustainable technology loan.

(2) A sustainable energy project manager may administer an energy efficiency and sustainable technology loan only within a utility service territory of an investor-owned or consumer-owned utility that provides electricity or gas services.

(3) A sustainable energy project manager shall serve the utility service territory for which the sustainable energy project manager has been selected by the director. The sustainable energy project manager shall provide loan program information and technical and financial information to promote energy efficiency and use of renewable energy at the neighborhood and community levels. The sustainable energy project manager shall be responsible for small scale local energy project verification and for monitoring program effectiveness for energy efficiency and sustainable technology loans and small scale local energy program loans. The sustainable energy project manager may administer the energy efficiency and sustainable technology loan program within the utility service territory.

(4) A city, county, metropolitan service district or other local government entity, or a nonprofit, for-profit, tribal or state entity, may be a sustainable energy project manager

if the entity meets the qualifications established by the director under this section and is approved by the director to provide promotion, outreach and customer support related to the energy efficiency and sustainable technology loan program within a utility service territory. The Public Purpose Fund Administrator is an ex officio sustainable energy project manager. The Public Purpose Fund Administrator shall act as the sustainable energy project manager in any utility service territory that is not served by another sustainable energy project manager.

(5) The director shall establish a sustainable energy project manager certification program. However, the Public Purpose Fund Administrator or a consumer-owned utility is not required to obtain a sustainable energy project manager certificate and the Public Purpose Fund Administrator is not subject to any qualifications established by the director for a sustainable energy project manager. [2009 c.753 §7; 2010 c.92 §8; 2013 c.8 §5]

**470.535 Applications for certification as project manager; selection factors.** (1) The Director of the State Department of Energy shall initiate the certification process for a sustainable energy project manager by publishing a request for proposals.

(a) Background information about the applicant including, but not limited to, the qualifications, relevant experience, financial status and staff of the applicant;

(b) A proposed plan for implementing and administering the goals and requirements of the energy efficiency and sustainable technology loan program in the utility service territory; and

(c) Any additional information required by the director by rule.

(3) After reviewing all applications received, the director may select a sustainable energy project manager. In selecting the sustainable energy project manager, the director shall consider the following factors:

(a) The organizational experience of the applicant and the capacity of the applicant to successfully implement the energy efficiency and sustainable technology loan program goals and requirements.

(b) The strength of the applicant's proposed plan for implementing the goals and requirements of the energy efficiency and sustainable technology loan program.

(c) The cost at which the applicant can conduct outreach, promotion, loan applicant support and project verification services nec-

essary to implement the energy efficiency and sustainable technology loan program.

(d) Any other factors the director adopts by rule or directive.

(4) An applicant may not be certified as a sustainable energy project manager if the applicant has a fiduciary or other obligation that creates an actual or apparent conflict of interest that may interfere with achieving the goals of the energy efficiency and sustainable technology loan program. [2009 c.753 §8; 2013 c.8 §6]

**470.540 State Department of Energy to notify unsuccessful applicants; timetable for certification of project manager.**

(1) Upon selecting a proposed sustainable energy project manager, the Director of the State Department of Energy shall notify all unsuccessful applicants for the position that another candidate is proposed for appointment. The director shall negotiate with the proposed sustainable energy project manager regarding any modifications to the service cost estimates or other features of the applicant's proposed plan that are necessary to ensure that the applicant will meet the goals and requirements of the energy efficiency and sustainable technology loan program and State Department of Energy rules.

(2) To the extent practicable, the director shall certify a sustainable energy project manager not later than four months after publication of the request for proposals and not later than two months after the selection of the proposed sustainable energy project manager. However, the director may at any time select a different applicant as the proposed sustainable energy project manager or may reinstate the certification process.

(3) Upon deciding to certify the proposed sustainable energy project manager, the director shall give notice of the decision to all unsuccessful candidates, the public and the Small Scale Local Energy Project Advisory Committee. The director may approve the final certification of the sustainable energy project manager if:

(a) A request to appeal under ORS 470.545 is not filed within 15 days after the date the notice is sent; and

(b) The committee does not undertake a review of the proposed certification within 15 days after the date the notice is sent. [2009 c.753 §9; 2013 c.8 §15]

**470.545 Appeal of certification decision; fee.** (1) A person that believes a decision of the Director of the State Department of Energy to certify a sustainable energy project manager is inconsistent with applicable rules or statutes may file a request to appeal with the Small Scale Local Energy Project Advisory Committee. Unless the re-

quest for appeal is filed by a nonprofit entity, the request must be accompanied by a \$2,000 appeal fee. The fee shall be waived for a nonprofit entity. The committee may initiate a review on its own motion.

(2) A majority of the committee may authorize the presiding officer of the committee to appeal the certification decision to the Governor. The presiding officer may initiate an appeal to the Governor no later than 30 days after receiving a request for appeal or 15 days after the committee initiates a review on its own motion.

(3) The decision of the Governor is final. If the Governor does not act within 30 days after receiving the appeal from the presiding officer of the committee, the appeal is denied. [2009 c.753 §10]

**470.550 Term of certification of project manager; certification approval letter; conditions for termination of certification.**

(1) Unless the sustainable energy project manager is the Public Purpose Fund Administrator or a consumer-owned utility, the certification of a sustainable energy project manager shall be for a five-year term. The Director of the State Department of Energy shall issue the sustainable energy project manager a certification approval letter that states any conditions applicable to the certification.

(2) The director may terminate the certification of a sustainable energy project manager for:

(a) Failure to adequately implement an applicable plan for implementing the energy efficiency and sustainable technology loan program;

(b) Noncompliance with the regulatory or statutory requirements of the energy efficiency and sustainable technology loan program;

(c) Failure to meet any sustainable energy project manager criteria established by the director; or

(d) Failure to perform other certification conditions. [2009 c.753 §11; 2013 c.8 §16]

**470.555 Project managers; contract with qualified third parties; coordination.**

(1) The Public Purpose Fund Administrator shall be the sustainable energy project manager for investor-owned electric utilities. The Public Purpose Fund Administrator shall inform the Public Utility Commission and the State Department of Energy of the activities of the administrator by filing a yearly action plan and an end-of-year report with the commission and the department.

(2) An investor-owned gas utility may act as a sustainable energy project manager for the utility service territory serviced by the

utility or may contract with the Public Purpose Fund Administrator to act as the sustainable energy project manager on behalf of the utility.

(3) A consumer-owned utility shall be the sustainable energy project manager for the utility service territory serviced by the utility if the utility agrees to promote energy efficiency and sustainable technology loans as part of an energy efficiency or renewable energy program offered by the utility. A consumer-owned utility may conduct energy efficiency and renewable energy programs within the utility service territory of the utility regardless of whether the utility service territory is served by an energy efficiency and sustainable technology loan program. A consumer-owned utility may decline to participate in the energy efficiency and sustainable technology loan program.

(4) If a customer is served by both a gas utility and an electric utility that have energy efficiency and sustainable technology loan programs, the utility that supplies the customer's primary source of heat for the property shall supply loan program services for that customer.

(5) The existence of an energy efficiency and sustainable technology loan program, or the appointment of a sustainable energy project manager, in a utility service territory does not prevent a consumer-owned utility from conducting an energy efficiency or renewable energy program offered by the utility. If the consumer-owned utility declines to serve as a sustainable energy project manager for the utility service territory, the utility may:

(a) Continue with existing utility services and policies; or

(b) Work with the Director of the State Department of Energy to solicit and select a qualified entity to serve as the sustainable energy project manager as described in ORS 470.535 and 470.540.

(6) Subject to approval by the director, a sustainable energy project manager may contract with a qualified third party to assist the sustainable energy project manager in serving a utility service territory. If a utility service territory is served by a sustainable energy project manager, the appointment of additional sustainable energy project managers may be made only by entering into a subcontract approved by the existing sustainable energy project manager. If the third party is acting as a financier, the third party is not required to comply with laws regulating utilities based on the actions of the third party as a financier. The sustainable energy project manager may enter into agreements with trade associations and other public and private entities for the

promotion or marketing of the energy efficiency and sustainable technology loan program.

(7) The Public Purpose Fund Administrator and sustainable energy project managers shall cooperate with, and coordinate their outreach and promotional efforts with, local utilities and other stakeholders to promote energy efficiency and renewable energy and to use the customer contacts, resources and capacity of the utilities to engage and inform utility customers about the energy efficiency and sustainable technology loan program. The Public Purpose Fund Administrator and sustainable energy project managers shall coordinate with gas utilities regarding any changes to a gas pipeline and with electric utilities regarding electric charging or any changes to electrical connections that are external to a structure. The Public Purpose Fund Administrator and sustainable energy project managers shall coordinate with a gas utility regarding the installation of appliances used for space heating, water heating and compressed natural gas refueling. [2009 c.753 §12; 2013 c.8 §7]

(1) The director estimates that interest rates and total costs to program applicants that would result from the use of the sup-

plemental capital funds are lower than would result from the use of bond proceeds; and

(2) The supplemental capital funds are made subject to any requirements adopted by the director by rule to ensure adequate protection of project moneys. [2009 c.753 §21]

#### (Local Governments)

**470.605 Local governments may direct moneys to certain funds to finance loans; accounting of moneys.** (1) Subject to the approval of the Director of the State Department of Energy, a local government, public utility or other legally organized entity may direct moneys to the Energy Project Supplemental Fund or Jobs, Energy and Schools Fund for use within a limited geographic area of this state as a source of capital for financing energy efficiency and sustainable technology loans, small scale local energy program loans or loan offset grants.

(2) Any moneys deposited under this section shall be separately accounted for and shall be managed consistently with small scale local energy project goals and any agreement between the State Department of Energy and the entity providing the moneys. The moneys may be disbursed only for use as designated by, and in the geographic area designated by, the entity providing the moneys. [2009 c.753 §25; 2011 c.467 §15]

#### (Bonds)

**470.610 Issuance of bonds; written declarations of State Department of Energy.** (1) The State Treasurer, at the request of the Director of the State Department of Energy, from time to time may issue and sell revenue bonds in the name of and on behalf of the State of Oregon in compliance with the applicable provisions of ORS chapter 286A in the principal amount necessary to carry out the purposes of ORS 470.500 to 470.710, or for paying or refunding any revenue bonds previously issued on behalf of the State Department of Energy for those purposes. At least once every six months, the director shall estimate the anticipated demand for loans under the energy efficiency and sustainable technology loan program, and shall make a written declaration of this amount to the State Treasurer.

(2) All bonds shall be special revenue obligations of the State of Oregon, and, unless paid from the proceeds of other bonds, shall be payable as to principal, redemption premium, if any, and interest, through the Energy Revenue Bond Repayment Fund solely from the revenues, moneys and other assets of the Energy Project Bond Loan Fund and the Energy Project Supplemental Fund that may be pledged for that payment. The Direc-

tor of the State Department of Energy shall determine for each fiscal quarter the amount that will fall due during that fiscal quarter for bonds issued under this section, other amounts described in ORS 470.585 and any expected significant changes in bond obligations for upcoming fiscal quarters and the amount necessary to adequately fund reserves. The director shall request that the State Treasurer make transfers from the Energy Project Bond Loan Fund and Energy Project Supplemental Fund to the Energy Revenue Bond Repayment Fund as the director believes prudent to ensure the continuing payment of maturing obligations and the funding of reserves.

(3) Prior to an issuance of revenue bonds under this section, the director shall prepare and sign a written declaration setting forth the amount of the bonds to be issued and the terms and conditions for issuance. If the State Treasurer approves the declaration, the State Treasurer shall certify the approval on the declaration. The approved declaration shall be known as an "energy revenue bond declaration." Each bond declaration shall be deemed to be and shall constitute conclusive proof of the authorization to issue the bonds described in the bond declaration and may contain further pledges and covenants as determined by the director or the State Treasurer. [2009 c.753 §22; 2010 c.92 §5]

**470.615 Payment of bonds.** (1) Revenue bonds issued under ORS 470.610 do not constitute a debt, liability or general obligation of this state or any political subdivision of this state or a pledge of the faith and credit of this state or any political subdivision of this state, but shall be payable solely from the revenues, moneys and other assets of the Energy Project Bond Loan Fund and the Energy Project Supplemental Fund that are pledged to the repayment in the energy revenue bond declaration.

(2) Each revenue bond issued under ORS 470.610 shall contain on the face of the bond a statement that the department is not obligated to pay the bond or the interest on the bond except from the revenues or assets pledged for those payments and that neither the faith and credit nor the taxing power of this state or any political subdivision of this state is pledged to the payment of the principal of or the interest on the bond.

(3) A utility or sustainable energy project manager is not liable for the payment of the principal of or the interest on any bond issued under this section. [2009 c.753 §23]

**470.620 Bond pledges; trustees.** The bonds issued by the State Treasurer under ORS 470.610 and the energy revenue bond declaration may:

(1) Pledge all or any part of the fees received by the State Department of Energy under ORS 470.655 and all or any part of the moneys received in payment of energy efficiency and sustainable technology loans and small scale local energy program loans that are funded with revenue from bonds issued under ORS 470.610, interest on those amounts and other moneys credited to the Energy Project Bond Loan Fund.

(2) Pledge any moneys, loans or grants received from the federal government, this state or any city, county or political subdivision of this state for payment of revenue bonds issued under ORS 470.610.

(3) Vest in a trustee appointed by the Director of the State Department of Energy and approved by the State Treasurer such property, rights, powers and duties in trust as the director may determine. [2009 c.753 §24]

#### (Program Loans)

**470.630 Form of disbursement; conditions for issuance.** (1) The State Department of Energy may disburse energy efficiency and sustainable technology loan and small scale local energy program loan moneys by providing the loan moneys through a sustainable energy project manager or providing the loan moneys to or through an entity described in ORS 470.060. Loan moneys may be disbursed through a sustainable energy project manager only for the purpose of enabling the sustainable energy project manager to issue energy efficiency and sustainable technology loans and small scale local energy program loans to applicants in the utility service territory served by the sustainable energy project manager.

(2) The sustainable energy project manager may issue a loan from moneys disbursed under this section only if adequate security exists to ensure repayment of the loan. An energy efficiency and sustainable technology loan from a sustainable energy project manager to an applicant located in the utility service territory served by the sustainable energy project manager must have the features described in ORS 470.150 and 470.645 and is subject to the requirements and processes imposed under ORS 470.500 to 470.710 for energy efficiency and sustainable technology loans issued by the Director of the State Department of Energy. A sustainable energy project manager that issues an energy efficiency and sustainable technology loan to support a small scale local energy project may record a fixture filing and lien on the property that benefits from the small scale local energy project as provided in ORS 470.680 or 470.685. [2009 c.753 §26; 2013 c.8 §9]

**470.635 Requirement for energy savings projection; form of projection; use of certified primary contractors.**

(1) The State Department of Energy may not complete an agreement for the issuance of an energy efficiency and sustainable technology loan unless the sustainable energy project manager, a primary contractor designated by the sustainable energy project manager or a person approved by the department completes an energy savings projection or similar evaluation for the property that will benefit from the small scale local energy project. The projection or other evaluation shall be in writing and shall, at a minimum, identify the following:

(a) The recommended base efficiency package for the structure. A base energy package may include improvements to existing supply lines and equipment.

(b) Any optional package recommended for the structure.

(c) The estimated net monthly cost to the applicant when energy savings, project repayment costs, tax or other incentives, loan offset grants, base efficiency package fees and other relevant economic factors are considered.

(d) The monthly cost to the applicant to repay the loan principal and finance charges.

(e) If the base efficiency package or recommended optional package includes the use of nontraditional technology, a description of the nontraditional technology.

(2) A base efficiency package or optional package may not provide for achieving energy efficiency upgrades through the use of appliances or other equipment that lack sufficient relationship to the structure to be subject to a fixture filing or real property lien.

(3) The projection or other evaluation shall state in a clear and conspicuous manner:

(a) That the estimated net monthly cost to the applicant contained in the projection or other evaluation does not represent a guarantee of project performance or results; and

(b) That no liability attaches to the department, any state agency or officer, the sustainable energy project managers or any utility if actual energy savings are less than the estimated savings or if the construction process or constructed project is unsatisfactory in any way.

(4) If the base efficiency package or recommended optional package includes the use of nontraditional technology, the projection or other evaluation shall include a statement that the technology is nontradi-

tional, initialed by the prospective loan applicant.

(5) An energy efficiency and sustainable technology loan may be used only for a project constructed by a primary contractor certified under ORS 701.119.

(6) Prior to the disbursement of the loan moneys to the primary contractor, a sustainable energy project manager or other person approved by the department shall verify that the small scale local energy project has been completed in a manner consistent with energy efficiency and sustainable technology loan program requirements. If this state or any agency of this state adopts or recognizes an energy efficiency scoring system for buildings, the department may require that the verification described in this subsection include the determination of an energy efficiency score for the property benefited by the project.

(7) The department shall periodically consult with primary contractors certified under ORS 701.119 for the purpose of updating average cost and projected savings figures used for energy savings projections or other evaluations under this section. The department shall encourage the use of methods for conducting energy savings projections or other evaluations under this section that are cost-effective and time-effective, take advantage of economies of scale and produce results that are accurate and are replicable for equivalent base energy packages. [2009 c.753 §27; 2010 c.92 §3; 2013 c.8 §3]

**470.640 Amount of loans; exceptions.**

(1) Except as provided in subsection (2) of this section, the amount of an energy efficiency and sustainable technology loan may not exceed \$40,000 for residential dwellings served by a single meter of the utility that is to provide on-bill financing. The loan limit described in this subsection does not apply to other buildings such as multifamily housing and mixed-use structures.

(2) The loan amount limit described in subsection (1) of this section shall increase annually on January 1 of each year, beginning January 1, 2011. The loan amount limit shall increase from the most recently established loan amount limit by a percentage equal to the percentage increase in the Consumer Price Index for All Urban Consumers, West Region (All Items), as published by the Bureau of Labor Statistics of the United States Department of Labor. [2009 c.753 §28; 2010 c.92 §6; 2019 c.57 §26]

**470.645 Application for loan; contents.**

An application for an energy efficiency and sustainable technology loan must contain:

(1) Information sufficient to identify real or personal property located within this state

against which a fixture filing and lien may be filed under ORS 470.680 or 470.685 to secure the loan and sufficient to allow verification that the property owner is the applicant or has consented to the fixture filing and lien;

(2) A clear and conspicuous disclosure:

(a) That a lien or other form of security for the energy efficiency and sustainable technology loan need not be paid in full upon a sale of the property, but all amounts due under the repayment plan as of the sale date must be paid before the sale closes; and

(b) That some lenders may be unwilling to make a mortgage on a property that is subject to a lien or other form of security for the energy efficiency and sustainable technology loan;

(3) The loan applicant must sign a loan contract that recites all terms and conditions required under this chapter for an energy efficiency and sustainable technology loan; and

(4) The State Department of Energy must be satisfied that all conditions required under ORS 470.090 to support the loan have been satisfied. [2009 c.753 §29]

**470.650 Residential small scale local energy projects; weatherization program.**

(1) If an applicant for a loan to construct a residential small scale local energy project has household income that may qualify the person for a weatherization program operated by the Housing and Community Services Department, the sustainable energy project manager shall refer the applicant to the department. This subsection does not prohibit a sustainable energy project manager from accepting an application from a person who has been denied, or is receiving, assistance under a department weatherization program.

(2) If an applicant for a loan to construct a residential small scale local energy project has household income that is less than 250 percent of the federal poverty guidelines, upon request by the applicant, the State Department of Energy may waive all or part of an application fee for the loan and may waive all or part of the project initiation fee. [2009 c.753 §30; 2013 c.8 §17]

**(Fees)**

**470.655 Project initiation fee; base efficiency package fee; rules.** (1) Except as provided in ORS 470.650, an applicant for an energy efficiency and sustainable technology loan approved by the State Department of Energy shall pay the department a project initiation fee. Upon request of the loan applicant, the department may add all or part of a project initiation fee to the principal of an issued loan. The department may establish

the fee amount by rule, not to exceed four percent of the approved loan amount. If the department does not establish the fee amount, the fee shall be two percent of the approved loan amount.

(2) The Director of the State Department of Energy may by rule establish a base efficiency package fee for energy efficiency and sustainable technology loans if the loans are not financed by moneys from the Jobs, Energy and Schools Fund. The fee may not exceed 10 percent of the estimated economic benefit for the base efficiency package. Any fees collected by the department under this subsection shall be deposited in the fund. [2009 c.753 §31; 2010 c.92 §4; 2011 c.467 §16]

**(On-Bill Financing)**

**470.660 Investor-owned utilities; requirements of system; rules; waiver.** (1)

All investor-owned utilities, except those that have withheld consent under ORS 470.510 (3), shall provide on-bill financing, except as described in subsection (4) of this section. After an investor-owned utility has established an on-bill financing system, an energy efficiency and sustainable technology loan shall be repaid by on-bill financing unless the loan agreement specifies that the State Department of Energy and the borrower have agreed to an alternative method for ensuring repayment of the loan.

(2) Unless the Public Utility Commission grants an investor-owned utility a waiver under subsection (4) of this section, the on-bill financing system of the utility must:

(a) Enable a customer to make a single payment to satisfy the periodic utility charges and repayment on an energy efficiency and sustainable technology loan;

(b) Provide a clearly identifiable line item or separate statement in the utility bill that shows the energy efficiency and sustainable technology loan repayment amount; and

(c) Direct energy efficiency and sustainable technology loan repayment amounts collected by the utility to the appropriate sustainable energy project manager or to the department for deposit to the credit of the Small Scale Local Energy Project Administration and Bond Sinking Fund, Energy Project Bond Loan Fund or Energy Project Supplemental Fund.

(3) The Public Utility Commission shall adopt rules for the use of on-bill financing by investor-owned utilities. The rules may include, but need not be limited to, rules regarding nonpayment, insufficient payment, delinquency notices, repayment charge transfers, processing fees, late fees and refunds. The commission may not adopt any rule that imposes responsibility for the re-

payment of an energy efficiency and sustainable technology loan on the utility.

(4) The commission may waive the requirement that an investor-owned utility provide on-bill financing for one or more loans if the commission determines that providing the on-bill financing is not practicable. If the commission grants a utility a waiver under this subsection, the utility shall bill the affected customers for loan repayment separately from any utility customer meter billings. [2009 c.753 §32; 2010 c.92 §7; 2013 c.8 §10]

**470.665 Consumer-owned utilities; requirements of system; rules; waiver.** (1) If a consumer-owned utility has established an on-bill financing system, an energy efficiency and sustainable technology loan shall be repaid by on-bill financing unless the loan agreement specifies that the State Department of Energy and the borrower have agreed to an alternative method for ensuring repayment of the loan.

(2) Unless the Director of the State Department of Energy grants a consumer-owned utility a waiver under subsection (4) of this section, the on-bill financing system of the utility must:

(a) Enable a customer to make a single payment to satisfy the periodic utility charges and repayment on an energy efficiency and sustainable technology loan;

(b) Provide a clearly identifiable line item or separate statement in the utility bill that shows the energy efficiency and sustainable technology loan repayment amount; and

(c) Direct energy efficiency and sustainable technology loan repayment amounts collected by the utility to the appropriate sustainable energy project manager or to the department for deposit to the credit of the Small Scale Local Energy Project Administration and Bond Sinking Fund, Energy Project Bond Loan Fund or Energy Project Supplemental Fund.

(3) The director may not adopt any rule that imposes responsibility for the repayment of an energy efficiency and sustainable technology loan on the utility.

(4) The director may waive the requirement that a consumer-owned utility provide on-bill financing for one or more loans if the director determines, after consultation with the Bonneville Power Administration, that providing the on-bill financing is not practicable. If the director grants a waiver under this subsection, the utility shall bill the affected customers for loan repayment separately from any utility customer account or customer meter billings. [2009 c.753 §33; 2013 c.8 §11]

**470.670 Repayment requirement for customer served by electric utility and gas utility.** If a customer is served by both an electric utility and a gas utility that both have an on-bill financing system, a loan repaid through on-bill financing shall be repaid through the on-bill financing system of the utility that supplies the customer's primary source of heat for the property. [2009 c.753 §34]

**470.675 Cost eligibility for ratemaking purposes; loan repayment charges.** (1) If a utility incurs reasonable costs in implementing an on-bill financing system that exceed any moneys received by the utility to assist in the implementation, the costs are legitimate costs for ratemaking purposes.

(2) A loan repayment charge for an energy efficiency and sustainable technology loan may include, but need not be limited to, the amount of the loan, interest on the loan and the cost incurred by the State Department of Energy to implement, promote and administer the energy efficiency and sustainable technology loan program.

(3) The amount of an energy efficiency and sustainable technology loan repayment and any moneys received by a utility to assist in the implementation of an on-bill financing system are not gross revenue for purposes of calculating franchise fees or other regulatory assessments. [2009 c.753 §35; 2013 c.8 §12]

#### (Repayment and Liens)

**470.680 State Department of Energy to identify forms of acceptable security.**

(1) Subject to ORS 470.170, the State Department of Energy may identify forms of acceptable security for energy efficiency and sustainable technology loans that the department determines will achieve the goals and requirements of the energy efficiency and sustainable technology loan program and that provide adequate security for repayment of the loans.

(2) For loans from the Small Scale Local Energy Project Loan Fund, the department may record a fixture filing as defined in ORS 79.0102 covering those building materials to be attached to the real property pursuant to an energy efficiency and sustainable technology loan that remain easily detachable from the property and are not essential to a structure or the use of a structure. The department shall record a lien on the real property benefited by the loan for those indebtedness amounts that are not secured by a fixture filing. The department may record a filing or lien under this section only on a property for which the property owner has agreed to the installation of a base efficiency package or optional package benefiting the property.

(3) An energy efficiency and sustainable technology loan must provide for repayment through an on-bill financing system unless the department finds that an alternative method for repaying the loan would provide suitable security for the loan and the department and the borrower specify the alternative repayment method in the loan agreement. [2009 c.753 §36]

**470.685 Recording liens; foreclosure of liens; attorney fees and costs.** (1) The State Department of Energy or a sustainable energy project manager may act on behalf of the Director of the State Department of Energy for the purpose of recording a lien in favor of the director as required by ORS 470.170 (3) against property benefited by an energy efficiency and sustainable technology loan.

(2) A lien described in this section attaches to the property and is perfected upon recording in the county deed records.

(3) In an action to foreclose a lien created under this section, the court shall include in the lien amount all costs for filing and recording the lien. The court shall award a prevailing party in the foreclosure action reasonable attorney fees and costs. [2009 c.753 §37]

**470.690 Avoidance of foreclosure.** A person that acquired an interest in a property in good faith and for a valuable consideration before the date a lien described in ORS 470.680 or 470.685 attached to the property under ORS 470.170 may avoid foreclosure of the lien by paying any delinquencies and collection costs associated with the underlying loan repayment charge and assuming normal payments in compliance with the energy efficiency and sustainable technology loan agreement repayment provisions. [2009 c.753 §38]

**470.695 Sale of real property; notice of loan repayment charge required.** A person entering into an agreement to sell, rent, lease or otherwise confer a right in the person's real property that is benefited by an energy efficiency and sustainable technology loan for which a loan repayment charge or other repayment obligation applies or for which a fixture filing, lien or other form of security exists shall, prior to any party signing the agreement, give notice of the loan repayment charge, repayment obligation, filing, lien or other security affecting the property to the other parties to the agreement. [2009 c.753 §39]

### (Loan Offset Grants)

**470.700 Use of loan offset grant moneys; alternate mechanisms.** (1) The State Department of Energy may use loan offset grant moneys for any of the following if, in the absence of the grant moneys, a utility customer would incur higher overall monthly costs when energy costs and small scale local energy project costs are considered:

(a) Offsetting the cost of an approved small scale local energy project.

(b) Reducing the loan repayment burden of an energy efficiency and sustainable technology loan borrower.

(c) Creating a financial incentive for energy efficiency, renewable energy and energy conservation projects that may not result in significant energy cost savings.

(d) Providing support, in coordination with the Oregon Innovation Council or other sustainable energy technology research bodies or companies, for small scale local energy projects that use nontraditional technology.

(2) If a small scale local energy program loan applicant is a person with an income limited as described in ORS 470.650 (2), the department may use loan offset grant moneys for an optional package or to offset reasonable costs associated with structural improvements that are not included in the base efficiency package, but that are necessary to the proper installation of the base efficiency package.

(3) The Director of the State Department of Energy may investigate and test the feasibility of using mechanisms other than the disbursing of Jobs, Energy and Schools Fund moneys for accomplishing the purposes described in subsection (1) of this section. [2009 c.753 §40; 2011 c.467 §17]

### (Miscellaneous)

**470.710 Apprenticeship and job training.** (1) The State Department of Energy shall collaborate with the State Workforce and Talent Development Board and other interested parties to identify opportunities for apprenticeship and for job training and development that would further the goals of ORS 470.500 to 470.710 and provide valuable skills to Oregon workers.

(2) In adopting any rules for carrying out apprenticeship and job training and development under the energy efficiency and sustainable technology loan program, the department and the board shall consult with representatives from:

- (a) State workforce programs;
- (b) Organized labor;

(c) The State Apprenticeship and Training Council;

(d) The Bureau of Labor and Industries; and

(e) Consumer advocacy organizations.

(1) May be paid from the Jobs, Energy and Schools Fund or Energy Project Bond Loan Fund; or

(2) May be paid from the Small Scale Local Energy Project Administration and Bond Sinking Fund created under ORS 470.300 if the Director of the State Department of Energy and the State Treasurer find that:

(a) A cash flow projection for the sinking fund shows that, for the term of the sinking fund bonds outstanding at the time the Director of the State Department of Energy transfers the moneys, remaining moneys in the sinking fund, together with expected loan contract payments and fund earnings, will improve the financial basis of the program and will continue to be adequate to pay bond principal, interest, redemption premiums, if any, and administration costs; and

(b) The transfer will not create the need for issuance of any bonds. [2009 c.753 §47; 2011 c.467 §18]

**Note:** 470.715 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 470 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

However, if a charge not contained in the original complaint or a prior amended complaint is sought to be made by any such amendment, the defendant shall be given a reasonable time to investigate the new charge and answer the amended complaint. The final hearing shall, if necessary, be continued until some date after the defendant has had a reasonable time to investigate and be prepared to meet the amended complaint.

(5) Notwithstanding subsection (1) of this section, any public utility or telecommunications utility may make complaint as to any matter affecting its own rates or service with like effect as though made by any other person, by filing an application, petition or complaint with the commission. [Formerly 756.520; 1987 c.447 §91; 1995 c.733 §68]

**756.505** [Repealed by 1971 c.655 §250]

**756.510** [Amended by 1971 c.655 §40; renumbered 756.518]

**756.512 Notice of complaint to defendant; responsive pleadings; setting cause for hearing.** (1) The Public Utility Commission shall serve a copy of the complaint upon the defendant, and shall give the defendant at least 10 days within which to respond to the complaint. Within the time so fixed, or such further time as the commission shall fix, the defendant shall file an answer to the complaint, taking issue on such parts of the complaint as the defendant desires and setting forth such additional matter as shall be pertinent to the matter in controversy. Such additional matter shall be deemed denied without the filing of any other pleading by the complainant. After the filing of the answer the commission shall set the matter for hearing, giving the defendant at least 10 days' written notice of the time and place of the hearing, unless the commission for good reason stated in the notice, fixes a shorter time. Amendment of any answer may be permitted by order of the commission.

(2) If the defendant fails to file a responsive pleading or otherwise appear within the time prescribed in subsection (1) of this section, or if the responsive pleading filed raises no issue of law or fact, the commission may act on the complaint without a hearing. [Formerly 756.530]

**756.515 Investigations and hearings on commission's own motion; hearings for aggrieved persons.** (1) Whenever the Public Utility Commission believes that any rate may be unreasonable or unjustly discriminatory, or that any service is unsafe or inadequate, or is not afforded, or that an investigation of any matter relating to any public utility or telecommunications utility or other person should be made, or relating to any person to determine if such person is subject to the commission's regulatory jurisdiction, the commission may on motion summarily investigate any such matter, with or without notice.

(2) If after making such investigation the commission is satisfied that sufficient grounds exist to warrant a hearing being ordered upon any such matter, the commission shall furnish any public utility or telecommunications utility or other person interested a statement notifying it of the matters under investigation, which statement shall be accompanied by a notice fixing the time and place for hearing upon such matters in the manner provided in ORS 756.512 for notice of complaint.

(3) Thereafter proceedings shall be had and conducted in reference to the matters investigated in like manner as though complaint had been filed with the commission relative thereto, and the same orders may be made in reference thereto as if such investigation had been made on complaint.

(4) The commission may, after making an investigation on the commission's motion, but without notice or hearing, make such findings and orders as the commission deems justified or required by the results of such investigation. Except as provided in subsections (5) and (6) of this section such findings and orders have the same legal force and effect as any other finding or order of the commission.

(5) In addition to any other remedy provided by law, any party aggrieved by an order entered pursuant to subsection (4) of this section may request the commission to hold a hearing to determine whether the order should continue in effect. Any such request for hearing shall be submitted to the commission not later than 15 days after the date of service of the order, and the commission shall hold the hearing not later than 60 days after receipt of such a request for hearing.

(6) If the commission receives a request for hearing pursuant to subsection (5) of this section, the order is suspended pending the outcome of the hearing unless the commission finds that the order is necessary for the public health or safety or to prevent the dissipation of assets of a business or activity subject to the commission's regulatory jurisdiction. [Formerly 757.515; 1973 c.776 §29; 1975 c.318 §1; 1983 c.703 §18; 1987 c.447 §92; 1995 c.733 §69]

(2) Upon request of any party in a major proceeding before the commission, the commission shall afford the parties an opportunity for oral argument before a final order is issued. There must be a quorum of the commission present at the time the oral argument is made. The commission shall adopt rules that establish criteria for determining which proceedings give rise to a right to oral argument under this subsection. In addition, the commission may adopt rules governing participation in oral arguments, cross-examination of witnesses, draft or proposed orders or such other matters as the commission deems appropriate. [Formerly 756.510; 2001 c.558 §3]

(2) At any time before the final taking of evidence in a proceeding, any person may apply to the commission for permission to appear and participate in the proceeding. The commission shall determine the interest of the applicant in the proceeding and shall grant the application, subject to appropriate conditions, if the commission determines that such appearance and participation will not unreasonably broaden the issues or burden the record, and otherwise may deny the application.

(3) This section does not apply to any person who might have been an original party in a proceeding before the commission if that person is required by statute to file a pleading or other response in the proceeding within a specified time. [1971 c.655 §42]

**756.528 Segregation of issues.** At any time before the conclusion of the taking of evidence in a proceeding, the Public Utility Commission may segregate the issues involved and order separate hearings thereon at such times and places as the commission may prescribe. (3) Depositions may be taken within or without the State of Oregon by the commission, or any other person authorized to ad-

minister oaths, in accordance with procedures prescribed by the rules of the commission.

(4) The commission shall promulgate rules concerning the manner of applying for and taking depositions and the use thereof. Such rules shall provide reasonable provisions against abuse of such procedure and for protection of the rights of all persons affected. [1971 c.655 §45]

**756.540** [Repealed by 1971 c.655 §250]

**756.543 Issuance of subpoenas; failure to comply.** (1) The Public Utility Commission shall issue subpoenas to any party to a proceeding before the commission upon request and proper showing of the general relevance and reasonable scope of the evidence sought. Witnesses appearing pursuant to subpoena, other than the parties or their officers or employees, or employees of the commission, shall receive fees and mileage as prescribed by law for witnesses in ORS 44.415 (2). If the commission certifies that the testimony of a witness was relevant and material, any person who paid fees and mileage to that witness shall be reimbursed by the commission and from moneys referred to in ORS 756.360, subject to the limitations provided in ORS 756.360.

(2) If any person fails to comply with any subpoena so issued or any party or witness refuses to testify on any matters on which the person may be lawfully interrogated, the judge of the circuit court of any county, on the application of the commission, or of the party requesting the issuance of the subpoena, shall compel obedience by proceedings for contempt as in the case of disobedience of the requirements of a subpoena issued from such court or a refusal to testify therein. [1971 c.655 §46; 1983 c.540 §2; 1987 c.980 §23; 1997 c.249 §221]

**756.549 Self-incrimination of witnesses in commission proceedings.** (1) No person shall be excused from testifying or from producing evidence in any proceeding held by the Public Utility Commission on the ground that the testimony or evidence required of the person may tend to incriminate the person or subject the person to prosecution, penalty or forfeiture if:

(a) The person has been directed by the commission to testify or produce evidence under oath;

(b) The person claims, at the time the person is directed by the commission to testify or produce evidence, that the testimony or evidence required of the person may tend to incriminate the person or subject the person to prosecution, penalty or forfeiture; and

(c) The commission specifically grants the person immunity from prosecution, pen-

alty or forfeiture regarding those matters about which the person testifies or produces evidence as directed.

However, no person shall be exempted from prosecution or punishment for perjury while so testifying. The immunity conferred by this section shall extend only to a natural person who, in obedience to a subpoena, gives testimony under oath or produces evidence, documentary or otherwise, under oath. [Formerly 757.590; 1989 c.827 §2]

**756.555 Powers of commission at hearings.** The Public Utility Commission may administer oaths, certify to official acts, issue notices in the name of the commission, issue subpoenas, compel the attendance of witnesses and the production of books, accounts, papers, records, documents and testimony, and take and receive testimony, conduct hearings and investigations, whether upon complaint or upon the commission's own motion. [Formerly 757.555]

**756.561 Rehearing; reconsideration.** (1) After an order has been made by the Public Utility Commission in any proceeding, any party thereto may apply for rehearing or reconsideration thereof within 60 days from the date of service of such order. The commission may grant such a rehearing or reconsideration if sufficient reason therefor is made to appear.

(2) No such application shall excuse any party against whom an order has been made by the commission from complying therewith, nor operate in any manner to stay or postpone the enforcement thereof without the special order of the commission.

(3) If a rehearing is granted, the proceedings thereupon shall conform as nearly as possible to the proceedings in an original hearing, except as the commission otherwise may direct. If in the judgment of the commission, after such rehearing and the consideration of all facts, including those arising since the former hearing, the original order is in any respect unjust or unwarranted, the commission may reverse, change or modify the same accordingly. Any order made after such rehearing, reversing, changing or modifying the original determination is subject to the same provisions as an original order. [Formerly 756.570]

Copies of the same shall be served and take effect as provided in ORS 756.558 for original orders. [Formerly 757.540; 1973 c.776 §30; 1987 c.447 §92a; 1995 c.733 §70]

(2) Any investigation, hearing or other proceeding involving the issuance of an order of the commission that has not been finally determined when a transfer of any interests of a person is effected may be continued and finally determined, notwithstanding any such transfer of interest. Any order issued in such investigation, hearing or other proceeding is binding upon the successors in interest. [1971 c.655 §54; 1973 c.776 §31; 1987 c.447 §93; 1995 c.733 §71]

**GENERAL PROVISIONS****757.005 Definition of public utility.**

(1)(a) As used in this chapter, except as provided in paragraph (b) of this subsection, “public utility” means:

(A) Any corporation, company, individual, association of individuals, or its lessees, trustees or receivers, that owns, operates, manages or controls all or a part of any plant or equipment in this state for the production, transmission, delivery or furnishing of heat, light, water or power, directly or indirectly to or for the public, whether or not such plant or equipment or part thereof is wholly within any town or city.

(B) Any corporation, company, individual or association of individuals, which is party to an oral or written agreement for the payment by a public utility, for service, managerial construction, engineering or financing fees, and having an affiliated interest with the public utility.

(b) As used in this chapter, “public utility” does not include:

(A) Any plant owned or operated by a municipality.

(B) Any railroad, as defined in ORS 824.020, or any industrial concern by reason of the fact that it furnishes, without profit to itself, heat, light, water or power to the inhabitants of any locality where there is no municipal or public utility plant to furnish the same.

(C) Any corporation, company, individual or association of individuals providing heat, light or power:

(i) From any energy resource to fewer than 20 customers, if it began providing service to a customer prior to July 14, 1985;

(ii) From any energy resource to fewer than 20 residential customers so long as the corporation, company, individual or association of individuals serves only residential customers;

(iii) From solar or wind resources to any number of customers; or

(iv) From biogas, waste heat or geothermal resources for nonelectric generation purposes to any number of customers.

(D) A qualifying facility on account of sales made under the provisions of ORS 758.505 to 758.555.

(E) Any person furnishing heat, but not delivering electricity or natural gas to its customers, except:

(i) As provided in ORS 757.007 and 757.009; or

(ii) With respect to heat furnished in municipalities which on January 1, 1989, had a municipally owned system that was fur-

nishing steam or other thermal forms of heat to its customers.

(F) Notwithstanding subparagraph (E) of this paragraph, any corporation, company, partnership, individual or association of individuals furnishing heat to a single thermal end user from an electric generating facility, plant or equipment that is physically interconnected with the single thermal end user.

(G) Any corporation, company, partnership, individual or association of individuals that furnishes natural gas, electricity, ethanol, methanol, methane, biodiesel or other alternative fuel to any number of customers for use in motor vehicles and does not furnish any utility service described in paragraph (a) of this subsection.

(H) An electricity service supplier, as defined in ORS 757.600.

(2) Nothing in subsection (1)(b)(C) of this section shall prohibit third party financing of acquisition or development by a utility customer of energy resources to meet the heat, light or power requirements of that customer. [Amended by 1953 c.583 §2; 1967 c.241 §1; 1967 c.314 §1; 1971 c.655 §64a; 1973 c.726 §1; 1979 c.62 §1; 1981 c.360 §1; 1981 c.749 §21; 1983 c.118 §1; 1983 c.799 §7; 1985 c.550 §1; 1985 c.633 §7; 1985 c.779 §1; 1987 c.447 §96; 1987 c.900 §3; 1989 c.5 §2; 1989 c.999 §§1,2; 1991 c.294 §1; 1995 c.267 §1; 1999 c.330 §2; 1999 c.491 §1; 1999 c.865 §21; 2001 c.104 §292; 2003 c.82 §4]

**757.006 People’s utility districts and electric cooperatives excluded from term “public utility.”** For purposes of ORS chapter 757, the term “public utility” does not include a people’s utility district organized under ORS chapter 261 or an electric cooperative organized under ORS chapter 62. [2016 c.28 §18c]

**Note:** 757.006 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.007 Contract and rate schedule filing for certain furnishers of heat exempt from regulation; procedure.** (1) Every person exempt from regulation under ORS 757.005 (1)(b)(E) shall file with the Public Utility Commission, not later than 30 days prior to their effective date, all contracts and schedules establishing rates, terms and conditions for the provision of heating services.

(2) Prior to the effective date, the commission may suspend the effective date of such contracts or schedules for an additional period of not more than 120 days in order to determine the reasonableness of such contracts or schedules, taking into consideration the services being provided, the costs and risks of service, the availability and costs of alternative forms of service and other reasonable considerations, including the impact on existing customers of the utilities fur-

nishing electricity and natural gas and on the public generally.

(3) If the contract or schedule is not suspended, or if the contract or schedule is determined reasonable by the commission after suspension, the contract or schedule shall not be subject to further commission review during its term or such other period as the commission may specify, except as provided in ORS 757.009.

(4) In any proceeding before the commission to determine the reasonableness of contracts or schedules proposed under this section, the burden shall be upon the proponent of the contract or schedule to establish its reasonableness. [1989 c.999 §§4a,4c; 2003 c.82 §5]

**757.009 Procedure for reregulation of furnishers of heat.** (1) Except as provided in subsection (2) of this section, the Public Utility Commission may, upon written complaint or upon the commission's own motion, regulate, under ORS 757.205 to 757.240, or any part thereof, any person otherwise exempt from regulation under ORS 757.005 (1)(b)(E) as follows:

(a) With respect to any or all customers, if the commission finds that the activities of such person have an adverse effect upon the customers of public utilities furnishing electricity or natural gas and the benefits of such regulation outweigh any adverse effect on the public generally; or

(b) With respect to any customer receiving service not exceeding 500 million British thermal units per year or any residential customer, if the commission finds that such person has engaged in unjust or unreasonable practices with respect to the services or rates available to the customer and the customer has no reasonable alternative to the services provided.

(2) The commission shall not regulate persons under subsection (1)(a) of this section with respect to contracts that became effective prior to the date of service of the complaint or with respect to heating systems already in place on the date of service of the complaint if the commission determines that continued expansion will increase the efficiency of those systems. [1989 c.999 §§4b,4d; 2003 c.82 §6]

**757.010** [Repealed by 1971 c.655 §250]

(1) Every corporation and person owning or holding directly or indirectly five percent or more of the voting securities of such public utility.

(2) Every corporation and person in any chain of successive ownership of five percent or more of voting securities of such public utility.

(3) Every corporation five percent or more of whose voting securities are owned by any person or corporation owning five percent or more of the voting securities of such public utility or by any person or corporation in any chain of successive ownership of five percent or more of voting securities of such public utility.

(5) Every corporation that has two or more officers or two or more directors in common with such public utility.

(6) Every corporation and person, five percent or more of which is directly or indirectly owned by a public utility.

(7) Every corporation or person that the Public Utility Commission determines as a matter of fact after investigation and hearing actually is exercising any substantial influence over the policies and actions of such public utility, even though such influence is not based upon stockholding, stockholders, directors or officers to the extent specified in this section.

(8) Every person or corporation that the commission determines as a matter of fact, after investigation and hearing, actually is exercising such substantial influence over the policies and actions of such public utility in conjunction with one or more other corporations or persons with whom they are related by ownership or blood or by action in concert that together they are affiliated with such public utility within the meaning of this section even though no one of them alone is so affiliated. [Amended by 1971 c.655 §65; 1989 c.17 §1; 2015 c.27 §60]

**757.020 Duty of utilities to furnish adequate and safe service at reasonable rates.** Every public utility is required to furnish adequate and safe service, equipment and facilities, and the charges made by any public utility for any service rendered or to be rendered in connection therewith shall be reasonable and just, and every unjust or unreasonable charge for such service is prohibited. or upon complaint, to require by general or special orders embodying reasonable rules or regulations, every person or municipality, their agents, lessees or acting trustees or receivers, appointed by court, engaged in the management, operation, ownership or control of telegraph, telephone, signal or power lines within this state, upon the public streets or highways, and also upon all other premises used, whether leased, owned or controlled by them, to construct, maintain and operate every line, plant, system, equipment or apparatus in such manner as to protect and safeguard the health and safety of all employees, customers and the public, and to this end to adopt and prescribe the installation, use, maintenance and operation of appropriate safety or other devices, or appliances, to establish or adopt standards of construction or equipment, and to require the performance of any other act which seems to the commission necessary or proper for the protection of the health or safety of all employees, customers or the public.

(2) When acting pursuant to subsection (1) of this section, the Public Utility Commission shall adopt by rule as the standard of such construction, operation and maintenance the 1973 edition of the American National Standard, National Electrical Safety Code, C2.

(3) In lieu of subsection (2) of this section, or in addition thereto, the commission may adopt by rule any revision or edition of or amendment to the National Electrical Safety Code approved by the American National Standards Institute after July 14, 1977, and in effect on the date of adoption by the commission. [Amended by 1969 c.530 §1; 1971 c.655 §68; 1975 c.658 §1; 1977 c.346 §1]

**757.039 Regulation of hazardous substance distribution and storage operations; cooperation with federal agencies; disclosure of reports and information.** (1) As used in this section, "hazardous substance or material" means:

(a) Fuel gas, whether in a gaseous, liquid or semisolid state;

(b) Petroleum or petroleum products; and

(c) Any other substance or material which may pose an unreasonable risk to life or property when transported by pipeline facilities.

(2) The Public Utility Commission has power, after a hearing had upon the commission's own motion or upon complaint, to require by general or special orders embodying reasonable rules, every person or municipality, their agents, lessees or acting trustees or receivers, appointed by court, engaged in the management, operation, ownership or control of facilities for the

transmission or distribution of a hazardous substance or material by pipeline; or of facilities for the storage or treatment of a hazardous substance or material to be transmitted or distributed by pipeline or upon the public streets or highways; or of any other premises used, whether leased, owned or controlled by them, to construct, maintain and operate every pipeline, plant, system, equipment or apparatus used in the transmission, distribution, storage or treatment of a hazardous substance or material to be transmitted by pipeline or upon the public streets or highways in such manner as to protect and safeguard the health and safety of all employees, customers and the public, and to this end to adopt and prescribe the installation, use, maintenance and operation of appropriate safety or other devices, or appliances, to establish or adopt standards of construction or equipment, and to require the performance of any other act which seems to the commission necessary or proper for the protection of the health and safety of all employees, customers or the public.

(3) The commission is authorized to cooperate with, make certifications to and enter into agreements with the Secretary of Transportation of the United States of America and to assume responsibility for, and carry out on behalf of the Secretary of Transportation, safety jurisdiction relating to pipeline facilities and transportation of hazardous substances and materials in Oregon in any manner not otherwise subject to the jurisdiction of any other agency of this state.

(4) Notwithstanding any other provisions to the contrary, the commission shall make public such reports as are required to be made public under applicable federal law and regulations and provide such information as is required by the Secretary of Transportation.

(5) The jurisdiction of the commission over propane, butane or mixtures of these gases shall be limited to systems transporting such gases to 10 or more customers, or to systems any portion of which is located in a public place. [Formerly 757.095; 1983 c.540 §3; 2001 c.35 §1]

**757.040** [Amended by 1971 c.655 §101; renumbered 758.035]

**757.045** [Amended by 1967 c.394 §1; repealed by 1971 c.781 §1]

**757.050 Authority of commission to order extension of service to unserved areas.** The Public Utility Commission has power to require any public utility, after a public hearing of all parties interested, to extend its line, plant or system into, and to render service to, a locality not already served when the existing public convenience and necessity requires such extension and

service. However, no such extension of service shall be required until the public utility has been granted such reasonable franchises as may be necessary for the extension of service, and unless the conditions are such as to reasonably justify the necessary investment by the public utility in extending its line, plant or system into such locality and furnishing such service. [Amended by 1971 c.655 §67]

**757.053 Alternative means for meeting energy conservation requirements.** Notwithstanding the specific requirements imposed on an electric company by ORS 469.631 to 469.645 and 469.860 to 469.900, an electric company meets the requirements of ORS 469.631 to 469.645 and 469.860 to 469.900 if the electric company:

(1) Meets the public purpose expenditure standard established under ORS 757.612; and

(2) Plans for and pursues cost-effective energy efficiency and demand response resources as required under ORS 757.054. [2021 c.547 §7]

**757.054 Cost-effective energy efficiency resources and demand response resources; legislative findings; planning and pursuit by electric company required; consumer credit; rules.** (1) As used in this section:

(a) “Electric company” has the meaning given that term in ORS 757.600.

(b) “Retail electricity consumer” means a retail electricity consumer, as defined in ORS 757.600, that is located in Oregon.

(2) The Legislative Assembly finds and declares that:

(a) Energy efficiency programs promote lower energy bills, protect the public health and safety, improve environmental benefits, stimulate sustainable economic development, create new employment opportunities and reduce reliance on imported fuels; and

(b) Demand response resources result in more efficient use of existing resources and reduce the need for procuring new power generating resources, which, in turn, reduces energy bills, protects the public health and safety and improves environmental benefits.

(3) For the purpose of ensuring prudent investments by an electric company in energy efficiency and demand response before the electric company acquires new generating resources, and in order to produce cost-effective energy savings, reduce customer demand for energy, reduce overall electrical system costs, increase the public health and safety and improve environmental benefits, each electric company serving customers in this state shall:

(a) Plan for and pursue all available energy efficiency resources that are cost effective, reliable and feasible; and

(b) As directed by the Public Utility Commission by rule or order, plan for and pursue the acquisition of available cost-effective demand response resources.

(4) All funds necessary to plan for and pursue cost-effective energy efficiency resources pursuant to subsection (3)(a) of this section must be collected in the rates of an electric company through charges paid by all retail electricity consumers, including those retail electricity consumers receiving electricity from electricity service suppliers subject to the limitations set forth in section 3, chapter 547, Oregon Laws 2021. The commission may require that a portion of all of the funds collected under this subsection be paid to a nongovernmental entity to make expenditures consistent with this section.

(5)(a) A retail electricity consumer that uses more than one average megawatt of electricity at any site in the prior year shall receive a credit against the amount charged in rates pursuant to subsection (4) of this section for that site for qualifying expenditures for energy efficiency resources made by the retail electricity consumer. The amount of the credit may not exceed the lesser of:

(A) The amount charged to the retail electricity consumer in rates; or

(B) The total amount of qualifying energy efficiency expenditures described in subsection (3)(a) of this section made by the retail electricity consumer for that site, less administration costs incurred under this subsection.

(b) The State Department of Energy shall adopt by rule procedures and other provisions necessary for a retail electricity consumer to obtain a credit under this subsection. [2016 c.28 §19; 2021 c.547 §2]

(B) A single contiguous area of land containing buildings or other structures within which each building or structure is no more than 1,000 feet from at least one other building or structure, if the buildings and structures and the land containing and connecting the buildings and structures are all owned by a single retail electricity consumer, either directly or through a wholly owned subsidiary, that is billed for electricity use at the buildings and structures; or

(C) For any single retail electricity consumer, each account of the retail electricity consumer that has exceeded 4,000 kilowatts at least twice within the most recent 13-month period and for which the retail electricity consumer maintains a load factor of 80 percent or greater, if the combined electricity usage across all of the accounts described in this subparagraph, in the aggregate, equals 100 average megawatts or more in a calendar year.

(2) For the period beginning on the effective date of this 2021 Act [September 25, 2021] and ending December 31, 2025, a retail electricity consumer that uses more than one average megawatt of electricity at any site in the prior year may not be charged an amount in rates pursuant to ORS 757.054 (4) that exceeds 1.7 percent of the total revenue received from the sale of electricity services to the site from any source.

The agreement shall govern the manner in which financial assistance may be provided to the organization. The agreement may provide for financial assistance to other organizations found by the commission to be qualified under subsection (2) of this section. The agreement described in this paragraph shall govern the manner in which financial assistance may be provided to an organization found by the commission to be qualified under paragraph (a)(B) or (C) of this subsection. More than one public utility or organization may join in a single agreement described in this paragraph.

(e) Other expenditures and major contracts for the sale or purchase of equipment; and

(f) Any payment or contemplated payment to any person or corporation having an affiliated interest for service, advice, auditing, associating, sponsoring, engineering, managing, operating, financing, legal or other services.

(2) On or before a date prescribed by the commission by rule, each public utility shall prepare a budget showing the amount of money which, in its judgment, shall be needed during the ensuing year for covering all such activities and expenditures, and file it with the commission.

(3) When any such budget has been filed with the commission, the commission shall examine into and investigate the same and unless rejected within 60 days thereafter, the proposed budget is presumptively fair and reasonable and not contrary to public interest.

(4) Proposed expenditures for pensions or for a trust to provide pensions for the employees and officers of such utility whether for future service or past service or both, shall be recognized as an operating expense if the trust fund is irrevocably committed to the payment of pensions or benefits to employees and if such pensions are reasonable and nondiscriminatory. The commission may disallow as an operating expense any ex-

penditure for pension purposes in excess of the amount necessary and proper to maintain an actuarially sound retirement plan for the employees of the utility in Oregon. [Amended by 1957 c.593 §1; 1971 c.655 §82; 2013 c.96 §1]

**757.107 Supplemental budgets and orders.** Adjustment and additions to such budget expenditures may be made from time to time during the year by filing supplementary budgets with the Public Utility Commission. The provisions of ORS 757.105 (3) apply to adjustments and additions to budgets. [Amended by 1971 c.655 §83]

**757.110 Effect of budget orders.** (1) Any finding and order made and entered by the Public Utility Commission under ORS 757.105 or 757.107 shall have the effect of prohibiting any unapproved or rejected expenditure from being recognized as an operating expense or capital expenditure in any rate valuation proceeding or in any proceeding or hearing unless and until the propriety thereof has been established to the satisfaction of the commission. Any such finding and order shall remain in full force and effect, unless and until it is modified or set aside by the commission or is set aside, modified or remanded in a proceeding for judicial review of an order in the manner provided by ORS 756.610.

(2) Nothing in ORS 757.105 or 757.107 prevents the commission from at any time making and filing orders rejecting imprudent and unwise expenditures or payments. Such orders when so made shall be in full force and effect, and the public utility shall not have the right to make such expenditures or payments found to be imprudent or unwise until the order has been modified or set aside by the commission or is set aside, modified or remanded in a proceeding for judicial review of an order in the manner provided by ORS 756.610. [Amended by 1971 c.655 §84; 2005 c.638 §7; 2017 c.312 §4]

**757.115** [Amended by 1971 c.655 §20; renumbered 756.105]

**757.120 Accounts required.** (1) Every public utility shall keep and render to the Public Utility Commission, in the manner and form prescribed by the commission, uniform accounts of all business transacted. All forms of accounts which may be prescribed by the commission shall conform as nearly as practicable to similar forms prescribed by federal authority.

(2) Every public utility engaged directly or indirectly in any other business than that of a public utility shall, if required by the commission, keep and render separately to the commission, in like manner and form, the accounts of all such other business, in which case all the provisions of this chapter shall apply with like force and effect to the ac-

(2) No public utility shall keep any other accounts or records of its public utility business transacted than those prescribed or approved by the commission except such as may be required by the laws of the United States.

(3) The commission shall cause to be prepared suitable blanks for reports for carrying out the purposes of this chapter, and shall, when necessary, furnish such blanks for reports to each public utility. [Amended by 1971 c.655 §86]

**757.130** [Repealed by 1971 c.655 §250]

**757.135 Closing accounts and filing balance sheet; rules; auditing accounts.**

(1) Except as provided in subsection (2) of this section, the accounts required under ORS 757.120 and 757.125 shall be closed annually on December 31 and a balance sheet of that date promptly taken therefrom. On or before a date prescribed by the Public Utility Commission by rule, such balance sheet, together with such other information as the commission shall prescribe, verified by an officer of the public utility, shall be filed with the commission.

(2) If a public utility maintains its accounts and records on a fiscal year basis, the accounts required by ORS 757.120 and 757.125 shall be closed annually on the last day of the fiscal year and a balance sheet shall be promptly taken from those accounts. On or before the first day of the fourth month following the end of the public utility's fiscal year, the balance sheet together with such information as the commission shall prescribe must be verified by an officer of the public utility and filed with the commission. The commission may require that a public utility filing information at the time specified in this subsection also file with the commission on a calendar year basis such additional information as may be prescribed by the commission.

(3) The commission may examine and audit any account. Items shall be allocated to the accounts in the manner prescribed by the commission. [Amended by 1983 c.540 §4; 2001 c.733 §1; 2013 c.96 §2]

**757.140 Depreciation accounts; use of certain undepreciated investment in rates.** (1) Every public utility shall carry a proper and adequate depreciation account. The Public Utility Commission shall ascertain and determine the proper and adequate rates of depreciation of the several classes of property of each public utility. The rates shall be such as will provide the amounts required over and above the expenses of maintenance, to keep such property in a state of efficiency corresponding to the progress of the industry. Each public utility shall conform its depreciation accounts to the rates so ascertained and determined by the commission. The commission may make changes in such rates of depreciation from time to time as the commission may find to be necessary.

(2) In the following cases the commission may allow in rates, directly or indirectly, amounts on the utility's books of account which the commission finds represent undepreciated investment in a utility plant, including that which has been retired from service:

(a) When the retirement is due to ordinary wear and tear, casualties, acts of God, acts of governmental authority; or

(b) When the commission finds that the retirement is in the public interest. [Amended by 1971 c.655 §87; 1989 c.956 §2]

## RATE SCHEDULES; MEASURING EQUIPMENT

**757.205 Filing schedules with commission; data filed with schedules.** (1) Every public utility shall file with the Public Utility Commission, within a time to be fixed by the commission, schedules which shall be open to public inspection, showing all rates, tolls and charges which it has established and which are in force at the time for any service performed by it within the state, or for any service in connection therewith or performed by any public utility controlled or operated by it.

(2) Every public utility shall file with and as part of every such schedule all rules and

regulations that in any manner affect the rates charged or to be charged for any service. Every public utility shall also file with the commission copies of interstate rate schedules and rules and regulations issued by it or to which it is a party.

(3) Where a schedule of joint rates or charges is or may be in force between two or more public utilities, such schedules shall in like manner be printed and filed with the commission. [Amended by 1971 c.655 §70]

**757.210 Hearing to establish new schedules; alternative regulation plan.**

(1)(a) Whenever any public utility files with the Public Utility Commission any rate or schedule of rates stating or establishing a new rate or schedule of rates or increasing an existing rate or schedule of rates, the commission may, either upon written complaint or upon the commission's own initiative, after reasonable notice, conduct a hearing to determine whether the rate or schedule is fair, just and reasonable. The commission shall conduct the hearing upon written complaint filed by the utility, its customer or customers, or any other proper party within 60 days of the utility's filing; provided that no hearing need be held if the particular rate change is the result of an automatic adjustment clause. At the hearing the utility shall bear the burden of showing that the rate or schedule of rates proposed to be established or increased or changed is fair, just and reasonable. The commission may not authorize a rate or schedule of rates that is not fair, just and reasonable.

(b) As used in this subsection, "automatic adjustment clause" means a provision of a rate schedule that provides for rate increases or decreases or both, without prior hearing, reflecting increases or decreases or both in costs incurred, taxes paid to units of government or revenues earned by a utility and that is subject to review by the commission at least once every two years.

(2)(a) Subsection (1) of this section does not apply to rate changes under an approved alternative form of regulation plan, including a resource rate plan under ORS 757.212.

(b) Any alternative form of regulation plan shall include provisions to ensure that the plan operates in the interests of utility customers and the public generally and results in rates that are just and reasonable and may include provisions establishing a reasonable range for rate of return on investment. In approving a plan, the commission shall, at a minimum, consider whether the plan:

(A) Promotes increased efficiencies and cost control;

(B) Is consistent with least-cost resources acquisition policies;

(C) Yields rates that are consistent with those that would be obtained following application of ORS 757.269;

(D) Is consistent with maintenance of safe, adequate and reliable service; and

(E) Is beneficial to utility customers generally, for example, by minimizing utility rates.

(c) As used in this subsection, "alternative form of regulation plan" means a plan adopted by the commission upon petition by a public utility, after notice and an opportunity for a hearing, that sets rates and revenues and a method for changes in rates and revenues using alternatives to cost-of-service rate regulation.

(d) Prior to implementing a rate change under an alternative form of regulation plan, the utility shall present a report that demonstrates the calculation of any proposed rate change at a public meeting of the commission.

(3) Except as provided in ORS 757.212, the commission, at any time, may order a utility to appear and establish that any, or all, of its rates in a plan authorized under subsection (2) of this section are in conformity with the plan and are just and reasonable. Except as provided in ORS 757.212, such rates, and the alternative form of regulation plan under which the rates are set, also shall be subject to complaint under ORS 756.500.

(4) Periodically, but not less often than every two years after the implementation of a plan referred to in subsection (2) of this section, the commission shall submit a report to the Legislative Assembly that shows the impact of the plan on rates paid by utility customers.

(5) The commission and staff may consult at any time with, and provide technical assistance to, utilities, their customers, and other interested parties on matters relevant to utility rates and charges. If a hearing is held with respect to a rate change, the commission's decisions shall be based on the record made at the hearing. [Amended by 1971 c.655 §70a; 1981 c.715 §1; 1985 c.550 §2; 1987 c.447 §97; 1987 c.613 §1; 1989 c.5 §§3,23; 1995 c.785 §1; 2001 c.913 §3; 2005 c.845 §5; 2011 c.137 §3]

**757.212 Resource rate plans; customers who may elect to be exempt; order approving plan; effect of approving plan; rules.** (1) For purposes of this section:

(a) "Resource rate plan" means a plan by a public utility to construct a generating plant or to enter into a wholesale power purchase or sales agreement with a term that is longer than one year.

(b) "Site" means:

(A) Buildings or other related structures that are interconnected by facilities owned by a single public utility customer and that are served through a single electric meter; or

(B) A single contiguous area of land containing buildings or other structures that are separated by not more than 1,000 feet, such that:

(i) Each building or structure included in the site is not more than 1,000 feet from at least one other building or structure in the site;

(ii) Buildings and structures in the site, and land containing and connecting buildings and structures in the site, are owned by a public utility customer who is billed for electricity use at the buildings and structures; and

(iii) Land shall be considered to be contiguous even if there is an intervening public or railroad right of way, provided that rights-of-way land on which municipal infrastructure facilities exist, such as street lighting, sewerage transmission and roadway controls, shall not be considered contiguous.

(2) The Public Utility Commission may approve a resource rate plan as an alternative form of regulation plan under ORS 757.210. A public utility must make a separate tariff filing for each proposed resource rate plan. If the commission approves a resource rate plan by a public utility based on the construction of a generating plant, the order approving the plan must state how the commission will reflect the costs and revenues of the generating plant in the utility's rates during all or a portion of the expected useful life of the generating plant. If the commission approves a resource rate plan based on a wholesale power purchase or sales agreement with a term longer than one year, the order approving the plan must state how the commission will reflect the costs and revenues under the wholesale power purchase or sales agreement in the utility's rates during all or a portion of the term of the agreement.

(3) A customer receiving electricity from a public utility may elect to be exempt from the costs and benefits of a resource rate plan for any single site at which the customer has had a peak load in excess of nine megawatts in any hour during the 12-month period immediately preceding the date on which the public utility files a tariff under this section. A public utility filing a tariff under this section must give written notice of the provisions of this subsection to all of its customers that are eligible to make an election under this subsection. The notice

must be given within three days after the tariff is filed. An election under this subsection must be made by a customer within 30 days after the tariff is filed.

(4) A public utility customer that elects to be exempt under subsection (3) of this section may also elect to be exempt from the costs and benefits of a resource rate plan for any single site at which the customer has had a peak load in excess of one megawatt in any hour during the 12-month period immediately preceding the date on which the public utility files a tariff under this section. An election under this subsection must be made as part of the election under subsection (3) of this section.

(5) The commission shall ensure that customers making an election under subsection (3) or (4) of this section are charged the market cost for all electricity that is required to replace the electricity that would otherwise have been provided under the resource rate plan, and that the election does not result in increased costs or risks to the public utility or to other customers of the public utility.

(6) The commission, by rule, may allow customers of a public utility other than those customers described in subsection (3) of this section to elect to be exempt from the costs and benefits of a resource rate plan.

(7) If the commission approves a resource rate plan, the order of the commission must also address:

(a) The extent to which the public utility will use power from the generating plant or from the power purchase or sales agreement to serve its retail customers in Oregon;

(b) The allocation of power available from the generating plant or power purchase or sales agreement among different classes of the public utility's customers;

(c) The ratemaking consequences of the generating plant or power purchase or sales agreement, including the consequences of variations in the amount of power that is actually available after the plan is in operation compared with the amount of power that was anticipated to be available at the time the plan was approved; and

(d) Any other issue the commission chooses to consider.

(8) If the commission approves a resource rate plan, the commission may not thereafter review the costs and rates specific to the resource rate plan or other obligations of the public utility under the plan, or consider any complaint under ORS 756.500 seeking review of the costs and rates specific to the resource rate plan or other obligations of the public utility under the plan, except for the purpose of determining whether the public utility is

in compliance with the plan and has established rates in accordance with the plan.

(9) A resource rate plan and a public utility's rates under a resource rate plan are not subject to ORS 757.355.

(10) The commission may not set aside or modify an order approving a resource rate plan unless the public utility operating under the plan approves the setting aside or modification. [2001 c.913 §2; 2005 c.638 §8]

**Note:** 757.212 was added to and made a part of 757.205 to 757.220 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**757.215 Commission authorized to suspend new rates or order interim rates during hearings; revenues collected under unapproved rates to be refunded; order after hearing.** (1) The Public Utility Commission may, pending such investigation and determination, order the suspension of the rate or schedule of rates for a period of up to nine months beyond the time when such rate or schedule would otherwise go into effect.

(2) This section does not prevent the commission and the utility from entering into a written stipulation at any time extending any period of suspension.

(3) After full hearing, whether completed before or after such rate or schedule has gone into effect, the commission may make such order in reference thereto as would be proper in a proceeding initiated after such rate or schedule has become effective.

(4) If the commission is required to or determines to conduct a hearing on a rate or schedule of rates filed pursuant to ORS 757.210, but does not order a suspension thereof, any increased revenue collected by the utility as a result of such rate or rate schedule becoming effective shall be received subject to being refunded. If the rate or rate schedule thereafter approved by the commission is for a lesser increase or for no increase, the utility shall refund the amount of revenues received that exceeds the amount approved as nearly as possible to the customers from whom such excess revenues were collected, by a credit against future bills or otherwise, in such manner as the commission orders.

(5) The commission may in a suspension order authorize an interim rate or rate schedule under which the utility's revenues will be increased by an amount deemed reasonable by the commission, not exceeding the amount requested by the utility. Any such interim increase for a public utility as defined in ORS 757.005 that produces, transmits, delivers or furnishes heat, light or power shall be effected by rates designed to

increase the utility's revenues without materially changing the revenue relationships among customer classes or between the revenues derived from demand charges and from energy charges. An interim rate or rate schedule shall remain in effect until terminated by the commission. Upon completion of the hearing and decision, the commission shall order the utility to refund that portion of the increase in the interim rate or schedule that the commission finds is not justified. Any refund of an interim increase under this subsection shall be based upon an analysis of the utility's earnings for a period reasonably representative of the period during which the interim increase was in effect. Refunds shall be made as nearly as possible to the customers against whom the interim rates were charged, by credits against future bills or in such other manner as the commission orders.

(6) Refunds ordered by the commission under subsection (4) or (5) of this section shall include interest on the amount determined to be subject to refund from the date such interim rate or rate schedules took effect. [Amended by 1981 c.715 §2; 1991 c.964 §1; 2023 c.53 §1]

**757.220 Notice of schedule changes required; exception for alternative regulation.** No change shall be made in any schedule, including schedules of joint rates, except upon 30 days' notice to the Public Utility Commission. All changes shall be plainly indicated upon existing schedules, or by filing new schedules in lieu thereof 30 days prior to the time they are to take effect. However, the commission, for good cause shown, may allow changes without requiring the 30 days' notice by filing an order specifying the changes to be made and the time when they shall take effect. This section does not apply to rate changes authorized under an alternative form of regulation plan under ORS 757.210 (2). [Amended by 1995 c.785 §2]

**757.225 Utilities required to collect for their services in accordance with schedules.** No public utility shall charge, demand, collect or receive a greater or less compensation for any service performed by it within the state, or for any service in connection therewith, than is specified in printed rate schedules as may at the time be in force, or demand, collect or receive any rate not specified in such schedule. The rates named therein are the lawful rates until they are changed as provided in ORS 757.210 to 757.220. [Amended by 1971 c.655 §71; 1985 c.550 §3; 1991 c.67 §204]

**757.227 Rate mitigation for certain electric company rate increases.** (1) As used in this section, "electric company" has the meaning given that term in ORS 757.600.

(2) The Public Utility Commission shall require that an electric company mitigate a rate increase payable by a class of customers described in subsection (5) of this section if:

(a) The increase results from a transition to an electric company's generally applicable cost-based rate from the rates established under the contracts described in subsection (5) of this section; and

(b) The increase in the cost of electricity to that class of customers by reason of the transition will exceed 50 percent during the first 12 calendar months after the transition occurs.

(3) The commission shall require an electric company to mitigate a rate increase under this section by means of a schedule of rate credits for the class of customers described in subsection (5) of this section. The rate credits provided by an electric company under the schedule shall automatically decrease each year to the lowest credit necessary to avoid a rate increase that is greater than 50 percent in any subsequent year. Rate credits under this section may not be provided for more than seven years after the transition occurs.

(4) For the purpose of determining the increase in the cost of electricity to a class of customers by reason of a transition described in subsection (2)(a) of this section, the commission shall:

(a) Include the total charges for electric service, including all special charges and credits other than the rate credit provided under this section; and

(b) Exclude any local taxes or fees paid by the class of customers.

(5) This section applies only to customers of an electric company that purchase electricity at metering points that before the transition described in subsection (2)(a) of this section were eligible for rates that were set under contracts entered into before 1960 and remained unchanged throughout the period of the contract.

(6) The full cost of providing rate credits under this section shall be spread equally among all other customers of the electric company. [2005 c.594 §3]

**757.230 Control of commission over classification of services and forms of schedules; rules.** (1) The Public Utility Commission shall provide for a comprehensive classification of service for each public utility, and such classification may take into account the quantity used, the time when used, the purpose for which used, the existence of price competition or a service alternative, the services being provided, the conditions of service, differential energy burdens on low-income customers and other

economic, social equity or environmental justice factors that affect affordability for certain classes of utility customers, and any other reasonable consideration. Based on such considerations the commission may authorize classifications or schedules of rates applicable to individual customers or groups of customers. The service classifications and schedule forms shall be designed consistently with the requirements of ORS 469.010. Each public utility is required to conform its schedules of rates to such classification. If the commission determines that a tariff filing under ORS 757.205 results in a rate classification primarily related to price competition or a service alternative, the commission, at a minimum, shall consider the following:

(a) Whether the rate generates revenues at least sufficient to cover relevant short and long run costs of the utility during the term of the rates;

(b) Whether the rate generates revenues sufficient to insure that just and reasonable rates are established for remaining customers of the utility;

(c) For electric and natural gas utilities:

(A) Whether it is appropriate to incorporate interruption of service in the utility's rate agreement with the customer; and

(B) Whether the rate agreement requires the utility to acquire new resources to serve the load; and

(d) For electric utilities, for service to load not previously served, the effect of the rate on the utility's average system cost through the residential exchange provision of the Pacific Northwest Electric Power Planning and Conservation Act of 1980, Public Law 96-501, as amended.

(2) The commission may prescribe such changes in the form in which the schedules are issued by any public utility as may be found to be expedient. The commission shall adopt rules which allow any person who requests notice of tariff filings described under subsection (1) of this section to receive such notice. [Amended by 1971 c.655 §72; 1977 c.682 §1; 1987 c.900 §1; 2021 c.90 §2]

**757.235** [Amended by 1953 c.285 §2; repealed by 1981 c.715 §3]

**757.240 Filing schedules in business office.** (1) A copy of so much of all schedules, including schedules of joint rates and charges, as the Public Utility Commission deems necessary for the use of the public shall be printed in plain type and kept on file in every business office of such public utility, open to the public, and in such form and place as to be readily accessible to the public for convenient inspection.

(2) Copies of all new schedules shall be filed in every business office of such public

utility 30 days prior to the time the schedules are to take effect, unless the commission prescribes a shorter time. [Amended by 1971 c.655 §73]

**757.245 Establishment of joint rates.**

(1) A public utility may establish reasonable through service and joint rates and classifications with other public utilities. Public utilities establishing joint rates shall establish just and reasonable regulations and practices in connection therewith and just, reasonable and equitable divisions thereof as between the public utilities participating therein, which shall not unduly prefer or prejudice any of such participating public utilities, and every unjust and unreasonable rate, classification, regulation, practice and division is prohibited.

(2) The Public Utility Commission may, and shall, whenever deemed by the commission to be necessary or desirable in the public interest, after full hearing upon complaint, or upon the commission's own initiative without complaint, establish through service, classifications and joint rates, the divisions of such rates and the terms and conditions under which such through service shall be rendered. If any tariff or schedule canceling any through service or joint rate or classification without the consent of all the public utilities parties thereto or authorization by the commission is suspended by the commission for investigation, the burden of proof is upon the public utilities proposing such cancellation to show that it is consistent with the public interest.

(3) Whenever, after full hearing upon complaint or upon the commission's own initiative without complaint, the commission is of the opinion that the divisions of joint rates between the public utilities are or will be unjust, unreasonable, inequitable or unduly preferential or prejudicial as between the public utilities parties thereto, whether agreed upon by such public utilities or otherwise established, the commission shall, by order, prescribe the just, reasonable and equitable divisions thereof to be received by the several public utilities. In cases where the joint rate was established pursuant to the finding or order of the commission and the divisions thereto are found by the commission to have been unjust, unreasonable or inequitable, or unduly preferential or prejudicial, the commission may also by order determine what, for the period subsequent to the filing of the complaint or petition or the making of the order of investigation, would have been the just, reasonable and equitable division thereof to be received by the several public utilities and require adjustment to be made in accordance therewith.

(4) In so prescribing and determining the divisions of joint rates, the commission shall give due consideration, among other things, to:

(a) The efficiency with which the public utilities concerned are operated;

(b) The amount of revenue to pay their respective operating expenses, taxes and a fair return on their public utility property held for and used in service;

(c) The importance to the public of the services of such public utilities;

(d) Whether any particular participating public utility is an originating, intermediate or delivering utility; and

(e) Any other fact or circumstance which ordinarily would entitle one public utility to a greater or less proportion of the joint rate than another. [Amended by 1971 c.655 §74]

**757.247 Tariff schedules for energy resource measures; rules.** (1) The Public Utility Commission may authorize a public utility, upon application of the utility, to file and place into effect a tariff schedule establishing rates or charges for the cost of energy resource measures provided to an individual property owner or customer pursuant to an agreement entered into between the individual property owner or customer and the public utility. Energy resource measures provided under this section may include:

(a) The installation of renewable energy generation facilities on the property of property owners or the premises of customers;

(b) The implementation of energy conservation measures, including measures that are not cost-effective;

(c) The installation of equipment or devices or the implementation of measures that enable demand reduction, peak load reduction, improved integration of renewable energy generation or more effective utilization of energy resources;

(d) Loans for the purposes described in paragraphs (a) to (c) of this subsection; and

(e) Direct payments to third parties for the purposes described in paragraphs (a) to (c) of this subsection.

(2) Subject to the agreement entered into between the individual property owner or customer and the public utility, a tariff schedule placed into effect under this section may include provisions for:

(a) The payment of the rates or charges over a period of time;

(b) Except as provided in subsection (5) of this section, a reasonable rate of return on any investment made by the public utility;

(c) The application of any payment obligation to successive owners of the property to which the energy resource measure is attached or to successive customers located at the premises to which the energy resource measure is attached; and

(d) The application of the payment obligation to the current property owner or customer alone, secured by methods agreed to by the property owner or customer and the public utility.

(3) Application of a tariff schedule under this section is subject to approval by the commission.

(4) If a payment obligation applies to successive property owners or customers as described in subsection (2)(c) of this section, a public utility shall record a notice of the payment obligation in the records maintained by the county clerk under ORS 205.130. The commission may prescribe by rule other methods by which the public utility shall notify property owners or customers of such payment obligations.

(5) A public utility may use moneys obtained through a rate established under ORS 757.603 (3)(a) to provide a renewable energy generation facility to a property owner or customer under this section. A public utility may not charge interest to a property owner or customer for a renewable energy generation facility acquired with moneys obtained through a rate established under ORS 757.603 (3)(a).

(6) Agreements entered into and tariff schedules placed into effect under this section are not subject to ORS 470.500 to 470.710, 757.054 or 757.612. [1991 c.268 §2; 2007 c.885 §3; 2013 c.344 §1; 2021 c.508 §22; 2021 c.547 §23]

**757.250 Standards and appliances for measuring service; rules.** (1) The Public Utility Commission shall ascertain and prescribe for each kind of public utility suitable and convenient standard commercial units of service. These shall be lawful units for the purposes of this chapter.

(2) The commission shall ascertain and fix adequate and serviceable standards for the measurement of quality, pressure, initial voltage or other conditions pertaining to the supply of the service rendered by any public utility and prescribe reasonable regulations for examination and testing of such service and for the measurement thereof. It shall establish reasonable rules, regulations, specifications and standards to secure the accuracy of all meters and appliances for the measurements, and every public utility is required to carry into effect all orders issued by the commission relative thereto. [Amended by 1971 c.655 §75]

**757.255 Testing of measuring appliances; rules; fees.** (1) The Public Utility Commission may provide for the examination and testing of any and all appliances used for the measuring of any service of a public utility, and may provide by rule that no such appliance shall be installed and used for the measuring of any service of any public utility until it has been examined and tested by the commission and found to be accurate.

(2) The commission shall declare and establish a reasonable fee governing the cost of such examination and test, which shall be paid to the commission by the public utility.

(3) The commission shall declare and establish reasonable fees for the testing of such appliances on the application of the customer, the fee to be paid by the customer at the time of the customer's request, but to be repaid to the customer by the commission and to be paid by the public utility if the appliance is found defective or incorrect to the disadvantage of the customer or used beyond such reasonable limit as may be prescribed by the commission.

(4) All fees collected under the provisions of this section shall be paid by the commission into the State Treasury.

(5) The commission may purchase such materials, apparatus and standard measuring instruments for the examination and tests as the commission deems necessary. [Amended by 1971 c.655 §76]

**757.259 Amounts includable in rate schedule; deferral; limit in effect on rates by amortization; rules.** (1) In addition to powers otherwise vested in the Public Utility Commission, and subject to the limitations contained in this section, under amortization schedules set by the commission, a rate or rate schedule:

(a) May reflect:

(A) Amounts lawfully imposed retroactively by order of another governmental agency; or

(B) Amounts deferred under subsection (2) of this section.

(b) Shall reflect amounts deferred under subsection (3) of this section if the public utility so requests.

(2) Upon application of a utility or ratepayer or upon the commission's own motion and after public notice, opportunity for comment and a hearing if any party requests a hearing, the commission by order may authorize deferral of the following amounts for later incorporation in rates:

(a) Amounts incurred by a utility resulting from changes in the wholesale price of natural gas or electricity approved by the Federal Energy Regulatory Commission;

(b) Balances resulting from the administration of Section 5(c) of the Pacific Northwest Electric Power Planning and Conservation Act of 1980;

(c) Direct or indirect costs arising from any purchase made by a public utility from the Bonneville Power Administration pursuant to ORS 757.663, provided that such costs shall be recovered only from residential and small-farm retail electricity consumers;

(d) Amounts accruing under a plan for the protection of short-term earnings under ORS 757.262 (2); or

(e) Identifiable utility expenses or revenues, the recovery or refund of which the commission finds should be deferred in order to minimize the frequency of rate changes or the fluctuation of rate levels or to match appropriately the costs borne by and benefits received by ratepayers.

(3) Upon request of the public utility, the commission by order shall allow deferral of amounts provided as financial assistance under an agreement entered into under ORS 757.072 for later incorporation in rates.

(4) The commission may authorize deferrals under subsection (2) of this section beginning with the date of application, together with interest established by the commission. A deferral may be authorized for a period not to exceed 12 months beginning on or after the date of application. However, amounts deferred under subsection (2)(c) and (d) or (3) of this section are not subject to subsection (5), (6), (7), (8) or (10) of this section, but are subject to such limitations and requirements that the commission may prescribe and that are consistent with the provisions of this section.

(5) Unless subject to an automatic adjustment clause under ORS 757.210 (1), amounts described in this section shall be allowed in rates only to the extent authorized by the commission in a proceeding under ORS 757.210 to change rates and upon review of the utility's earnings at the time of application to amortize the deferral. The commission may require that amortization of deferred amounts be subject to refund. The commission's final determination on the amount of deferrals allowable in the rates of the utility is subject to a finding by the commission that the amount was prudently incurred by the utility.

(6) Except as provided in subsections (7), (8) and (10) of this section, the overall average rate impact of the amortizations authorized under this section in any one year may not exceed three percent of the utility's gross revenues for the preceding calendar year.

(7) The commission may allow an overall average rate impact greater than that speci-

fied in subsection (6) of this section for natural gas commodity and pipeline transportation costs incurred by a natural gas utility if the commission finds that allowing a higher amortization rate is reasonable under the circumstances.

(8) The commission may authorize amortizations for an electric utility under this section with an overall average rate impact not to exceed six percent of the electric utility's gross revenues for the preceding calendar year. If the commission allows an overall average rate impact greater than that specified in subsection (6) of this section, the commission shall estimate the electric utility's cost of capital for the deferral period and may also consider estimated changes in the electric utility's costs and revenues during the deferral period for the purpose of reviewing the earnings of the electric utility under the provisions of subsection (5) of this section.

(9) The commission may impose requirements similar to those described in subsection (8) of this section for the amortization of other deferrals under this section, but may not impose such requirements for deferrals under subsection (2)(c) or (d) or (3) of this section.

(10) The commission may authorize amortization of a deferred amount for an electric utility under this section with an overall average rate impact greater than that allowed by subsections (6) and (8) of this section if:

(a) The deferral was directly related to extraordinary power supply expenses incurred during 2001;

(b) The amount to be deferred was greater than 40 percent of the revenue received by the electric utility in 2001 from Oregon customers; and

(c) The commission determines that the higher rate impact is reasonable under the circumstances.

(11) If the commission authorizes amortization of a deferred amount under subsection (10) of this section, an electric utility customer that uses more than one average megawatt of electricity at any site in the immediately preceding calendar year may prepay the customer's share of the deferred amount. The commission shall adopt rules governing the manner in which:

(a) The customer's share of the deferred amount is calculated; and

(b) The customer's rates are to be adjusted to reflect the prepayment of the deferred amount.

(12) The provisions of this section do not apply to a telecommunications utility. [1987

c.563 §2; 1989 c.18 §1; 1989 c.956 §1; 1993 c.175 §1; 1999 c.865 §31; 2001 c.733 §3; 2003 c.132 §1; 2003 c.234 §3]

**757.260** [Amended by 1971 c.655 §18; renumbered 756.075]

**757.262 Rates to encourage acquisition of cost-effective conservation resources; rules.** (1) The Public Utility Commission, by rule, may adopt policies designed to encourage the acquisition of cost-effective conservation resources and small-scale, renewable-fuel electric generating resources.

(2) In furtherance of the policies adopted pursuant to subsection (1) of this section, and in such manner as the commission considers proper, the commission may authorize periodic rate adjustments for the purpose of providing some protection to a utility from reduction of short-term earnings that may result from implementation of such policies. The adjustments may include, but are not limited to, adjustments based in whole or in part upon the extent to which actual sales deviate from a base level of sales the commission considers appropriate. [1993 c.175 §3; 1999 c.944 §3]

**757.264 Annual forecast of certain projected production tax credits required; inclusion in rates.** Each public utility that makes sales of electricity shall forecast on an annual basis the projected state and federal production tax credits received by the public utility due to variable renewable electricity production, and the Public Utility Commission shall allow those forecasts to be included in rates through any variable power cost forecasting process established by the commission. [2016 c.28 §18b]

**757.265** [Repealed by 1971 c.655 §250]

**757.266 Rates may encourage tree planting programs as offset to carbon dioxide emissions.** The Public Utility Commission of Oregon may allow a rate or rate schedule of a public utility to reflect amounts for small scale programs that enable the utility to gain experience with tree planting on underproducing forestland, as defined by the State Forestry Department, as an offset to carbon dioxide emissions. [1993 c.286 §1]

**Note:** 757.266 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.267** [2005 c.845 §2; repealed by 2011 c.137 §5]

**757.268** [2005 c.845 §3; repealed by 2011 c.137 §5]

**757.269 Setting of rates based upon income taxes paid by utility; limitation on use of tax information; rules.** (1) When establishing schedules and rates under ORS 757.210 for an electricity or natural gas utility, the Public Utility Commission shall act to balance the interests of the customers of

the utility and the utility's investors by setting fair, just and reasonable rates that include amounts for income taxes. Subject to subsections (2) and (3) of this section, amounts for income taxes included in rates are fair, just and reasonable if the rates include current and deferred income taxes and other related tax items that are based on estimated revenues derived from the regulated operations of the utility.

(2) During ratemaking proceedings conducted pursuant to ORS 757.210, the Public Utility Commission must ensure that the income taxes included in the electricity or natural gas utility's rates:

(a) Include all expected current and deferred tax balances and tax credits made in providing regulated utility service to the utility's customers in this state;

(b) Include only the current provision for deferred income taxes, accumulated deferred income taxes and other tax related items that are based on revenues, expenses and the rate base included in rates and on the same basis as included in rates;

(c) Reflect all known changes to tax and accounting laws or policy that would affect the calculated taxes;

(d) Are reduced by tax benefits generated by expenditures made in providing regulated utility service to the utility's customers in this state, regardless of whether the taxes are paid by the utility or an affiliated group;

(e) Contain all adjustments necessary in order to ensure compliance with the normalization requirements of federal tax law; and

(f) Reflect other considerations the commission deems relevant to protect the public interest.

(3) During a ratemaking proceeding conducted under ORS 757.210 for an electricity or natural gas utility that pays taxes as part of an affiliated group, the Public Utility Commission may adjust the utility's estimated income tax expense based upon:

(a) Whether the utility's affiliated group has a history of paying federal or state income taxes that are less than the federal or state income taxes the utility would pay to units of government if it were an Oregon-only regulated utility operation;

(b) Whether the corporate structure under which the utility is held affects the taxes paid by the affiliated group; or

(c) Any other considerations the commission deems relevant to protect the public interest.

(4)(a) Because tax information of unregulated nonutility business in an electricity or natural gas utility's affiliated group is commercially sensitive, and public disclosure of

such information could provide a commercial advantage to other businesses, the Public Utility Commission may not use the tax information obtained under this section for any purpose other than those described in this section, in ORS 757.511 and as necessary for the implementation and administration of this section and ORS 757.511.

(b) The commission shall adopt rules to implement paragraph (a) of this subsection that:

(A) Identify all documents and tax information that an electricity or natural gas utility must file in its initial filing in a proceeding to change rates that include amounts for income taxes, recognizing that any party may object to providing such documents on the grounds that they are not relevant; and

(B) Determine the procedures under which intervenors in such proceedings may obtain and use documents and tax information to fully participate in the proceeding.

(5) As used in this section, “affiliated group” means a group of corporations of which the public utility is a member and that files a consolidated federal income tax return. [2011 c.137 §1]

**Note:** 757.269 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

### ATTACHMENTS REGULATION

**757.270 Definitions for ORS 757.270 to 757.290.** As used in ORS 757.270 to 757.290, unless the context requires otherwise:

(1) “Attachment” means any wire or cable for the transmission of intelligence by telegraph, telephone or television (including cable television), light waves, or other phenomena, or for the transmission of electricity for light, heat or power, and any related device, apparatus, or auxiliary equipment, installed upon any pole or in any telegraph, telephone, electrical, cable television or communications right of way, duct, conduit, manhole or handhole or other similar facility or facilities owned or controlled, in whole or in part, by one or more public utility, telecommunications utility or consumer-owned utility.

(2) “Consumer-owned utility” means a people’s utility district organized under ORS chapter 261, a municipal utility organized under ORS chapter 225 or an electric cooperative organized under ORS chapter 62.

(3) “Licensee” means any person, firm, corporation, partnership, company, association, joint stock association or cooperatively organized association that is

authorized to construct attachments upon, along, under or across the public ways.

(4) “Public utility” has the meaning for that term provided in ORS 757.005, and does not include any entity cooperatively organized or owned by federal, state or local government, or a subdivision of state or local government.

(5) “Telecommunications utility” has the meaning for that term provided in ORS 759.005, and does not include any entity cooperatively organized or owned by federal, state or local government or a subdivision of state or local government. [1979 c.356 §2; 1989 c.5 §4; 1999 c.832 §4]

**757.271 Authorization from pole owner required for attachment.** (1) Subject to applicable regulations of the Public Utility Commission, a person shall not establish an attachment to a pole or other facility of a public utility, telecommunications utility or consumer-owned utility unless the person has executed a contract with and has authorization from the utility allowing the attachment.

(2) A licensee shall report all pole attachments to the pole owner. A pole owner may impose on a licensee a penalty charge for failing to report an attachment. The pole owner also may charge the licensee for any expenses incurred as a result of an unauthorized attachment or any attachment that exceeds safety limits established by rule of the commission. [1999 c.832 §2]

**757.272 Pole owner may approve or reject attachment.** (1) A licensee shall notify a public utility, telecommunications utility or consumer-owned utility of all attachments to the utility’s poles according to the terms of any agreement between the licensee and the utility.

(2) Notwithstanding subsection (1) of this section, the public utility, telecommunications utility or consumer-owned utility may approve or reject the attachment. If the attachment is rejected, the licensee shall remove the attachment within three business days of the date the attachment is rejected. If the attachment is not removed within three business days of the date the attachment is rejected, the utility may remove the attachment and charge the licensee for all costs incurred by the utility in removing the attachment. [1999 c.832 §3]

**757.273 Attachments to public utility and telecommunications utility facilities regulated.** The Public Utility Commission of Oregon shall have the authority to regulate in the public interest the rates, terms and conditions for attachments by licensees to poles or other facilities of public utilities and telecommunications utilities. All rates, terms

and conditions made, demanded or received by any public utility or telecommunications utility for any attachment by a licensee shall be just, fair and reasonable. [1979 c.356 §3; 1989 c.5 §5]

**757.276 Attachments by licensees to consumer-owned utility facilities regulated.** The Public Utility Commission of Oregon shall have the authority to regulate the rates, terms and conditions for attachments by licensees to poles or other facilities of consumer-owned utilities. All rates, terms and conditions made, demanded or received by any consumer-owned utility for any attachment by a licensee shall be just, fair and reasonable. [1979 c.356 §4; 1987 c.414 §164; 1999 c.832 §5]

**757.279 Fixing rates or charges by commission; cost of hearing.** (1) Whenever the Public Utility Commission of Oregon finds, after hearing had upon complaint by a licensee, a public utility, a telecommunications utility or a consumer-owned utility that the rates, terms or conditions demanded, exacted, charged or collected in connection with attachments or availability of surplus space for such attachments are unjust or unreasonable, or that such rates or charges are insufficient to yield a reasonable compensation for the attachment and the costs of administering the same, the commission shall determine the just and reasonable rates, terms and conditions thereafter to be observed and in force and shall fix the same by order. In determining and fixing such rates, terms and conditions, the commission shall consider the interest of the customers of the licensee, as well as the interest of the customers of the public utility, telecommunications utility or consumer-owned utility that owns the facility upon which the attachment is made.

(2) When the order applies to a consumer-owned utility, the order shall also provide for payment by the parties of the cost of the hearing. The payment shall be made in a manner which the commission considers equitable. [1979 c.356 §5; 1983 c.251 §1; 1987 c.414 §165; 1989 c.5 §6; 1999 c.832 §6]

**757.282 Criteria for just and reasonable rate for attachments; rate reduction.** (1) A just and reasonable rate shall ensure the public utility, telecommunications utility or consumer-owned utility the recovery from the licensee of not less than all the additional costs of providing and maintaining pole attachment space for the licensee nor more than the actual capital and operating expenses, including just compensation, of the public utility, telecommunications utility or consumer-owned utility attributable to that portion of the pole, duct or conduit used for the pole attachment, including a share of the

required support and clearance space in proportion to the space used for pole attachment above minimum attachment grade level, as compared to all other uses made of the subject facilities, and uses that remain available to the owner or owners of the subject facilities.

(2) A licensee shall receive a rental deduction if the licensee is in compliance with rules adopted by the Public Utility Commission for certifying compliance with the laws regulating pole attachments. A licensee is eligible for the rental reduction unless the commission or the utility authorizing the attachment notifies the licensee in writing that the licensee has failed to comply with either the commission's rules or the terms of a contract between the licensee and the utility authorizing the attachment.

(3) For purposes of determining the rental rate for a pole attachment, the usable space on the pole shall include 20 inches of safety clearance space between communication circuits and electric circuits, provided the licensee is in compliance with rules and agreements as described in subsection (2) of this section. [1979 c.356 §6; 1989 c.5 §7; 1999 c.832 §7]

**757.285 Presumption of reasonableness of rates set by private agreement.** Agreements regarding rates, terms and conditions of attachments shall be deemed to be just, fair and reasonable, unless the Public Utility Commission finds upon complaint by a public utility, telecommunications utility, consumer-owned utility or licensee party to such agreement and after hearing, that such rates, terms and conditions are adverse to the public interest and fail to comply with the provisions hereof. [1979 c.356 §7; 1987 c.414 §166; 1989 c.5 §8; 1999 c.832 §8]

**757.287 Application to electrical utility attachments.** Nothing in ORS 757.270 to 757.290 shall be deemed to apply to any attachment by one or more electrical utilities on the facilities of one or more other electrical utilities. [1979 c.356 §8]

**757.290 Regulatory procedures.** The procedures of the Public Utility Commission for petition, regulation and enforcement relative to attachments, including any rights of appeal from any decision thereof, shall be the same as those otherwise generally applicable to the commission. [1979 c.356 §9; 1987 c.414 §167]

## NET METERING FACILITIES

**757.300 Net metering facility allowed to connect to public utility; conditions for connecting and measuring energy; rules; application to out-of-state utilities.** (1) As used in this section:

(a) “Customer-generator” means a user of a net metering facility.

(b) “Electric utility” means a public utility, a people’s utility district operating under ORS chapter 261, a municipal utility operating under ORS chapter 225 or an electric cooperative organized under ORS chapter 62.

(c) “Net metering” means measuring the difference between the electricity supplied by an electric utility and the electricity generated by a customer-generator and fed back to the electric utility over the applicable billing period.

(d) “Net metering facility” means a facility for the production of electrical energy that:

(A) Generates electricity using:

(i) Solar power;

(ii) Wind power;

(iii) Fuel cells;

(iv) Hydroelectric power;

(v) Landfill gas;

(vi) Digester gas;

(vii) Waste;

(viii) Dedicated energy crops available on a renewable basis;

(ix) Low-emission, nontoxic biomass based on solid organic fuels from wood, forest or field residues;

(x) Geothermal energy; or

(xi) Renewable marine energy, including wave energy, wave-wind hybrid energy and tidal energy;

(B) Is located on the customer-generator’s premises, the territorial sea as defined in ORS 196.405, or the outer continental shelf;

(C) If located on the territorial sea or the outer continental shelf, is directly interconnected to the customer-generator’s premises;

(D) Can operate in parallel with an electric utility’s existing transmission and distribution facilities; and

(E) Is intended primarily to offset part or all of the customer-generator’s requirements for electricity.

(2) An electric utility that offers residential and commercial electric service:

(a) Shall allow net metering facilities to be interconnected using a standard meter that is capable of registering the flow of electricity in two directions.

(b) May at its own expense install one or more additional meters to monitor the flow of electricity in each direction.

(c) May not charge a customer-generator a fee or charge that would increase the

customer-generator’s minimum monthly charge to an amount greater than that of other customers in the same rate class as the customer-generator. However, the Public Utility Commission, for a public utility, or the governing body, for a municipal electric utility, electric cooperative or people’s utility district, may authorize an electric utility to assess a greater fee or charge, of any type, if the electric utility’s direct costs of interconnection and administration of the net metering outweigh the distribution system, environmental and public policy benefits of allocating such costs among the electric utility’s entire customer base. The commission may authorize a public utility to assess a greater fee or charge under this paragraph only following notice and opportunity for public comment. The governing body of a municipal electric utility, electric cooperative or people’s utility district may assess a greater fee or charge under this paragraph only following notice and opportunity for comment from the customers of the utility, cooperative or district.

(3)(a) For a customer-generator, an electric utility shall measure the net electricity produced or consumed during the billing period in accordance with normal metering practices.

(b) If an electric utility supplies a customer-generator more electricity than the customer-generator feeds back to the electric utility during a billing period, the electric utility shall charge the customer-generator for the net electricity that the electric utility supplied.

(c) Except as provided in paragraph (d) of this subsection, if a customer-generator feeds back to an electric utility more electricity than the electric utility supplies the customer-generator during a billing period, the electric utility may charge the minimum monthly charge described in subsection (2) of this section but must credit the customer-generator for the excess kilowatt-hours generated during the billing period. An electric utility may value the excess kilowatt-hours at the avoided cost of the utility, as determined by the commission or the appropriate governing body. An electric utility that values the excess kilowatt-hours at the avoided cost shall bear the cost of measuring the excess kilowatt-hours, issuing payments and billing for the excess hours. The electric utility also shall bear the cost of providing and installing additional metering to measure the reverse flow of electricity.

(d) For the billing cycle ending in March of each year, or on such other date as agreed to by the electric utility and the customer-generator, any remaining unused kilowatt-hour credit accumulated during the previous

year shall be granted to the electric utility for distribution to customers enrolled in the electric utility's low-income assistance programs, credited to the customer-generator or dedicated for other use as determined by the commission, for a public utility, or the governing body, for a municipal electric utility, electric cooperative or people's utility district, following notice and opportunity for public comment.

(4)(a) A net metering facility shall meet all applicable safety and performance standards established in the state building code. The standards shall be consistent with the applicable standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers and Underwriters Laboratories or other similarly accredited laboratory.

(b) Following notice and opportunity for public comment, the commission, for a public utility, or the governing body, for a municipal electric utility, electric cooperative or people's utility district, may adopt additional control and testing requirements for customer-generators to protect public safety or system reliability.

(c) An electric utility may not require a customer-generator whose net metering facility meets the standards in paragraphs (a) and (b) of this subsection to comply with additional safety or performance standards, perform or pay for additional tests or purchase additional liability insurance. However, an electric utility shall not be liable directly or indirectly for permitting or continuing to allow an attachment of a net metering facility, or for the acts or omissions of the customer-generator that cause loss or injury, including death, to any third party.

(5) Nothing in this section is intended to prevent an electric utility from offering, or a customer-generator from accepting, products or services related to the customer-generator's net metering facility that are different from the net metering services described in this section.

(6) The commission, for a public utility, or the governing body, for a municipal electric utility, electric cooperative or people's utility district, may not limit the cumulative generating capacity of solar, wind, geothermal, renewable marine, fuel cell and microhydroelectric net metering systems to less than one-half of one percent of a utility's, cooperative's or district's historic single-hour peak load. After a cumulative limit of one-half of one percent has been reached, the obligation of a public utility, municipal electric utility, electric cooperative or people's utility district to offer net metering to a new customer-generator may be limited by the

commission or governing body in order to balance the interests of retail customers. When limiting net metering obligations under this subsection, the commission or the governing body shall consider the environmental and other public policy benefits of net metering systems. The commission may limit net metering obligations under this subsection only following notice and opportunity for public comment. The governing body of a municipal electric utility, electric cooperative or people's utility district may limit net metering obligations under this subsection only following notice and opportunity for comment from the customers of the utility, cooperative or district.

(7) The commission or the governing body may adopt rules or ordinances to ensure that the obligations and costs associated with net metering apply to all power suppliers within the service territory of a public utility, municipal electric utility, electric cooperative or people's utility district.

(8) This section applies only to net metering facilities that have a generating capacity of 25 kilowatts or less, except that the commission by rule may provide for a higher limit for customers of a public utility.

(9) Notwithstanding subsections (2) to (8) of this section, an electric utility serving fewer than 25,000 customers in Oregon that has its headquarters located in another state and offers net metering services or a substantial equivalent offset against retail sales in that state shall be deemed to be in compliance with this section if the electric utility offers net metering services to its customers in Oregon in accordance with tariffs, schedules and other regulations promulgated by the appropriate authority in the state where the electric utility's headquarters are located. [1999 c.944 §2; 2005 c.145 §1; 2013 c.648 §5; 2014 c.33 §1]

**757.305** [Amended by 1971 c.655 §77; repealed by 1979 c.190 §431]

(c) Widespread transportation electrification requires that electric companies increase access to the use of electricity as a transportation fuel in low and moderate income communities;

(d) Widespread transportation electrification should stimulate innovation and competition, provide consumers with increased options in the use of charging equipment and in procuring services from suppliers of electricity, attract private capital investments and create high quality jobs in this state;

(e) Transportation electrification and the purchase and use of electric vehicles should assist in managing the electrical grid, integrating generation from renewable energy resources and improving electric system efficiency and operational flexibility, including the ability of an electric company to integrate variable generating resources;

(f) Deploying transportation electrification and electric vehicles creates the opportunity for an electric company to propose, to the commission, that a net benefit for the customers of the electric company is attainable; and

(g) Charging electric vehicles in a manner that provides benefits to electrical grid management affords fuel cost savings for vehicle drivers.

(3)(a) The commission shall direct each electric company to file:

(A) Applications for programs to support transportation electrification; and

(B) A plan, for acceptance by the commission, that integrates the electric company's transportation electrification actions.

(b) The applications and plan must be filed in a form and manner prescribed by the commission.

(c) A program proposed by an electric company may include prudent investments in or customer rebates for electric vehicle charging and related infrastructure.

(4) The commission may allow an electric company to recover costs from retail electricity consumers for prudent infrastructure measures to support transportation electrification if the infrastructure measures are consistent with and meet the requirements of subsection (5) of this section.

(5) If undertaken by an electric company, an infrastructure measure to support transportation electrification is a utility service and a benefit to utility customers if the infrastructure measure can be reasonably anticipated to:

(a) Support reductions of transportation sector greenhouse gas emissions over time; and

(b) Benefit the electric company's customers in ways that may include, but need not be limited to:

(A) Distribution or transmission management benefits;

(B) Revenues to utilities from electric vehicle charging to offset utilities' fixed costs that may otherwise be charged to customers;

(C) System efficiencies or other economic values inuring to the benefit of customers over the long term; or

(D) Increased customer choice through greater transportation electrification infrastructure deployment to increase the availability of and access to public and private electric vehicle charging stations.

(6) When considering a transportation electrification program and determining cost recovery for investments and other expenditures that are not infrastructure measures and that are related to a program proposed by an electric company under subsection (3) of this section, the commission shall consider whether the investments and other expenditures:

(a) Are within the service territory of the electric company;

(b) Are prudent as determined by the commission;

(c) Are reasonably expected to be used and useful as determined by the commission;

(d) Are reasonably expected to enable the electric company to support the electric company's electrical system;

(e) Are reasonably expected to improve the electric company's electrical system efficiency and operational flexibility, including the ability of the electric company to integrate variable generating resources; and

(f) Are reasonably expected to stimulate innovation, competition and customer choice in electric vehicle charging and related infrastructure and services.

(7) In undertaking infrastructure measures that involve the installation of one or more electric vehicle charging stations, an electric company must allow for customer choice in the selection of the type of electric vehicle charging station to be installed, subject to equipment eligibility as determined by the electric company. An electric company may prequalify multiple types of eligible electric vehicle charging stations based on criteria determined by the electric company.

(8) Nothing in this section restricts or prohibits a corporation, company, partnership, individual or association of individuals exempt from regulation under ORS 757.005 (1)(b)(G) from furnishing electricity to any number of customers for use in motor vehicles.

(9)(a) Tariff schedules and rates allowed pursuant to subsections (3) to (6) of this section:

(A) May allow a return of and a return on an investment made by an electric company under subsections (3) to (6) of this section; and

(B) Shall be recovered from the retail electricity consumers of an electric company in a manner determined by the commission.

(b) A return on investment allowed under this subsection may be earned for a period of time that does not exceed the depreciation schedule of the investment approved by the commission. When an electric company's investment is fully depreciated, the commission may authorize the electric company to donate the electric vehicle charging infrastructure to the owner of the property on which the infrastructure is located.

(10) For purposes of ORS 757.355, electric vehicle charging infrastructure provides utility service to the customers of an electric company.

(11) In authorizing programs described in subsection (3) of this section, the commission shall review data concerning current and future adoption of electric vehicles and utilization of electric vehicle charging infrastructure. If market barriers unrelated to the investment or expenditures made by

an electric company prevent electric vehicles from adequately utilizing available electric vehicle charging infrastructure, the commission may not permit additional investments in or expenditures related to supporting transportation electrification without a reasonable showing that the investments or expenditures would not result in long-term stranded costs recoverable from the retail electricity consumers of electric companies. **757.365 Pilot program for small solar energy systems; rules; limits to program; report to Legislative Assembly.**

(1) The Public Utility Commission shall establish a pilot program for each electric company to demonstrate the use and effectiveness of volumetric incentive rates and payments for electricity or for the nonenergy attributes of electricity, or both, from solar photovoltaic energy systems that are permanently installed in this state by retail electricity consumers and that first become operational after the program begins. The cumulative nameplate capacity of the qualifying systems enrolled in all of the pilot programs may not exceed 27.5 megawatts of alternating current. Qualifying systems enrolled in the pilot program may not have nameplate generating capacity greater than 500 kilowatts.

(2) The commission by rule shall adopt requirements for the pilot programs described in subsection (1) of this section. Each electric company shall file for commission approval tariff schedules for the pilot programs that conform to the requirements.

(3) The commission may establish incentive rates for the pilot programs to enable the development of the most efficient solar photovoltaic energy systems.

(4) A retail electricity consumer participating in a pilot program may receive payments based on electricity generated from solar photovoltaic energy system output for 15 years from the consumer’s date of enrollment in the program, at rates or through a rate formula in a tariff schedule established at the time of enrollment, or at rates otherwise established at the time of enrollment. The consumer thereafter may receive payments based upon electricity generated from the qualifying system at a rate equal to the resource value.

(5) The commission may adjust the tariff schedule as needed for new pilot program participants for the purpose of meeting the goal established in subsection (1) of this section. Once a retail electricity consumer is enrolled in a program, the rates or rate formula for determining payments to the consumer may not be modified.

**757.405 Power to regulate issuance of utility securities.** The power of public utilities to issue stocks and bonds, notes and other evidences of indebtedness and to create liens on their property situated within this state is a special privilege, the right of supervision, regulation, restriction and control of which is and shall continue to be vested in the state. Such power shall be exercised as provided by law and under such rules and regulations as the Public Utility Commission may prescribe.

**757.410 When issuance of securities is void.** All stocks and bonds, notes or other evidences of indebtedness, and any security of a public utility shall be void when issued:

(1) Without an order of the Public Utility Commission authorizing the same then in effect except as provided in ORS 757.412 or 757.415 (3).

(2) With the authorization of the commission, but not conforming in its provisions to the provisions, if any, which it is required by the order of authorization of the commission to contain; but no failure to comply with the terms or conditions of the order of authorization of the commission and no informality or defect in the application or in the proceedings in connection therewith or with the issuance of such order shall render void any stock or bond, note or other evidence of indebtedness, or security issued pursuant to and in substantial conformity with an order of the commission, except as to a person taking the same otherwise than in good faith and for value and without actual notice. [Amended by 1997 c.261 §1]

(2) Any public utility or class of public utilities. [1997 c.261 §3]

**Note:** 757.412 was added to and made a part of ORS chapter 757 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**757.415 Purposes for which securities and notes may be issued; order required.**

(1) Except as otherwise permitted by subsection (4) of this section, a public utility may issue stocks and bonds, notes and other evidences of indebtedness, certificates of beneficial interests in a trust and securities for the following purposes and no others:

(b) The improvement or maintenance of its service.

(c) The discharge or lawful refunding of its obligations.

(e) The compliance with terms and conditions of options granted to its employees to purchase its stock, if the commission first finds that such terms and conditions are reasonable and in the public interest.

(f) The finance or refinance of bondable rate recovery expenditures as described in ORS 757.461. Bonds, notes, certificates of beneficial interests in a trust and other evidences of indebtedness or ownership, issued for this purpose are rate recovery bonds for the purposes of ORS 757.463.

(2) Before issuing such securities a public utility, in addition to the other requirements of law, shall secure from the commission upon application an order authorizing such issue, stating:

(a) The amount of the issue and the purposes to which the issue or the proceeds thereof are to be applied;

(b) In the opinion of the commission, the money, costs and expenses, property or labor to be procured, paid for or refinanced by such issue reasonably is required for the purposes specified in the order and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the applicant of service as a public utility, and will not impair its ability to perform that service; and

(c) Except as otherwise permitted in the order in the case of bonds, notes or other evidences of indebtedness, such purposes are not, in whole or in part, reasonably chargeable to operating expenses or to income.

(3) This section and ORS 757.410 apply to demand notes but do not apply to the issuance or renewal of a note or evidence of indebtedness maturing not more than one year after date of such issue or renewal.

(4) Nothing in ORS 757.400 to 757.463 shall prevent issuance of stock to stockholders as a stock dividend if there has been secured from the commission an order:

(b) Authorizing such issue and a transfer of surplus to capital in an amount equal to the par or stated value of the stock so authorized; and

(c) Finding that a sum equal to the amount to be so transferred was expended for the purposes enumerated in subsection (1) of this section.

(5) Rate recovery bonds authorized pursuant to subsection (1)(f) of this section may be issued directly by a public utility or through a finance subsidiary. For purposes of this subsection, "finance subsidiary" means any corporation, limited liability company, company, association, trust or other entity:

(B) In the case of a trust, for which a public utility or subsidiary thereof is the grantor; or

**757.417 Limitation on application of ORS 757.415.** ORS 757.415 does not apply to the issuance, renewal or assumption of liability on any evidence of indebtedness when such issuance, renewal or assumption is for the purpose of acquiring specific real or personal property, if the aggregate principal amount thereof, together with all other then outstanding evidences of indebtedness issued, renewed or assumed under this section, does not exceed whichever is the greater of the following amounts:

**757.420 Hearings and supplemental orders relating to issuance of securities; joint approval of issuance by interstate utility.** (1) To enable the Public Utility Commission to determine whether the com-

mission will issue an order under ORS 757.415, the commission may hold a hearing and may make such additional inquiry or investigation, examine such witnesses, books, papers, documents and contracts and require the filing of such data as the commission deems necessary. The application for such order shall be given priority and shall be disposed of by the commission within 30 days after the filing of such application, unless that period is extended with the consent of the public utility.

(2) The commission may, upon application of the public utility, after opportunity for hearing and for good cause shown, make such supplemental orders in the premises as the commission finds necessary or appropriate, and may by any such supplemental order modify the provisions of any previous order as to the particular purposes, uses, extent to which, or the condition under which, any security theretofore authorized or its proceeds may be applied. Such supplemental orders are subject to the requirements of ORS 757.415. The period of time permitted under subsection (1) of this section for disposing of applications shall not apply to supplemental orders.

(3) If a commission or other agency is empowered by another state to regulate and control the amount and character of securities to be issued by any public utility within such other state, the commission of Oregon has power to agree with such commission or agency of such other state on the issue of stocks, bonds, notes, other evidences of indebtedness or securities by a public utility owning or operating a public utility both in such state and in this state, and has power to approve such issue jointly with such commission or agency and to issue a joint certificate of such approval. However, no such joint approval is required in order to express the consent to and approval of such issue by the State of Oregon if the issue is separately approved by the Oregon commission.

(2) The commission has power to require public utilities to account for the disposition of the proceeds of all sales of stocks and bonds, notes and other evidences of indebtedness, in such form and detail as the commission deems advisable, and to establish such rules and regulations as the commission deems reasonable and necessary to insure the disposition of such proceeds for the purpose or purposes specified in the order.

**757.440 Approval required before utility may guarantee another's indebtedness.** No public utility shall assume any obligation or liability as guarantor, indorser, surety or otherwise in respect to the securities of any other person, firm or corporation, when such securities are payable at periods of more than 12 months after the date thereof, without first having secured from the Public Utility Commission an order authorizing it so to do. Every assumption made other than in accordance with such an order is void.

**757.463 Security interest as collateral in rate recovery assets; requirements for attachment and perfection; transfers; enforcement rights and remedies.** (1)(a) A public utility, finance subsidiary or assignee may grant a security interest in rate recovery assets as collateral for rate recovery bonds. revenues have accrued or the related rate recovery charges have been charged, billed or collected. Multiple security interests in the same rate recovery assets shall rank according to priority in time of perfection.

(e) Subject to the terms of the security agreement covering the rate recovery assets, the relative priority of a security interest created or perfected under this section is not adversely affected by:

(D) Contains a description that refers to the commission’s financing order that created the rate recovery assets.

(b) A notice of transfer that is filed in accordance with the requirements under paragraph (a) of this subsection shall be deemed sufficient under ORS chapter 79 and all other relevant laws for identifying the rate recovery assets and for providing notice that the rate recovery assets have been transferred to the assignee.

(c) A transfer is perfected against third parties on the date a notice of transfer is filed.

(d) A transfer of rate recovery assets to a financing subsidiary that is perfected under this subsection is free and clear of all claims, security interests, liens and encumbrances of the transferring public utility, except for any prior security interest perfected under subsection (1) of this section.

(e) The priority of a transfer that is perfected under this subsection is not adversely affected by:

(A) Any later modification of the financing order or rate recovery assets; or

(B) The commingling of proceeds of rate recovery assets.

(3)(a) When proceeds of rate recovery assets are transferred to a segregated account for an assignee or secured party, any lien or security interest that may apply to those proceeds, other than a security interest perfected under subsection (1) of this section, is automatically terminated, without the need for further notice, act or evidence.

(b) Proceeds from rate recovery assets shall be held in trust for an assignee or secured party until the proceeds have been transferred to the assignee or secured party.

(c) Any adjustment in rate recovery charges does not affect the validity, perfection or priority of a security interest in or the transfer of rate recovery assets.

(4)(a) The rights and remedies of a secured party in enforcing a secured interest in rate recovery assets do not include and are without recourse to any public utility asset except for the rate recovery assets, even if the rate recovery assets are commingled with other assets.

(b) If a public utility or finance subsidiary defaults on a required payment with respect to rate recovery bonds, a secured party or secured party's representatives may apply to the commission for relief. Upon application by a secured party or secured party's representatives, the commission shall order, without limiting other remedies of the secured party or secured party's representatives, the sequestration and payment to the secured party or secured party's representatives of the proceeds of the rate recovery assets.

(c) The interest of an assignee or financing party in rate recovery assets is not subject to setoff, counterclaim, surcharge or defense by the public utility or any other person in connection with a bankruptcy, reorganization or insolvency proceeding. However, any surplus in excess of amounts necessary to pay principal, interest, premium, if any, and other amounts due with respect to the rate recovery bonds and associated financing costs, including enforcement costs, with respect to the security agreement shall be remitted to the debtor or transferor.

(d) Notwithstanding any bankruptcy, reorganization or other insolvency proceeding with respect to a public utility, debtor or transferor with respect to rate recovery assets, the commission's financing order shall remain in full force and effect.

(5) A transfer of rate recovery assets by a public utility to a finance subsidiary or other assignee that the parties have expressly stated in the governing documentation to be a sale or other absolute transfer,

in a transaction approved in a financing order, shall be treated as a true sale and not as a pledge or other financing of the rate recovery assets. According to the holders of rate recovery bonds a preferred right to revenues of the public utility or the provision by the public utility of other credit enhancement with respect to rate recovery bonds does not impair or negate the characterization of a transfer as a true sale.

(6) Any successor to a public utility pursuant to any bankruptcy, reorganization or other insolvency proceeding shall perform and satisfy all obligations of the public utility under an approved contract governing rate recovery bonds in the same manner and to the same extent as was required of the public utility before the proceeding, including, without limitation, billing, collecting and paying to the holders of the rate recovery bonds or their representatives revenues arising with respect to the rate recovery assets pledged to secure the rate recovery bonds.

(7) The granting, perfection and enforcement of security interests in rate recovery assets to secure rate recovery bonds are subject to ORS chapter 79, except that when a provision in ORS chapter 79 comes in conflict with a provision in this section, the provision in this section shall control.

(8) Except for enforcement permitted under the laws of another state, the laws of this state shall govern the creation, validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the creation or transfer of a security interest in a rate recovery asset. [2023 c.529 §6 (enacted in lieu of 757.460)]

**757.465 Rate recovery bond not security for certain purposes.** A rate recovery bond, as described under ORS 757.457, 757.459, 757.461 and 757.463, that is exempt under ORS 59.025 from ORS 59.049 and 59.055 is not a security for purposes of ORS 59.115, 59.135 or 59.137. [2023 c.529 §7]

**Note:** 757.465 and 757.467 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

757.450 by sections 8 to 12, chapter 529, Oregon Laws 2023, and taken in good faith and pursuant to a financing order issued prior to such determination or occurrence. [2023 c.529 §14]

(b) Mortgage or otherwise encumber the whole or any part of the property of the public utility necessary or useful in the performance of the public utility's duties to the public, including any franchise, permit or right to maintain and operate the public utility or public utility property, or perform any service as a public utility; or

(3) Every sale, lease, assignment, mortgage, disposition, encumbrance, merger or consolidation subject to subsection (1) of this section made other than in accordance with

the order of the commission authorizing the same is void.

(4) For purposes of complying with subsections (1)(a) and (2) of this section, a public utility shall include in the calculation of the value of the property to be sold, leased, assigned or otherwise disposed of only the portion of the value of the property that has been recognized as the basis of an operating expense or capital expenditure in an Oregon rate valuation or other hearing or proceeding.

(5) This section does not prohibit or invalidate the sale, lease or other disposition by any public utility of property that is not necessary or useful in the performance of the public utility's duties to the public.

(6) A water utility doing business in Oregon shall not, without first obtaining the Public Utility Commission's approval of a transaction, sell, lease, assign or otherwise dispose of the whole of the property of the water utility necessary or useful in the performance of the water utility's duties to the public or any part thereof of a value in excess of \$10,000, or sell, lease, assign or otherwise dispose of any franchise, permit or right to maintain and operate the water utility or water utility property, or perform any service as a water utility. **757.482 Approval to sell or convey real property below market price for development of affordable housing.** (1) As used in this section, "affordable housing" means affordable housing as defined in ORS 197A.445 or publicly supported housing as defined in ORS 456.250.

(2)(a) To facilitate the development of affordable housing in this state, the Public Utility Commission may allow a public utility to sell, or to convey at below market price or as a gift, the public utility's interest in real property for the purpose of the real property being used for the development of affordable housing.

(b) The instrument that conveys, or contracts to convey, the public utility's interest in the real property must include an affordable housing covenant as provided in ORS 456.270 to 456.295.

(3) A public utility may not recover costs from customers for selling, or conveying at below market price or as a gift, the public utility's interest in real property under this section. [2023 c.223 §29]

**Note:** 757.482 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.483 Condemnation or acquisition of service territory or property of electric company by electric utility; stranded costs obligation.** (1) For purposes of this section:

(a) "Electric company" has the meaning given that term in ORS 757.600.

(b) "Electric utility" has the meaning given that term in ORS 757.600.

(c) "Retail electricity consumer" has the meaning given that term in ORS 757.600.

(2) Upon the request of an electric company, the Public Utility Commission shall establish a stranded costs obligation payable by an electric utility to an electric company in association with a condemnation or transaction described in subsection (3) of this section.

(3)(a) An electric utility that condemns the service territory or property of an electric company, or acquires property pursuant to a transaction described in ORS 757.480, must pay the stranded costs obligation established by the commission under subsection (2) of this section.

(b) The purpose of the stranded costs obligation is to prevent shifting the costs associated with the loss of service territory or property of an electric company from the retail electricity consumers of the electric utility to the retail electricity consumers of the electric company.

(4) The commission may determine the stranded costs obligation in accordance with the Federal Energy Regulatory Commission's current methodology for determining stranded costs under the same or similar circumstances.

(5) This section does not interfere with or supersede the jurisdiction of the Federal Energy Regulatory Commission. [2016 c.28 §18]

**757.485 Purchase of property or stocks of one utility by another.** (1) No public utility shall, directly or indirectly, purchase, acquire or become the owner of any of the stocks or bonds or property utilized for utility purposes and having a value in excess of \$10,000 of any other public utility unless authorized so to do by the Public Utility Commission.

(2) Every contract by any public utility for the purchase, acquisition, assignment or transfer to it of any of the stock of any other public utility by or through any person, partnership or corporation without the approval of the commission shall be void and of no effect, and no such transfer or assignment of such stock upon the books of the corporation pursuant to any such contract is effective for any purpose. [Formerly 757.160]

**757.490 Approval needed for certain contracts.** (1) When any public utility doing business in this state enters into a contract with another corporation with relation to the construction, operation, maintenance or use of the property of said public utility in Oregon, or the use of the property of the other contracting party, or any part thereof, or for service, advice, engineering, financing, rentals, leasing or for any construction or management charges in respect of any such property, or for the purchase of property, materials or supplies, the proposed contract shall be filed with the Public Utility Commission for the investigation and approval when the public utility owns a majority of or controls directly or indirectly the voting stock of the other contracting corporations.

(2) Any such proposed contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier. The commission shall promptly investigate and act upon the contract in accordance with ORS 757.495 (3) and (6).

(3) In making such investigation the commission and accountants, examiners and agents, appointed by the commission for the purpose, shall be given free access to all books, books of account, documents, data and records of the public utility as well as of the corporation with which it is proposing to contract, which the commission may deem material to the investigation. The failure or refusal of either of the parties to the proposed contract to comply with this subsection is prima facie evidence that such contract is unfair, unreasonable and contrary to public interest, and is sufficient to justify a determination and finding of the commission to that effect, which has the same force and effect as any other determination or order of the commission. [Formerly 757.165; 1989 c.956 §6]

**757.495 Contracts involving utilities and persons with affiliated interests.** (1) When any public utility doing business in this state enters into any contract to make any payment, directly or indirectly, to any person or corporation having an affiliated interest, for service, advice, auditing, accounting, sponsoring, engineering, managing, operating, financing, legal or other services, or enter any charges therefor on its books, which shall be recognized as an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the Public Utility Commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the

parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(2) When any public utility doing business in this state enters into any contract, oral or written, with any person or corporation having an affiliated interest relating to the construction, operation, maintenance, leasing or use of the property of such public utility in Oregon, or the purchase of property, materials or supplies, which shall be recognized as the basis of an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(3) When any such contract has been submitted to the commission, the commission promptly shall examine and investigate the contract. If, after such investigation, the commission determines that the contract is fair and reasonable and not contrary to the public interest, the commission shall enter findings and an order to this effect and serve a copy thereof upon the public utility, whereupon any expenses and capital expenditures incurred by the public utility under the contract may be recognized in any rate valuation or other hearing or proceeding. If, after such investigation, the commission determines that the contract is not fair and reasonable in all its terms and is contrary to the public interest, the commission shall enter findings and an order accordingly and serve a copy thereof upon the public utility, and, except as provided in subsection (4) of this section, it shall be unlawful to recognize the contract for the purposes specified in this section.

(4) When any such contract has been filed with the commission within 90 days of execution and the commission has not entered an order disapproving the contract under subsection (3) of this section, the commission may not base its refusal to recognize any expenses or capital expenditures incurred under the contract in any rate valuation or other hearing or proceeding solely on the basis that such contract has not been approved under subsection (3) of this section.

(5) No public utility shall issue notes or lend its funds or give credit on its books or otherwise to any person or corporation having an affiliated interest, either directly or indirectly, without the approval of the commission.

(6) The action of the commission with respect to all the matters described in this

section when submitted to the commission shall be by findings and an order to be entered within 90 days after the matter has been submitted to the commission for consideration, and the findings and order of the commission with respect to any of such matters shall be and remain in full force and effect, unless and until set aside, modified or remanded in a proceeding for judicial review of an order in the manner provided by ORS 756.610. [Formerly 757.170; 1989 c.956 §7; 2005 c.22 §505; 2005 c.638 §9; 2017 c.312 §5]

**757.500 Contracts between certain public utilities.** When any public utility is primarily engaged in another enterprise and is only indirectly engaged in the production, transmission, delivery or furnishing of heat, light, water or power to or for the public by reason of a contract or agreement, express or implied, between itself and another public utility which is directly engaged in such business, the jurisdiction of the Public Utility Commission over such public utility extends only to the right to modify, control, rescind, alter or amend any such existing contract or agreement where the interest of the customers of such public utility directly engaged in such business demands. No such contract or agreement is valid or enforceable until it has been approved by the commission as being in the public interest. [Formerly 757.175]

**757.505** [Repealed by 1971 c.655 §250]

**757.506 Findings and policy regarding exercise of influence over utility by person not engaged in utility business.** (1) The Legislative Assembly finds and declares that:

(a) The protection of customers of public utilities which provide heat, light or power is a matter of fundamental statewide concern;

(b) Existing legislation requires the Public Utility Commission's approval of one public utility's acquisition of another public utility's stocks, bonds and certain property used for utility purposes, but does not require the commission's approval of such acquisitions by persons not engaged in the public utility business in Oregon; and

(c) An attempt by a person not engaged in the public utility business in Oregon to acquire the power to exercise any substantial influence over the policies and actions of an Oregon public utility which provides heat, light or power could result in harm to such utility's customers, including but not limited to the degradation of utility service, higher rates, weakened financial structure and diminution of utility assets.

(2) It is, therefore, the policy of the State of Oregon to regulate acquisitions by persons not engaged in the public utility business in

Oregon of the power to exercise any substantial influence over the policies and actions of an Oregon public utility which provides heat, light or power in the manner set forth in this section and ORS 757.511 in order to prevent unnecessary and unwarranted harm to such utilities' customers. [1985 c.632 §2]

**757.510** [Repealed by 1971 c.655 §250]

**757.511 Application for authority to exercise influence over utility; contents of application; issuance of order; dissemination of information about acquisition.**

(1) No person, directly or indirectly, shall acquire the power to exercise any substantial influence over the policies and actions of a public utility which provides heat, light or power without first securing from the Public Utility Commission, upon application, an order authorizing such acquisition if such person is, or by such acquisition would become, an affiliated interest with such public utility as defined in ORS 757.015 (1), (2) or (3).

(2) Notice must be given to the commission of an application under this section at least 60 days before the application is filed with the commission. The notice must indicate whether the transaction is a transaction described in ORS 757.814 (1). If the transaction is a transaction as described in ORS 757.814 (1), the commission shall give notice to cities and counties as required by ORS 757.814 (1).

(3) The application required by subsection (1) of this section shall set forth detailed information regarding:

(a) The applicant's identity and financial ability;

(b) The background of the key personnel associated with the applicant;

(c) The source and amounts of funds or other consideration to be used in the acquisition;

(d) The applicant's compliance with federal law in carrying out the acquisition;

(e) Whether the applicant or the key personnel associated with the applicant have violated any state or federal statutes regulating the activities of public utilities;

(f) All documents relating to the transaction giving rise to the application;

(g) The applicant's experience in operating public utilities providing heat, light or power;

(h) The applicant's plan for operating the public utility;

(i) How the acquisition will serve the public utility's customers in the public interest; and

(j) Such other information as the commission may require by rule.

(4)(a) The commission shall examine and investigate each application received pursuant to this section. The commission shall issue an order disposing of the application within 11 months of the date the application is filed, unless extended by agreement between the commission and applicant. If the commission determines that approval of the application will serve the public utility's customers and is in the public interest, the commission shall issue an order granting the application. The commission may condition an order authorizing the acquisition upon the applicant's satisfactory performance or adherence to specific requirements. The commission otherwise shall issue an order denying the application. The applicant shall bear the burden of showing that granting the application is in the public interest.

(b) In reviewing an application received pursuant to this section for an electricity or natural gas utility, the Public Utility Commission must consider the effect of the acquisition or merger on the amount of income taxes paid by the utility or its affiliated group and make any necessary adjustments to the rates of the utility, including the establishment of a balancing account to track income tax expense, to ensure that the acquisition or merger serves the utility's customers and is in the public interest.

(5) Nothing in this section shall prohibit dissemination by any party of information concerning the acquisition so long as such dissemination is not otherwise in conflict with state or federal law. [1985 c.632 §3; 2007 c.807 §2a; 2011 c.137 §4; 2023 c.53 §2]

**757.515** [Amended by 1971 c.655 §39; renumbered 756.515]

**757.516 Contracts between natural gas utilities and customers for commodity and services; determination by commission of reasonableness of contract and utility activities.** (1) Following a Public Utility Commission determination that such services are subject to competition, a natural gas utility may enter into a contract with any customer for the provision of natural gas commodity, rights to pipeline capacity and natural gas transportation services when such services are provided in advance of the point of interconnection between the facility of the natural gas utility and the facility of an interstate pipeline.

(2) Contracts for services described under subsection (1) of this section are not schedules of rates, tolls or charges within the meaning of ORS 757.205 and are not subject to the requirements of ORS 757.205, 757.230 and 757.310.

(3) A contract for services described under subsection (1) of this section may include services provided after the point of interconnection between a natural gas utility's facility and the interstate pipeline's facility. Services provided after the point of interconnection are subject to the requirements of ORS 757.205, 757.230 and 757.310 and shall be separately priced in accordance with the utility's filed tariffs.

(4) A natural gas utility entering contracts for services described under subsection (1) of this section shall make available to the commission any information necessary for review of such contracts for ratemaking purposes. Notwithstanding ORS 192.311 to 192.478, the commission shall not release the terms of any contract or portion of a contract for services described in subsection (1) of this section without the consent of the customer and the natural gas utility except for contracts entered into between a natural gas utility and an affiliated interest of that natural gas utility. Notwithstanding any other provision of this section, a contract for services described in subsection (1) of this section between a natural gas utility and another public utility may be released by the commission pursuant to a hearing held under ORS 757.210.

(5) Nothing in this section shall restrict the commission from subsequent investigation of the reasonableness of contracts entered into under subsection (1) of this section for ratemaking purposes. The commission's review of such contracts for ratemaking purposes shall not in any way affect the obligations or rights of the parties under the contracts.

(6) In accordance with ORS 756.515, the commission may investigate the activities of a natural gas utility related to contracts described under subsection (1) of this section. Notwithstanding any other provision of this section, if the commission finds that the activities of a natural gas utility have not generally been in the public interest, the commission, by order, may require the natural gas utility to file all future contracts described under subsection (1) of this section as provided under ORS 757.205 or 757.240. Any such finding by the commission shall not affect the obligations or rights of the parties under any existing contracts.

(7) Nothing in this section, nor any action taken by the commission pursuant to this section, shall be deemed state action for the purpose of exempting a natural gas utility from liability for anticompetitive conduct or other unlawful practices.

(8) As used in this section, "natural gas utility" means a public utility providing natural gas service to customers. [1993 c.485 §2]

### ELIMINATION OF COAL FROM ELECTRICITY SUPPLY

**757.518 Elimination of coal-fired resources from allocations of electricity; depreciation; exception; useful life of coal-fired resources; rates.** (1) As used in this section:

(a) "Allocation of electricity" means, for the purpose of setting electricity rates, the costs and benefits associated with the resources used to provide electricity to an electric company's retail electricity consumers that are located in this state.

(b)(A) "Coal-fired resource" means a facility that uses coal-fired generating units, or that uses units fired in whole or in part by coal as feedstock, to generate electricity.

(B) "Coal-fired resource" does not include a facility generating electricity that is included as part of a limited duration wholesale power purchase made by an electric company for immediate delivery to retail electricity consumers that are located in this state for which the source of the power is not known.

(c) "Electric company" has the meaning given that term in ORS 757.600.

(d) "Retail electricity consumer" has the meaning given that term in ORS 757.600.

(2) On or before January 1, 2030, an electric company shall eliminate coal-fired resources from its allocation of electricity.

(3)(a) The Public Utility Commission shall adjust any schedule of depreciation approved by the commission for an electric company's coal-fired resource if:

(A) The electric company holds a minority ownership share in only one coal-fired resource, with no more than four generating units; and

(B) The electric company serves at least 800,000 retail electricity consumers and only retail electricity consumers that are located in this state.

(b) The adjusted depreciation schedule described in paragraph (a) of this subsection must require the coal-fired resource described in paragraph (a)(A) of this subsection to be fully depreciated on or before December 31, 2030.

(4) Notwithstanding subsections (2) and (3) of this section, for the number of years requested by the electric company, not to exceed five years after the coal-fired resource is fully depreciated, the commission shall authorize an electric company described in subsection (3) of this section to include in the company's allocation of electricity the costs and benefits associated with the coal-fired resource described in subsection (3)(a)(A) of this section if:

(a) The electric company requests the commission to authorize the allocation of electricity; or

(b) The owners of the coal-fired resource agree to close the coal-fired resource on or before the date that is five years after the date the coal-fired resource is fully depreciated.

(5) For purposes of evaluating the prudence of an investment decision regarding a coal-fired resource made after March 8, 2016, or an investment related to the continued operation of a coal-fired resource made after March 8, 2016, the useful life of the coal-fired resource may not be considered to be any later than January 1, 2030, unless the commission determines otherwise.

(6) Notwithstanding ORS 757.355, this section does not prevent the full recovery of prudently incurred costs related to the decommissioning or remediation of a coal-fired resource or the closure of a coal-fired resource, at the time those costs are incurred. [2016 c.28 §1]

**Note:** 757.518 and 757.519 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.519 Consideration of net gain or net loss upon sale of coal-fired resource for allocation to certain retail electricity consumers.** The Public Utility Commission may consider the net gain or net loss upon the sale of any coal-fired resource, as defined in ORS 757.518, for allocation to the retail electricity consumers, as defined in ORS 757.600, of an electric company that makes sales of electricity to 25,000 or more retail electricity consumers in this state. [2016 c.28 §2]

**Note:** See note under 757.518.

**757.520** [Repealed by 1971 c.655 §250]

- (C) Installation, replacement or modification of equipment that improves the heat rate of the facility or reduces a generating facility’s pounds of greenhouse gases per megawatt-hour of electricity;
- (D) Installation, replacement or modification of equipment where the primary purpose is to maintain reliable generation output capability and not to extend the life of the generating facility, and that does not increase the heat input or fuel usage as specified in existing generation air quality permits, but that may result in incidental increases in generation capacity;
- (E) Repairs necessitated by sudden and unexpected equipment failure; or
- (F) An acquisition of an additional interest.

(11) “Output-based methodology” means a greenhouse gas emissions standard that is expressed in pounds of greenhouse gases emitted per megawatt-hour, factoring in the useful thermal energy employed for purposes other than the generation of electricity.

**757.524 Greenhouse gas emissions standard applicable to electric companies and electricity service suppliers.** (1) The greenhouse gas emissions standard that applies to electric companies and electricity service suppliers is 1,100 pounds of greenhouse gases per megawatt-hour for a generating facility.

(2) The greenhouse gas emissions standard applies only to carbon dioxide emissions.

(3) For purposes of applying the emissions standard to cogeneration facilities, the Public Utility Commission shall establish an output-based methodology to ensure that the calculation of emissions of greenhouse gases for cogeneration facilities recognizes the total usable energy output of the process and includes all greenhouse gases emitted by the facility in the production of both electrical and thermal energy. [2009 c.751 §2; 2013 c.172 §2]

**757.525** [Repealed by 1971 c.655 §250]

**757.526 Petition by electric companies and electricity service suppliers to study greenhouse gas emissions standard; report to Legislative Assembly.** No sooner than 90 days after the enactment of a federal law, state law, regulation or rule regulating the emission of greenhouse gases from generating facilities, an electric company, electricity service supplier or the customer of an electric company or electricity service supplier may petition the Public Utility Commission to study the greenhouse gas emissions standard established under ORS 757.524. If the commission undertakes the study, the commission shall determine whether the standard is still necessary to reduce greenhouse gases emitted by electric companies and electricity service suppliers and whether the standard should be repealed or maintained in whole or in part. In making the determination, the commission shall consider whether the enacted federal law, state law, regulation or rule is inconsistent with the standard or renders the standard redundant. The commission shall report the results of the study, and shall include recommendations for legislation, to the Legislative Assembly in the manner described in ORS 192.245 no later than 12 months after receiving the petition. [2013 c.172 §4]

**Note:** See note under 757.522.

**757.528 Greenhouse gas emissions standard applicable to consumer-owned utilities; modification; rules.** (1) Unless modified by rule by the State Department of Energy as provided in this section, the greenhouse gas emissions standard that applies to consumer-owned utilities is 1,100 pounds of greenhouse gases per megawatt-hour for a generating facility.

(2) Unless modified pursuant to subsection (4) of this section, the greenhouse gas emissions standard includes only carbon dioxide emissions.

(3) For purposes of applying the emissions standard to cogeneration facilities, the department shall establish an output-based methodology to ensure that the calculation of emissions of greenhouse gases for cogeneration facilities recognizes the total usable energy output of the process and includes all greenhouse gases emitted by the facility in the production of both electrical and thermal energy.

(4) The department shall review the greenhouse gas emissions standard established under this section no more than once every three years. After public notice and hearing, and consultation with the Public Utility Commission, the department may:

(a) Modify the emissions standard to include other greenhouse gases as defined in ORS 468A.210, with the other greenhouse gases expressed as their carbon dioxide equivalent; and

(b) Modify the emissions standard based upon current information on the rate of greenhouse gas emissions from a commercially available combined-cycle natural gas generating facility that:

(A) Employs a combination of one or more gas turbines and one or more steam turbines and produces electricity in the steam turbines from waste heat produced by the gas turbines;

(B) Has a heat rate at high elevation within the boundaries of the Western Electricity Coordinating Council; and

(C) Has a heat rate at ambient temperatures when operating during the hottest day of the year.

(5) In modifying the greenhouse gas emissions standard, the department shall:

(a) Use an output-based methodology to ensure that the calculation of greenhouse gas emissions through cogeneration recognizes the total usable energy output of the process and includes all greenhouse gases emitted by the generating facility in the production of both electrical and thermal energy; and

(b) Consider the effects of the emissions standard on system reliability and overall costs to electricity consumers.

(6) If upon a review conducted pursuant to subsection (4) of this section, the department determines that a mandatory greenhouse gas emissions limit has been established pursuant to state or federal law, the department shall issue a report to the appropriate legislative committees of the Legislative Assembly stating which portions, if any, of the greenhouse gas emissions standard are no longer necessary as a matter of state law. [2009 c.751 §3]

**Note:** See note under 757.522.

**757.530** [Repealed by 1971 c.655 §250]

**757.531 Emissions standard-based restrictions on long-term financial commitments by electric companies or electricity service suppliers; rules.** (1)(a) An electric company or electricity service supplier may not enter into a long-term financial commitment unless the baseload electricity acquired under the commitment is produced by a generating facility that complies with a greenhouse gas emissions standard established under ORS 757.524.

(b) A generating facility complies with the greenhouse gas emissions standard es-

tablished under ORS 757.524 if the rate of emissions of the facility does not exceed the emissions standard.

(c) In determining whether a generating facility complies with the emissions standard, the total emissions associated with producing baseload electricity at the generating facility are included in determining the rate of emissions of greenhouse gases. The total emissions associated with producing electricity at the generating facility do not include emissions associated with transportation, fuel extraction or other life-cycle emissions associated with obtaining the fuel for the facility.

(2) Notwithstanding subsection (1) of this section, the emissions standard does not apply to greenhouse gas emissions produced by a generating facility owned by an electric company or electricity service supplier or contracted through a long-term financial commitment if the emissions:

(a) Come from a facility powered exclusively by renewable energy sources described in ORS 469A.025;

(b) Come from a cogeneration facility in this state that is fueled by natural gas, synthetic gas, distillate fuels, waste gas or a combination of these fuels, and that is producing energy, in service for tax purposes, commercially operable, or in rates as of July 1, 2010, until the facility is subject to a new long-term financial commitment; or

(c) Come from a generating facility that has in place a plan, as determined by the Public Utility Commission, to be a low-carbon emissions resource, pursuant to sufficient technical documentation, within seven years of commencing plant operations.

(3) Notwithstanding ORS 757.524 and subsection (1) of this section, the commission may exempt a long-term financial commitment by an electric company or an electricity service supplier from the greenhouse gas emissions standard if the commission finds that the commitment is a necessary and prudent response to:

(a) Unanticipated electricity system reliability needs; or

(b) Catastrophic events or threat of significant financial harm that may arise from unforeseen circumstances.

(4) Notwithstanding subsection (1) of this section, an electric company may enter into a long-term financial commitment that does not meet the emissions standard established under ORS 757.524 if the electric company does not seek recovery of the costs in retail sales in this state.

(5) The commission by rule shall establish:

(a) Standards for identifying contracts for electricity for which the emissions cannot readily be determined with any specificity; and

(b) Emissions to be attributed to such contracts for purposes of determining compliance with the emissions standard established under ORS 757.524. [2009 c.751 §4]

**Note:** See note under 757.522.

**757.533 Emissions standard-based restrictions on long-term financial commitments by consumer-owned utilities; rules.** (1)(a) A governing board of a consumer-owned utility may not enter into a long-term financial commitment unless the baseload electricity acquired under the commitment is produced by a generating facility that complies with a greenhouse gas emissions standard established under ORS 757.528.

(b) A generating facility complies with the greenhouse gas emissions standard established under ORS 757.528 if the rate of emissions of the facility does not exceed the emissions standard.

(c) In determining whether a generating facility complies with the emissions standard, the total emissions associated with producing baseload electricity at the generating facility shall be included in determining the rate of emissions of greenhouse gases. The total emissions associated with producing electricity at the generating facility do not include emissions associated with transportation, fuel extraction or other life-cycle emissions associated with obtaining the fuel for the facility.

(2) Notwithstanding subsection (1) of this section, the emissions standard does not apply to greenhouse gas emissions produced by a generating facility owned by a consumer-owned utility or contracted through a long-term financial commitment if the emissions:

(a) Come from a facility powered exclusively by renewable energy sources described in ORS 469A.025;

(b) Come from a cogeneration facility in this state that is fueled by natural gas, synthetic gas, distillate fuels, waste gas or a combination of these fuels, and that is producing energy, in service for tax purposes, commercially operable, or in rates as of July 1, 2010, until the facility is subject to a new long-term financial commitment; or

(c) Come from a generating facility that has in place a plan to be a low-carbon emission resource, as determined by the State Department of Energy, pursuant to sufficient technical documentation, within seven years of commencing plant operations.

(3) The governing board may provide an exemption for an individual generating facility from the emissions performance standard to address:

(a) Unanticipated electricity system reliability needs;

(b) Catastrophic events or threat of significant financial harm that may arise from unforeseen circumstances; or

(c) Long-term financial commitments between members of a joint operating entity recognized under federal law or the joint operating entity's predecessor organization, or with the joint operating entity for a baseload resource that the consumer-owned utility had an ownership interest in prior to July 1, 2010.

(4) A governing board shall report to the consumer-owned utility's customers or members and to the State Department of Energy information on any case-by-case exemption from the emissions performance standard granted by the governing board.

(5) For purposes of ORS 757.522 to 757.536, a long-term financial commitment for a consumer-owned utility does not include agreements to purchase electricity from the Bonneville Power Administration.

(6) The department by rule shall establish:

(a) Standards for identifying contracts for electricity for which the emissions cannot readily be determined with any specificity; and

(b) Emissions to be attributed to such contracts for purposes of determining compliance with the emissions standard established under ORS 757.528. [2009 c.751 §5]

**Note:** See note under 757.522.

**757.535** [Repealed by 1971 c.655 §250]

**757.536 Public Utility Commission review of plans and rates to ensure compliance with greenhouse gas emissions standard; rules.** (1)(a) The Public Utility Commission may not acknowledge in an integrated resource plan, or allow in customer rates, the costs of a long-term financial commitment by an electric company or by an electricity service supplier unless the baseload electricity proposed to be acquired under the commitment is produced by a generating facility that complies with the greenhouse gas emissions standard established under ORS 757.524.

(b) The commission shall revoke the certification under ORS 757.649 of an electricity service supplier entering into a long-term financial commitment to serve customers in this state if baseload electricity acquired under the commitment is produced by a generating facility that does not comply with the

greenhouse gas emissions performance standard established under ORS 757.524.

(2) Pursuant to ORS 756.040, the commission shall adopt rules for the implementation of this section.

(3) Within 90 days of application by an electric company or electricity service supplier, the commission shall determine whether the electric company's or electricity service supplier's proposal to enter into a long-term financial commitment complies with the greenhouse gas emissions standard established under ORS 757.524. The commission may not decide in a proceeding under this subsection issues involving the actual costs to construct and operate the selected resource, cost recovery or other issues reserved by the commission for decision in a general rate case or other proceeding for recovery of the resource or contract costs. [2009 c.751 §6]

**Note:** See note under 757.522.

**757.538 Rules.** The Public Utility Commission and the State Department of Energy shall adopt rules as necessary to implement ORS 757.522 to 757.536. [2009 c.751 §8]

**Note:** See note under 757.522.

### VOLUNTARY EMISSION REDUCTION PROGRAM

**757.539 Eligibility criteria; contents of application; project proposal processes; recovery of costs; rate cap; report to Legislative Assembly.** (1) As used in this section, "emission" means any anthropogenic gas, such as carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons and sulfur hexafluoride.

(2) The Public Utility Commission shall establish a voluntary emission reduction program for the purposes of incentivizing public utilities that furnish natural gas to invest in projects that reduce emissions and providing benefits to customers of public utilities that furnish natural gas.

(3) As part of the emission reduction program, the commission shall establish eligibility criteria for projects. The eligibility criteria must include:

(a) That the public utility requesting the project be a public utility that furnishes natural gas and that the project involve the provision of natural gas;

(b) That the project directly or indirectly reduce emissions;

(c) That the project benefit customers of the public utility as identified by the commission by rule or order;

(d) That the public utility, without the emission reduction program, would not in-

vest in the project in the ordinary course of business;

(e) That the public utility, prior to filing an application under subsection (4) of this section, involve stakeholders as required by the commission by rule or order; and

(f) That the rate impact of the aggregate of all projects undertaken by a public utility under this section not exceed an amount established by the commission by rule or order.

(4) For each project that a public utility proposes under this section, the public utility must file with the commission an application. An application filed under this subsection must include:

(a) A description of the project;

(b) The projected amount of capital and operating costs necessary to complete and operate the project;

(c) The projected amount of reduced emissions created by the project;

(d) The potential of the project to reduce emissions not identified in paragraph (c) of this subsection;

(e) The projected date on which the project will become operational;

(f) A requested method, as described in subsection (8) of this section, for recovery of costs incurred and investments made and for the receipt of additional incentives;

(g) An explanation of why the public utility, without the emission reduction program, would not invest in the project in the ordinary course of business;

(h) Proof of stakeholder involvement;

(i) The projected rate impact of the project;

(j) The projected aggregate rate impact of all projects proposed by the public utility under this section and approved by the commission for the public utility under this section;

(k) An explanation of how the public utility will provide the commission with progress updates during the life of the project, including updates on costs and reduced emissions associated with the project; and

(L) Any other information required by the commission by rule or order.

(5)(a) The commission shall establish a two-tiered process for submitting a project proposal under the emission reduction program. For the purpose of establishing the tiers, the commission shall:

(A) Establish a threshold for overall project cost; and

(B) Establish a threshold for overall project cost per metric ton of reduced emissions.

(b) If a proposed project meets both the threshold described in paragraph (a)(A) of this subsection and the threshold described in paragraph (a)(B) of this subsection, the project is a tier one project subject to the requirements of subsection (6) of this section. If a proposed project does not meet the threshold described in paragraph (a)(A) of this subsection or the threshold described in paragraph (a)(B) of this subsection, the project is a tier two project subject to the requirements of subsection (7) of this section.

(6) For tier one projects, the commission shall:

(a) Provide interested parties with an opportunity to submit written comment in response to the proposed project;

(b) Hold a public hearing to address all submitted written comments; and

(c) Issue a final order on the proposed project within 90 days of receiving the application for the project, or at a later time as authorized by the public utility.

(7) For tier two projects, the commission shall:

(a) By rule or order, provide interested parties with an opportunity to submit testimony in response to the proposed project and be heard; and

(b) Issue a final order on the proposed project within 180 days of receiving the application for the project, or at a later time as authorized by the public utility.

(8) If a final order issued under subsection (6)(c) or (7)(b) of this section authorizes a project, the order shall specify:

(a) The type of ratepayer from whom the public utility that submitted the project proposal may recover costs incurred and investments made and receive any allowed additional incentives. A public utility may recover costs incurred and investments made and receive any allowed additional incentives from a type of ratepayer under this paragraph only if the commission makes a finding that the type of ratepayer receives a benefit from the project. If the commission makes a finding that more than one type of ratepayer receives a benefit from the project, the commission shall allow recovery of costs incurred and investments made and receipt of any allowed additional incentives from each type of ratepayer in an amount that is proportionate to the proportion of the benefit received, as determined by the commission, by the type of ratepayer.

(b) The method by which the public utility that submitted the project proposal may recover costs incurred and investments made and receive any allowed additional incentives, and the amount that the public utility

may recover and receive. Methods of recovery and receipt include:

(A) Payment per unit of reduced emissions;

(B) Preapproval for inclusion in the public utility's rates of costs prudently incurred and of investments prudently made;

(C) Return of investment and return on investment; and

(D) Any other method approved by the commission by rule or order.

(9) For purposes related to the emission reduction program established under this section, the commission may consider the amount of reduced emissions created by a project or the value of reduced emissions created by a project.

(10) The commission shall establish a rate cap for each public utility for which a project is authorized under this section. The rate cap must limit the cost of all of the public utility's projects authorized under this section to an amount that does not exceed a percentage of the public utility's revenue requirement as identified by the commission by rule or order.

(11) The commission shall biennially conduct a study on whether federal law or regulation or other state laws or rules provide adequate incentives for public utilities that furnish natural gas to invest in projects that reduce emissions in the ordinary course of business. The commission shall report the results of a study conducted under this subsection, and may make recommendations for legislation, to the Legislative Assembly in the manner described in ORS 192.245 not later than February 1 of each odd-numbered year. (3) ORS 757.600 to 757.691 do not apply to an electric company providing electricity services to fewer than 25,000 consumers in this state unless the electric company offers direct access to any of its retail electricity consumers in this state or offers to sell electricity services available under direct access to more than one retail electricity consumer of another electric utility. [1999 c.865 §2; 2001 c.819 §1; 2003 c.14 §454]

**Note:** 757.601 was added to and made a part of ORS chapter 757 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**757.603 Electric company required to provide cost-of-service rate option to all retail electricity consumers; waiver; portfolio of rate options for residential consumers.** (1) Except as provided in this section, an electric company shall provide all retail electricity consumers that are connected to the electric company’s distribution system with a regulated, cost-of-service rate option.

(2)(a) The Public Utility Commission by order may waive the requirement in subsection (1) of this section for any retail electricity consumer other than residential electricity consumers and small commercial electricity consumers.

(b) Prior to ordering a waiver under this subsection, the commission may conduct

such studies as the commission deems necessary and shall provide notice and opportunity for public comment and hearings regarding the proposed waiver.

(c) The commission may order a waiver under this subsection if the commission finds, based on the evidentiary record developed through the conducted studies, public comment and hearings, that a market exists in which retail electricity consumers subject to the waiver are able to:

(A) Purchase supplies of electricity adequate to meet the needs of the retail electricity consumers;

(B) Obtain multiple offers for electricity supplies within a reasonable period of time;

(C) Obtain reliable supplies of electricity; and

(D) Purchase electricity at prices that are not unduly volatile and that are just and reasonable.

(3) Each electric company shall provide each retail electricity consumer that is connected to its distribution system and whose electricity demand at any point of delivery is less than 30 kilowatts a portfolio of rate options. The portfolio of rate options shall include at least the following options:

(a) A rate that reflects significant new renewable energy resources;

(b) A market-based rate; and

(c) If the commission finds, through public comment and hearing or through market research conducted by the electric company, that demand is sufficient to justify the rate, a rate option for electricity associated with a specific renewable energy resource, including solar photovoltaic energy.

(4) The commission shall regulate the cost-of-service rate option under subsection (1) of this section and the portfolio of rate options under this section. The commission:

(a) Shall reasonably ensure that the costs, risks and benefits of serving each option are reflected in the rates for each option, and such rates may include a monthly flat rate or charge in addition to usage.

(b) May prohibit or otherwise limit the use of a cost-of-service rate by retail electricity consumers who have been served through direct access.

(c) May limit switching among the portfolio of rate options and the cost-of-service rate.

(5)(a) As used in this subsection, “government” means a city, county, irrigation district, ditch improvement district, water control district, or government of a federally recognized Indian tribe in Oregon.

(b) An electric company may file, as part of a portfolio of rate options required under this section and if agreed to in coordination with one or more governments to meet adopted renewable and nonemitting energy goals, a program of rates or charges that reflect the cost of an electric company program to serve retail electricity consumers within the boundaries of those governments with electricity:

(A) Derived from new or existing renewable energy resources or nonemitting energy resources, including supply and demand-side resources; or

(B) Paired with unbundled renewable energy certificates, as defined in ORS 469A.005, from new or existing renewable energy resources.

(c) The commission may approve a rate or charge under this subsection if:

(A) The government attests that the coordination required under paragraph (b) of this subsection occurred and the electric company includes the attestation in the filing for a program of rates or charges;

(B) The government enacts or adopts an ordinance, charter provision, resolution or other regulation requiring that retail electricity consumers within the boundaries of the government must, as determined during the coordination required by paragraph (b) of this subsection and conducted in accordance with this paragraph, be served with renewable energy resources or nonemitting energy resources, including at the option of the government, resources such as:

(i) Energy from community-based resources, including solar photovoltaic, storage, microgrids, irrigation district-owned projects, in-pipe hydroelectric, or microhydroelectric, that provide community cobenefits, such as:

(I) Community stability;

(II) Community reinvestment;

(III) Ownership by a nonprofit organization or renewable energy cooperative that represents an environmental justice community;

(IV) Ownership by the government;

(V) Disaster resiliency;

(VI) Water savings;

(VII) Species protection;

(VIII) Direct cost savings to customers;

or

(IX) Local economic development and jobs; and

(ii) Renewable and nonemitting energy resources acquired through government

specified procurement criteria which may include goals for local or diverse ownership;

(C) The ordinance, charter provision, resolution or other regulation specifies that:

(i) All eligible retail electricity consumers served within the boundaries of the government are placed on the rate schedule by the electric company, upon commission approval, but have an opportunity to decline to be served by the rate option; and

(ii) Retail electricity consumers within the boundaries of the government that are connected to the distribution system and whose electricity demand at any point of delivery is greater than 30 kilowatts may choose to be placed on the rate schedule, if the electric company determines that electricity demand at the consumer's point of delivery is greater than 30 kilowatts because of additional demand resulting from electrification of transportation or other services, including electric vehicle charging stations, after September 25, 2021;

(D) The ordinance, charter provision, resolution or other regulation includes protections, such as subsidies or bill payment assistance, for low-income retail electricity consumers affected by the rates or charges and provides that these protections are paid for solely by retail electricity consumers within the boundaries of the government;

(E) The electric company has included in the program provisions to minimize the shifting of costs from retail electricity consumers to other customers who do not participate;

(F) The ordinance, charter provision, resolution or other regulation sets forth the duration of the program; and

(G) The electric company utilizes commission-approved procurement processes, to the extent those processes apply, and the procurement criteria agreed to with the government in subparagraph (B)(ii) of this paragraph.

(d) After the electric company receives approval to serve retail electricity consumers within the boundaries of the government according to the program of rates or charges adopted pursuant to this subsection, the electric company must:

(A) Prior to commencing the program, receive acknowledgement from the government to proceed with the program as approved by the commission and, if the government declines to proceed, shall file to suspend the rates and charges under the program;

(B) Include information on its monthly bills to participating retail electricity consumers identifying the program's cost;

(C) Provide notice to participating retail electricity consumers of any change in rate for participation in the program; and

(D) Provide an annual report to the commission and participating governments summarizing the program activities in the prior calendar year.

(e) The commission shall allow the electric company, for purposes of the new or existing renewable energy resources or nonemitting energy resources that serve the program of rates or charges adopted pursuant to this subsection:

(A) To own the facilities or use power purchase agreements.

(B) To recover part or all of the costs associated with the resources that serve the program, including costs associated with resources described in subparagraph (A) of this paragraph, from all retail electricity consumers not served by an electricity service supplier, if:

(i) The electric company can demonstrate that above-market or incremental costs of those resources have been paid for by program participants;

(ii) An integrated resource plan conducted by the electric company shows an energy or capacity need and the company demonstrates that such resources are capable of meeting that need, in whole or in part;

(iii) The electric company will use the resources to meet a renewable portfolio standard imposed by ORS 469A.052;

(iv) The resources help the electric company comply with ORS 469A.410; or

(v) All customers will otherwise benefit from inclusion of the costs in rates collected from all customers.

(C) To collect moneys from participating retail electricity consumers in excess of the cost of service and defer revenues or costs associated with the program for the purposes of making future investments in resources or renewable energy certificates to serve program participants and for the purposes of protecting nonparticipating retail electricity consumers should the government end its participation in the program.

(D) To recover the costs associated with the resources that serve the program, including costs associated with resources described in subparagraph (A) of this paragraph, from retail electricity consumers within the boundaries of the government other than those served by electricity service suppliers, if the government ends its participation in the program and the costs are not otherwise recoverable under subparagraph (B) of this paragraph.

(6) Nothing in subsection (3) of this section prohibits an electric company from providing retail electricity consumers that are connected to its distribution system and whose electricity demand at any point of delivery is greater than 30 kilowatts a portfolio of rate options.

(7) Notwithstanding the exemption to ORS 757.600 to 757.691 provided by ORS 757.601 (3), an electric company serving fewer than 25,000 customers in this state may propose a program for approval by the commission if the program meets the criteria specified in this section. [1999 c.865 §4; 2001 c.819 §2; 2015 c.556 §1; 2021 c.508 §20]

**757.605** [1961 c.691 §2; 1971 c.655 §97; renumbered 758.400]

**757.606** [Formerly 758.040; renumbered 165.475]

**757.607 Direct access conditions; cost recovery.** The Public Utility Commission shall ensure that direct access programs offered by electric companies meet the following conditions:

(1) The provision of direct access to some retail electricity consumers must not cause the unwarranted shifting of costs to other retail electricity consumers of the electric company. The commission may, in establishing any rates and charges under ORS 757.600 to 757.667, consider and mitigate the rate impact on consumers from the reduction or elimination of subsidies in existing rate structures.

(2) The direct access, portfolio of rate options and cost-of-service rates may include transition charges or transition credits that reasonably balance the interests of retail electricity consumers and utility investors. The commission may determine that full or partial recovery of the costs of uneconomic utility investments, or full or partial pass-through of the benefits of economic utility investments to retail electricity consumers, is in the public interest.

(3) The commission shall allow recovery, through a transition charge, of any otherwise unrecoverable costs arising from or related to an electric company's contractual or other legal obligations to the Bonneville Power Administration under ORS 757.663, or arising from or related to a failure of the Bonneville Power Administration to meet its contractual or other legal obligations to the electric company, from those classes of consumers for which electric power was purchased from the Bonneville Power Administration.

(4) Notwithstanding ORS 757.355, the commission may allow a return on the unamortized balance of an uneconomic utility investment or an economic utility investment that is included in rates. [1999 c.865 §8]

**757.609 Date for announcing prices for electricity in subsequent calendar year; estimated prices.** (1) The Public Utility Commission shall set a date on which all electric companies must announce prices that will be charged for electricity by the companies in the subsequent calendar year. Retail electricity consumers who are eligible for direct access must be allowed at least three business days after the date set by the commission to elect whether to use direct access or to purchase electricity from an electric company.

(2) All electricity service suppliers and electric companies must announce estimated prices that will be charged for electricity by the suppliers and companies in the subsequent calendar year or contract period at least five days before the date set by the commission under subsection (1) of this section. [2003 c.478 §2]

**Note:** 757.609 was added to and made a part of 757.600 to 757.687 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**757.610** [1961 c.691 §18; renumbered 758.405]

**757.611** [Formerly 758.050; renumbered 165.480]

**757.612 Requirements for public purpose expenditures; rules.** (1)(a) There is established an annual public purpose expenditure standard for electric companies and Oregon Community Power to fund:

(A) The above-market costs of new renewable energy resources and customer investments in distribution system-connected technologies that support reliability, resilience and the integration of renewable energy resources with the distribution systems of electric companies and Oregon Community Power;

(B) New low-income weatherization;

(C) New energy-related investments in schools; and

(D) Low-income housing.

(b) The public purpose expenditure standard shall be funded by the public purpose charge described in subsection (2) of this section.

(2)(a) Until January 1, 2036, an electric company or Oregon Community Power shall collect a nonbypassable public purpose charge equal to 1.5 percent of the revenues described in paragraph (b) of this subsection, apportioned as further set forth in subsection (3)(b) of this section. The electric company or Oregon Community Power shall collect the public purpose charge from all of the retail electricity consumers located within the electric company's or Oregon Community Power's service territory, including retail electricity consumers served by electricity service suppliers.

(b) The percentages described in paragraph (a) of this subsection and subsection (3)(b) of this section shall be calculated as percentages of the total revenues collected by the electric company, Oregon Community Power or the electricity service supplier from retail electricity consumers for electricity services, distribution services, ancillary services, metering and billing, transition charges and other types of costs included in electric rates on July 23, 1999.

(3)(a) The Public Utility Commission shall establish rules implementing the provisions of this section relating to electric companies and Oregon Community Power.

(b) The public purpose charge described in subsection (2)(a) of this section shall be the sum total of the following percentages of revenues described in subsection (2)(b) of this section, allocated for the following purposes:

(A) 0.3 percent of revenues for school districts that are located in the service territory of the electric company or Oregon Community Power, as further directed under paragraph (e) of this subsection.

(B) As further directed under paragraph (f) of this subsection, 0.51 percent of revenues for:

(i) The above-market costs of constructing and operating new renewable energy resources with a nominal electric generating capacity, as defined in ORS 469.300, of 20 megawatts or less; or

(ii) Customer investments in distribution system-connected technologies that support reliability, resilience and the integration of renewable energy resources with the distribution system of the electric company or Oregon Community Power.

(C) 0.55 percent of revenues for new low-income weatherization, as further directed under paragraph (g) of this subsection.

(D) 0.14 percent of revenues for deposit in the Housing and Community Services Department Electricity Public Purpose Charge Fund established by ORS 456.587 (1) for the purpose of providing grants as described in ORS 458.625 (2).

(c) The costs of administering subsections (1) to (5) of this section for an electric company or Oregon Community Power shall be paid out of the funds collected through public purpose charges. The commission may require an electric company or Oregon Community Power to direct funds collected through public purpose charges to state agencies responsible for implementing subsections (1) to (5) of this section in order to pay the costs of administering subsections (1) to (5) of this section.

(d) The commission shall direct the manner in which public purpose charges are collected and spent by an electric company or Oregon Community Power and may require an electric company or Oregon Community Power to expend funds through competitive bids or other means designed to encourage competition, except that funds dedicated for new low-income weatherization shall be directed to the Housing and Community Services Department for purposes related to new low-income weatherization, as further directed in paragraph (g) of this subsection. The commission may also require funds collected through public purpose charges to be paid to a nongovernmental entity for investment in public purposes described in subsection (1) of this section.

(e)(A) Funds allocated under subsection (3)(b)(A) of this section shall be distributed to individual school districts according to the weighted average daily membership (ADMw) of each school district for the prior fiscal year as calculated under ORS 327.013. The commission shall establish by rule a methodology for distributing a proportionate share of funds under this paragraph to school districts that are only partially located in the service territory of the electric company or Oregon Community Power.

(B) A school district that receives funds under this paragraph shall use the funds first to pay for energy audits for schools located within the school district or for a fleet audit for the school district. To the extent practicable, a school district shall coordinate with the State Department of Energy and incorporate federal funding in complying with this paragraph. Following completion of an audit, the school district may expend funds received under this paragraph to implement the audit.

(C) Once an energy audit has been conducted and completely implemented for each school within the school district, the school district may expend funds received under this paragraph for any of the following purposes:

(i) Conducting additional energy audits. A school district shall conduct an energy audit prior to expending funds on any other purpose authorized under this paragraph unless the school district has performed an energy audit within the three years immediately prior to receiving the funds.

(ii) Weatherizing school district facilities and upgrading the energy efficiency of school district facilities.

(iii) Energy conservation education programs.

(iv) Purchasing electricity from environmentally focused sources.

(v) Investing in renewable energy resources.

(D) Once a fleet audit has been conducted for the school district, the school district may expend funds received under this paragraph for any of the following purposes:

(i) Purchasing or leasing zero-emission vehicles, as defined in ORS 283.398, including buses.

(ii) Purchasing or installing electric vehicle charging stations to provide electricity to zero-emission vehicles.

(f) Of the funds allocated under subsection (3)(b)(B) of this section, 25 percent must be used for activities, resources and technologies that serve low and moderate income customers, including for technologies that do not have above-market costs.

(g)(A) Funds collected by an electric company or Oregon Community Power, allocated for new low-income weatherization under subsection (3)(b)(C) of this section and directed to the Housing and Community Services Department shall be spent within the service territory of the electric company or Oregon Community Power from which the funds are collected.

(B) As further determined by the Housing and Community Services Department, a portion of the funds described in this paragraph may be used for manufactured housing replacements as a means to deliver energy efficiency, pursuant to a program dedicated to manufactured housing replacement.

(C) For purposes of this paragraph and as further determined by the Housing and Community Services Department, purposes related to new low-income weatherization includes providing funding for participants in programs by low-income weatherization service providers to change energy sources from bulk fuels to electricity service.

(h) The commission may not establish a different public purpose charge than the public purpose charge described in subsection (2) of this section.

(4)(a) A retail electricity consumer that uses more than one average megawatt of electricity at any site in the prior year shall receive a credit against public purpose charges billed by an electric company or Oregon Community Power for that site. The amount of the credit shall be equal to the total amount of qualifying expenditures for the above-market costs of new renewable energy resources and investments in distribution system-connected technologies incurred by the retail electricity consumer, not to exceed 25.5 percent of the annual public purpose charges, less administration costs incurred under this paragraph and paragraphs (b) and (c) of this subsection. The credit may not exceed, on an annual basis, the lesser of:

(A) The amount of the retail electricity consumer's qualifying expenditures; or

(B) The portion of the public purpose charge billed to the retail electricity consumer that is dedicated to the above-market costs of new renewable energy resources and investments in distribution system-connected technologies.

(b) To obtain a credit under paragraph (a) of this subsection, a retail electricity consumer shall file with the State Department of Energy a description of the proposed new renewable energy resource or investment in distribution system-connected technology and a declaration that the retail electricity consumer plans to incur the qualifying expenditure. The State Department of Energy shall issue a notice of precertification within 30 days of receipt of the filing, if such filing is consistent with paragraph (a) of this subsection. The credit may be taken after a retail electricity consumer provides a letter from a certified public accountant to the State Department of Energy verifying that the precertified qualifying expenditure has been made.

(c) Credits earned by a retail electricity consumer as a result of qualifying expenditures that are not used in one year may be carried forward for use in subsequent years.

(5) Electric utilities and retail electricity consumers shall receive a fair and reasonable credit for the public purpose expenditures of their energy suppliers. The State Department of Energy shall adopt rules to determine eligible expenditures and the method by which such credits are accounted for and used. The State Department of Energy also shall adopt methods to account for eligible public purpose expenditures made through consortia or collaborative projects.

(6) For purposes of this section, "retail electricity consumers" includes any direct service industrial consumer that purchases electricity without purchasing distribution services from the electric utility.

(7) For purposes of this section, funds collected by Oregon Community Power through public purpose charges are not considered moneys received from electric utility operations. [1999 c.865 §3; 2001 c.134 §9; 2001 c.819 §3; 2005 c.22 §506; 2007 c.217 §9; 2007 c.301 §27; 2007 c.807 §43a; 2007 c.837 §2a; 2009 c.813 §1; 2011 c.467 §10; 2011 c.566 §2; 2015 c.180 §50; 2017 c.200 §1; 2019 c.565 §7; 2021 c.536 §5; 2021 c.547 §1]

**757.613 Whole building assessment; investment in energy efficiency.** (1) If an electric company invests moneys collected under ORS 757.054 on new cost-effective local energy conservation, or if the nongovernmental entity described in ORS 757.746 invests moneys paid to the nongovernmental entity under ORS 757.054 on new cost-

effective local energy conservation, and if the investment involves updating the energy efficiency of a residential or nonresidential building, the electric company, Oregon Community Power or the nongovernmental entity may make those investments by conducting a whole building assessment of the energy efficiency of the building and, in consideration of the whole building assessment, by maximizing the overall energy efficiency of the building. For purposes of this subsection, a "whole building assessment" means a single assessment of savings opportunities, as identified by the Public Utility Commission by rule or order.

(2) An investment described in subsection (1) of this section must be limited to an investment in a single project, as authorized by the commission by rule or order. [2013 c.383 §1; 2021 c.547 §5]

**Note:** 757.613 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

The policies shall be designed to mitigate the vertical and horizontal market power of incumbent electric companies and prohibit preferential treatment, or the appearance of such treatment, by the incumbent electric companies toward generation or market affiliates. The commission may require an electric company acting as an electricity service supplier do so through an affiliate.

(2) The commission shall establish by rule a code of conduct for electric companies and their affiliates to protect against market abuses and anticompetitive practices. The code shall, at a minimum:

(a) Require an electric company and any affiliate that shares the same name and logo to disclose to all consumers the relationship between the company and affiliate and to clarify that the affiliate is not the same as the electric company and that in order to receive service from the company a con-

(2) Every electric utility shall maintain the integrity of its transmission facilities and distribution system and provide safe, reliable service to all retail electricity consumers. Nothing in ORS 757.600 to 757.667 or 757.669 to 757.687 shall reduce or diminish the statutory or contractual obligations of electric utilities to maintain the safety and reliability of their transmission facilities and distribution system and other infrastructure and equipment used to deliver electricity.

(3) The commission for electric companies, or the governing body for other electric utilities, shall adopt rules, ordinances, policies and service quality standards designed to maintain a reliable, safe and efficient distribution system. The commission shall regulate electrical safety regarding generation, transmission, substation and distribution facilities for electric utilities and other electrical system owners and operators as provided under ORS 757.035.

(4) Every bill to a direct access retail electricity consumer from an electricity service supplier shall contain at least:

If a retail electricity consumer of an electric company does not request separate bills, or a consolidated bill from an electricity service supplier as provided in paragraph (c) of this subsection, the electric company shall consolidate the bills for all electricity services into a single statement, and electricity service suppliers shall provide to the electric company the information necessary to prepare a consolidated statement.

(b) The requirement for bill consolidation by an electric company shall continue through December 31, 2001, after which time the commission may waive the requirement if the waiver results in effective billing procedures for retail electricity consumers.

(c) Upon the request of a retail electricity consumer of an electric company, an electricity service supplier shall consolidate the bills for all electricity services into a single statement, and electric utilities and other electricity service suppliers shall provide to the billing electricity service supplier any information necessary to prepare a consolidated statement.

(d) For retail electricity consumers of an electric company, the commission shall adopt by rule provisions relating to the failure of a consumer to make full payment on a consolidated bill. The rules shall address collection of payments, service disconnection and reconnection, and the allocation of costs associated with collection, disconnection and reconnection. A distribution utility shall be solely responsible for actual disconnection and reconnection. [1999 c.865 §14; 2021 c.508 §25]

(6) The method of determining a default supplier for those consumers who are not eligible to participate in a portfolio program under ORS 757.603 in a manner that provides for viable competition among electricity service suppliers and among power generation companies. The commission may condition the use of a default service option by requiring reasonable notice and commitment from a consumer who intends to use the default service option in nonemergency situations.

(7) Requirements for market structure described in ORS 757.646.

(8) Requirements for public purpose charges and credits under ORS 757.612.

(b) Any party to the arbitration may challenge the selection of an arbitrator by direct petition to the commission. The commission's review of the selection shall be limited to allegations of bias and lack of qualifications. The commission shall hold a hearing within 10 days after the filing of a petition, and the commission shall issue a final decision within 10 days after the hearing. (6) The commission shall enforce an arbitration decision made pursuant to this section, unless any party to the arbitration files

written exceptions with the commission for any of the following causes:

(a) The decision was procured by corruption, fraud or undue means;

**Note:** 757.660 was added to and made a part of 757.600 to 757.687 by legislative action but was not added to any smaller series therein. See Preface to Oregon Revised Statutes for further explanation.

**757.661 Commission authority to require filing.** The Public Utility Commission may require an electric company to make any filings under this chapter that the commission determines necessary to implement ORS 757.600 to 757.667. [1999 c.865 §20]

**757.663 Commission authority to require electric company to enter into contracts with Bonneville Power Administration.** In order to preserve the benefits of federal low-cost power for residential and small-farm consumers of electric utilities, the Public Utility Commission may require an electric company to enter into contracts with the Bonneville Power Administration for the purpose of securing such benefits. The contracts shall be subject to approval by the commission. In reviewing a contract, the commission, at a minimum, shall consider:

(1) The short-term expected cost of electric power from the Bonneville Power Administration compared to market-priced alternatives;

(2) The long-term benefit of retaining the rights to purchase electric power from the Bonneville Power Administration at cost, compared to market-priced alternatives; and

(3) Other factors deemed relevant by the commission. [1999 c.865 §19]

ORS 757.603 to 757.667 shall not apply to a consumer-owned utility.

(2) Notwithstanding subsection (1) of this section, a consumer-owned utility that sells electricity, either directly or through a related party, to a nonresidential electricity consumer of another electric utility in this

state, shall permit any other electricity service supplier to sell electricity to the consumer-owned utility's nonresidential electricity consumers whose electricity use, measured in average megawatts per year, is equal to or greater than the use of the nonresidential electricity consumer of the other electric utility. Such consumer-owned utility shall be subject to ORS 757.649 (1) to (4) and rules adopted thereunder. [1999 c.865 §23]

**757.675** [1961 c.691 §12; 1971 c.655 §99; renumbered 758.465]

**757.676 Consumer-owned utility authorized to offer direct, portfolio or other forms of access to electricity services.** The governing body of a consumer-owned utility is authorized to determine whether and under what terms and conditions it will offer its retail electricity consumers direct access, portfolio access or other forms of access to electric service suppliers. In making such determination, the governing body of a consumer-owned utility shall consider such factors as it deems appropriate. A consumer-owned utility shall have sole authority to determine:

(1) The quality and nature of electric service, including but not limited to different product and pricing options, which shall be made available to its retail electricity consumers.

(2) The extent to which products and services will be unbundled and the rates, tariffs, terms and conditions on which they may be offered.

(5) Whether and on what basis a transition charge will be adopted, assessed and collected from a retail electricity consumer located within the utility's service territory, including but not limited to a nonbypassable distribution charge, the amount and period of recovery for the charges, the allocation of the charges among retail electricity consumers located within the utility's service territory and the method of collecting such charges including but not limited to whether to impose a nonbypassable distribution charge.

(6) The manner of collecting stranded distribution charges, systems benefit charges, franchise fees, taxes and payments made in lieu of taxes from retail electricity consum-

ers located within the utility's service territory for electric power transactions using transmission facilities, whether or not such transactions use distribution facilities. The governing body may assign charges on the basis of usage, demand or any combination or method it finds appropriate. Charges need not be assigned to specific facilities.

(7) The collection from retail electricity consumers located within the utility's service territory through rates, fees or charges, including the imposition of a nonbypassable distribution charge, in amounts sufficient to recover 100 percent of stranded costs imposed by, or incurred pursuant to the purchase of cost-based electric power from, the Bonneville Power Administration. Such stranded cost charges may include the difference in cost associated with purchasing electric power from the Bonneville Power Administration and the cost of purchasing a like and similar amount of electric power at market prices.

(8) The establishment of technical capability requirements, financial responsibility requirements and other protections for retail electricity consumers located within the utility's service territory and the consumer-owned utility in dealings with electric service suppliers.

(9) Access to or use of the utility's transmission facilities or distribution system by retail electricity consumers or electric service suppliers.

(10) The utility's qualification standards for energy service suppliers in addition to any certification standards established by the Public Utility Commission, provided that the qualification standards are uniformly applied to electricity service providers in a nondiscriminatory manner. [1999 c.865 §24; 2003 c.186 §80]

**757.679 Net billing agreements.** (1) Nothing in ORS 757.669 to 757.687 is intended to impair the rights or obligations of any party to net billing agreements. Notwithstanding any other provision of ORS 757.600 to 757.667, 757.676 and 757.687, and in the event a participating utility is required to make payments pursuant to a net billing agreement, the governing body of a participating utility may levy a rate, fee or charge, including a nonbypassable distribution system access charge against retail electricity consumers located within the utility's service territory, to meet its obligations.

(2) As used in this section:

(A) Between the administrator of the Bonneville Power Administration and EWEB;

(B) Among a participating utility, the administrator of the Bonneville Power Administration and EWEB; or

(C) Among a participating utility, the administrator of the Bonneville Power Administration and the supply system.

(c) "Participating utility" means a consumer-owned utility established by, or organized and existing under, the Oregon Constitution and laws of the State of Oregon, and that is a party to a net billing agreement.

**757.680** [1961 c.691 §15; renumbered 758.470]

**757.683 Consumer-owned utility's distribution rights and control over distribution system.** Notwithstanding the provisions of ORS 757.600 to 757.667, a consumer-owned utility shall have exclusive distribution rights, to the extent such rights are provided by law, and exclusive responsibility for the performance and oversight of its distribution system including the acquisition, construction, financing, operation and maintenance of distribution facilities and metering, billing, collection and consumer response functions relating to the distribution of electricity to retail electricity consumers located within the utility's service territory. Nothing in this section shall diminish or enlarge the rights of any person under ORS 758.400 to 758.475. [1999 c.865 §26]

**757.687 Consumer-owned utility offering direct access; public purpose charge; bill assistance program.** (1) Beginning on the date a consumer-owned utility provides direct access to any class of retail electric consumers, the consumer-owned utility shall collect from that consumer class a nonbypassable public purpose charge until January 1, 2026. Except as provided in subsection (8) of this section, the amount of the public purpose charge shall be sufficient to produce revenue of not less than three percent of the total revenue collected by the consumer-owned utility from its retail electricity consumers for electricity services,

distribution, ancillary services, metering and billing, transition charges and any other costs included in rates as of July 23, 1999, except that the consumer-owned utility may exclude from the calculation of such costs any cost related to the public purposes described in subsection (5) of this section. If a consumer-owned utility has fewer than 17 consumers per mile of distribution line, the amount of the public purpose charge shall be sufficient to produce revenue not less than three percent of the total revenue from the sale of electricity services in the utility's service area to the consumer class that is provided direct access, or the utility's consumer class percentage share of state total electricity sales multiplied by three percent of total statewide retail electric revenue, whichever is less.

(2) Except as provided in subsection (9) of this section, the governing body of a consumer-owned utility shall determine the manner of collecting and expending funds for public purposes required by law to be assessed against and paid by the retail electric consumers of the utility. A determination by the governing body shall include:

(a) The manner for collecting public purpose charges;

(b) Public purpose programs upon which revenue from the charges may be expended; and

(c) The allocation of expenditures for each program.

(3) Beginning on the same date two years after July 23, 1999, a consumer-owned utility shall report annually to the State Department of Energy created under ORS 469.030 on the public purpose charges paid to the utility by its retail electric consumers and the public purposes on which the revenue was expended.

(4) A consumer-owned utility may comply with the public purpose requirements of this section by participating in collaborative efforts with other consumer-owned utilities located in this state.

(5) Funds assessed and paid by, and credits or other financial assistance issued or extended to, retail electric consumers for purposes of this section may, in the discretion of the governing body of the consumer-owned utility, be expended to fund programs for energy conservation, renewable resources or low-income energy services otherwise required by the laws of this state, adopted by the governing body pursuant to the National Energy Conservation Policy Act (Public Law 95-619, as amended November 10, 1981), or conducted by the utility pursuant to agreement with the Bonneville Power Administration under the Pacific Northwest Electric

Power Planning and Conservation Act (Public Law 96-501). All such funds expended, credits issued and incremental costs incurred in connection with the performance of a consumer-owned utility's obligations under this section shall be credited toward the utility's public purpose funding obligation under this section.

(6) A consumer-owned utility also may credit toward its funding obligations under this section any incremental costs incurred by the utility for capital expenditures made to reduce its distribution system energy losses, existing biomass gas and waste to energy systems, existing hydroelectric generation projects using fish attraction water, for new energy conservation and renewable resource funding costs included in its wholesale power supplier's charges and for electric power generated by renewable or cogeneration resources pursuant to requirements of the Public Utilities Regulatory Policy Act of 1978 (Public Law 95-617), to the extent that such costs exceed the average cost of the utility's other electric power resources.

(7) A consumer-owned utility also may credit toward its public purpose funding obligations under this section any costs incurred in complying with ORS 469.649 to 469.659.

(8) Beginning on March 1, 2002, a consumer-owned utility whose territory abuts the greatest percentage of the site of an aluminum plant that averages more than 100 megawatts of electricity use per year shall collect from the aluminum company a public purpose charge equal to one percent of the total revenue from the sale of electricity services to the aluminum plant from any source.

(9)(a) A retail electricity consumer that uses more than one average megawatt of electricity at any site in the prior year shall receive a credit against public purpose charges billed by a consumer-owned utility for that site. The amount of the credit shall be equal to the total amount of qualifying expenditures for new energy conservation, not to exceed 68 percent of the annual public purpose charges, and the above-market costs of purchases of new renewable energy resources incurred by the retail electricity consumer, less administration costs incurred under this subsection. The credit shall not exceed, on an annual basis, the lesser of:

(A) The amount of the retail electricity consumer's qualifying expenditures; or

(B) The portion of the public purpose charge billed to the retail electricity consumer that is dedicated to new energy conservation, new market transformation or the above-market costs of new renewable resources.

(b) To obtain a credit under this subsection, a retail electricity consumer shall file with the department a description of the proposed conservation project, new market transformation or new renewable energy resource and a declaration that the retail electricity consumer plans to incur the qualifying expenditure. The department shall issue a notice of precertification within 30 days of receipt of the filing, if such filing is consistent with this subsection. Notice shall be issued to the retail electricity consumer and the appropriate consumer-owned utility. The credit may be taken after a retail electricity consumer provides a letter from a certified public accountant to the department verifying that the precertified qualifying expenditure has been made.

(c) Credits earned by a retail electricity consumer as a result of qualifying expenditures that are not used in one year may be carried forward for use in subsequent years.

(d)(A) A retail electricity consumer that uses more than one average megawatt of electricity at any site in the prior year may request that the department hire an independent auditor to assess the potential for conservation measures at the site. If the independent auditor determines there is no available conservation measure at the site that would have a simple payback of one to 10 years, the retail electricity consumer shall be relieved of 54 percent of its payment obligation for public purpose charges related to the site. If the auditor determines that there are potential conservation measures available at the site, the retail electricity consumer shall be entitled to a credit against public purpose charges related to the site equal to 54 percent of the public purpose charges less the estimated cost of available conservation measures.

(B) A retail electricity consumer shall be entitled each year to the credit described in this paragraph unless a subsequent audit determines that new conservation investment opportunities are available. The department may require that a new audit be performed on the site to determine whether new conservation measures are available, provided that the audits occur no more than once every two years.

(C) The retail electricity consumer shall pay the cost of the audits described in this subsection.

(10) A retail electricity consumer with a load greater than one average megawatt shall not be required to pay a public purpose charge in excess of three percent of the consumer's total cost of electricity services unless the charge is established in an agreement between the consumer and the consumer-owned utility.

(11) Beginning on March 1, 2002, a consumer-owned utility shall have in operation a bill assistance program for households that qualify for federal low-income energy assistance in the consumer-owned utility's service area. A consumer-owned utility shall report annually to the Housing and Community Services Department detailing the utility's program and program expenditures.

(12) A consumer-owned utility may require an electricity service supplier to provide information necessary to ensure compliance with this section. The consumer-owned utility shall ensure the privacy and protection of any proprietary information provided. [1999 c.865 §27; 2001 c.819 §5; 2007 c.301 §29]

**757.689** [2007 c.301 §46; repealed by 2021 c.547 §13]

**757.690** [1961 c.691 §17; repealed by 1967 c.164 §4]

**757.691 Applicability.** Nothing in ORS 757.669 to 757.687 is intended to affect administration and enforcement of ORS 758.400 to 758.475 or to diminish or enlarge the rights of any person under ORS 758.400 to 758.475. [1999 c.865 §28]

## ELECTRICITY BILL MITIGATION AND ASSISTANCE

**757.695 Mitigation of energy burdens; costs collection.** (1) In addition to comprehensive classifications, tariff schedules, rates and bill credits, the Public Utility Commission may address the mitigation of energy burdens through bill reduction measures or programs that may include, but need not be limited to, demand response or weatherization.

(2) The costs of tariff schedules, rates, bill credits or program discounts allowed pursuant to subsection (1) of this section must be collected in the rates of an electric company through charges paid by all retail electricity consumers, such that retail electricity consumers that purchase electricity from electricity service suppliers pay the same amount to address the mitigation of energy burdens as retail electricity consumers that are not served by electricity service suppliers. [2021 c.90 §7]

**757.698 Low-income electric bill payment and crisis assistance.** (1) An electric company, as defined in ORS 757.600, or Oregon Community Power shall collect funds for low-income electric bill payment and crisis assistance in an amount determined by the Public Utility Commission. The commission shall:

(a) Establish the amount to be collected and rates to be charged by each electric company from its customers, including customers receiving electricity from other sources, such that the forecasted collection

by all electric companies in a calendar year is at least \$20 million.

(b) Adjust the rates if forecasted collections or actual collections are less than \$20 million in any calendar year but shall not otherwise adjust the rates once set.

(c) Ensure that no customer pays more than \$500 per month per customer site for low-income electric bill payment and crisis assistance.

(2) Funds collected by an electric company or Oregon Community Power under this section must be:

(a) Paid into the Housing and Community Services Department Low-Income Electric Bill Payment Assistance Fund established by ORS 456.587 (2);

(b) Used by the Housing and Community Services Department solely for purposes related to low-income electric bill payment and crisis assistance and for the Housing and Community Services Department's cost of administering this section; and

(c) Expended in the service area of the electric company or Oregon Community Power from which the funds are collected.

(3) The Housing and Community Services Department shall determine the manner in which funds collected under this section are allocated by the department to energy assistance program providers for the purpose of providing low-income electric bill payment and crisis assistance. However, the department shall:

(a) In consultation with electric companies, investigate and may implement alternative delivery models to effectively reduce service disconnections and related costs to customers and electric companies; and

(b) Direct priority assistance to low-income customers who are in danger of having their electricity service disconnected.

(4) The department shall maintain records and provide those records upon request to an electric company, Oregon Community Power and the Citizens' Utility Board established under ORS chapter 774 on a quarterly basis. Records maintained must include the numbers of low-income customers served, the average amounts paid and the type of assistance provided. Electric companies and Oregon Community Power shall, if requested, provide the department with aggregate data relating to low-income customers served on a quarterly basis to support program development.

(5) Interest on moneys deposited in the Housing and Community Services Department Low-Income Electric Bill Payment Assistance Fund established by ORS 456.587 (2)

may be used to provide bill payment and crisis assistance to customers whose primary source of heat is not electricity.

(6) Notwithstanding ORS 757.310, the commission may allow an electric company or Oregon Community Power to provide reduced rates or other bill payment or crisis assistance or low-income program assistance to a low-income household eligible for assistance under the federal Low Income Home Energy Assistance Act of 1981, as amended and in effect on July 23, 1999. [2021 c.536 §2 and 2021 c.547 §15 as amended by 2021 c.536 §2a]

### **EMERGENCY CURTAILMENT OF ELECTRICITY OR NATURAL OR MANUFACTURED GAS**

**757.710 Emergency curtailment plan required; credits for weatherization or alternate energy devices.** (1) Any person, as defined in ORS 758.400, engaged in the sale or resale of electricity or natural or synthetic gas in this state shall present for approval by the Public Utility Commission a plan for curtailment of electrical or gas load in the event of any predictable circumstance that may jeopardize prolonged continuity of service. Utility plans shall be submitted in such form and within such time limits as the commission shall specify.

(2) Utility plans may provide for a credit against future curtailment for a customer who has already accomplished a reduction in demand for the utility's service by installing an alternative energy device or by weatherization or other installed conservation measures equivalent to the proposed level of curtailment. Where the level of curtailment exceeds the demand reduction produced, by the conservation measures or installed alternative energy device of the customer, the utility plan may provide for credit against the level of curtailment ordered to the extent of the demand reduction produced by the conservation measure or alternate energy device.

(3) The commission shall approve the feature of any plan concerning such credit against curtailment to the extent of the demand reduction produced and shall not penalize either the utility or the customer, in the event of a curtailment order, under ORS 757.720 for the amount of reduced demand. [1973 c.309 §2; 1975 c.606 §10; 1979 c.355 §1]

**757.720 Factors to be considered in approving plan; authority to establish plan; consultation with State Department of Energy.** (1) Approval of utility plans for the curtailment of load shall be based on the following factors:

(a) The consistency of the plan with the public health, safety and welfare;

(b) The technical feasibility of implementation of the plan;

(c) The effectiveness with which the plan minimizes the impact of any curtailment; and

(d) Consistency with Oregon energy policies formulated under ORS 469.010 to 469.155, 469.300 to 469.563 and 757.710 and this section.

(2) In the event of an emergency threatening the health, safety and welfare of the general public, the Public Utility Commission may on the commission's own motion and without hearing establish a plan for the curtailment of load by any person referred to in ORS 757.710. If an emergency is not present, the commission shall prior to approval hold public hearings with respect to any proposed plan and give reasonable notice of such hearings.

(3) The commission shall consult with the Director of the State Department of Energy before approving a plan. [1973 c.309 §3; 1975 c.606 §11; 2005 c.22 §508]

**757.730 Liability when curtailment occurs.** A utility shall not be liable for damages to persons or property resulting from a curtailment of service in accordance with a plan approved by the Public Utility Commission. [1973 c.309 §4]

### KLAMATH RIVER DAMS

**757.732 Definitions for ORS 757.732 to 757.744.** As used in ORS 757.732 to 757.744:

(1) "Agreement in principle" means the agreement signed November 13, 2008, by the states of Oregon and California, by the United States Department of the Interior and by PacifiCorp.

(2) "Allocated share" means the portion of PacifiCorp's costs assigned to this state under the interjurisdictional cost allocation methodology used by the Public Utility Commission for the purpose of establishing rates for PacifiCorp.

(3) "Customers" means the Oregon retail electricity customers of PacifiCorp.

(4) "Final agreement" means a successor agreement to the agreement in principle.

(5) "Klamath River dam" means the J.C. Boyle Dam located in Oregon, the Copco 1 Dam located in California, the Copco 2 Dam located in California or the Iron Gate Dam located in California. [2009 c.690 §2]

**757.734 Recovery of investment in Klamath River dams.** (1) Not more than six months after the execution of a final agreement, the Public Utility Commission shall determine a depreciation schedule under ORS 757.140 for each Klamath River dam based on the assumption that the dam will

be removed in 2020. The commission may change a depreciation schedule determined under this section at any time if removal of a dam will occur during a year other than 2020.

(2) The commission shall use the depreciation schedules prepared under this section to establish rates and tariffs for the recovery of Oregon's allocated share of undepreciated amounts prudently invested by PacifiCorp in a Klamath River dam. Amounts recoverable under this section include, but are not limited to:

(a) Return of investment and return on investment;

(b) Capital improvements required by the United States or any state for continued operation of the dam until dam removal;

(c) Amounts spent by PacifiCorp in seeking relicensing of the dam before July 14, 2009;

(d) Amounts spent by PacifiCorp for settlement of the issues of relicensing or removal of the dam; and

(e) Amounts spent by PacifiCorp for the decommissioning of the dam in anticipation of the dam's removal.

(3) If any amount specified under subsection (2) of this section has not been recovered by PacifiCorp before a dam is removed, the Public Utility Commission shall allow recovery of that amount by PacifiCorp in PacifiCorp's rates and tariffs. The commission shall allow the recovery without an amortization schedule if the impact of the recovery does not exceed one-half of one percent of PacifiCorp's annual revenue requirement. If the impact exceeds one-half of one percent of PacifiCorp's annual revenue requirement, the commission may establish an amortization schedule that limits the annual impact to one-half of one percent of PacifiCorp's annual revenue requirement. [2009 c.690 §3]

**757.736 Surcharges for funding costs of removing Klamath River dams; judicial review.** (1) Not more than 30 days after the execution of a final agreement, PacifiCorp must file a copy of the final agreement with the Public Utility Commission along with full and complete copies of all analyses or studies that relate to the rate-related costs, benefits and risks for customers of removing or relicensing Klamath River dams and that were reviewed by PacifiCorp during the decision-making process that led to PacifiCorp's entering into the final agreement.

(2) PacifiCorp must include with the filing made under subsection (1) of this section tariffs for the collection of two nonbypassable surcharges from its customers

for the purpose of paying the costs of removing Klamath River dams as described in subsection (11) of this section. Notwithstanding the commission's findings and conclusions under subsection (4) of this section, the commission shall require PacifiCorp to begin collecting the surcharges on the date that the filing is made under subsection (1) of this section, or on January 1, 2010, whichever is later, and PacifiCorp shall continue to collect the surcharges pending a final decision on the commission's order under subsection (4) of this section. The surcharges imposed under this section shall be:

(a) A surcharge for the costs of removing the J.C. Boyle Dam; and

(b) A surcharge for the costs of removing the Copco 1 Dam, the Copco 2 Dam and the Iron Gate Dam.

(3) The surcharges imposed under this section may not exceed the amounts necessary to fund Oregon's share of the customer contribution of \$200 million identified in the agreement in principle. In addition, the total amount collected in a calendar year under both surcharges may not exceed more than two percent of PacifiCorp's annual revenue requirement as determined in PacifiCorp's last case under ORS 757.210 decided by the commission before January 1, 2010.

(4) Not more than six months after a filing is made under subsection (1) of this section, the commission shall conduct a hearing under ORS 757.210 on the surcharges imposed under this section, and shall enter an order setting forth findings and conclusions as to whether the imposition of surcharges under the terms of the final agreement results in rates that are fair, just and reasonable.

(5) Notwithstanding ORS 183.482 (1), jurisdiction for judicial review of any appeal of an order entered under subsection (4) of this section is conferred on the Supreme Court, and a person seeking judicial review of the order must file a petition for review with the Supreme Court in the manner provided by ORS 183.482. ORS 183.482 (3) does not apply to an order entered under subsection (4) of this section. If a petition for review is filed, the surcharges imposed under the terms of the final agreement shall remain in effect pending a final decision on the petition, but shall be refunded if the rates resulting from the surcharges are finally determined not to be fair, just and reasonable. A petition filed under this subsection must indicate on its face that the petition is filed pursuant to this subsection.

(6) The commission may not use any commercially sensitive information provided to the commission in a filing made under subsection (1) of this section for any purpose

other than determining whether the imposition of surcharges under the terms of the final agreement results in rates that are fair, just and reasonable. Notwithstanding ORS 192.311 to 192.478, the commission may not release commercially sensitive information provided to the commission under this section, and shall require any person participating in a proceeding relating to the surcharge to sign a protective order prepared by the commission before allowing the participant to obtain and use the information.

(7) The surcharges imposed under this section must be of a specified amount per kilowatt hour billed to retail customers, as determined by the commission. The amount of each surcharge shall be calculated based on a collection schedule that will fund, by December 31, 2019, Oregon's share of the customer contribution of \$200 million identified in the agreement in principle. To the extent practicable, the commission shall set the surcharges so that total annual collections of the surcharges remain approximately the same during the collection period, and, when setting the rate for the surcharges, the commission shall account for the actual and expected changes in energy usage over the collection period and account for the actual and expected changes in interest rates on the collected funds over the collection period. The commission may change the collection schedule if a Klamath River dam will be removed during a year other than 2020.

(8) Except as provided in ORS 757.738 (2), all amounts collected under the surcharges imposed under this section shall be paid into the appropriate trust account established under ORS 757.738.

(9) If the commission determines at any time that amounts have been collected under this section in excess of those needed, or in excess of those allowed, the commission must:

(a) Direct the trustee of the appropriate trust account under ORS 757.738 to refund these excess amounts to customers or to otherwise use these amounts for the benefit of customers; or

(b) Adjust future surcharge amounts as necessary to offset the excess amounts.

(10) If one or more Klamath River dams will not be removed, the commission shall direct PacifiCorp to terminate collection of all or part of the surcharges imposed under this section. In addition, the commission shall direct the trustee of the appropriate trust account under ORS 757.738 to apply any excess balances in the accounts to Oregon's allocated share of prudently incurred costs to implement Federal Energy Regulatory Commission relicensing require-

ments. If any excess amounts remain in the trust accounts after that application, the Public Utility Commission shall order that the excess amounts be refunded to customers or otherwise be used for the benefit of customers in accordance with Public Utility Commission rules and policies.

(11) For the purposes of subsection (2) of this section, “the costs of removing Klamath River dams” includes costs of:

- (a) Physical removal of the dams;
- (b) Site remediation and restoration;
- (c) Avoiding downstream impacts of dam removal;
- (d) Downstream impacts of dam removal;
- (e) Permits that are required for the removal;
- (f) Removal and disposal of sediment, debris and other materials, if necessary; and
- (g) Compliance with environmental laws. [2009 c.690 §4; 2011 c.394 §1]

**757.738 Surcharge trust accounts related to removal of Klamath River dams.** (1)(a) The Public Utility Commission shall establish a separate trust account for amounts generated by each of the two surcharges imposed under ORS 757.736. The commission shall establish the trust accounts as interest-bearing accounts:

(A) With an agency of the United States identified in the final agreement;

(B) In a qualified depository under ORS 295.001 to 295.108; or

(C) With the State Treasurer, to be invested as provided in ORS 293.701 to 293.857.

(b) The commission may establish each of the two trust accounts with a different trustee among those listed in paragraph (a) of this subsection.

(c) The commission may authorize transfer of funds from one trust account to another as necessary to fund removal of the Klamath River dams.

(2) If an agreement is entered into under ORS 757.742 (2), the parties to the agreement may agree that a portion of the amounts collected under one surcharge may be deposited in the trust account established for amounts collected under the other surcharge.

(3) Upon request of an agency of the United States, or upon request of the designee of an agency of the United States, the commission shall require the trustee of the appropriate trust account established under this section to transfer to the agency or designee the amounts that are necessary to pay the costs of removing the Klamath River dams as described in ORS 757.736 (11).

(4) If any amounts remain in a trust account established under this section after the trustee makes all payments necessary for the costs of removing the Klamath River dams as described in ORS 757.736 (11), the commission shall direct the trustee of the account to refund those amounts to customers or to otherwise use the excess amounts for the benefit of customers. [2009 c.690 §5; 2011 c.394 §2; 2019 c.587 §50]

**757.740 Recovery of other costs incurred as result of changes in operation to or removal of Klamath River dams.** Pursuant to ORS 757.210, the Public Utility Commission shall allow PacifiCorp to include in its rates and tariffs this state’s allocated share of any costs that are prudently incurred by PacifiCorp from changes in operation of Klamath River dams before removal of the dams, or that are prudently incurred for replacement power after the dams are removed, that are not otherwise recovered under ORS 757.734 and 757.736. [2009 c.690 §6]

**757.742 Public Utility Commission authorization to enter agreement with California related to cost apportionment and trust fund.** (1) The State of Oregon may enter into an agreement with representatives of the State of California, either as part of a final agreement or by separate agreement, that establishes each state’s share of the customer contribution of \$200 million identified in the agreement in principle.

(2) The Public Utility Commission may enter into an agreement with representatives of the State of California to establish and administer the trust accounts authorized under ORS 757.738 and to ensure that trust account moneys are disbursed for dam removal costs that are necessary and appropriate. [2009 c.690 §7]

**757.744 Disclaimers.** (1) ORS 757.732 to 757.744 do not authorize the expenditure of any public moneys for removal of Klamath River dams.

(2) ORS 757.732 to 757.744 do not create a cause of action against the State of Oregon or against any of the officers, employees or agents of the state and may not be used as the basis for an assertion of liability on the part of the State of Oregon or of any officers, employees or agents of the state. [2009 c.690 §8]

## NONGOVERNMENTAL ENTITIES

**757.746 Requirements for nongovernmental entities receiving funds.** (1) If the Public Utility Commission requires funds collected pursuant to ORS 757.054, through natural gas tariffs or through public purpose charges pursuant to ORS 757.612 to be paid to a nongovernmental entity, the entity shall:

(a) Include on the entity's board of directors an ex officio member designated by the commission, who shall also serve on the entity's nominating committee for filling board vacancies.

(b) Require the entity's officers and directors to provide an annual disclosure of economic interest to be filed with the commission on or prior to April 15 of each calendar year for public review in a form similar to the statement of economic interest required for public officials under ORS 244.060.

(c) Require the entity's officers and directors to declare actual and potential conflicts of interest at regular meetings of the entity's governing body when such conflicts arise, and require an officer or director to abstain from participating in any discussion or voting on any item where that officer or director has an actual conflict of interest. For the purposes of this paragraph, "actual conflict of interest" and "potential conflict of interest" have the meanings given those terms in ORS 244.020.

(d) Annually, arrange for an independent auditor to audit the entity's financial statements, and direct the auditor to file an audit opinion with the commission for public review.

(e) With public utilities, jointly develop public utility-specific budgets, action plans and agreements that detail the entity's public utility-specific planned activities, resources and technologies pursuant to ORS 757.054 and 757.612 (3)(b)(B), including coordinated activities that require joint investment and deployment. Each action plan must reflect stakeholder feedback gathered through a public process managed by the entity and the relevant public utility as overseen by the commission.

(f) File with the commission the entity's budget, action plan and quarterly and annual reports for public review. The entity's budget and action plan must include the budget and action plans jointly developed with public utilities under paragraph (e) of this subsection.

(g) At least once every five years, contract for an independent management evaluation to review the entity's operations, efficiency and effectiveness, and direct the independent reviewer to file a report with the commission for public review.

(2) The commission may remove from the board of directors of a nongovernmental entity an officer or director who fails to provide an annual disclosure of economic interest, or who fails to declare an actual or potential conflict of interest, as described in this section, if the failure is connected to the

allocation or expenditure of funds collected pursuant to ORS 757.054, through natural gas tariffs or through public purpose charges pursuant to ORS 757.612 and paid to the entity. [2021 c.547 §9]

**757.747 Environmental justice; commission to establish equity metrics.** (1) As used in this section, "environmental justice" means the equal treatment, protection from environmental and health hazards, and meaningful involvement of environmental justice communities in the development, implementation and enforcement of regulations and policies that affect the environment in which people live, work, learn, practice spirituality and play.

(2) The Public Utility Commission shall establish, and update no less than once every four years, equity metrics for the purpose of assessing, addressing and creating accountability for environmental justice in the expenditure and investment of funds collected pursuant to ORS 757.054, through natural gas tariffs or through public purpose charges pursuant to ORS 757.612 and paid to a nongovernmental entity. The equity metrics and each update required by this section must reflect feedback gathered through a public process that is managed by the commission and that, at a minimum, includes representatives of environmental justice communities.

(3) Each nongovernmental entity that is paid funds collected pursuant to ORS 757.054, through natural gas tariffs or through public purpose charges pursuant to ORS 757.612 shall, as part of the entity's filings required under ORS 757.746 (1)(f), report on the entity's progress in achieving the equity metrics established pursuant to this section. [2021 c.547 §11]

#### **HEALTH ENDANGERING TERMINATION OF RESIDENTIAL UTILITY SERVICE**

**757.750 Legislative findings.** The Legislative Assembly finds that the termination of residential electric and natural gas utility service can lead to the serious impairment of human health and possibly to loss of life; therefore, the Legislative Assembly has enacted ORS 757.750 to 757.760. [1979 c.868 §2; 1983 c.326 §1]

**757.755 Termination of residential electric or natural gas service prohibited; rules of commission.** (1) The Public Utility Commission of Oregon shall establish rules to prohibit the termination of residential electric or natural gas service when such termination would significantly endanger the physical health of the residential consumer.

(2) The commission shall provide by rule a method for determining when the termi-

nation of residential electric or natural gas service would significantly endanger the physical health of the residential consumer. [1979 c.868 §3; 1983 c.326 §2]

**757.760 Requirements for notice of termination of service; payment schedules; rules.** The Public Utility Commission shall establish rules to require each electric and natural gas utility to:

(1) Give written or personal notice of a proposed termination of residential service in a manner reasonably calculated to reach the residential consumer within a reasonable period of time before the proposed date of termination;

(2) Accept reasonable partial payment on the outstanding account and to establish a reasonable payment schedule for any indebtedness, including a deposit, that the utility claims the residential consumer owes for service at any residential address in lieu of termination of or refusal to provide service, and to inform the residential consumer of the provisions of this subsection;

(3) Inform those residential consumers who cannot afford to pay their bills or deposits of the names and telephone numbers of the appropriate unit within the Department of Human Services or other appropriate social service agencies that can help the consumer investigate what federal, state or private aid might be available to that consumer; and

(4) Provide that a transfer of service from one premises to another within the utility's service area shall not be considered a discontinuation of service. [1979 c.868 §4; 1983 c.326 §3]

## OUTDOOR LIGHTING FIXTURES

**757.765 Public utility provision of shielded outdoor lighting fixtures to customers.** (1) As used in this section:

(a) "Outdoor lighting fixture" means an automatically controlled searchlight, spotlight, floodlight or other device used for architectural lighting, lighting streets or parking lots, landscape lighting, billboards or other artificial illumination or advertising purposes.

(b) "Public utility" has the meaning given that term in ORS 757.005.

(c) "Shielded" means that a light fixture is designed to ensure that direct or indirect light rays emitted from the fixture are projected below a horizontal plane running through the lowest light-emitting point of the fixture.

(2) A public utility supplying electricity that provides a customer with outdoor lighting fixtures shall make the option of using

shielded outdoor lighting fixtures available to the customer. The utility shall notify a customer to whom the utility provides outdoor lighting fixtures that a shielded outdoor lighting fixture option is available through the utility. The utility shall file an application with the Public Utility Commission to establish rates and charges for providing the shielded outdoor lighting fixture option.

(3) Subsection (2) of this section does not require a utility to reimburse a customer for the cost of a shielded outdoor lighting fixture installed before the date the utility sends a notice to the customer under this section, or to provide an option for a customer to acquire:

(a) Incandescent outdoor lighting fixtures of not more than 150 watts;

(b) Light sources of not more than 70 watts that are not incandescent lighting fixtures;

(c) Outdoor lighting fixtures on advertising signs on interstate or federal primary highways;

(d) Navigational lighting systems at airports or other lighting necessary for aircraft safety; or

(e) Outdoor lighting fixtures necessary for worker safety at farms, ranches, dairies or feedlots or at industrial, mining, oil or gas facilities. [2009 c.588 §1]

**Note:** 757.765 and 757.770 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.770 Deadline for public utility filing of outdoor lighting fixture rate and charge application; required notification to customers.** (1) A public utility that is subject to ORS 757.765 shall file an initial rate and charge application as required by ORS 757.765 (2) on or before January 1, 2010.

(2) A utility that is subject to ORS 757.765 shall give a customer notice of the shielded outdoor lighting fixture option on or before the later of the date the utility first begins providing outdoor lighting fixtures to the customer or 60 days after the rate or charge takes effect. [2009 c.588 §2]

**Note:** See note under 757.765.

## HIGH VOLTAGE POWER LINE REGULATION

### WILDFIRE PROTECTION AND MITIGATION

**757.960 Commission to convene workshops; wildfire protection and mitigation best practices.** The Public Utility Commission shall periodically convene workshops for the purpose of helping public utilities that provide electricity, municipal electric utilities, people's utility districts organized under ORS chapter 261 that sell electricity, electric cooperatives organized under ORS chapter 62 and operators of electrical transmission and distribution systems to develop and share information for the identification, adoption and carrying out of best practices regarding wildfires, including, but not limited to, risk-based wildfire protection and risk-based wildfire mitigation procedures and standards. [2021 c.592 §2]

**757.963 Public utility required to develop wildfire protection plan; rules.** (1) A public utility that provides electricity must have and operate in compliance with a risk-based wildfire protection plan that is filed with the Public Utility Commission and has been evaluated by the commission. The plan must be based on reasonable and prudent practices identified through workshops conducted by the commission pursuant to ORS 757.960 and on commission standards adopted by rule. The public utility must design the plan in a manner that seeks to protect public safety, reduce risk to utility customers and promote electrical system resilience to wildfire damage.

(2) A public utility that provides electricity shall regularly update a risk-based wildfire protection plan on a schedule determined by the commission. The plan must, at a minimum:

(a) Identify areas that are subject to a heightened risk of wildfire and are:

(A) Within the service territory of the public utility; and

(B) Outside the service territory of the public utility but within a reasonable distance, as determined by the commission, of the public utility's generation or transmission assets.

(b) Identify a means for mitigating wildfire risk that reflects a reasonable balancing of mitigation costs with the resulting reduction of wildfire risk.

(c) Identify preventive actions and programs that the public utility will carry out to minimize the risk of utility facilities causing a wildfire.

(d) After seeking information from regional, state and local entities, including municipalities, identify a protocol for the de-energizing of power lines and adjusting of power system operations to mitigate

wildfires, promote the safety of the public and first responders and preserve health and communication infrastructure.

(e) Describe the procedures, standards and time frames that the public utility will use to inspect utility infrastructure in areas that the public utility identifies under paragraph (a) of this subsection.

(f) Describe the procedures, standards and time frames that the public utility will use to carry out vegetation management in areas that the public utility identifies under paragraph (a) of this subsection.

(g) Identify the development, implementation and administration costs for the plan.

(h) Identify the community outreach and public awareness efforts that the public utility will use before, during and after a wildfire season.

(3) To develop a plan described in subsection (2) of this section, a public utility may consult with and consider information from regional, state and local entities, including municipalities.

(4) The commission, in consultation with the State Forestry Department and local emergency services agencies, shall evaluate a public utility's wildfire protection plan and plan updates through a public process.

(5) Not more than 180 days after receiving a wildfire protection plan or plan update from a public utility, the commission shall approve or approve with conditions the plan or update if the commission finds that the plan or update is based on reasonable and prudent practices identified through workshops pursuant to ORS 757.960 and designed to meet all applicable rules and standards adopted by the commission.

(6) The commission's approval of a wildfire protection plan does not establish a defense to any enforcement action for violation of a commission decision, order or rule or relieve a public utility from proactively managing wildfire risk, including by monitoring emerging practices and technologies.

(7) The commission shall adopt rules for the implementation of this section. The rules may include, but need not be limited to, procedures and standards regarding vegetation management, public power safety shutoffs and restorations, pole materials, circuitry and monitoring systems.

(8) All reasonable operating costs incurred by, and prudent investments made by, a public utility to develop, implement or operate a wildfire protection plan under this section are recoverable in the rates of the public utility from all customers through a filing under ORS 757.210 to 757.220. The commission shall establish an automatic ad-

justment clause, as defined in ORS 757.210, or another method to allow timely recovery of the costs. [2021 c.592 §3]

(2) A consumer-owned utility must have and operate in compliance with a risk-based wildfire mitigation plan approved by the governing body of the utility. The plan must be designed to protect public safety, reduce risk to utility customers and promote electrical system resilience to wildfire damage.

(3) The consumer-owned utility shall regularly update the risk-based wildfire mitigation plan on a schedule the governing body deems consistent with prudent utility practices.

(4) A consumer-owned utility shall conduct a wildfire risk assessment of utility facilities. The utility shall review and revise the assessment on a schedule the governing body deems consistent with prudent utility practices.

(5) A consumer-owned utility shall submit a copy of the risk-based wildfire mitigation plan approved by the utility governing body to the Public Utility Commission to facilitate commission functions regarding statewide wildfire mitigation planning and wildfire preparedness. [2021 c.592 §4]

**757.968 Electric utility easement over private land.** (1) As used in this section, “electric utility” has the meaning given that term in ORS 757.600.

(2) ORS 757.963 and 757.966 do not affect the terms or conditions of an easement held by an electric utility over private land as of July 19, 2021. [2021 c.592 §6a]

**Note:** 757.968 and 757.969 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 757 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**757.969 Municipally owned utility exempt from requirements.** ORS 757.963 and 757.995 do not apply to municipally owned utilities organized under ORS chapter 225. [2021 c.592 §6b]

**RIGHTS OF WAY****758.010 Authority to construct lines and facilities; requirements and conditions.**

(1) Except within cities, any person has a right and privilege to construct, maintain and operate its water, gas, electric or communication service lines, fixtures and other facilities along the public roads in this state, as defined in ORS 368.001 or across rivers or over any lands belonging to state government, as defined in ORS 174.111, free of charge, and over lands of private individuals, as provided in ORS 772.210. Such lines, fixtures and facilities shall not be constructed so as to obstruct any public road or navigable stream.

(2) A county governing body and the Department of Transportation have authority to designate the location upon roads under their respective jurisdiction, outside of cities, where lines, fixtures and facilities described in this section may be located, and subject to ORS 758.025 may order the location of any such line, fixture or facility to be changed when such governing body or department deems it expedient. Any line, fixture or facility erected or remaining in a different location upon such road than that designated in any order of the governing body or department is a public nuisance and may be abated accordingly.

(3) The state officer, agency, board or commission having jurisdiction over any land belonging to state government, as defined in ORS 174.111, with respect to which the right and privilege granted under subsection (1) of this section is exercised may impose reasonable requirements for the location, construction, operation and maintenance of the lines, fixtures and facilities on such land. The person exercising such right and privilege over any land belonging to state government, as defined in ORS 174.111, shall pay the current market value for the existing forest products that are damaged or destroyed in exercising such right and privilege. Such right and privilege of any person is conditioned upon compliance with the requirements imposed by this subsection. [Amended by 1955 c.123 §1; 1971 c.655 §100; 1981 c.153 §76; 2001 c.664 §§3,6; 2009 c.444 §4; 2015 c.55 §1]

**758.012 Notice of intent to build transmission line to consumer-owned utilities and public utilities; exemptions.**

(1) As used in this section:

(a) "Public utility" has the meaning given that term in ORS 757.005.

(b) "Transmission line" means a linear utility facility by which a utility provider transmits or transfers electricity from a point of origin or generation or between transfer stations.

(2) A person who applies for a permit with the Energy Facility Siting Council or with a county to build a transmission line must notify each people's utility district organized under ORS chapter 261, municipal utility organized under ORS chapter 225, electric cooperative organized under ORS chapter 62 and public utility in whose service territory the transmission line will be constructed of the intent to receive approval for the construction of the transmission line unless the person is:

(a) A people's utility district organized under ORS chapter 261, a municipal utility organized under ORS chapter 225 or an electric cooperative organized under ORS chapter 62; or

(b) A public utility. [2013 c.235 §2]

**758.013 Operator of electric power line to provide Public Utility Commission with safety information; availability of information to public utilities.**

(1) Each person who is subject to the Public Utility Commission's authority under ORS 757.035 and who engages in the operation of an electric power line as described in ORS 757.035 must provide the commission with the following information before January 2 of each even-numbered year:

(a) The name and contact information of the person that is responsible for the operation and maintenance of the electric power line, and for ensuring that the electric power line is safe, on an ongoing basis; and

(b) The name and contact information of the person who is responsible for responding to conditions that present an imminent threat to the safety of employees, customers and the public.

(2) In the event that the contact information described in subsection (1) of this section changes or that ownership of the electric power line changes, the person who engages in the operation of the electric power line must notify the commission of the change as soon as practicable, but no later than within 90 days.

(3) If the person described in subsection (1) of this section is not the public utility, as defined in ORS 757.005, in whose service territory the electric power line is located, the commission shall make the information provided to the commission under subsection (1) of this section available to the public utility in whose service territory the electric power line is located. [2013 c.235 §3]

**758.015 Certificate of public convenience and necessity.**

(1) When any person, as defined in ORS 758.400, providing electric utility service, as defined in ORS 758.400, or any transmission company, proposes to construct an overhead transmission line which

will necessitate a condemnation of land or an interest therein, it shall petition the Public Utility Commission for a certificate of public convenience and necessity setting forth a detailed description and the purpose of the proposed transmission line, the estimated cost, the route to be followed, the availability of alternate routes, a description of other transmission lines connecting the same areas, and such other information in such form as the commission may reasonably require in determining the public convenience and necessity.

(2) The commission shall give notice and hold a public hearing on such petition. The commission, in addition to considering facts presented at such hearing, shall make the commission's own investigation to determine the necessity, safety, practicability and justification in the public interest for the proposed transmission line and shall enter an order accordingly. Except for petitions for a proposed transmission line for which the petitioner also seeks approval from the Energy Facility Siting Council for the same transmission line, the order shall be subject to review as in other cases. Orders on petitions for a proposed transmission line for which the petitioner also seeks approval from the Energy Facility Siting Council for the same transmission line are subject to judicial review in the same manner as an order in a contested case as set forth in ORS 758.017. In any proceeding for condemnation, a certified copy of such order shall be conclusive evidence that the transmission line for which the land is required is a public use and necessary for public convenience.

(3) This section shall not apply to construction of transmission lines in connection with a project for which a permit or license is otherwise obtained pursuant to state or federal law.

(4) As used in this section and ORS 758.020, "transmission company" means a person or entity that owns or operates high voltage transmission lines and is subject to the jurisdiction of the Federal Energy Regulatory Commission. "Transmission company" does not include a cooperative organized under ORS chapter 62. [1961 c.691 §19; 2001 c.913 §6; 2013 c.335 §1]

**758.017 Appeal of grant or denial of certificate of public convenience and necessity for transmission lines subject to Energy Facility Siting Council approval; review vested in Supreme Court.** (1) Any party to a contested case hearing related to the application for a certificate of public convenience and necessity under ORS 758.015 for a proposed transmission line for which the petitioner also seeks approval from the Energy Facility Siting Council for

the same transmission line may appeal the Public Utility Commission's grant or denial of the application. Issues on appeal shall be limited to those raised by the parties to the contested case hearing before the commission.

(2) Jurisdiction for judicial review of the commission's approval or rejection of an application for a certificate of public convenience and necessity under subsection (1) of this section is conferred upon the Supreme Court. Proceedings for review shall be instituted by filing a petition in the Supreme Court. The petition shall be filed within 60 days after the date of service of the commission's final order. Date of service shall be the date on which the commission delivered or mailed the final order in accordance with ORS 183.470.

(3) The filing of a petition for judicial review may not stay the order, except that a party to the contested case hearing may apply to the Supreme Court for a stay upon a showing that there is a colorable claim of error and that the petitioner will suffer irreparable injury.

(4) If the Supreme Court grants a stay pursuant to subsection (3) of this section, the court:

(a) Shall require the petitioner requesting the stay to give an undertaking in the amount of \$5,000.

(b) May grant the stay in whole or in part.

(c) May impose other reasonable conditions on the stay.

(5) The review by the Supreme Court shall be the same as the review by the Court of Appeals described in ORS 183.482. The Supreme Court shall give priority on its docket to a petition for review under this section and render a decision within six months of the filing of the petition for review.

(6) The following periods of delay shall be excluded from the six-month period within which the court must render a decision under subsection (5) of this section:

(a) Any period of delay resulting from a motion properly before the court; or

(b) Any reasonable period of delay resulting from a continuance granted by the court on the court's own motion or at the request of one of the parties, if the court granted the continuance on the basis of findings that the ends of justice served by granting the continuance outweigh the best interests of the public and the other parties in having a decision within six months.

(7) No period of delay resulting from a continuance granted by the Supreme Court

under subsection (6)(b) of this section shall be excluded from the six-month period unless the court sets forth, in the record, either orally or in writing, the court's reasons for finding that the ends of justice served by granting the continuance outweigh the best interests of the public and the other parties in having a decision within six months. The factors the court shall consider in determining whether to grant a continuance under subsection (6)(b) of this section are:

(a) Whether the failure to grant a continuance in the proceeding would be likely to make a continuation of the proceeding impossible or result in a miscarriage of justice; or

(b) Whether the case is so unusual or so complex, because of the number of parties involved or the existence of novel questions of fact or law, that it is unreasonable to expect adequate consideration of the issues within the six-month period.

(8) No continuance under subsection (6)(b) of this section shall be granted because of general congestion of the court calendar or lack of diligent preparation or attention to the case by any member of the court or any party. [2013 c.335 §3]

**758.020 Joint occupancy of poles.** (1)

The county court, board of county commissioners or the Department of Transportation, when designating the location where poles or other aboveground facilities described in ORS 758.010 may be placed on a road or highway which fronts on the ocean or on a river or other body of water and the water frontage of the highway is being developed or maintained for its scenic or recreational value, may require all lines to occupy the opposite side of the right of way, if such joint occupancy can be maintained without undue impairment of service or damage to public life and property.

(2) If the owners of such lines are unable to agree on the terms and conditions of joint occupancy, such department, court or board shall request the Public Utility Commission to determine the practicability of such joint occupancy and the effect thereof upon adequate and safe service by the prospective joint occupants, the location of the lines, and, if found to be practicable, to fix and prescribe the terms and conditions pursuant to which joint occupancy shall be accomplished. Before making or entering an order, such commission shall hold a hearing and make findings in accordance with ORS 756.500 to 756.610. The order of the commission is subject to judicial review in the manner provided by ORS 756.610. In fixing terms and conditions pursuant to which joint occupancy shall be accomplished, the Public

Utility Commission shall require the installation by each occupant of standards, devices and equipment reasonably necessary to protect the equipment of the other occupants from damage and the public from injury arising from such joint occupancy.

(3) The right of any public utility, telecommunications utility or transmission company to construct, maintain and operate on a public highway poles or fixtures is contingent on compliance with reasonable requirements established by the Department of Transportation, county courts, boards of county commissioners or the Public Utility Commission under authority of this section and ORS 758.010. Such rights are likewise contingent and conditioned on all facilities, equipment and installations being constructed and maintained in strict conformance with modern and approved standards. [Amended by 1971 c.655 §102; 1987 c.447 §98; 2001 c.913 §7; 2005 c.638 §11; 2017 c.312 §6]

(c) "Utility" means a public utility, as defined in ORS 757.005, or a telecommunications utility or competitive telecommunications provider, as those terms are defined in ORS 759.005.

(2) If a public body plans a project that would require utilities to relocate their utility facilities that are located in the highway right of way, the public body shall notify affected utilities of the project in writing as soon as is practicable.

(3) During the planning and design phase of a project, the public body shall coordinate with the affected utilities to discuss the project's scope and schedule. At a minimum, the discussion must include a description of the plans, goals and objectives of the proposed project and options to minimize or eliminate costs to the public body and the utilities. The public body is not required to avoid or minimize costs to the utilities in a way that materially affects the project's scope, costs or schedule. Failure of the affected utilities to respond or participate in the coordination or discussion does not affect the ability of the public body to proceed with design and construction of the project.

(4) A public body having jurisdiction over a highway may not prohibit a utility from seeking reimbursement from private parties or customers for costs under this section in any permit application, license application or other written agreement authorizing the utility to relocate the facilities.

(5)(a) Notwithstanding any other provision of ORS chapter 759, a telecommunications utility that is not subject to rate-of-return regulation, including a utility regulated under ORS 759.255 may, after participating in the process described in subsection (3) of this section, request authorization from the Public Utility Commission to recover from customers prudent costs incurred for the relocation of facilities required by a public body that are not otherwise paid or reimbursed from another source. Recoverable relocation costs are the nonfacility costs incurred in the relocation plus the undepreciated value of the facilities replaced, including the cost of placing such facilities underground if underground placement is required by the public body or other provision of law. The commission may authorize the recovery of relocation costs that the commission determines to be substantial and beyond the normal course of business.

(b) The commission shall:

(A) Verify the relocation costs for which the utility requests recovery;

(B) Determine the allocation of costs between interstate and intrastate services, geographic areas, customers and services; and

(C) Prescribe the method of cost recovery.

(c) In determining the level of cost recovery and the allocation of costs, the commission shall consider:

(A) The overall impact on the utility; and

(B) Other relevant factors identified by the commission.

(d) Relocation costs may be recovered for a reasonable period of time subject to approval by the commission and not to exceed the depreciable life of the facilities. [2009 c.444 §2]

**758.035 Commission's power to enforce joint use of facilities.** (1) Every public utility, telecommunications utility, person, association or corporation having conduits, subways, street railway tracks, poles or other equipment on, over or under any street or highway shall for a reasonable compensation permit the use of the same by any public utility or telecommunications utility whenever public convenience or necessity requires such use and such use will

not result in irreparable injury to the owner or other users of such equipment nor in any substantial detriment to the service to be rendered by such owners or other users.

(2) In case of failure to agree upon such use or the conditions or compensation for such use, any public utility, telecommunications utility, person, association or corporation interested may apply to the Public Utility Commission, and if after investigation the commission ascertains that public convenience or necessity requires such use and that it would not result in irreparable injury to the owner or other users of such equipment, the commission shall by order direct that such use be permitted and prescribe reasonable conditions and compensation for such joint use.

(3) The use so ordered shall be permitted and the prescribed conditions and compensation shall be the lawful conditions and compensation to be observed, followed and paid. The order of the commission is subject to judicial review in the manner provided by ORS 756.610. The order may be modified by the commission upon application of any interested party or upon the commission's own motion. All public utilities and telecommunications utilities shall afford all reasonable facilities and make all necessary regulations for the interchange of business, or traffic carried or their product between them, when ordered by the commission so to do. ### PROVISION OF BROADBAND SERVICES BY ELECTRIC COOPERATIVE

**758.120 Electric easement in provision of broadband services; exceptions; notice; remedies for property owners.** (1) As used in this section and ORS 758.125 and 758.130:

(a) "Attachment" has the meaning given that term in ORS 757.270.

(b) "Broadband" has the meaning given that term in ORS 276A.406.

(c) "Commercial broadband service provider" means a provider of broadband service that is not affiliated with or a division of an electric cooperative.

(d) "Electric cooperative" has the meaning given that term in ORS 757.600.

(e) “Electric easement” means any recorded or unrecorded easement or license, including easements created by operation of law, held or used by an electric cooperative for the installation and maintenance of electric facilities, regardless of whether the easement is for the exclusive benefit of the electric cooperative or is also for use in connection with other utility services that may or may not be provided by the electric cooperative.

(f) “Electric facilities” means any line, wire, pipe, conduit, main, pump, pole, tower, fixture, manhole, handhole or other similar facility or facilities, and any other related or ancillary materials, which are owned or controlled, in whole or in part, by one or more electric cooperatives.

(g) “Property owner” means a person with a recorded fee simple interest in land upon which an electric easement is located.

(2)(a)(A) Except as provided in paragraph (b) of this subsection, an electric cooperative may use or allow for the use of an electric easement in the provision of broadband services.

(B) If use of an electric easement in the provision of broadband services as authorized under this paragraph would result in an expansion of the uses for which the easement is granted or acquired, the electric cooperative shall, no later than 60 days prior to the expansion of use, provide written notice to the property owner pursuant to subsection (3) of this section.

(C) A commercial broadband service provider may request for an electric cooperative to send notice to a property owner as required by this subsection. A commercial broadband service provider shall include in a request under this subparagraph the addresses of subject poles and the pole numbers if labeled on the pole, and the names and addresses of the property owners to whom the commercial broadband service provider requests notice to be sent. Absent unusual circumstances such as an outage or similar emergency, an electric cooperative shall send notice to a property owner as requested under this subparagraph no later than 10 days after receipt of the request from a commercial broadband service provider.

(b)(A) The provisions of this section do not authorize an electric cooperative to use or allow for the use in the provision of broadband services any electric easements that are granted on property owned, managed or operated by a city, including but not limited to public rights of way within the boundaries of the city.

(B) If an electric easement is an unrecorded easement, license or easement created

by operation of law, the electric easement must be in current use by the electric cooperative for the installation and maintenance of electric facilities in order for the electric cooperative to exercise the authority granted under this section. For purposes of this section, the location and extent of an unrecorded easement, license or easement created by operation of law is limited to:

(i) The location of the electric easement as it was in use prior to commencement of use of the electric easement in the provision of broadband services; and

(ii) A width of no more than 10 feet on each side from the center line of the electric easement.

(3)(a) Written notice as required by subsection (2) of this section must be sent by certified mail to the last known address of the property owner, according to publicly available records of the county assessor. The notice must contain:

(A) The name and mailing address of the electric cooperative;

(B) The mailing address, telephone number and electronic mail address for a representative of the electric cooperative;

(C) A summary statement of the purpose and character of the expansion of the use of the electric easement; and

(D) An offer for an onsite meeting prior to commencement of any installation activities associated with the expanded use.

(b) If the notice is sent by an electric cooperative on behalf of a commercial broadband service provider, the notice must also contain:

(A) The name and mailing address of the commercial broadband service provider; and

(B) The mailing address, telephone number and electronic mail address for a representative of the commercial broadband service provider.

(4) If the activities necessary to expand use of the electric easement for provision of broadband services will require trenching or other underground work that is not included in the uses for which the easement is granted or acquired:

(a) The notice provided under subsection (3) of this section must also include:

(A) A summary statement describing the activities to be conducted during the trenching or other underground work; and

(B) The approximate dates when the trenching or other underground work will start and end;

(b) Any new conduit must be installed in a location that is adjacent to and as close to

existing conduit as allowed under applicable code requirements or regulations;

(c) To the extent allowed under any applicable code requirements or regulations, the property owner may choose which side of the existing conduit to install any new conduit; and

(d) Any surface area disturbed during trenching or other underground work must be restored to its condition prior to the trenching or other underground work.

(5) In installing and maintaining facilities necessary to provide broadband services, the provider of broadband services that is making use of an electric easement as authorized pursuant to this section must:

(a) Make reasonable accommodations to prevent disruption to active agricultural and forest operations;

(b) Employ best practices to prevent the introduction of noxious weeds onto the property upon which the electric easement is located;

(c) Provide compensation to the property owner for property damage or crop loss caused by the installation or maintenance of the facilities; and

(d) Upon the request of the property owner, provide at least seven days advance notice before the commencement of any installation or routine maintenance activities.

(6) An expansion of use described in subsection (2) of this section is deemed vested in the electric cooperative and shall run with the land as of the date that the property owner receives notice from the electric cooperative.

(7) Except as provided in ORS 758.125 (1), a property owner that receives notice under subsection (3) of this section may bring a cause of action, in the circuit court of the county where the electric easement is located, against the provider of broadband services for damages relating to a decrease in the value of the property owner's real property caused by the use of the easement in the provision of broadband services. A cause of action authorized by this subsection must be brought no later than 18 months after the date that the electric cooperative provided notice under subsection (3) of this section. The cause of action provided for in this subsection shall be the exclusive remedy in law or equity with respect to use of the electric easement for the provision of broadband services.

(8)(a) In an action brought under subsection (7) of this section:

(A) The court or jury shall ascertain and assess the decrease in value of property, if any, based on the difference between:

(i) The fair market value of the entire parcel of real property upon which the electric easement is located immediately before the expanded use; and

(ii) The fair market value of the entire parcel of real property immediately after the expanded use;

(B) Evidence of revenues or profits derived from the expanded use or related attachment rates is not admissible in determining fair market value; and

(C) Evidence of the increase in fair market value due to the availability of broadband services is admissible in determining fair market value.

(b) Prior to the commencement of trial in an action brought under subsection (7) of this section, the defendant shall make at least one offer of compensation to the property owner. If the property owner obtains a judgment that exceeds the offer of compensation made by the defendant, the property owner shall be entitled to an additional award for trial costs, disbursements, reasonable attorney fees and expenses as defined in ORS 35.335 (2).

(c) At any point not later than 10 days before the trial of the action, after making an initial offer of compensation pursuant to paragraph (b) of this subsection, the defendant may serve an offer of compromise on the plaintiff in the action, as provided in ORS 35.300. If the plaintiff accepts the offer of compromise, the plaintiff shall be entitled to an award for costs and disbursements, attorney fees and expenses incurred by the plaintiff before service of the offer on plaintiff. If the plaintiff rejects the offer of compromise and fails to obtain a judgment more favorable than the offer, the plaintiff may not recover prevailing party fees or costs and disbursements, attorney fees and expenses that were incurred on and after service of the offer.

(9) The electric cooperative may include required reimbursement for expanded use compensation awards and litigation costs in any attachment license agreement with a provider of broadband services that is not the electric cooperative and that is directly benefited by the expanded use.

(10) A class action may not be maintained against a provider of broadband services in any action for damages based on a claim of expanded use for broadband services. [2021 c.149 §1]

**Note:** 758.120 to 758.130 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 758 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**758.125 Duties and rights not altered by ORS 758.120.** (1) ORS 758.120 does not alter the rights of an electric cooperative or commercial broadband service provider to acquire the rights to use real property for broadband services through any other means authorized by law.

(2) ORS 758.120 does not authorize an expanded use that is expressly prohibited by the terms of a written electric easement.

(3) Exercise of the authority granted in ORS 758.120 does not:

(a) Change the legal relationship between the electric cooperative as the easement holder and the property owner;

(b) Create an easement right for any third party, including but not limited to a commercial broadband service provider or a broadband division or affiliate of the electric cooperative; or

(c) Expand the footprint of the existing easement.

(4) An expanded use of an electric easement authorized under ORS 758.120 may not alter or interfere with any easement rights held by parties other than the electric cooperative that existed, within or outside the area of the electric easement, prior to the expanded use.

(5)(a) Nothing in ORS 758.120 requires an electric cooperative that does not have a broadband division or affiliate to offer or authorize the access or use of an electric easement or to use attachments or electric service infrastructure owned or controlled by the electric cooperative for provision of broadband services in a manner that would, in the electric cooperative's reasonable discretion, materially interfere with the electric cooperative's construction, maintenance or use of any electric cooperative attachments or infrastructure for the provision of electric service.

(b) Subject to subsection (2) of this section, if an electric cooperative has a broadband division or affiliate, the electric cooperative may withhold authorization for a commercial broadband service provider to access or use an electric easement or to use attachments or electric service infrastructure owned or controlled by the electric cooperative for provision of broadband services only if:

(A) There is insufficient capacity for attachments necessary for the provision of broadband service; or

(B) Concerns of safety or reliability or generally applicable engineering purposes weigh against granting the authorization.

(6) Nothing in this section or ORS 758.120 imposes any duty or liability on a

property owner in addition to any liability provided for in an electric easement for unintentional damage by the property owner to facilities necessary for the provision of broadband that are installed in an electric easement pursuant to an expanded use authorized under ORS 758.120. An electric cooperative that exercises the authority granted under ORS 758.120 shall indemnify and hold harmless the property owner against damage to existing easement holders resulting from activities related to the installation or maintenance of facilities described in this subsection. [2021 c.149 §2]

**Note:** See note under 758.120.

**758.130 Requirements for electric cooperative in provision of broadband services; audit; compliance.** (1) An electric cooperative that exercises the authority granted under ORS 758.120 for the provision of broadband services:

(a) For as long as the electric cooperative maintains an exclusive right to provide electric service to customers within its exclusive service territory, may provide broadband service only through a broadband affiliate or through a separate broadband division within the electric cooperative; and

(b) If the electric cooperative has a broadband affiliate or separate broadband division:

(A) Shall maintain or cause to be maintained an accounting system for the broadband affiliate or division that is separate from the accounting system for the electric cooperative's electric division;

(B) Shall cause, within two years after commencement of commercial operation by the electric cooperative's broadband affiliate or division and at least once every two years thereafter, a financial audit to be performed by an independent certified public accountant with respect to the broadband affiliate's or division's provision of retail broadband service, including an audit of the allocation of costs for property and services that are used in both the provision of broadband service and the electric cooperative's provision of electric service; and

(C) May not provide the broadband affiliate or division of the electric cooperative a right to install maintain, own, operate, or use attachments at rates, terms or conditions that are more favorable than the rates, terms or conditions provided to commercial broadband service providers.

(2)(a) An electric cooperative may not use its exclusive right to provide electric service within its exclusive territory to cross-subsidize a broadband affiliate of the electric cooperative or a separate broadband division within the electric cooperative, or to

cross-subsidize a broadband affiliate's or division's provision of broadband service through:

(A) Below fair market pricing;

(B) Payment of capital or operating costs properly charged to the broadband affiliate or division under applicable accounting rules; or

(C) Use of any revenue from or subsidy for the provision of electric service to provide broadband service below market value, except in connection with the electric cooperative's provision of electricity.

(b) An electric cooperative may:

(A) Enter into transactions with the broadband affiliate or division of the electric cooperative on terms and conditions that are substantially similar to the terms and conditions that would be agreed to between two similarly situated parties in an arm's-length commercial transaction;

(B) Loan funds to the broadband affiliate or division of the electric cooperative if the interest rate on the loan is no less than the electric cooperative's lowest cost of capital;

(C) Provide for reduced-cost broadband service to low-income customers;

(D) Conduct and fund due diligence, operational analysis, entity set-up, and associated noncapital expenditures relating to and prior to the establishment of a broadband affiliate or division; or

(E) Offer broadband service through a broadband affiliate or division at below market pricing on a temporary basis for promotional purposes.

(3)(a) Upon request from a commercial broadband service provider, an electric cooperative subject to this section and any broadband affiliate or division of the electric cooperative shall cause an officer of the electric cooperative and the broadband affiliate or division, respectively, to certify that both the electric cooperative and the broadband affiliate or division are in compliance with this section.

(b) If a dispute arises between an electric cooperative or its broadband affiliate or division and a commercial broadband service provider regarding matters addressed in this subsection, the parties to the dispute have standing to file a claim or cause of action in any court of competent jurisdiction in the state. The following are discoverable and admissible as evidence in court regarding compliance by the electric cooperative and the broadband affiliate or division of the electric cooperative compliance with this section:

(A) Any certification requested and produced pursuant to this subsection; and

(B) Any audit required to be performed pursuant to subsection (1) of this section, except that the court shall provide appropriate restrictions upon the disclosure of any trade secret, as that term is defined in ORS 192.345 (2), that may be included in the audit. [2021 c.149 §3]

**Note:** See note under 758.120.

## UNDERGROUND ELECTRIC AND COMMUNICATIONS FACILITIES

**758.210 Policy.** The legislature finds that in many areas of this state landowners, utilities and public authorities desire to convert existing overhead electric and communication facilities to underground facilities by means of special assessment proceedings. The legislature declares that a public purpose will be served and that the public welfare will be promoted by providing a procedure to accomplish such conversion by special assessment proceedings and that it is in the public interest for such conversion to be accomplished as provided in ORS 758.210 to 758.270. [1969 c.385 §4]

**758.230 Assessment procedure; objections to conversion.** (1) Upon presentation of the petition and certificate of sufficiency, or upon adoption of an ordinance or resolution, the public authority shall proceed in the manner provided by ORS 223.389.

(2) Unless the charter of a county provides otherwise, a county shall declare a proposed conversion abandoned if, after notice as provided by ORS 223.389, objections to the conversion are received by a county court or board of county commissioners signed by more than 50 percent of the landowners within the proposed assessment district who own more than 50 percent of land within the district. If a proposed conversion is abandoned because of objections, no new proceeding for the conversion shall be undertaken within a period of one year thereafter. [1969 c.385 §5]

**758.235 Applicability of local improvement laws; issuance of bonds.** Unless otherwise provided by ORS 758.210 to 758.270, the provisions relating to the procedure for local improvements in cities, as set forth in ORS 223.205, 223.210 to 223.295, 223.387 to 223.399, 223.401, 223.405 to 223.485, 223.505 to

223.595, 223.610, 223.615 to 223.650 and 223.770, apply to proceedings for a conversion by a city or county under ORS 758.210 to 758.270. In a proceeding conducted by a county, where the statutes referred to in this section refer to officials of cities, the corresponding officials of the county shall perform the required functions, unless otherwise provided by order of the county court or board of county commissioners. Cities and counties may, as provided by ORS 223.205 and 223.210 to 223.295, issue improvement bonds in the total amount of the valid applications received to pay assessments in installments. [1969 c.385 §6; 1995 c.333 §20; 2017 c.17 §60]

**758.240 Contract with utility for conversion.** (1) When a public authority in accordance with ORS 758.230 determines that a conversion shall be made, it may contract with the utilities supplying electric or communication service within the underground assessment district to perform the conversion. A contract shall provide:

(2) Upon approval and execution of the conversion contracts by the utilities and public authority, the public authority shall direct the utilities owning overhead electric or communication facilities within the district to convert such facilities as required by the contract. [1969 c.385 §7]

**758.245 Payment of costs for conversion; removal of overhead facilities.** Upon completion of the conversion of the overhead electric or communication facilities on public lands and right of way to underground, the

affected utility shall file a verified statement of the costs of such conversion with the public authority. The public authority shall adopt an ordinance assessing the whole or any part of the cost of the conversion against the real property in the underground assessment district specifically benefited and shall promptly thereafter mail to each landowner a statement of the amount of such costs assessed to the property of the landowner. With the statement the public authority shall mail to each landowner a notice stating that:

(1) Service from the underground facilities is available;

(2) The landowner has 90 days after the date of the mailing of such notice to convert all overhead electric or communication facilities providing service to any structure or improvement located on the lot or parcel to underground service facilities; and

(2) Upon completion of the conversion of overhead electric or communication service facilities on privately owned lots and parcels within a district, the utility shall file with the public authority a verified statement of the costs of the conversion of such service facilities of each landowner in the district. Promptly thereafter the public authority shall mail to each landowner a copy of such verified statement. [1969 c.385 §9]

**758.255 Discontinuance of utility service for noncompliance with conversion provisions.** If the owner of any structure or improvement served from the overhead electric or communication service facilities within an underground assessment district does not grant the utility a permit or ease-

ment referred to in ORS 758.250 or if such an owner fails to convert to underground service facilities within 90 days after the mailing to the owner of the notice provided by ORS 758.245, the public authority shall order the utility to complete the conversion and to disconnect and remove all overhead facilities, including service facilities, providing service to such structure or improvement. [1969 c.385 §10]

**758.260 Competitive bidding for utility conversion.** To the extent that the contract between the utility and the public authority provides that all or any part of the conversion work shall be performed by the utility, any statute or charter provision requiring competitive bidding and the award of a contract to the lowest responsible bidder does not apply. [1969 c.385 §11]

**758.265 Overhead facilities in assessment district after conversion.** Once converted, no overhead electric or communication facilities shall be installed, maintained or operated in any underground assessment district except as authorized by ORS 758.210 to 758.270. [1969 c.385 §12]

**758.270 Effect of ORS 758.210 to 758.270 on existing laws and rights.** ORS 758.210 to 758.270 are supplemental and cumulative of existing rights, laws, charters, ordinances and franchises and shall not abrogate or modify any franchise granted to a utility by any local government or abrogate or modify in any way existing rights, laws, charters or ordinances of any local government. [1969 c.385 §13]

#### LIABILITY OF ELECTRIC UTILITY FOR PRUNING AND REMOVING VEGETATION

**758.280 Definitions for ORS 758.280 to 758.286.** For the purposes of ORS 758.280 to 758.286:

(1) "Electric facilities" means lines, conduits, ducts, poles, wires, pipes, conductors, cables, crossarms, receivers, transmitters, transformers, instruments, machines, appliances and all other devices and apparatuses used, operated, owned or controlled by an electric utility for the purposes of manufacturing, transforming, transmitting, distributing, selling or furnishing electricity.

(2) "Electric utility" has the meaning given that term in ORS 758.505.

(3) "Vegetation" means trees, shrubs, vines and all other plants. [2001 c.420 §1]

**Note:** 758.280 to 758.286 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 758 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**758.282 Immunity of electric utility for pruning or removing vegetation in certain cases.** (1) An electric utility is immune from any civil liability for pruning or removing vegetation that is growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located, if the pruning or removal is consistent with policies of the Public Utility Commission relating to the pruning or removal of vegetation, or is consistent with a local ordinance or resolution applicable to the property that relates to the pruning or removal of vegetation, and:

(a) The vegetation has come in contact with or caused damage to electric facilities; or

(b) Pruning or removing the vegetation is necessary to protect life or property or to restore electric service.

(2) ORS 105.810 and 105.815 do not apply to any claim against an electric utility based on the pruning or removal of vegetation growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located. [2001 c.420 §2]

**Note:** See note under 758.280.

**758.284 Immunity of electric utility for pruning or removing vegetation in other cases; notice to property owner.** (1) An electric utility is immune from any civil liability for pruning or removing vegetation that is growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located, if the pruning or removal is consistent with policies of the Public Utility Commission relating to the pruning or removal of vegetation, or is consistent with a local ordinance or resolution applicable to the property that relates to the pruning or removal of vegetation, and any of the following apply:

(a) The vegetation to be pruned or removed is hanging over electric facilities or growing in such close proximity to overhead electric facilities that the vegetation constitutes an electrical hazard under any electrical safety code adopted by the Public Utility Commission or constitutes a danger under state or federal health and safety codes to a person working on the facilities or with access to the facilities.

(b) The vegetation to be removed is diseased, dead or dying or is close enough to electric facilities that pruning or removal of the vegetation is necessary to avoid contact between the vegetation and electric facilities. A determination under this paragraph must be made by a qualified forester or arborist if

a local ordinance or resolution requires that such determinations be made by a qualified forester or arborist.

(c) The vegetation is of such size, condition and proximity to electric facilities that the vegetation can reasonably be expected to cause damage to electric facilities in the future. A determination under this paragraph must be made by a qualified forester or arborist if a local ordinance or resolution requires that such determinations be made by a qualified forester or arborist.

(2) The limitation on liability provided by this section does not apply unless the electric utility has provided notice to owners of the property where the vegetation is located. Notice may be provided by posting a flyer in a conspicuous location on the property where the vegetation is located. The flyer must:

(a) Indicate that the electric utility intends to prune or remove vegetation on the property;

(b) Include a brief statement of the nature of the work to be performed and the reason the work is needed;

(c) Include an estimate of the time period during which the work will occur; and

(d) Provide information on how the electric utility can be contacted.

(3) The limitation on liability provided by this section does not apply unless the pruning or removal complies with rules adopted by the Public Utility Commission relating to pruning or removal. In adopting rules, the commission shall give consideration to the American National Standard for Tree Care Operations adopted by the American National Standards Institute. [2001 c.420 §3]

**Note:** See note under 758.280.

**758.286 Immunity not applicable to liability for cost of abating fires.** The immunities provided by ORS 758.280 to 758.284 do not affect any liability that an electric utility may have for the costs of abating fires under ORS 477.064 to 477.120. [2001 c.420 §4]

**Note:** See note under 758.280.

## WATER UTILITIES

**758.300 Definitions for ORS 758.300 to 758.320.** As used in ORS 758.300 to 758.320:

(1) “Commission” means the Public Utility Commission.

(2) “Community water supply system” means a water source and distribution system, whether publicly or privately owned, that serves more than three residences or other users to whom water is provided for public consumption, including but not limited to schools, farm labor camps, industrial establishments, recreational facilities, restau-

rants, motels, mobile home parks or group care homes.

(3) “Water utility” means any corporation, company, individual or association of individuals, or its lessees, trustees or receivers, that owns, operates, manages or controls all or a part of any plant or equipment in this state for the production, transmission, delivery or furnishing of water, directly or indirectly to or for the public, whether or not such plant or equipment or part thereof is wholly within any town or city. “Water utility” does not include a municipal corporation. [1999 c.695 §1]

**Note:** 758.300 to 758.320 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 758 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**758.302 Application for exclusive service territory; hearing on application; notice.** (1) A water utility may apply to the Public Utility Commission for an order designating an area as an exclusive service territory for the water utility. The commission may designate as an exclusive service territory any area that on the date of application is being served in an adequate manner by the applicant and is not being served by any other water provider.

(2) In addition to the area described in subsection (1) of this section, a private water utility may apply for inclusion in an exclusive service territory designated for the private water utility any area adjacent to the area described in subsection (1) of this section if:

(a) The applicant plans to extend service to the adjacent area in the six months immediately following the date of the application;

(b) The adjacent area is not being served by any other water provider; and

(c) The applicant demonstrates that it is more economical and feasible to provide services to the adjacent area by an extension of the applicant’s existing facilities than by an extension of the facilities of another water provider or community water supply system.

(3) An application under this section must be made on forms provided by the commission, contain all information required by commission rule and include a copy of the notice of the filing to be given to all customers of record. The applicant shall, within 30 days after filing an application under this section, give notice of the filing in the manner provided by subsection (5) of this section.

(4) Within 30 days after the filing of an application under this section, the commission shall give notice of the filing to all

other water providers in the areas adjacent to the area described in the application.

(5)(a) A notice given pursuant to this subsection shall be given:

(A) By mail or electronic mail to all customers of record of the water utility in the area described in the application;

(B) By press release to news media local to the area described in the application; and

(C) By publication in one or more newspapers of general circulation in the area described in the application at least once weekly for two successive weeks.

(b) The notice must describe the area of the proposed exclusive service territory and the general rate impact to existing customers.

(6) If the commission, on its own motion, chooses, or if any customer or customers of the water utility request a hearing on the application within 30 days of the date notice is given under subsection (3) of this section, the commission shall hold a hearing. The commission shall give notice of the time and place of the hearing in the manner provided by subsection (5) of this section. If the hearing is held by reason of a customer's request, the commission shall give notice of the hearing within 30 days after the request is received by the commission. The hearing shall be held at a place within or conveniently accessible to the area described in the application.

(7) The commission may make such investigations relating to an application under this section as the commission deems proper, including physical examination and evaluation of the facilities and systems of the applicant, estimates of their operating costs and revenues, and studies of such other information as the commission deems relevant.

(8) The commission shall enter an order granting or denying an application for an exclusive service territory under this section. The order must contain findings of fact supporting the order. The commission may grant an application subject to such conditions and limitations as the commission deems appropriate.

(9) ORS 756.500 to 756.610 govern the conduct of hearings under this section and any appeal of the commission's order.

(10) If the commission considers competing applications under subsection (2) of this section to extend exclusive service to the same area, there is a disputable presumption that applicants have an equal ability to extend, improve, enlarge, build, operate and maintain existing or proposed facilities. [1999 c.695 §2; 2003 c.202 §4; 2023 c.53 §3]

**Note:** See note under 758.300.

#### **758.305 Exclusive service territories.**

(1) Designated service territories of a water utility approved by the Public Utility Commission shall be exclusive. A water utility or community water supply system shall not provide water utility service within the designated exclusive service territory of another water utility without the express approval of the commission.

(2) A water utility shall serve only customers within its designated exclusive service territory and shall serve all applicants for service within its designated territory. The water utility may refuse service only as provided by commission rule.

(3) Upon petition by the water utility for an order, or by the commission on its own motion, a designated service territory may be expanded to include unserved areas. In reviewing a petition, the commission shall consider at least the current ability of the water utility to serve the expanded area, the demand for service in the expanded area, the impact on existing customers and the availability of alternative service. The commission may take other factors into consideration as prescribed by commission rule. Notice and hearing of the proposed expansion shall be given as provided in ORS 758.302.

(4) Upon petition by the water utility or a customer of the utility for an order, or by the commission on its own motion, a designated exclusive service territory may be decreased upon a showing that the water utility is not providing adequate service to its customers or does not have the capacity to serve the designated area. Notice of the proposed decrease of service territory shall be given as provided in ORS 758.302. [1999 c.695 §6]

**Note:** See note under 758.300.

#### **758.310 Assignment or transfer of rights in exclusive service territory; approval of commission.**

(1) The rights acquired by the designation of an exclusive service territory may be assigned or transferred only with the approval of the Public Utility Commission after a finding that the assignment or transfer is in the public interest. However, a hearing is not required if at least 75 percent of the affected customers agree to the proposed assignment or transfer.

(2) An order designating an exclusive service territory shall not be construed to confer any property right. However, upon the death of an applicant under an approved designation, the executor or administrator shall continue operating the water utility for the purpose of transferring such rights for a period not to exceed two years from the date of death.

(3) The territory served by a water utility under an order of the commission designating exclusive service territory shall not be altered solely as the result of a change in ownership or form of ownership. [1999 c.695 §5]

**Note:** See note under 758.300.

**758.315 Water utility service provided by persons not designated by commission; remedy.** In the event a designated exclusive service territory is served by a person not authorized by the Public Utility Commission, the commission or the water utility designated by the commission to serve the area may file an action for injunctive relief in the circuit court for any county where some or all of the designated service territory is located. The action shall proceed as in an action not triable by right to a jury. Any party to the action may appeal to the Court of Appeals from the trial court's order. An injunction ordered under this section shall be in addition to any other remedy provided by law. [1999 c.695 §7]

**Note:** See note under 758.300.

**758.320 Application of ORS 758.300 to 758.320 to cities; effect on certain voluntary associations; existing franchise; exception.** (1) The provisions of ORS 758.300 to 758.320 shall not be construed to restrict the powers granted to cities to issue franchises or to restrict the powers of condemnation of a municipality.

(2) The provisions of ORS 758.300 to 758.320 shall not be construed to restrict the formation of homeowners associations pursuant to ORS chapter 94, cooperatives pursuant to ORS chapter 62 or districts pursuant to ORS chapter 198 within the designated exclusive service territory of a water utility. A homeowners association, cooperative or district may petition the Public Utility Commission for an order excluding the association, cooperative or district from the exclusive service territory of a water utility. Upon a showing by the association, cooperative or district that exclusion is not detrimental to the public interest, the commission may issue an order excluding the association, cooperative or district from the exclusive service territory of a water utility.

(3) The commission shall recognize the service territories of a water utility that has an existing franchise on October 23, 1999, with a municipality as exclusive service territories. Upon application as provided in ORS 758.302, any such water utility may request an order from the commission to designate exclusive service territories in addition to those identified in the franchise agreement if the water utility is providing adequate and exclusive service to areas outside the areas identified in the franchise agreement.

(4) A district, as defined in ORS 198.010, that provides water utility service shall be exempt from the requirements of ORS 758.302. However, upon request of the commission, the district shall provide to the commission a map of its service territory and shall in all other respects comply with the requirements of ORS 758.300 to 758.320. [1999 c.695 §8; 2003 c.202 §6]

**Note:** See note under 758.300.

### **ELECTRIC AND GAS UTILITIES; ALLOCATION OF TERRITORIES AND CUSTOMERS**

**758.400 Definitions for ORS 758.015 and 758.400 to 758.475.** As used in ORS 758.015 and 758.400 to 758.475 unless the context requires otherwise:

(1) "Allocated territory" means an area with boundaries established by a contract between persons furnishing a similar utility service and approved by the Public Utility Commission or established by an order of the commission approving an application for the allocation of territory.

(2) "Person" includes individuals, firms, partnerships, corporations, associations, cooperatives and municipalities, or their agent, lessee, trustee or referee.

(3) "Utility service" means service provided by any equipment, plant or facility for the distribution of electricity to users or the distribution of natural or manufactured gas to consumers through a connected and inter-related distribution system. "Utility service" does not include service provided through or by the use of any equipment, plant or facilities for the production or transmission of electricity or gas which pass through or over but are not used to provide service in or do not terminate in an area allocated to another person providing a similar utility service. [Formerly 757.605; 1979 c.62 §2; 1985 c.550 §8; 1987 c.447 §101; 1999 c.59 §232]

**758.405 Purpose of ORS 758.400 to 758.475.** The elimination and future prevention of duplication of utility facilities is a matter of statewide concern; and in order to promote the efficient and economic use and development and the safety of operation of utility services while providing adequate and reasonable service to all territories and customers affected thereby, it is necessary to regulate in the manner provided in ORS 758.400 to 758.475 all persons and entities providing utility services. [Formerly 757.610]

**758.410 Contracts for allocation of territories and customers; transfer of facilities.** (1) Any person providing a utility service may contract with any other person providing a similar utility service for the purpose of allocating territories and customers between the parties and designating

which territories and customers are to be served by which of said contracting parties; and the territories and customers so allocated and designated may include all or any portion of the territories and customers which are being served by either or both of the parties at the time the contract is entered into, or which could be economically served by the then existing facilities of either party, or by reasonable and economic extensions thereto.

(2) Any such contracting parties may also contract in writing for the sale, exchange, transfer, or lease of equipment or facilities located within territory which is the subject of the allocation agreed upon pursuant to subsection (1) of this section. Any sale, exchange, transfer or lease of equipment, plant or facilities made pursuant to this subsection by any person which is a "public utility" as defined in ORS 757.005 is also subject to the approval of the Public Utility Commission to the extent required by ORS chapter 757.

(3) The commission may approve a contract entered into under this section that authorizes Coos County to construct a natural gas pipeline into allocated territory in Coos County and that contains terms for the allocation of industrial customers in Coos County between the county and the other party to the contract. The contract need not specify the territory in which industrial customers subject to the allocation are located. The commission may approve the provisions of a contract under this subsection that govern allocation of industrial customers only if the commission determines that the provisions promote the purposes specified in ORS 758.405. The commission shall actively supervise the implementation of any contract entered into pursuant to this subsection to ensure that the contract continues to promote the purposes specified in ORS 758.405. [Formerly 757.615; 2003 c.32 §1; 2023 c.53 §5]

**758.415 Enforceability of contract approved by commission; conditions for approval.** Notwithstanding any other provisions of law, a contract entered into pursuant to ORS 758.410, when approved by the Public Utility Commission as provided in ORS 758.420 to 758.475, shall be valid and enforceable; provided, that the commission shall approve such a contract only if the commission finds, after a hearing as provided in ORS 758.420 to 758.475, that the contract will eliminate or avoid unnecessary duplicating facilities, and will promote the efficient and economic use and development and the safety of operation of the utility systems of the parties to the contract, while providing adequate and reasonable service to all territories and customers affected thereby. [Formerly 757.620]

**758.420 Filing of contract; hearing on contract; notice.** (1) A person who enters into a contract pursuant to ORS 758.410 shall promptly file the contract with the Public Utility Commission. A contract filed under this section must include a copy of the notice of the filing to be given to all customers of record, and the person shall, within 30 days after filing a contract under this section, give notice of the filing in the manner provided by subsection (3) of this section.

(2) If the commission chooses or if any customer or customers request a hearing on the matter within 30 days of the notice, the commission shall hold a hearing by telephone, video conference or other electronic means of communication or in person. The commission shall give notice of such hearing in the manner provided by subsection (3) of this section within 30 days of the customer's request. The notice shall set the date and place of hearing on the question as to whether or not such contract will be approved. The hearing shall be held at a place within or conveniently accessible to the territories affected by the contract.

(3)(a) A notice given under this section shall be given:

(A) By mail or electronic mail to all customers of record affected by the contract;

(B) By press release to news media local to the area affected by the contract; and

(C) By publication in one or more newspapers of general circulation in the area affected by the contract at least once weekly for two successive weeks.

**758.425 Order of commission on contract.** (1) On the basis of the applicant's filing or, if there is a hearing, on the record made at the hearing held pursuant to ORS 758.420, the Public Utility Commission shall enter an order either approving or disapproving the contract as filed, together with any appropriate findings of the facts supporting such order.

(2) An order of the commission under this section is subject to judicial review in the manner provided by ORS 756.610.

(3) If the commission approves a contract and a petition for judicial review is not filed, the contract shall be deemed to be valid and enforceable for all purposes from the date on which the right to file a petition for judicial review expires. [Formerly 757.630; 1985 c.633 §4; 2005 c.638 §13; 2017 c.312 §8]

**758.430 Amendment of contract; approval of commission.** Any contract that has been approved as provided in ORS 758.400 to 758.475 may be subsequently amended by the parties thereto, but any such amendatory agreement shall be filed with the Public Utility Commission and shall thereafter be approved or disapproved by the commission in the manner provided in ORS 758.420 and 758.425. However, no hearing is required if all affected customers approve the amendatory agreement. An amendatory agreement may be enforced in the manner provided in ORS 758.465. [Formerly 757.635; 1983 c.540 §5]

**758.435 Application for allocation of territory; hearing on application; notice.**

(1) Any person providing a utility service in a territory that is not served by another person providing a similar utility service may file an application with the Public Utility Commission for an order allocating such territory to the person providing the utility service. The application may include any adjacent area when it is more economical and feasible to serve the adjacent area by an extension of the applicant's existing facilities than by an extension of the facilities of another person. An application must include a copy of the notice of the filing to be given to all customers of record, and the applicant shall, within 30 days after filing an application under this section, give notice of the filing in the manner provided by subsection (4) of this section.

(2) Within 30 days after the filing of an application under this section, the commission shall give notice of the filing to all providers of similar utility services in the areas adjacent to the area covered by the application.

(3) If the commission chooses, or if a customer requests a hearing on the matter within 30 days of the notice, the commission shall hold a hearing by telephone, video conference or other electronic means of communication or in person. The commission shall give notice of the hearing in the manner provided by subsection (4) of this section within 30 days of the request. The notice shall set the date and place of hearing. The hearing shall be held at a place within or conveniently accessible to the territory covered by the application.

(4)(a) A notice given pursuant to this subsection shall be given:

(A) By mail or electronic mail to all customers of record in the area covered by the application;

(B) By press release to news media local to the area covered by the application; and

(C) By publication in one or more newspapers of general circulation in the area covered by the application at least once weekly for two successive weeks.

(b) The notice must include a description of the area covered by the application and the general rate impact to existing customers.

(5) Territory within the limits of a city, as fixed on May 31, 1961, shall not be deemed to be served exclusively by any person, if such city is, on such date, served by more than one person having necessary municipal or franchise authority to serve within the entire city. [Formerly 757.640; 1985 c.633 §1; 2023 c.53 §6]

**758.440 Order of commission on application.**

(1) On the basis of the application, or, if there is a hearing, on the record made at the hearing held pursuant to ORS 758.435, the Public Utility Commission shall enter an order either approving or disapproving the application as filed, or as amended, together with findings of the facts supporting such order.

(2) The commission, before approving an application for the allocation of territory, shall find that the applicant is exclusively serving the territory covered by the application and in the case of an adjacent unserved area that it is more economical and feasible to serve by an extension of the applicant's existing facilities than by an extension of the facilities of another person. [Formerly 757.645; 1985 c.633 §2]

**758.445 Judicial review of order on application.**

An order of the Public Utility Commission under ORS 758.440 is subject to judicial review in the manner provided by ORS 756.610. If a petition for judicial review is not filed within the specified time, the order shall thereafter be valid and enforceable for the purposes herein specified from the date on which the right to file a petition for judicial review expires. [Formerly 757.650; 2005 c.638 §14; 2017 c.312 §9]

**758.450 Contract required for allocation of territory; prohibited activities; exceptions; third party financing.**

(1) Territory served by more than one person providing similar utility service may only become an allocated territory by a contract approved by the Public Utility Commission.

(2) Except as provided in subsection (4) of this section, no other person shall offer, construct or extend utility service in or into an allocated territory.

(3) Except as provided in subsection (4) of this section, during the pendency of an application for an allocation of exclusively served territory, no person other than applicant shall offer, construct or extend utility

service in or into the territory applied for; nor shall any person, without the express consent of the commission, offer, construct or extend utility service in or into any unserved territory which is the subject of a filing pending before the commission under ORS 758.420 or 758.435.

(4) The provisions of ORS 758.400 to 758.475 do not apply to any corporation, company, individual or association of individuals providing heat, light or power:

(a) From any energy resource to fewer than 20 customers, if it began providing service to a customer prior to July 14, 1985;

(b) From any energy resource to fewer than 20 residential customers so long as the corporation, company, individual or association of individuals serves only residential customers;

(c) From solar or wind resources to any number of customers; or

(d) From biogas, waste heat or geothermal resources for nonelectric generation purposes to any number of customers.

(5) Nothing in subsection (4) of this section shall prohibit third party financing of acquisition or development by a utility customer of energy resources to meet the heat, light or power requirements of that customer. [Formerly 757.652; 1981 c.360 §2; 1985 c.779 §2]

**758.455 Investigation by commission respecting contracts or applications; hearing procedure.** (1) The Public Utility Commission may make such investigations respecting a contract or an application for the allocation of territory as the commission deems proper including the physical examinations and evaluations of the facilities and systems of the parties to the contract, estimates of their operating costs and revenues and studies of such other information as the commission deems pertinent.

(2) Insofar as applicable and consistent herewith, the provisions of ORS 756.500 to 756.610 shall govern the conduct of hearings.

(3) In considering competing applications to serve the same territory, there shall be a disputable presumption that applicants have an equal ability to extend, improve, enlarge, build, operate and maintain existing or proposed facilities. [Formerly 757.655]

**758.460 Assignment or transfer of rights acquired by allocation; approval of commission.** (1) The rights acquired by an allocation of territory may only be assigned or transferred with the approval of the Public Utility Commission after a finding that such assignment or transfer is not contrary to the public interest. However, no hearing is required if all affected customers agree to the proposed assignment or transfer.

(2) No approved contract or order approving an allocation of territory shall be construed to confer any property right; providing, however, upon the death of an individual who is a party to an approved contract or the applicant under an approved order, the executor or administrator shall continue the operation thereunder for the purpose of transferring such rights for a period of not to exceed two years from the date of death.

(3) In the event the property of a person serving an allocated territory is condemned, no value shall be claimed or awarded by reason of the contract or order making such allocation. [Formerly 757.670; 1983 c.540 §6]

**758.465 Enforcement procedure.** In the event a contract approved by the Public Utility Commission is breached or in the event an allocated territory is served by a person not authorized by such contract, or order of the commission, the aggrieved person or the commission may file an action in the circuit court for any county in which is located some or all of the allocated territory allegedly involved in said breach or invasion, for an injunction against said alleged breach or invasion. The trial of such action shall proceed as in an action not triable by right to a jury. Any party may appeal to the Court of Appeals from the court's judgment, as in other equity cases. The remedy provided in this section shall be in addition to any other remedy provided by law. [Formerly 757.675; 1979 c.284 §198; 2003 c.576 §561]

**758.470 Application to cities, municipalities and cooperatives of ORS 758.400 to 758.475.** (1) ORS 758.015 and 758.400 to 758.475 shall not be construed or applied to restrict the powers granted to cities to issue franchises, or to restrict the exercise of the power of condemnation by a municipality; and when a municipality has condemned or otherwise acquired another person's equipment, plant or facilities for rendering utility service, it shall acquire all of the rights of the person whose property is condemned to serve the territory served by the acquired properties.

(2) ORS 758.015 and 758.400 to 758.475 shall not be construed to restrict the right of a municipality to provide utility service for street lights, fire alarm systems, airports, buildings and other municipal installations regardless of their location.

(3) ORS 758.015 and 758.400 to 758.475 shall not be construed to confer upon the Public Utility Commission any regulatory authority over rates, service or financing of cooperatives or municipalities. [Formerly 757.680]

**758.475 Fees.** Except in cases under ORS 758.430 and 758.460 where no hearing is required, to cover the costs of administering ORS 758.015 and 758.400 to 758.475 the Public Utility Commission is required to receive fees before filing any contract, application, petition, complaint, protest, appearance, motion, answer or other pleading and for holding any hearing. ### TROJAN NUCLEAR PLANT

**758.480 Assumption of obligations arising out of Trojan Nuclear Plant.** (1) As used in this section:

(a) "Agreement" means the agreement dated October 5, 1970, and titled "Agreement for Construction, Ownership and Operation of the Trojan Nuclear Plant," as amended.

(b) "Allocated territory" has the meaning given that term in ORS 758.400.

(c) "Person" means:

(A) A person as defined in ORS 174.100;

(B) A person as defined in ORS 758.400;

(2) Any person acquiring all or a portion of any allocated territory of the Portland General Electric Company, or acquiring the right to provide utility service within the allocated territory of the Portland General Electric Company, shall assume a share of Trojan obligations that is proportionate to the total amount of allocated territory or the percentage of retail customer load for which the person has acquired the right to provide utility service, whichever is greater.

(5) The obligations imposed by subsection (2) of this section do not apply to any person acquiring allocated territory or customers of the Portland General Electric Company when:

### COGENERATION AND SMALL POWER PRODUCTION FACILITIES

**758.505 Definitions for ORS 758.505 to 758.555.** As used in ORS 758.505 to 758.555:

(1) "Avoided cost" means the incremental cost to an electric utility of electric energy or energy and capacity that the utility would

generate itself or purchase from another source but for the purchase from a qualifying facility.

(2) “Cogeneration facility” means a facility that:

(a) Produces, through the sequential use of energy, electric energy and useful thermal energy including but not limited to heat or steam, used for industrial, commercial, heating or cooling purposes; and

(b) Is more than 50 percent owned by a person who is not an electric utility, an electric holding company, an affiliated interest or any combination thereof.

(3) “Commission” means the Public Utility Commission.

(4) “Electric utility” means a nonregulated utility or a public utility.

(5) “Index rate” means the lowest avoided cost approved by the commission for a generating utility for the purchase of energy or energy and capacity of similar characteristics including online date, duration of obligation and quality and degree of reliability.

(6) “Nonregulated utility” means an entity providing retail electric utility service to Oregon consumers that is a people’s utility district organized under ORS chapter 261, a municipal utility operating under ORS chapter 225 or an electric cooperative organized under ORS chapter 62.

(7) “Public utility” means a utility regulated by the commission under ORS chapter 757, that provides electric power to consumers.

(8) “Qualifying facility” means a cogeneration facility or a small power production facility.

(9) “Small power production facility” means a facility that:

(a) Produces energy primarily by the use of biomass, waste, solar energy, wind power, water power, geothermal energy or any combination thereof;

(b) Is more than 50 percent owned by a person who is not an electric utility, an electric utility holding company, an affiliated interest or any combination thereof; and

(c) Has a power production capacity that, together with any other small power production facility located at the same site and owned by the same person, is not greater than 80 megawatts. [1983 c.799 §1]

**758.510** [1979 c.730 §3; 1981 c.714 §2; repealed by 1981 c.714 §7 and by 1983 c.799 §9]

**758.515 Legislative findings.** The Legislative Assembly finds and declares that:

(1) The State of Oregon has abundant renewable resources.

(2) It is the goal of Oregon to:

(a) Promote the development of a diverse array of permanently sustainable energy resources using the public and private sectors to the highest degree possible; and

(b) Insure that rates for purchases by an electric utility from, and rates for sales to, a qualifying facility shall over the term of a contract be just and reasonable to the electric consumers of the electric utility, the qualifying facility and in the public interest.

(3) It is, therefore, the policy of the State of Oregon to:

(a) Increase the marketability of electric energy produced by qualifying facilities located throughout the state for the benefit of Oregon’s citizens; and

(b) Create a settled and uniform institutional climate for the qualifying facilities in Oregon. [1983 c.799 §2]

**758.520** [1979 c.730 §4; 1981 c.714 §3; repealed by 1981 c.714 §9 and by 1983 c.799 §9]

**758.525 Avoided cost schedules; filing; requirement to purchase energy from qualifying facilities.** (1) At least once every two years each electric utility shall prepare, publish and file with the Public Utility Commission a schedule of avoided costs equaling the utility’s forecasted incremental cost of electric resources over at least the next 20 years. Prices contained in the schedules filed by public utilities shall be reviewed and approved by the commission.

(2) An electric utility shall offer to purchase energy or energy and capacity whether delivered directly or indirectly from a qualifying facility. Except as provided in subsection (3) of this section, the price for such a purchase shall not be less than the utility’s avoided costs. At the option of the qualifying facility, exercised before beginning delivery of the energy or energy and capacity, such prices may be based on:

(a) The avoided costs calculated at the time of delivery; or

(b) The projected avoided costs calculated at the time the legal obligation to purchase the energy or energy and capacity is incurred.

(3) Nothing contained in ORS 543.610, 757.005 and 758.505 to 758.555 shall be construed to require an electric utility to pay full avoided-cost prices for a purchase from a qualifying facility on which construction began before November 8, 1978, but the price for a purchase from such a facility shall be sufficient to encourage production of energy or energy and capacity.

(4) The rates of an electric utility for the sale of electricity shall not discriminate against qualifying facilities. [1983 c.799 §3]

**758.530** [1979 c.730 §5; 1981 c.714 §4; repealed by 1981 c.714 §11 and by 1983 c.799 §9]

**758.535 Criteria for qualifying facility; terms and conditions of energy sale.** (1) The Public Utility Commission shall establish minimum criteria that a cogeneration facility or small power production facility must meet to qualify as a qualifying facility under ORS 543.610, 757.005 and 758.505 to 758.555.

(2) The terms and conditions for the purchase of energy or energy and capacity from a qualifying facility shall:

(a) Be established by rule by the commission if the purchase is by a public utility;

(b) Be adopted by an electric cooperative or people's utility district according to the applicable provision of ORS chapter 62 or 261; and

(c) Be established by a municipal utility according to the requirements of the municipality's charter and ordinance.

(3) The rules or policies adopted under subsection (2) of this section also shall:

(a) Establish safety and operating requirements necessary to adequately protect all systems, facilities and equipment of the electric utility and qualifying facility;

(b) Be consistent with applicable standards required by the Public Utility Regulatory Policies Act of 1978 (P.L. 95-617); and

(c) Be made available to the public at the commission's office. [1983 c.799 §4]

**758.540** [1979 c.730 §6; repealed by 1981 c.714 §13]

**758.545 Electric utility required to make good faith effort to transmit energy; remedy.** (1) If an electric utility fails to make a good faith effort to comply with a request from a qualifying facility to transmit energy or energy and capacity produced by the qualifying facility to another electric utility or to the Bonneville Power Administration, the electric utility shall purchase the

qualifying facility's energy or energy and capacity at a price which is the higher of:

(a) The electric utility's avoided cost; or

(b) The index rate.

(2) As used in this section, "good faith effort" shall be demonstrated by the electric utility's publication of a generally applicable, reasonable policy of the electric utility to allow a qualifying facility to use the electric utility's transmission facilities on a cost-related basis. [1983 c.799 §5]

**758.550** [1979 c.730 §7; repealed by 1983 c.799 §9]

**758.552 Ownership of renewable energy certificates for energy generated by qualifying facility.** (1) For contracts executed pursuant to the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.) and in effect prior to November 30, 2005, renewable energy certificates created pursuant to a system established by the State Department of Energy under ORS 469A.130, for generation during the term of such a contract, are owned by the owner of a qualifying facility, unless the owner has transferred a certificate in a contract between the owner and another person.

(2) Subsection (1) of this section applies to qualifying facilities that:

(a) Are located in this state;

(b) Are certified as qualifying small power production facilities or qualifying cogeneration facilities under the Federal Power Act (16 U.S.C. 796) as in effect on June 7, 2011; and

(c) Produce electricity that is priced under ORS 758.525. [2011 c.248 §2]

**758.555 Effect of energy sales on qualifying facility.** A qualifying facility shall not become a public utility within the meaning of ORS 757.005 on account of sales made under ORS 543.610, 757.005 and 758.505 to 758.555. [1983 c.799 §6]

**GENERAL PROVISIONS**

**759.005 Definitions.** As used in this chapter:

(1) “Competitive telecommunications provider” means a telecommunications services provider that has been classified as a competitive telecommunications provider by the Public Utility Commission pursuant to ORS 759.020.

(2) “Intrastate telecommunications service” means any telecommunications service in which the information transmitted originates and terminates within the boundaries of the State of Oregon.

(3) “Local exchange telecommunications service” means telecommunications service provided within the boundaries of exchange maps filed with and approved by the commission.

(4) “Private telecommunications network” means a system for the provision of telecommunications service or any portion of telecommunications service, including the construction, maintenance or operation of the system, by a person for the exclusive use of that person and not for resale, directly or indirectly.

(5) “Radio common carrier” means any corporation, company, association, joint stock association, partnership and person, their lessees, trustees or receivers and any town making available facilities to provide radio communications service, radio paging or cellular communications service for hire.

(6) “Shared telecommunications service” means the provision of telecommunications and information management services and equipment to a user group located in discrete premises in building complexes, campuses or high-rise buildings, by a commercial shared services provider or by a users’ association, through privately owned customer premises equipment and associated data processing and information management services and includes the provision of connections to local exchange telecommunications service.

(7) “Telecommunications” means the transmission of information chosen by a person, between or among points specified by the person, without change in the form or content of the information sent or received.

(8) “Telecommunications service” means telecommunications that are offered for a fee to the public, or to such class of users as to be effectively available to the public, without regard to the facilities used to provide the telecommunications. “Telecommunications service” does not include:

(a) Services provided by radio common carrier.

(b) One-way transmission of television signals.

(c) Private telecommunications networks.

(d) Communications of the customer that take place on the customer side of on-premises equipment.

(9)(a) “Telecommunications utility” means:

(A) Any corporation, company, individual or association of individuals, or its lessees, trustees or receivers, that owns, operates, manages or controls all or a part of any plant or equipment in this state for the provision of telecommunications service, directly or indirectly to or for the public, whether or not the plant or equipment, or any portion of the plant or equipment, is wholly within any town or city.

(B) Any corporation, company, individual or association of individuals that is party to an oral or written agreement for the payment by a telecommunications utility, for service, managerial construction, engineering or financing fees, and has an affiliated interest with the telecommunications utility.

(b) “Telecommunications utility” does not include:

(A) Any plant owned or operated by a municipality.

(B) Any corporation not providing intrastate telecommunications service to the public in this state, whether or not the corporation has an office in this state or has an affiliated interest with a telecommunications utility as defined in this chapter.

(C) Any person acting only as a competitive telecommunications provider.

(D) Any corporation, company, individual or association of individuals providing only telephone customer premises equipment to the public.

(10) “Toll” means switched telecommunications between exchanges carried on the public switched network. “Toll” does not include services that are an option to flat rate local or extended area service, even though the options may include charges on a per-unit basis. [1987 c.447 §1; 1989 c.5 §15; 1991 c.326 §2; 2005 c.232 §1; 2007 c.825 §1]

**759.010** [1987 c.447 §2; 1989 c.17 §2; repealed by 2005 c.232 §2]

**759.015 Legislative findings on universal telecommunications service.** The Legislative Assembly finds and declares that it is the goal of the State of Oregon to secure and maintain high-quality universal telecommunications service at just and reasonable rates for all classes of customers and to encourage innovation within the industry by a balanced program of regulation and competition. The Public Utility Commission shall

administer the statutes with respect to telecommunications rates and services in accordance with this policy. [Formerly 757.810]

**759.016 Legislative findings on broadband services.** The Legislative Assembly finds and declares:

(1) That it is the goal of this state to promote access to broadband services for all Oregonians in order to improve the economy in Oregon, improve the quality of life in Oregon communities and reduce the economic gap between Oregon communities that have access to broadband digital applications and services and those that do not, for both present and future generations; and

(2) That the goal set forth in subsection (1) of this section may be achieved by:

(a) Expanding broadband and other telecommunications services;

(b) Creating incentives to establish and expand broadband and other telecommunications services;

(c) Undertaking telecommunications planning at the local, regional and state levels that includes participants from both the public and the private sectors;

(d) Removing barriers to the full deployment of broadband digital applications and services and providing incentives for the removal of those barriers; and

(e) Removing barriers to public-private partnerships in areas where the private sector cannot justify investments. [2003 c.775 §1]

**Note:** 759.016 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 759 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**759.020 Certificate of authority; application; procedure; criteria; intrastate toll service level; rules.** (1) A person, corporation, company or association of individuals or their lessees, trustees or receivers may not provide intrastate telecommunications service on a for-hire basis without a certificate of authority issued by the Public Utility Commission under this section.

(2) Applications for certificates of authority must be in a form prescribed by the commission and must describe the telecommunications services the applicant proposes to provide.

(3)(a) Except as provided in ORS 759.050, a certificate may not authorize any person to provide local exchange telecommunications service within the local exchange telecommunications service area of a telecommunications utility unless the utility consents, is unable to provide the service or fails to protest an application.

(b) Paragraph (a) of this subsection does not apply to any application for a certificate by a provider of shared telecommunications services.

(4) A hearing need not be held prior to issuance of a certificate of authority except upon the commission's own motion or unless the application is to authorize a person to provide local exchange telecommunications service in the local exchange telecommunications service area of a telecommunications utility and the utility protests. After hearing, the commission shall issue the certificate only upon a showing that the proposed service is required by the public interest.

(5) The commission may classify a successful applicant for a certificate as a telecommunications utility or as a competitive telecommunications services provider. If the commission finds that a successful applicant for a certificate has demonstrated that services it offers are subject to competition or that its customers or those proposed to become customers have reasonably available alternatives, the commission shall classify the applicant as a competitive telecommunications services provider. The commission shall conduct the initial classification and any subsequent review of the classification in accordance with procedures the commission may establish by rule, after hearings. The commission may attach reasonable conditions to the classification and may amend or revoke any order as provided in ORS 756.568. For purposes of this section, in determining whether telecommunications services are subject to competition or whether there are reasonably available alternatives, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which the services of alternative providers are functionally equivalent or substitutable at comparable rates, terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission.

(6) Any provider of intrastate toll service must inform customers of the service level furnished by that provider, according to rules of the commission. The commission, by rule, shall determine the level of intrastate toll service that is standard. Any provider of intrastate toll service must identify the service level the provider plans to furnish in an annual report to the commission. The commission shall revoke the certification of any provider that does not consistently furnish the service level identified in the provider's

annual report. [Formerly 757.815; 1991 c.326 §1; 1993 c.423 §1; 2022 c.60 §9]

**759.025 Certificates of authority for persons, companies and corporations providing services on January 1, 1986.** (1) Notwithstanding ORS 759.020, the Public Utility Commission shall issue to any person, company or corporation providing intrastate telecommunications services that are subject to regulation by the commission on January 1, 1986, a certificate of authority to continue to provide those services on and after January 1, 1986.

(2) Notwithstanding any other provision of law, the commission shall issue to any cooperative corporation, or unincorporated association providing intrastate telecommunications service on January 1, 1986, a certificate of authority to continue to provide those services on and after January 1, 1986. Such actions shall not subject such cooperative corporations or association to the commission's general powers of regulation. [Formerly 757.820]

**759.027 Shared telecommunications service provider; alternative access to local exchange telecommunications services.** If the Public Utility Commission finds upon notice and investigation that customers of shared telecommunications services have no alternative access to local exchange telecommunications services, the commission may require the shared telecommunications service provider to make alternative facilities or conduit space available on reasonable terms and conditions and at reasonable prices. [2005 c.232 §5]

**759.030** [Formerly 757.825; 1991 c.301 §1; repealed by 2005 c.232 §6]

**759.035 Duty to furnish adequate and safe service at reasonable rates.** Every telecommunications utility is required to furnish adequate and safe service, equipment and facilities, and the charges made by any public utility for any service rendered or to be rendered in connection therewith shall be reasonable and just, and every unjust or unreasonable charge for such service is prohibited. [1987 c.447 §3]

## REGULATION OF TELECOMMUNICATIONS SERVICES

**759.036 Commission authority.** Except as otherwise provided by law, the Public Utility Commission shall have authority to determine the manner and extent of the regulation of telecommunications services within the State of Oregon. [2005 c.232 §7]

**759.040 Exemptions for certain unaffiliated utilities with fewer than 50,000 access lines.** (1) Subject to subsection (6) of this section, ORS 759.180 to 759.190 do not

apply to new or revised tariff schedules filed with the Public Utility Commission by telecommunications utilities or affiliated groups of telecommunications utilities serving fewer than 50,000 access lines in Oregon and not affiliated or under common control with any other kind of public utility providing service in Oregon.

(2) Subject to subsection (6) of this section, ORS 759.375 to 759.393 do not apply to telecommunications utilities or affiliated groups of telecommunications utilities serving fewer than 50,000 access lines in Oregon and not affiliated or under common control with any other kind of public utility providing service in Oregon.

(3) Subject to subsection (6) of this section, ORS 759.300 to 759.360 do not apply to telecommunications utilities or affiliated groups of telecommunications utilities serving fewer than 50,000 access lines in Oregon and not affiliated or under common control with any other kind of public utility providing service in Oregon.

(4) Upon petition by any telecommunications utility serving fewer than 50,000 access lines in Oregon and affiliated or under common control with another public utility providing service in Oregon, and a finding that such action is consistent with the public interest, the commission by order may exempt such telecommunications utility from:

- (a) ORS 759.180 to 759.190.
- (b) ORS 759.375 to 759.393.
- (c) ORS 759.300 to 759.360.

(5) Upon petition by any telecommunications utility serving fewer than 50,000 access lines in Oregon, and finding that such action is consistent with the public interest, the commission by order may exempt such telecommunications utility from ORS 759.175 and 759.205 to 759.215.

(6) Upon petition by the telecommunications utility or upon petition by 10 percent of the then current access line subscribers, or 500 subscribers, whichever is the lesser, of any telecommunications utility:

(a) Filed with the commission not less than 10 days prior to the proposed effective date of new or revised tariff schedules, the commission may impose all or part of the procedures of ORS 759.180 to 759.190 to any of the schedules of a telecommunications utility exempted from ORS 759.180 to 759.190 pursuant to this section.

(b) After notice and hearing and a finding that the action is required by the public interest, the commission may revoke any exemption granted pursuant to this section or impose reasonable conditions upon the continued exercise of the exemption.

(7) Any telecommunications utility for which an exemption from the application of ORS 759.180 to 759.190 is provided pursuant to this section shall notify its affected customers of any price increase for intrastate telecommunications services at least 45 days prior to the proposed effective date of the increase.

(8) Any telecommunications utility for which an exemption from the application of any statute is provided pursuant to this section shall file with the commission an annual report that includes copies of the income statement and balance sheet the telecommunications utility files with the Federal Communications Commission. Each telecommunications utility described in this subsection shall notify customers that the income statement and balance sheet are on file with the commission. [Formerly 757.870; 1999 c.451 §1; 2005 c.232 §12]

**759.045 Special rules for utilities exempted from regulation under ORS 759.040.** The Public Utility Commission shall adopt specific rules to apply to telecommunications utilities which are exempted from certain regulation under ORS 759.040. An objective of these rules shall be to minimize the regulatory burden on these utilities to the extent this objective is feasible and consistent with the public interest. These rules shall not pertain to the statutes from which these utilities are exempted under ORS 759.040. [1991 c.658 §2]

**759.050 Competitive zone service regulation.** (1) As used in this section:

(a) “Competitive zone” means a telecommunications service area within all or part of a local exchange, described both by service and territory, that has been designated a competitive zone by the Public Utility Commission under subsection (2) or (4) of this section.

(b) “Competitive zone service” means a local exchange telecommunications service that the commission has authorized to be provided within a competitive zone.

(c) “Essential function” means a functional component of a competitive zone service necessary to the provision of the service by a telecommunications provider for which there is no adequate alternative in terms of quality, quantity and price to the incumbent telecommunications utility.

(d) “Telecommunications utility” and “competitive provider” mean those entities that are classified as such by the commission under ORS 759.020. “Telecommunications provider” includes both telecommunications utilities and competitive providers.

(2)(a) Notwithstanding the provisions of ORS 759.020 (3), the commission may certify

one or more persons, including another telecommunications utility, to provide local exchange telecommunications service within the local exchange telecommunications service area of a certificated telecommunications utility if the commission determines that the authorization would be in the public interest. For the purpose of determining whether the authorization would be in the public interest, the commission shall consider:

(A) The effect on rates for local exchange telecommunications service customers both within and outside the competitive zone.

(B) The effect on competition in the local exchange telecommunications service area.

(C) The effect on access by customers to high quality, innovative telecommunications service in the local exchange telecommunications service area.

(D) Any other facts the commission considers relevant.

(b) Upon certification of a telecommunications provider under paragraph (a) of this subsection, the commission shall establish a competitive zone defined by the services to be provided by the telecommunications provider and the geographic area to be served by the telecommunications provider. Price and service competition within the meaning of ORS 759.052 may not be deemed to exist by virtue of the establishment of a competitive zone.

(c) At the time of certification of a telecommunications provider, or thereafter, the commission may impose reasonable conditions upon the authority of the telecommunications provider to provide competitive zone service within the competitive zone. Reasonable conditions include, but are not limited to, conditions:

(A) Designed to promote fair competition, such as interconnection; and

(B) Requiring contributions of the type required of a telecommunications utility on account of the provision of local exchange service, including those to the Residential Service Protection Fund or the Telecommunications Devices Access Program.

(3) Upon demand, a competitive provider of competitive zone services shall make available to the commission any information relating to competitive zone services that the commission requests. Information provided to the commission by a competitive provider under this subsection shall be confidential and may not be disclosed by the commission, except for regulatory purposes in the context of a proceeding before the commission.

(4) Upon application by a telecommunications utility and a showing of competition

within its local exchange, whether or not from certificated providers, the commission may designate all or part of the local exchange a competitive zone.

(5)(a) Except with respect to telecommunications utilities that are exempt from the provisions of ORS 759.180 to 759.190, unless the commission determines that it is not in the public interest at the time a competitive zone is created, upon designation of a competitive zone, price changes, service variations and modifications of competitive zone services offered by a telecommunications utility in the zone are not subject to ORS 759.180 to 759.190 and, at the telecommunication utility's discretion, may be made effective upon filing with the commission.

(b) The price and terms of service offered by a telecommunications utility for a competitive zone service within a competitive zone may differ from that outside of the zone. However, the price for a competitive zone service within the zone may not be lower than the total service long run incremental cost, for nonessential functions, of providing the service within the zone and the charges for essential functions used in providing the service, but the commission may establish rates for residential local exchange telecommunications service at any level necessary to achieve the commission's universal service objectives. Within the zone, the price of a competitive zone service, or any essential function used in providing the competitive zone service, may not be higher than those prices in effect when the competitive zone was established, unless authorized by the commission.

(c) The commission may revoke the exemption of a telecommunications utility from ORS 759.180 to 759.190 if the commission finds that the utility has violated statutes, rules or conditions of the commission applicable to competitive zone services or that there has been a substantial change in the circumstances that prevailed at the time the competitive zone was first established.

(d) On the motion of a telecommunications provider or on its own motion, the commission may order a telecommunications utility to disaggregate and offer essential functions of the telecommunications utility's local exchange network.

(6) A decision of the commission, with respect to the terms and conditions under which competitive zone services may be offered within a competitive zone by a telecommunications utility, to authorize a competitor to provide service within the local exchange service area of a telecommunications utility or to otherwise designate a competitive zone shall be subject to judicial review, but may not be stayed other than by

order of the commission, except upon a showing by clear and convincing evidence that failure to stay the decision will result in irreparable harm to the aggrieved party.

(7) The exclusive remedy of a telecommunications provider aggrieved by the prices, terms of service or practices of another provider with respect to competitive zone services within a competitive zone is to file a complaint with the commission under ORS 756.500. The commission, either upon complaint or its own motion, may permanently suspend a filing made by a provider with respect to a competitive zone service or take such other action as the commission deems appropriate, except an award for damages. A claim for damages arising from a commission decision in favor of the provider on a matter alleged in the complaint shall be brought as a separate action at law.

(8) Nothing in this section shall serve to shield any telecommunications provider of local exchange telecommunications service from state or federal antitrust laws. [1993 c.423 §3; 2005 c.232 §13; 2022 c.60 §10]

**759.052 Commission authority to exempt telecommunications services from regulation.** (1)(a) Upon petition by any interested party and following notice and investigation, the Public Utility Commission may exempt in whole or in part from regulation those telecommunications services for which the commission finds that:

(A) Price or service competition exists;

(B) Telecommunications services can be demonstrated by the petitioner or the commission to be subject to competition; or

(C) The public interest no longer requires full regulation of the telecommunications services.

(b) The commission may attach reasonable conditions to an exemption made under paragraph (a) of this subsection and may amend or revoke any order as provided in ORS 756.568.

(2) Upon petition by a telecommunications utility, and after notice and hearing, the commission shall exempt a telecommunications service from regulation if the commission finds that price and service competition exists.

(3) Prior to making the findings required by subsection (1) or (2) of this section, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which the services of alternative providers are functionally equivalent or substitutable at comparable rates and under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission.

(4) A service that is deregulated under subsection (2) of this section may be reregulated, after notice and hearing, if the commission determines an essential finding on which the deregulation was based no longer prevails, and reregulation is necessary to protect the public interest. [2005 c.232 §8]

**759.054 Price listing for product or service offered as part of local exchange telecommunications services.** (1) If the Public Utility Commission determines that a product or service offered by a telecommunications utility as part of local exchange telecommunications services can be demonstrated by the utility to be subject to competition, or that a product or service is not an essential product or service, the commission may authorize the utility to file a price list with the commission.

(2) The price list shall contain the description, terms, conditions and prices of the service or product described in subsection (1) of this section. No other schedule for price listed services need be filed with the commission. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective immediately upon filing with the commission unless a later date is specified.

(3) In determining whether a product or service is subject to competition, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which services of alternative providers are functionally equivalent or substitutable at comparable rates or under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission. [2005 c.232 §9]

**759.056 Price listing for product or service offered as part of interexchange telecommunications services.** (1) If the Public Utility Commission determines that a product or service offered by a telecommunications utility as part of interexchange telecommunications services can be demonstrated by the utility to be subject to competition, the commission, under conditions that the commission determines are reasonable, may authorize the utility to file a price list with the commission.

(2) The price list shall contain the description, terms, conditions and prices of the

service or product described in subsection (1) of this section. No other schedule for price listed services need be filed with the commission. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective immediately on filing with the commission unless a later date is specified.

(3) In determining whether a product or service is subject to competition, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which services of alternative providers are functionally equivalent or substitutable at comparable rates or under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission. [2005 c.232 §10]

**759.058 Commission action on petition under ORS 759.052, 759.054 or 759.056.** Within 60 days of a filing under ORS 759.052, 759.054 or 759.056, the Public Utility Commission shall either determine the appropriateness of the filing or determine that further investigation is necessary. If the commission determines that further investigation is necessary, the commission may suspend operation of the filing for a period not longer than five months from the end of the initial 60-day period. Upon a showing of good cause, any party may request extension of the suspension period for an additional three months. [2005 c.232 §11]

**759.060 Information submitted by local exchange telecommunications utilities; rules exempting disclosure.** (1) The Public Utility Commission, by rule, shall specify information submitted to the commission by local exchange telecommunications utilities or cooperatives that is exempt from disclosure under ORS 192.311 to 192.478 as provided in this section. In adopting rules, the commission shall consider, among other matters:

(a) Whether the information is of a type that could potentially be used to the competitive disadvantage of a local exchange telecommunications utility or cooperative.

(b) Whether the information concerns matters of a nature personal to an employee or stockholder of a local exchange telecommunications utility or an employee or member of a cooperative.

(c) Whether the information is otherwise publicly available.

(2) Information specified under subsection (1) of this section is exempt from disclosure.

sure unless the public interest requires disclosure in the particular instance.

(3) Nothing in subsection (1) of this section limits the exemptions granted to a local exchange telecommunications utility or cooperative under ORS 192.311 to 192.478. [1995 c.538 §2]

**759.070 Charge to access public body radio tower; market rate; exception.** (1) As used in this section:

(a) "Market rate" means a price, lease rate or other form of compensation for goods or services provided by a public body, when participating in a proprietary transaction, that is comparable to the average price, lease rate or other form of compensation in the same market for the same goods or services provided by a private-sector provider.

(b) "Private business" does not include a nonprofit emergency services organization.

(c) "Public body" has the meaning given that term in ORS 174.109.

(d) "Radio tower" means a lattice tower that is generally 60 to 200 feet tall with three or four steel support legs, or a monopole that is generally 25 to 125 feet tall, to which multiple antennae may be attached to accommodate a variety of communication services, including radio communications service, radio paging and cellular communications service.

(2) A public body shall charge a private business a market rate for access to a radio tower if the private business uses the radio tower to deliver any of the following communication services for hire:

- (a) Radio communications service;
- (b) Radio paging; or
- (c) Cellular communications service.

(3) Subsection (2) of this section does not prohibit a public body, when participating in a proprietary transaction, from charging or receiving compensation in the form of an exchange of goods or services or in any other nonmonetary form. [2013 c.440 §1]

**Note:** 759.070 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 759 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

## RIGHTS OF WAY

**759.075 Authority to construct lines and facilities; condemnation power; procedure.** (1) Any telecommunications utility may:

(a) Enter upon lands within this state for the purpose of examining, locating and sur-

veying the line thereof and also other lands necessary and convenient for the purpose of construction of service facilities, doing no unnecessary damage thereby.

(b) Condemn such lands not exceeding 100 feet in width for its lines (including poles, towers, wires, supports and necessary equipment therefor) and in addition thereto, other lands necessary and convenient for the purpose of construction of service facilities.

(2) Notwithstanding subsection (1) of this section, any telecommunications utility may, when necessary or convenient for transmission lines (including poles, towers, wires, supports and necessary equipment therefor) designed for voltages in excess of 330,000 volts, condemn land not to exceed 300 feet in width. In addition, if the lands are covered by trees which are liable to fall and constitute a hazard to its wire or line, such telecommunications utility may condemn such trees for a width not exceeding 100 feet on either side of the condemned land, as may be necessary or convenient for such purpose.

(3) The proceedings for the condemnation of such lands shall be the same as that provided in ORS chapter 35, provided that any award shall include, but shall not be limited to, damages for destruction of forest growth, premature cutting of timber and diminution in value to remaining timber caused by increased harvesting costs. [1987 c.447 §69]

**759.080 Use of property outside limits of municipal corporation; agreement; condemnation upon failure to agree.**

When it is necessary or convenient, in the location of any poles or lines mentioned in ORS 759.075, to appropriate any part of any public road, street, alley or public grounds not within the corporate limits of any municipal corporation, the county court or board of county commissioners of the county within which such road, street, alley or public grounds is located, may agree with the telecommunications utility upon the extent, terms and conditions upon which the same may be appropriated or used and occupied by such corporation. If such parties are unable to agree, the telecommunications utility may condemn so much thereof as is necessary and convenient in the location and construction of the poles or lines. The provisions of ORS chapter 35 are applicable to condemnations under this section. [1987 c.447 §70]

**759.100** [1987 c.447 §5; repealed by 2005 c.232 §14]

**759.105** [1989 c.484 §7; renumbered 759.219 in 2005]

**759.110** [1987 c.447 §6; repealed by 2005 c.232 §14]

**759.115** [1987 c.447 §7; repealed by 2005 c.232 §14]

### ACCOUNTS AND RECORDS

**759.120 Form and manner of accounts prescribed by commission.** (1) Every telecommunications utility shall keep and render to the Public Utility Commission, in the manner and form prescribed by the commission, uniform accounts of all business transacted. All forms of accounts which may be prescribed by the commission shall conform as nearly as practicable to similar forms prescribed by federal authority.

(2) Every telecommunications utility engaged directly or indirectly in any other business than that of a telecommunications utility shall, if required by the commission, keep and render separately to the commission, in like manner and form, the accounts of all such other business, in which case all the provisions of this chapter shall apply with like force and effect to the accounts and records of such other business. [1987 c.447 §8]

**759.125 Records and accounts prescribed by commission; prohibition on other records or accounts; exception; blanks for reports.** (1) The Public Utility Commission shall prescribe the accounts and records required to be kept and every telecommunications utility is required to keep and render its accounts and records accurately and faithfully in the manner prescribed by the commission and to comply with all directions of the commission relating to such accounts and records.

(2) No telecommunications utility shall keep any other accounts or records of its telecommunications utility business transacted than those prescribed or approved by the commission except such as may be required by the laws of the United States.

(3) The commission shall cause to be prepared suitable blanks for reports for carrying out the purposes of this chapter, and shall, when necessary, furnish such blanks for reports to each telecommunications utility. [1987 c.447 §9]

**759.130 Closing date of accounts; filing balance sheet; audit.** (1) The accounts shall be closed annually on December 31 and a balance sheet of that date promptly taken therefrom. On or before April 1 following, such balance sheet, together with such other information as the Public Utility Commission shall prescribe, verified by an officer of the telecommunications utility, shall be filed with the commission.

(2) The commission may examine and audit any account. Items shall be allocated to the accounts in the manner prescribed by the commission. [1987 c.447 §10]

**759.135 Depreciation accounts; undepreciated investment allowed in rates; conditions.** (1) Every telecommunications utility shall carry a proper and adequate depreciation account. The Public Utility Commission shall ascertain and determine the proper and adequate rates of depreciation of the several classes of property of each telecommunications utility. The rates shall be such as will provide the amounts required over and above the expenses of maintenance, to keep such property in a state of efficiency corresponding to the progress of the industry. Each telecommunications utility shall conform its depreciation accounts to the rates so ascertained and determined by the commission. The commission may make changes in such rates of depreciation from time to time as the commission may find to be necessary.

(2) In the following cases the commission may allow in rates, directly or indirectly, amounts on the utility's books of account which the commission finds represent undepreciated investment in a utility plant, including that which has been retired from service:

(a) When the retirement is due to ordinary wear and tear, casualties, acts of God, acts of governmental authority; or

(b) When the commission finds that the retirement is in the public interest. [1987 c.447 §11; 1989 c.956 §3]

### RATE REGULATION AND PROCEDURES; MEASURING EQUIPMENT

**759.175 Filing rate schedules and data with commission.** (1) Every telecommunications utility shall file with the Public Utility Commission, within a time to be fixed by the commission, schedules showing all rates, tolls and charges that the utility has established and that are in force at the time for any service performed by the utility within the state, or for any service in connection with or performed by any utility controlled or operated by the utility. Schedules filed with the commission shall be open to public inspection.

(2) Every telecommunications utility shall file, with and as part of every schedule filed under subsection (1) of this section, all rules and regulations that in any manner affect the rates charged or to be charged for any service.

(3) Where a schedule of joint rates or charges is or may be in force between two or more telecommunications utilities, the schedule shall in like manner be printed and filed with the commission. [1987 c.447 §12; 2005 c.232 §15]

**759.180 Hearing on reasonableness of rates; procedures; exceptions.** (1)(a) Except as provided in ORS 759.195 and 759.410 and ORS 759.052, 759.054 or 759.056, whenever any telecommunications utility files with the Public Utility Commission any rate or schedule of rates stating or establishing a new rate or schedule of rates or increasing an existing rate or schedule of rates, the commission may, either upon written complaint or upon the commission's own initiative, after reasonable notice, conduct a hearing to determine the propriety and reasonableness of the rate or schedule. The commission shall conduct the hearing upon written complaint filed by the telecommunications utility, its customer or customers, or any other proper party within 60 days of the telecommunications utility's filing. A hearing need not be held if the particular rate change is the result of an automatic adjustment clause. At the hearing the telecommunications utility shall bear the burden of showing that the rate or schedule of rates proposed to be established or increased or changed is just and reasonable.

(b) As used in this subsection, "automatic adjustment clause" means a provision of a rate schedule, authorized pursuant to ORS 759.195 (6), that provides for rate increases, decreases or both, without prior hearing, reflecting increases, decreases or both in costs incurred by a telecommunications utility and that is subject to review by the commission at least once every two years.

(2) The commission and staff may consult at any time with, and provide technical assistance to, telecommunications utilities, their customers, and other interested parties on matters relevant to utility rates and charges. If a hearing is held with respect to a rate change, the decisions of the commission shall be based on the record made at the hearing. [1987 c.447 §13; 1989 c.5 §16; 2005 c.232 §16]

**759.182 Rate schedules for service promotions; rules.** (1) A telecommunications utility may file rate schedules for service promotions that are offered by the utility for the purpose of:

(a) Increasing the use of the utility's services by present or future customers;

(b) Preventing a decrease in the use of the utility's services by present or future customers; or

(c) Inducing any person to use the utility's services instead of a competing provider's services.

(2) The rates charged under a service promotion by a telecommunications utility must be adequate to ensure that:

(a) The utility will recover an amount equal to the sum of the total service long run

incremental cost of providing the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions; and

(b) The utility will recover the amount under paragraph (a) of this subsection during the average time that customers use the service.

(3) Notwithstanding ORS 759.190, service promotion rate schedules become effective upon filing with the Public Utility Commission.

(4) The commission shall adopt rules governing service promotion rate schedules filed under this section. [2001 c.309 §2]

**Note:** 759.182 was added to and made a part of 759.180 to 759.190 by legislative action but was not added to any other series. See Preface to Oregon Revised Statutes for further explanation.

**759.185 Suspension of rates pending hearing; time limitation; refund of revenue collected; interim rates.** (1) The Public Utility Commission may, pending such investigation and determination, order the suspension of the rate or schedule of rates, provided the initial period of suspension shall not extend more than six months beyond the time when such rate or schedule would otherwise go into effect. If the commission finds that the investigation will not be completed at the expiration of the initial suspension, the commission may enter an order further suspending such rate or schedule for not more than three months beyond the last day of the initial suspension.

(2) This section does not prevent the commission and the telecommunications utility from entering into a written stipulation at any time extending any period of suspension.

(3) After full hearing, whether completed before or after such rate or schedule has gone into effect, the commission may make such order in reference thereto as would be proper in a proceeding initiated after such rate or schedule has become effective.

(4) If the commission is required to or determines to conduct a hearing on a rate or schedule of rates filed pursuant to ORS 759.180, but does not order a suspension thereof, any increased revenue collected by the telecommunications utility as a result of such rate or rate schedule becoming effective shall be received subject to being refunded. If the rate or rate schedule thereafter approved by the commission is for a lesser increase or for no increase, the telecommunications utility shall refund the amount of revenues received that exceeds the amount approved as nearly as possible to the customers from whom such excess revenues were collected, by a credit against future

bills or otherwise, in such manner as the commission orders.

(5) The commission may, in a suspension order, authorize an interim rate or rate schedule under which the telecommunications utility's revenues will be increased by an amount deemed reasonable by the commission, not exceeding the amount requested by the telecommunications utility. An interim rate or rate schedule shall remain in effect until terminated by the commission. [1987 c.447 §14]

**759.190 Notice of schedule change.** No change shall be made in any schedule, including schedules of joint rates, except upon 30 days' notice to the Public Utility Commission. All changes shall be plainly indicated upon existing schedules, or by filing new schedules in lieu thereof 30 days prior to the time they are to take effect. However, the commission, for good cause shown, may allow changes without requiring the 30 days' notice by filing an order specifying the changes to be made and the time when they shall take effect. [1987 c.447 §15]

**759.195 Price listing of services; conditions; maximum rates; essential services; justification by utility of rates for price-listed services; rules.** (1) Except as provided in subsection (6) of this section, upon petition of a telecommunications utility that provides local exchange service directly, or is affiliated with a utility that provides local exchange service, and after notice and hearing, the Public Utility Commission may authorize the utility to set rates for toll and other telecommunications services by filing a price list containing the price and terms for the service. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective as determined by the commission. The commission may prescribe conditions on an authorization to establish rates by price list, including conditions relating to the sharing of revenues received by the utility that are in excess of allowances provided for in the order of authorization.

(2) Telecommunications utilities that provide telecommunications services only between exchanges and are not affiliated with a utility that provides local exchange service may establish rates by price list without special authorization from the commission.

(3) Prior to granting a petition to set rates by price list under this section, the commission shall find that pricing flexibility:

(a) Is reasonably necessary to enable the utility to respond to current and future competitive conditions for any or all telecommunications services;

(b) Will maintain the appropriate balance between the need for price flexibility and the protection of consumers;

(c) Is likely to benefit the consumers of fixed rate services; and

(d) Is unlikely to cause any undue harm to any customer class.

(4) A rate set for a service by a utility may not be lower than the long run incremental cost of providing the service.

(5) Upon its own motion the commission may fix maximum rate levels and terms of service for price listed services and for toll services on noncompetitive routes. Upon request of any affected person, the commission shall fix maximum rate levels and terms of service for price listed services not subject to competition and for toll services on noncompetitive routes.

(6) By rule, the commission shall designate local exchange services that it deems essential, and rates for such services shall be prescribed under ORS 759.180 to 759.190. The commission also may authorize automatic adjustment clauses which reflect increases, decreases, or both, in particular costs incurred by the utility. For the purposes of this subsection, "essential services" need not be essential for all classes of customers.

(7) The commission may, at any time, order a telecommunications utility to appear and establish that any of its price listed rates are just and reasonable and in conformity with the requirements of this section and the authorization to price list issued by the commission. Price listed rates shall also be subject to complaint under ORS 756.500. [Formerly 757.850; 2005 c.232 §13a]

**759.200 Inclusion of amortizations in rates; deferral of certain expenses or revenues; limitation on amounts; prohibited uses.** (1) In addition to powers otherwise vested in the Public Utility Commission, and subject to the limitations contained in subsection (5) of this section, under amortization schedules set by the commission, a rate or rate schedule may reflect the following:

(a) Amounts lawfully imposed retroactively by order of another governmental agency; or

(b) Amounts deferred under subsection (2) of this section.

(2) Upon application of a telecommunications utility or ratepayer or upon the commission's own motion and after public notice and opportunity for comment, the commission by order may authorize deferral, for later incorporation in rates, telecommunications utility expenses or revenues, the

recovery or refund of which the commission finds should be deferred in order to minimize the frequency of rate changes or the fluctuation of rate levels or to match appropriately the costs borne by and benefits received by ratepayers. The authority under this subsection is limited to the following accounts:

(a) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in jurisdictional separations approved by the Federal Communications Commission;

(b) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in depreciation rates or amortization schedules approved by the commission;

(c) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in income, excise, franchise or ad valorem taxes by the federal, state or local governments;

(d) Increases or decreases in amounts incurred by a telecommunications utility resulting from restoration of telecommunications services interrupted by floods, fires, earthquakes, storms or other acts of nature;

(e) Increases or decreases in amounts incurred by a telecommunications utility for research, development, planning and advance advertising for products and services not yet in service;

(f) Increases or decreases in amounts incurred by a telecommunications utility for telephone plant transfers and property sales approved by the commission;

(g) Increases or decreases in amounts incurred by a telecommunications utility from affiliated interest contracts and transactions approved by the commission;

(h) Increases or decreases in amounts incurred by a telecommunications utility from attorney's fees, court settlements and court awards;

(i) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in accounting methods approved by the commission; and

(j) Increases or decreases in amounts incurred by a telecommunications utility from customer service contracts, intercompany service contracts and joint and through service arrangements.

(3) The commission may authorize deferrals under subsection (2) of this section beginning with the date of application, together with interest established by the commission. A deferral may be authorized for a period not to exceed 12 months beginning on or after the date of application.

(4) Unless subject to an automatic adjustment clause under ORS 759.180, amounts described in this section shall be allowed in rates only to the extent authorized by the commission in a proceeding to change rates and upon review of the utility's earnings at the time of application to amortize the deferral.

(5) In any one year, the overall average rate impact of the amortizations authorized under this section shall not exceed three percent of the telecommunications utility's gross revenues for the preceding calendar year.

(6) The provisions of this section may be used as a means of deferring the effect of readily identifiable and readily measurable changes in particular costs or revenues of a telecommunications utility, but shall not be used to implement a claim for an increase or decrease in the overall revenue requirement of a telecommunications utility when the amount of the change or changes would not be known until the completion of a rate case. [1989 c.929 §2]

**759.205 Conformance of rates charged with schedule.** No telecommunications utility shall charge, demand, collect or receive a greater or less compensation for any service performed by it within the state, or for any service in connection therewith, than is specified in printed rate schedules as may at the time be in force, or demand, collect or receive any rate not specified in such schedule. The rates named therein are the lawful rates until they are changed as provided in this chapter. [1987 c.447 §16]

**759.210 Classification of service and rates; considerations; rules.** (1) The Public Utility Commission shall provide for a comprehensive classification of service for each telecommunications utility. The classification may take into account the quantity used, the time when used, the purpose for which used, the existence of price competition or a service alternative, the services being provided, the conditions of service and any other reasonable consideration. Based on these considerations the commission may authorize classifications or schedules of rates applicable to individual customers or groups of customers. Each telecommunications utility is required to conform its schedules of rates to such classification. If the commission determines that a tariff filing under ORS 759.175 results in a rate classification primarily related to price competition or a service alternative, the commission, at a minimum, shall consider the following:

(a) Whether the rate generates revenues at least sufficient to cover relevant short and long run costs of the utility during the term of the rates; and

(b) Whether the rate generates revenues sufficient to insure that just and reasonable rates are established for remaining customers of the telecommunications utility.

(2) The commission may prescribe any changes in the form in which the schedules are issued by any telecommunications utility as the commission finds to be expedient. The commission shall adopt rules that allow any person who requests notice of tariff filings described under subsection (1) of this section to receive such notice. [1987 c.447 §17; 1989 c.5 §17; 2005 c.232 §18]

**759.215 Public access to schedules.** (1)

A copy of so much of all schedules, including schedules of joint rates and charges, as the Public Utility Commission deems necessary for the use of the public, shall be made available to the public.

(2) Except as provided in ORS 759.410 (8), copies of all new schedules shall be made readily accessible to the public as required by the commission 30 days prior to the time the schedules are to take effect, unless the commission prescribes a shorter time. [1987 c.447 §18; 2005 c.232 §19]

**759.217** [2001 c.957 §17; repealed by 2011 c.83 §26]

**759.218 Revenues and expenses of unregulated activities.** (1) A telecommunications utility may not use revenues earned from, or allocate expenses to, that portion of the utility's business that is regulated under this chapter in order to subsidize activities that are not regulated by this chapter.

(2) The Public Utility Commission may not require revenues or expenses from an activity that is not regulated under this chapter to be attributed to the regulated activities of a telecommunications utility.

(3) The commission may approve a telecommunications utility rate proposal for basic local service rates that utilizes revenues from other regulated services to partially cover the costs of providing basic local service. [2005 c.232 §4]

**759.219 Certain taxes as operating expense; charge pro rata to users; condition.** The privilege tax authorized by ORS 221.515, or other similar exactions imposed by any municipality in this state upon telecommunications utilities for use and occupancy of streets, alleys or highways, or all of them, shall be allowed as an operating expense of the affected telecommunications utilities operating in the municipality for rate-making purposes by the Public Utility Commission. The cost of such privilege tax or other similar exactions shall be charged pro rata to the users of such telecommunications utility within the municipality unless the Public Utility Commission determines on a statewide basis that such pro rata charges

would be inequitable, in whole or in part, to city ratepayers or should otherwise be borne as a statewide operating expense by the telecommunications utility. [Formerly 759.105]

**759.220 Joint rates and classifications; procedure; considerations.** (1) A telecommunications utility may establish reasonable through service and joint rates and classifications with other telecommunications utilities. Telecommunications utilities establishing joint rates shall establish just and reasonable regulations and practices in connection therewith and just, reasonable and equitable divisions thereof, as between the public utilities participating therein which shall not unduly prefer or prejudice any of the participating telecommunications utilities and every unjust and unreasonable rate, classification, regulation, practice and division is prohibited.

(2) The Public Utility Commission may, and shall, whenever deemed by the commission to be necessary or desirable in the public interest, after full hearing upon complaint, or upon the commission's own initiative without complaint, establish through service, classifications and joint rates, the divisions of such rates and the terms and conditions under which such through service shall be rendered. If any tariff or schedule canceling any through service or joint rate or classification without the consent of all the telecommunications utilities party thereto, or authorization by the commission is suspended by the commission for investigation, the burden of proof is upon the telecommunications utility proposing such cancellation to show that it is consistent with the public interest.

(3) Whenever, after full hearing upon complaint or upon the commission's own initiative without complaint, the commission is of the opinion that the divisions of joint rates between the telecommunications utilities are or will be unjust, unreasonable, inequitable or unduly preferential or prejudicial as between the telecommunications utilities party thereto, whether agreed upon by such telecommunications utilities or otherwise established, the commission shall, by order, prescribe the just, reasonable and equitable divisions thereof to be received by the several telecommunications utilities. In cases where the joint rate was established pursuant to the finding or order of the commission and the divisions thereto are found by the commission to have been unjust, unreasonable or inequitable, or unduly preferential or prejudicial, the commission may also by order determine what, for the period subsequent to the filing of the complaint or petition or the making of the order of investigation, would have been the

just, reasonable and equitable division thereof to be received by the several telecommunications utilities and require adjustment to be made in accordance therewith.

(4) In so prescribing and determining the divisions of joint rates, the commission shall give due consideration, among other things, to:

(a) The efficiency with which the telecommunications utilities concerned are operated;

(b) The amount of revenue to pay their respective operating expenses, taxes and a fair return on their telecommunications utility property held for and used in service;

(c) The importance to the public of the services of such telecommunications utilities;

(d) Whether any particular participating telecommunications utility is an originating, intermediate or delivering utility; and

(e) Any other fact or circumstance which ordinarily would entitle one telecommunications utility to a greater or less proportion of the joint rate than another. [1987 c.447 §19]

**759.225 Application of ORS 759.220 to unincorporated associations and cooperative corporations.** Notwithstanding any other provision of law, ORS 759.220 applies to any unincorporated association or cooperative corporation providing intrastate telecommunications service. The application of ORS 759.220 to unincorporated associations and cooperative corporations:

(1) Does not allow the Public Utility Commission to establish terms, conditions, classifications or rates for services rendered to members of unincorporated associations or cooperative corporations;

(2) Does not make unincorporated associations or cooperative corporations subject to the commission's general powers of regulation;

(3) Allows the commission to regulate access charges imposed by unincorporated associations and cooperative corporations; and

(4) Requires unincorporated associations and cooperative corporations to provide information to the commission that the commission deems necessary to establish new extended service areas. [Formerly 757.860; 2001 c.853 §1]

**759.230 Measured service rate for business customers; restriction.** (1) Notwithstanding any other provision of this chapter, the Public Utility Commission shall not authorize a telecommunications utility to implement a rate schedule that includes optional measured service for business customers unless the rate for the service is sufficient to defray all costs that must be in-

curred to implement the service, including the costs of measuring and billing.

(2) As used in this section:

(a) "Local exchange telephone service" means telephone service provided within the boundaries of exchange maps filed with and approved by the commission.

(b) "Measured service" means local exchange telephone service, the rate for which is based upon the number of calls, length of calls, distance or time of day. [Formerly 757.835]

**759.235 Mandatory measured service rate; prohibition.** (1) The Public Utility Commission shall be prohibited from requiring any call aggregator, telephone customer or class of customers to pay for local exchange telephone service, or any portion thereof, on a mandatory measured service basis.

(2) As used in this section:

(a) "Call aggregator" has the meaning given that term in ORS 759.680.

(b) "Measured service" means charging for local exchange telephone service based upon number of calls, length of calls, distance, time of day, or any combination thereof.

(3) Nothing in this section is intended to prohibit the commission from requiring telephone customers to pay on a mandatory measured service basis for:

(a) Land, marine, or air mobile service.

(b) Local exchange telephone service resold at a profit.

(4) The commission shall not change boundaries of local exchange service areas nor take any other actions if such changes or actions have the effect of circumventing subsections (1) and (2) of this section. [Formerly 757.840; 1997 c.317 §1]

**759.240 Measuring quality of service; standards; rules.** (1) The Public Utility Commission shall ascertain and prescribe for each kind of telecommunications utility suitable and convenient standard commercial units of service. These shall be lawful units for the purposes of this chapter.

(2) The commission shall ascertain and fix adequate and serviceable standards for the measurement of quality, pressure, initial voltage or other conditions pertaining to the supply of the service rendered by any telecommunications utility and prescribe reasonable regulations for examination and testing of such service and for the measurement thereof. It shall establish reasonable rules, regulations, specifications and standards to secure the accuracy of all meters and appliances for the measurements, and every telecommunications utility is required to carry

into effect all orders issued by the commission relative thereto. [1987 c.447 §20]

**759.245 Examination and testing of measuring appliances; rules; fees.** (1) The Public Utility Commission may provide for the examination and testing of any and all appliances used for the measuring of any service of a telecommunications utility and may provide by rule that no such appliance shall be installed and used for the measuring of any service of any telecommunications utility until it has been examined and tested by the commission and found to be accurate.

(2) The commission shall declare and establish a reasonable fee governing the cost of such examination and test, which shall be paid to the commission by the telecommunications utility.

(3) The commission shall declare and establish reasonable fees for the testing of such appliances on the application of the customer, the fee to be paid by the customer at the time of the customer's request, but to be repaid to the customer by the commission and to be paid by the telecommunications utility if the appliance is found defective or incorrect to the disadvantage of the customer or used beyond such reasonable limit as may be prescribed by the commission.

(4) All fees collected under the provisions of this section shall be paid by the commission into the State Treasury.

(5) The commission may purchase such materials, apparatus and standard measuring instruments for the examination and tests as the commission deems necessary. [1987 c.447 §21]

**759.250 Contracts for special services; procedure for filing and approval; subsequent review and investigation.** (1) A telecommunications utility may enter into a contract with any customer for the provision of a telecommunications service that the Public Utility Commission determines is a new service with limited availability, is designed to respond to a unique customer requirement or is subject to competition. Contracts shall be for a stated time period, not to exceed five years. If a contract includes competitive and noncompetitive service elements, the noncompetitive service elements shall be unbundled and priced separately from all other facilities and service elements in the contract. Such noncompetitive service elements shall be made available to all purchasers under the same or substantially the same circumstances at the same rate, terms and conditions.

(2) The telecommunications utility shall file any contract with the commission no later than 90 days following its effective date. At the customer's request, the telecom-

munications utility shall file the contract at least 30 days in advance of the effective date. Notice of the filing of the contract shall be given by the commission to all persons who have filed with the commission a petition to receive such notice.

(3) Contracts entered into under this section are not schedules of rates, tolls or charges within the meaning of ORS 759.175. A contract entered into under this section shall be enforceable by the contracting parties according to its terms, unless the contract has been rejected by the commission as provided in this section.

(4) Notwithstanding ORS 759.175 to 759.185, the commission shall approve any contract for a telecommunications service entered into under this section if the commission finds the following:

(a) The telecommunications service is a new service with limited availability, is designed to respond to a unique customer requirement or is subject to competition. In making the determination of whether a service is subject to competition, the commission shall consider whether the customer might reasonably have chosen an alternative to the telecommunications utility's service.

(b) The contracted price for the telecommunications service is above the long run incremental costs of providing such service during the term of the contract. In making this calculation for a contract that includes both competitive and noncompetitive service elements, the commission shall consider separately whether the competitive service elements are priced above the long run incremental costs of providing such service elements.

(c) The contracted price for the telecommunications service includes all costs of providing such service, including the rate that would be charged by a telecommunications utility to any competitive telecommunications provider for any component essential to the competitive telecommunications provider's ability to offer the telecommunications service. The commission shall determine which components of the service shall be deemed essential and the method to include prices of those components in costs of such services.

(5) The commission shall issue an order regarding any contract filed under subsection (2) of this section within 90 days of the filing. If the commission does not act within 90 days of the filing, the contract shall be deemed approved. If the commission disapproves the contract, it shall enter an order describing the ways in which the contract fails to meet the standards set forth in subsection (4) of this section and declaring the contract null and void. The telecommuni-

cations utility or customer may request that the commission hold a hearing to determine whether the order should continue in effect. Any such request for hearing shall be submitted to the commission not later than 15 days after the date of service of the order, and the commission shall hold the hearing not later than 60 days after receipt of such request for hearing.

(6) Notwithstanding ORS 192.311 to 192.478, the commission shall not disclose the identity of a customer or any customer proprietary information contained in a contract filed under subsection (2) of this section without the consent of the customer and the telecommunications utility.

(7) No contract filed under subsection (2) of this section may be automatically renewed. A contract renewal shall be treated as a new contract.

(8) Nothing in this section shall be deemed state action for the purpose of exempting a telecommunications utility from liability for anticompetitive conduct or other unlawful practices.

(9) Any contract executed prior to September 29, 1991, and approved by the commission is deemed lawful and shall be enforceable by the contracting parties according to its terms. A contract renewal shall be deemed a new contract.

(10) Nothing in this section shall restrict the commission from subsequent scrutiny of the reasonableness of contracts filed under this section for ratemaking purposes.

(11) In accordance with ORS 756.515, the commission may investigate contracts filed by a specific telecommunications utility under this section. Notwithstanding any other provision of this section, if the commission finds that contracts entered into by a telecommunications utility have not generally been in the public interest, the commission, by order, may prevent or restrict the telecommunications utility from future contracting pursuant to this section and may require the telecommunications utility to file contracts under ORS 759.175. [1991 c.527 §2]

**759.255 Setting prices without regard to return on utility investment; petition; findings; conditions; application of statutes to approved plan.** (1) In addition to powers vested in the Public Utility Commission under ORS 759.195, and subject to the limitations contained in subsections (2) to (4) of this section, upon petition of a telecommunications utility that provides local exchange service directly, or is affiliated with a utility that provides local exchange service, the commission, after notice and hearing, may approve a plan under which the commission regulates prices charged by the util-

ity, without regard to the return on investment of the utility. Prices approved under the plan are not subject to the provisions of ORS 759.180 to 759.190 and shall become effective as stated in the plan.

(2) Prior to granting a petition to approve a plan under subsection (1) of this section, the commission must find that the plan is in the public interest. In making its determination the commission shall consider, among other matters, whether the plan:

(a) Ensures prices for telecommunications services that are just and reasonable;

(b) Ensures high quality of existing telecommunications services and makes new services available;

(c) Maintains the appropriate balance between the need for regulation and competition; and

(d) Simplifies regulation.

(3) If the commission approves a plan under subsection (1) of this section, the commission shall establish objectives of the plan and conditions for review of the plan during the operation of the plan. The commission may not consider return on investment of the utility when the commission establishes objectives of the plan and conditions for review of the plan during the operation of the plan.

(4) A rate for any service in the plan authorized under subsection (1) of this section may not be lower than the total service long run incremental cost, for nonessential functions, of providing the service and the charges of essential functions used in providing the service. However, the commission may allow a telecommunications utility to establish rates for residential local exchange service at any level necessary to achieve the commission's universal service objectives.

(5) If the commission approves a plan under subsection (1) of this section, the commission may waive, in whole or in part, compliance by the telecommunications utility with ORS 759.120, 759.125, 759.130, 759.135, 759.180 to 759.205, 759.215, 759.220, 759.285 and 759.300 to 759.393. [1995 c.399 §2; 2005 c.232 §13b]

**759.257 Extended area service: Portland to Scappoose.** (1) Two-way, flat rate or measured extended area service shall be provided by each telecommunications utility providing service between the Portland EAS Region and the Scappoose Exchange, as described by EAS and exchange maps filed with and approved by the Public Utility Commission.

(2) The service provided for in subsection (1) of this section may be implemented during the currently pending Portland EAS Re-

gion Expansion, but in no event shall such implementation occur later than November 1, 1998.

(3) Nothing in subsection (1) of this section authorizes a telecommunications utility to discontinue two-way, flat rate or measured extended area service in any exchange area where that service was provided prior to October 4, 1997. [1997 c.796 §2]

**759.259 Extended area service: Portland to Molalla.** (1) Two-way, flat rate or measured extended area service shall be provided by each telecommunications utility providing service between the Portland EAS Region and the Molalla Exchange, as described by EAS and exchange maps filed with and approved by the Public Utility Commission.

(2) The service provided for in subsection (1) of this section may be implemented during the currently pending Portland EAS Region Expansion, but in no event shall such implementation occur later than November 1, 1998, after approval by customers of the Molalla Exchange.

(3) Nothing in subsection (1) of this section authorizes a telecommunications utility to discontinue two-way, flat rate or measured extended area service in any exchange area where the service was provided prior to October 4, 1997. [1997 c.505 §2]

### ILLEGAL PRACTICES

#### **759.260 Unjust discrimination in rates.**

(1) Except as provided in ORS 759.265, no telecommunications utility or any agent or officer thereof shall, directly or indirectly, by any device, charge, demand, collect or receive from any person a greater or less compensation for any service rendered or to be rendered by it than:

(a) That prescribed in the public schedules or tariffs then in force or established; or

(b) It charges, demands, collects or receives from any other person for a like and contemporaneous service under substantially similar circumstances. A difference in rates or charges based upon a difference in classification pursuant to ORS 759.210 shall not constitute a violation of this paragraph.

(2) Any telecommunications utility violating this section is guilty of unjust discrimination. [1987 c.447 §46; 1989 c.5 §22; 1993 c.18 §165]

**759.265 Practices not constituting unjust discrimination.** (1) ORS 759.260 does not prevent any telecommunications utility from giving free service, or reduced rates therefor, to:

(a) Its officers, directors, employees and members of their families;

(b) Former employees of such telecommunications utilities or members of their families where such former employees have become disabled in the service of such telecommunications utility or are unable from physical disqualification, including retirement, to continue in the service; or

(c) Members of families of deceased employees of such telecommunications utility.

(2) The Public Utility Commission may require any telecommunications utility to file with the commission a list, verified under oath, of all free or reduced rate privileges granted by a telecommunications utility under the provisions of this section. [1987 c.447 §47]

#### **759.267 Service promotion activities.**

A telecommunications utility may promote the use of its services by offering a waiver of part or all of a recurring or a nonrecurring charge, a redemption coupon or a premium with the purchase of a service. ORS 759.260 and 759.265 do not apply to promotions under this section, but the customer group to which the promotion is available must be based on reasonable distinctions among customers. [1993 c.204 §4]

**759.270 Reducing rates for persons furnishing part of facilities; rental of customer facilities; furnishing meters and appliances.** (1) No telecommunications utility shall demand, charge, collect or receive from any person less compensation for any service rendered or to be rendered by the telecommunications utility in consideration of the furnishing by such person of any part of the facilities incident thereto.

(2) This section does not prohibit any telecommunications utility from renting any customer's facilities incident to providing its services and for paying a reasonable rental therefor.

(3) This section does not require a telecommunications utility to furnish any part of such appliances which are situated in and upon the premises of any customer, except meters and appliances for measurements of any service, unless otherwise ordered by the Public Utility Commission. [1987 c.447 §48]

**759.275 Undue preferences and prejudices.** (1) No telecommunications utility shall make or give undue or unreasonable preference or advantage to any particular person or locality, or shall subject any particular person or locality to any undue or unreasonable prejudice or disadvantage in any respect.

(2) Any telecommunications utility violating this section is guilty of unjust discrimination. [1987 c.447 §49]

**759.280 Soliciting or accepting rebates or special advantage.** No person shall knowingly solicit, accept or receive any rebate, concession or discrimination in respect to any service whereby any such service shall, by any device, be rendered free or at a lesser rate than that named in the published schedules and tariffs in force, or whereby any service or advantage is received other than authorized in this chapter. [1987 c.447 §50]

**759.285 Charging rates based on cost of property not presently providing service.** No telecommunications utility shall, directly or indirectly, by any device, charge, demand, collect or receive from any customer, rates which are derived from a rate base which includes within it any construction, building, installation or real or personal property not presently used for providing utility service to the customer. [1987 c.447 §51]

**759.290** [1989 c.621 §2; repealed by 2007 c.823 §6]

#### ISSUANCE OF SECURITIES

**759.300 "Stocks" defined.** As used in ORS 759.300 to 759.360, "stocks" means stocks, stock certificates or other evidence of interest or ownership. [1987 c.447 §28]

**759.305 Power to regulate issuance of telecommunications stocks; rules.** The power of telecommunications utilities to issue stocks and bonds, notes and other evidences of indebtedness and to create liens on their property situated within this state is a special privilege, the right of supervision, regulation, restriction and control of which is and shall continue to be vested in the state. Such power shall be exercised as provided by law and under such rules and regulations as the Public Utility Commission may prescribe. [1987 c.447 §29]

**759.310 When issuance of securities void.** All stocks and bonds, notes or other evidences of indebtedness and any security of a telecommunications utility shall be void when issued:

(1) Without an order of the Public Utility Commission authorizing the same then in effect except as provided in ORS 759.315 (3) or (5).

(2) With the authorization of the commission, but not conforming in its provisions to the provisions, if any, which it is required by the order of authorization of the commission to contain; but no failure to comply with the terms or conditions of the order of authorization of the commission and no informality or defect in the application or in the proceedings in connection therewith or with the issuance of such order shall render void any stock or bond, note or other evidence of indebtedness, or security issued pursuant to

and in substantial conformity with an order of the commission, except as to a person taking the same otherwise than in good faith and for value and without actual notice. [1987 c.447 §30; 1993 c.204 §1]

**759.315 Purposes for which securities may be issued; order required; exceptions; rules.** (1) A telecommunications utility may issue stocks and bonds, notes and other evidences of indebtedness, and securities for the following purposes and no others, except as otherwise permitted by subsection (4) of this section:

(a) The acquisition of property, or the construction, completion, extension or improvement of its facilities.

(b) The improvement or maintenance of its service.

(c) The discharge or lawful refunding of its obligations.

(d) The reimbursement of money actually expended from income or from any other money in the treasury of the telecommunications utility not secured by or obtained from the issue of stocks or bonds, notes or other evidences of indebtedness, or securities of such telecommunications utility, for any of the purposes listed in paragraphs (a) to (c) of this subsection except the maintenance of service and replacements, in cases where the applicant has kept its accounts and vouchers for such expenditures in such manner as to enable the Public Utility Commission to ascertain the amount of money so expended and the purposes for which such expenditures were made.

(e) The compliance with terms and conditions of options granted to its employees to purchase its stock, if the commission first finds that such terms and conditions are reasonable and in the public interest.

(2) Before issuing such securities, a telecommunications utility, in addition to the other requirements of law, shall secure from the commission upon application an order authorizing such issue, stating:

(a) The amount of the issue and the purposes to which the issue or the proceeds thereof are to be applied;

(b) In the opinion of the commission, the money, property or labor to be procured or paid for by such issue reasonably is required for the purposes specified in the order and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the applicant of service as a telecommunications utility, and will not impair its ability to perform that service; and

(c) Except as otherwise permitted in the order in the case of bonds, notes or other

evidences of indebtedness, such purposes are not, in whole or in part, reasonably chargeable to operating expenses or to income.

(3) This section and ORS 759.310 apply to demand notes but do not apply to the issuance or renewal of a note or evidence of indebtedness maturing not more than one year after date of such issue or renewal.

(4) Nothing in ORS 759.300 to 759.360 shall prevent issuance of stock to stockholders as a stock dividend if there has been secured from the commission an order:

(a) Finding that the stock dividend is compatible with the public interest;

(b) Authorizing such issue and a transfer of surplus to capital in any amount equal to the par or stated value of the stock so authorized; and

(c) Finding that a sum equal to the amount to be so transferred was expended for the purposes enumerated in subsection (1) of this section.

(5) A telecommunications utility that derives one-half or more of its gross revenue from sources outside this state does not require commission authorization to issue stocks and bonds, notes or other evidences of indebtedness and any security unless the commission finds that the authorization requirements of ORS 759.310 and subsection (2) of this section are necessary to:

(a) Prevent the telecommunications utility from issuing securities for purposes not permitted under subsection (1) of this section; or

(b) Prevent impairment of the telecommunications utility's ability to provide telecommunications utility services to its customers in this state. The commission shall adopt rules that set forth independently determined financial indicators upon which the commission must base any finding of impaired ability to provide utility telecommunications services. [1987 c.447 §31; 1993 c.204 §2; 2001 c.236 §1]

**759.320 Application of ORS 759.315.** ORS 759.315 does not apply to the issuance, renewal or assumption of liability on any evidence of indebtedness when such issuance, renewal or assumption is for the purpose of acquiring specific real or personal property, if the aggregate principal amount thereof, together with all other then outstanding evidences of indebtedness issued, renewed or assumed under this section, does not exceed whichever is the greater of the following amounts:

(1) The amount of \$75,000.

(2) The amount of one-half of one percent of the sum of:

(a) The total principal amount of all bonds or other securities representing secured indebtedness of the telecommunications utility issued or assumed and then outstanding; and

(b) The capital and surplus as then stated on the books of account of the telecommunications utility. [1987 c.447 §32]

**759.325 Application of ORS 759.375.** ORS 759.375 does not apply to any mortgage or other encumbrance upon any real or personal property given to secure payment of any evidence of indebtedness issued under ORS 759.315. [1987 c.447 §33]

**759.330 Hearings and supplemental orders for securities issuance; joint approval for issuance by utility operating in another state.** (1) To enable the Public Utility Commission to determine whether the commission will issue an order under ORS 759.315, the commission may hold a hearing and may make such additional inquiry or investigation, examine such witnesses, books, papers, documents and contracts and require the filing of such data as the commission deems necessary. The application for such order shall be given priority and shall be disposed of by the commission within 30 days after the filing of such application, unless that period is extended with the consent of the telecommunications utility.

(2) The commission may, upon application of the telecommunications utility, after opportunity for hearing and for good cause shown, make such supplemental orders in the premises as the commission finds necessary or appropriate, and may by any such supplemental order modify the provisions of any previous order as to the particular purposes, uses, extent to which, or the condition under which, any security theretofore authorized or its proceeds may be applied. Such supplemental orders are subject to the requirements of ORS 759.315. The period of time permitted under subsection (1) of this section for disposing of applications shall not apply to supplemental orders.

(3) If a commission or other agency is empowered by another state to regulate and control the amount and character of securities to be issued by any telecommunications utility within such other state, the commission of Oregon has power to agree with such commission or agency of such other state on the issue of stocks, bonds, notes, other evidences of indebtedness or securities by a telecommunications utility owning or operating a telecommunications utility both in such state and in this state, and has power to approve such issue jointly with such commission or agency and to issue a joint certificate of such approval. However, no such joint approval is required in order to express the

consent to and approval of such issue by the State of Oregon if the issue is separately approved by the Oregon commission. [1987 c.447 §34]

**759.335 Obligation of state as consequence of approval of issuance.** No provision of ORS 759.300 to 759.360, and no deed or act done or performed under or in connection therewith, shall be held or construed to obligate the State of Oregon to pay or guarantee, in any manner whatsoever, any stock or bond, note or other evidence of indebtedness, authorized, issued or executed under the provisions of ORS 759.300 to 759.360. [1987 c.447 §35]

**759.340 Conditional approval of issuance.** The Public Utility Commission may by order grant permission for the issue of stocks or bonds, notes or other evidences of indebtedness in the amount applied for, or in a lesser amount, or not at all, and may attach to the exercise of the permission such condition or conditions as the commission deems reasonable and necessary. [1987 c.447 §36]

**759.345 Use of proceeds from issuance; accounting; rules.** (1) No telecommunications utility shall, without the consent of the Public Utility Commission, apply the issue of any stock or bond, note or other evidence of indebtedness, or any part or proceeds thereof, to any purpose not specified in the commission's order, or to any purpose specified in the commission's order in excess of the amount authorized for such purpose, or issue or dispose of the same on any terms less favorable than those specified in such order, or a modification thereof.

(2) The commission has power to require telecommunications utilities to account for the disposition of the proceeds of all sales of stocks and bonds, notes and other evidences of indebtedness, in such form and detail as the commission deems advisable, and to establish such rules and regulations as the commission deems reasonable and necessary to insure the disposition of such proceeds for the purpose or purposes specified in the order. [1987 c.447 §37]

**759.350 Limitation on authority of utility to guarantee debt of another.** No telecommunications utility shall assume any obligation or liability as guarantor, indorser, surety or otherwise in respect to the securities of any other person, firm or corporation, when such securities are payable at periods of more than 12 months after the date thereof, without first having secured from the Public Utility Commission an order authorizing it to do so. Every assumption made other than in accordance with such an order is void. [1987 c.447 §38]

**759.355 Issuance or use of proceeds contrary to commission order.** No telecommunications utility shall directly or indirectly, issue or cause to be issued any stock or bond, note or other evidence of indebtedness in nonconformity with the order of the Public Utility Commission authorizing the same or contrary to the provisions of ORS 759.300 to 759.360, or of the Constitution of this state, or apply the proceeds from the sale thereof, or any part thereof, to any purpose other than the purposes specified in the commission's order, or to any purpose specified in the commission's order, in excess of the amount in the order authorized for such purpose. [1987 c.447 §39]

**759.360 Prohibited acts regarding issuance of securities.** No person shall:

(1) Knowingly authorize, direct, aid in, issue or execute, or cause to be issued or executed, any stock or bond, note or other evidence of indebtedness, in nonconformity with the order of the Public Utility Commission authorizing the same, or contrary to the provisions of ORS 759.300 to 759.360 or of the Constitution of this state.

(2) In any proceeding before the commission, knowingly make any false statement or representation or with knowledge of its falsity file or cause to be filed with the commission any false statement or representation which may tend in any way to influence the commission to make an order authorizing the issue of any stock or bond, note or other evidence of indebtedness, or which results in procuring from the commission the making of any such order.

(3) With knowledge that any false statement or representation was made to the commission in any proceeding tending in any way to influence the commission to make such order, issue, execute or negotiate, or cause to be issued, executed or negotiated, any stock or bond, note or other evidence of indebtedness.

(4) Directly or indirectly, knowingly apply, or cause or assist to be applied, the proceeds, or any part thereof, from the sale of any stock or bond, note or other evidence of indebtedness, to any purpose not specified in the commission's order, or to any purpose specified in the commission's order in excess of the amount authorized for such purpose.

(5) With knowledge that any stock or bond, note or other evidence of indebtedness, has been issued or executed in violation of ORS 759.300 to 759.360, negotiate, or cause the same to be negotiated. [1987 c.447 §40]

**TRANSACTIONS OF UTILITIES**

**759.375 Approval prior to sale, mortgage or disposal of operative utility property.** (1) A telecommunications utility doing business in Oregon shall not, without first obtaining the Public Utility Commission's approval of such transaction:

(a) Sell, lease, assign or otherwise dispose of the whole of the property of such telecommunications utility necessary or useful in the performance of its duties to the public or any part thereof of a value in excess of \$100,000, or sell, lease, assign or otherwise dispose of any franchise, permit or right to maintain and operate such telecommunications utility or telecommunications utility property, or perform any service as a telecommunications utility;

(b) Mortgage or otherwise encumber the whole or any part of the property of such telecommunications utility necessary or useful in the performance of its duties to the public, including any franchise, permit or right to maintain and operate such telecommunications utility or telecommunications utility property, or perform any service as a telecommunications utility; or

(c) By any means whatsoever, directly or indirectly, merge or consolidate any of its lines, plant, system or other property whatsoever, or franchise or permit to maintain or operate any telecommunications utility property, or perform any service as a telecommunications utility, or any part thereof, with any other public utility or telecommunications utility.

(2) A telecommunications utility that sells, leases, assigns or otherwise disposes of the whole of the property of such telecommunications utility necessary or useful in the performance of its duties to the public or any part thereof of a value in excess of \$25,000, but less than \$100,000, shall notify the commission of the sale within 60 days following the date of the sale.

(3) Every sale, lease, assignment, mortgage, disposition, encumbrance, merger or consolidation subject to subsection (1) of this section made other than in accordance with the order of the commission authorizing the same is void.

(4) This section does not prohibit or invalidate the sale, lease or other disposition by any telecommunications utility of property which is not necessary or useful in the performance of its duties to the public. [1987 c.447 §41; 1999 c.530 §2]

**759.380 Purchase of stock or property of another utility.** (1) No telecommunications utility shall, directly or indirectly, purchase, acquire or become the owner of any of the stocks or bonds or property uti-

lized for utility purposes and having a value in excess of \$10,000 of any other public utility or telecommunications utility unless authorized to do so by the Public Utility Commission.

(2) Every contract by any telecommunications utility for the purchase, acquisition, assignment or transfer to it of any of the stock of any other telecommunications utility by or through any person, partnership or corporation without the approval of the commission shall be void and of no effect, and no such transfer or assignment of such stock upon the books of the corporation pursuant to any such contract is effective for any purpose. [1987 c.447 §42]

**759.385 Contracts regarding use of utility property; filing with commission; investigation.** (1) When any telecommunications utility doing business in this state, except a telecommunications carrier that has elected to be subject to ORS 759.405 and 759.410, enters into a contract with another corporation with relation to the construction, operation, maintenance or use of the property of the telecommunications utility in Oregon, or the use of the property of the other contracting party, or any part of the property, or for service, advice, engineering, financing, rentals, leasing or for any construction or management charges with respect to any of the property, or for the purchase of property, materials or supplies, the proposed contract shall be filed with the Public Utility Commission for investigation and approval when the telecommunications utility owns a majority of or controls directly or indirectly the voting stock of the other contracting corporations.

(2) Any proposed contract described in subsection (1) of this section shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier. The commission shall promptly investigate and act upon the contract in accordance with ORS 759.390 (4) and (7).

(3) In making an investigation of the contract, the commission and accountants, examiners and agents, appointed by the commission for the purpose, shall be given free access to all books, books of account, documents, data and records of the telecommunications utility, as well as of the corporation with which it is proposing to contract, that the commission may deem material to the investigation. The failure or refusal of either of the parties to the proposed contract to comply with this subsection is prima facie evidence that the contract is unfair, unrea-

sonable and contrary to public interest, and is sufficient to justify a determination and finding of the commission to that effect. A determination and finding by the commission under this subsection has the same force and effect as any other determination or order of the commission.

(4) This section applies only to transactions in which the telecommunications utility's Oregon intrastate expenditure to the affiliate is more than \$100,000. [1987 c.447 §43; 1989 c.956 §4; 1991 c.899 §1; 1999 c.809 §1; 2005 c.232 §21; 2009 c.11 §97]

**759.390 Contracts with affiliated interests; procedure; use in rate proceedings.** (1) As used in this section, "affiliated interest" with a telecommunications utility means:

(a) Every person owning or holding directly or indirectly five percent or more of the voting securities of the telecommunications utility.

(b) Every person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(c) Every corporation five percent or more of whose voting securities are owned by any person owning five percent or more of the voting securities of the telecommunications utility or by any person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(d) Every individual who is an officer or director of the telecommunications utility or of any person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(e) Every corporation that has two or more officers or two or more directors in common with the telecommunications utility.

(f) Every entity, five percent or more of which is directly or indirectly owned by a telecommunications utility.

(g) Every person that the Public Utility Commission determines as a matter of fact, after investigation and hearing, actually is exercising any substantial influence over the policies and actions of the telecommunications utility, even though the influence is not based upon stockholdings, stockholders, directors or officers to the extent specified in this section.

(h) Every person that the commission determines as a matter of fact, after investigation and hearing, actually is exercising such substantial influence over the policies and actions of the telecommunications utility in conjunction with one or more other persons with whom they are related by owner-

ship or blood or by action in concert that together they are affiliated with the telecommunications utility within the meaning of this section even though no one of them alone is so affiliated.

(2) When any telecommunications utility doing business in this state, except a telecommunications carrier that has elected to be subject to ORS 759.405 and 759.410, enters into any contract to make any payment, directly or indirectly, to any person having an affiliated interest, for service, advice, auditing, accounting, sponsoring, engineering, managing, operating, financing, legal or other services, or enters any charge on the books of the utility, and the contract is to be recognized as an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(3) When any telecommunications utility doing business in this state enters into any contract, oral or written, with any person having an affiliated interest relating to the construction, operation, maintenance, leasing or use of the property of the telecommunications utility in Oregon, or the purchase of property, materials or supplies that is to be recognized as the basis of an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(4) The commission promptly shall examine and investigate any contract submitted to the commission under subsection (2) or (3) of this section. If, after the investigation, the commission determines that it is fair and reasonable and not contrary to the public interest, the commission shall enter findings and order approving the contract and serve a copy of the findings and order upon the telecommunications utility. Following the commission's determination of fairness and reasonableness, any expenses and capital expenditures incurred by the telecommunications utility under the contract may be recognized in any rate valuation or other hearing or proceeding. If, after the investigation, the commission determines that the contract is not fair and reasonable in all its terms and is contrary to the public interest,

the commission shall enter findings and order disapproving the contract and serve a copy of the findings and order upon the telecommunications utility. Except as provided in subsection (5) of this section, it is unlawful to recognize a disapproved contract for the purposes specified in this section.

(5) When any contract described in subsection (2) or (3) of this section has been filed with the commission within 90 days of execution and the commission has not entered an order disapproving the contract under subsection (4) of this section, the commission may not base its refusal to recognize any expenses or capital expenditures incurred under the contract in any rate valuation or other hearing or proceeding solely on the basis that the contract has not been approved under subsection (4) of this section.

(6) A telecommunications utility may not issue notes or loan its funds or give credit on its books or otherwise to any person having an affiliated interest, either directly or indirectly, without the approval of the commission.

(7) The action of the commission with respect to all the matters described in this section shall be by findings and order to be entered within 90 days after the matter has been submitted to the commission for consideration. An order of the commission under this section is subject to judicial review in the manner provided by ORS 756.610.

(8) This section applies only to transactions in which the telecommunications utility's Oregon intrastate expenditure to the affiliate is more than \$100,000. [1987 c.447 §4; 1989 c.956 §5; 1991 c.899 §2; 1999 c.809 §2; 2005 c.232 §22; 2005 c.638 §16a; 2017 c.312 §10]

**759.393 Applicability of ORS 759.385 and 759.390.** (1) Except as provided in subsection (2) of this section, the filing of proposed contracts under ORS 759.385 and 759.390 shall constitute a telecommunications utility's sole reporting obligation under ORS 759.385 and 759.390 and the Public Utility Commission may not require a telecommunications utility to submit annual or other cumulative reports regarding such contracts, including contracts with affiliates of the utility.

(2) On April 1 of each year, every telecommunications utility shall file with the commission a list of affiliate contracts executed in the preceding year. The list shall consist of the names of the parties to the contracts, the dollar amounts of the contracts and the dates of execution of the contracts. [1999 c.809 §3]

**759.394** [1991 c.899 §4; repealed by 1999 c.809 §5]

**759.395** [1987 c.447 §45; repealed by 1991 c.315 §1]

**759.405 Election of regulation under ORS 759.405 and 759.410; conditions; Telecommunications Infrastructure Account; remedy for failure of utility to comply with conditions.** (1) A telecommunications carrier may elect to be subject to this section and ORS 759.410. The telecommunications carrier shall notify, in writing, the Public Utility Commission of its election. Such election shall be effective 30 days after the written notification is received by the Public Utility Commission. A telecommunications carrier that elects to be subject to this section and ORS 759.410 shall be subject to the infrastructure investment and price regulation requirements of this section and ORS 759.410 and shall not be subject to any other regulation based on earnings, rates or rate of return.

(2) A telecommunications carrier that elects to be subject to this section and ORS 759.410 shall establish in its accounts a Telecommunications Infrastructure Account. The telecommunications carrier shall commit to its Telecommunications Infrastructure Account over a four-year period amounts totaling 20 percent of the telecommunications carrier's gross regulated intrastate revenue for the calendar year immediately prior to the year the telecommunications carrier elects to be subject to this section and ORS 759.410. Of the total committed amount, 30 percent shall be credited to and made available for the purposes of the electing carrier's

account on the date the telecommunications carrier's election becomes effective. An electing telecommunications carrier shall credit an equal amount on the same date in the next following year. The electing carrier shall credit to its Telecommunications Infrastructure Account an amount equal to 20 percent of the total committed amount on the same date in each of the next following two years.

(3)(a) A telecommunications carrier that elects to be subject to this section and ORS 759.410 shall expend the moneys in the telecommunications carrier's Telecommunications Infrastructure Account on a plan or plans approved by the Oregon Business Development Commission under ORS 759.430. Subject to paragraphs (c) and (d) of this subsection, the total amount of capital and other expenses associated with completing the projects shall equal the total amount of moneys available in the account.

(b) Moneys in the account shall be used primarily to ensure that rural and urban Oregonians have improved access to telecommunications technology and services. Expenditures from the account shall be used for investment in telecommunications infrastructure and deployment of new and advanced telecommunications services.

(c)(A) Within 120 days following the effective date of a telecommunications carrier's election to be regulated under this section and ORS 759.410, but not later than January 1 of the year following the effective date of a telecommunications carrier's election, and on the same date in each of the next following three years, a telecommunications carrier serving less than one million access lines in Oregon shall transfer 40 percent of the moneys most recently credited to its Telecommunications Infrastructure Account to the Connecting Oregon Communities Fund established under ORS 759.445.

(B) Within 120 days following the effective date of a telecommunications carrier's election to be regulated under this section and ORS 759.410, but not later than January 1 of the year following the effective date of a telecommunications carrier's election, and on the same date in the next following year, a telecommunications carrier serving one million or more access lines in Oregon shall transfer 70 percent of the moneys most recently credited to its Telecommunications Infrastructure Account to the Connecting Oregon Communities Fund established under ORS 759.445.

(d) Notwithstanding ORS 285A.075 (2), if the Oregon Business Development Commission determines, following notice and a public hearing, that the telecommunications carrier is not complying with plans or plan

modifications approved under ORS 759.430, following notice to the telecommunications carrier and reasonable opportunity to cure any noncompliance, the Oregon Business Development Commission may require the telecommunications carrier to transfer any or all moneys remaining in the carrier's Telecommunications Infrastructure Account, and any future amounts credited to the account, to the Connecting Oregon Communities Fund established under ORS 759.445.

(4) Nothing in this section affects the authority of a city or municipality to manage the public rights of way or to require fair and reasonable compensation from a telecommunications carrier, on a competitively neutral and nondiscriminatory basis, under ORS 221.420, 221.450, 221.510 and 221.515. [1999 c.1093 §24; 2001 c.104 §295]

**759.410 Intent of ORS 759.410; establishing maximum and minimum price for telecommunications services; packaging services; notice of price change, new service; enforcement.** (1) It is the intent of the Legislative Assembly that:

(a) The State of Oregon cease regulation of telecommunications carriers on a rate of return basis;

(b) Telecommunications carriers subject to rate of return regulation have the ability to opt out of rate of return regulation;

(c) A telecommunications carrier that opts out of rate of return regulation under this section and ORS 759.405 shall be subject to price cap regulation and the carrier under price cap regulation shall continue to meet service quality requirements; and

(d) Telecommunications carriers that opt out of rate of return regulation under this section and ORS 759.405 shall make payments to the state to support the use of advanced telecommunications services and to support deployment of advanced telecommunications services.

(2) A telecommunications carrier that elects to be subject to this section and ORS 759.405 shall be subject to price regulation as provided in this section and shall not be subject to any other retail rate regulation, including but not limited to any form of earnings-based, rate-based or rate of return regulation.

(3) The price a telecommunications utility that elects to be subject to this section and ORS 759.405 may charge for basic telephone service shall be established by the Public Utility Commission under ORS 759.425. Subject to ORS 759.415, the regular tariff rate of intrastate switched access and retail telecommunications services regulated by the commission, other than basic telephone service, in effect on the date the car-

rier elects to be subject to this section and ORS 759.405 shall be the maximum price the telecommunications carrier may charge for that service.

(4) A telecommunications carrier that elects to be subject to this section and ORS 759.405 may adjust the price for intrastate switched access or a regulated retail telecommunications service between the maximum price established under this section and a price floor equal to the sum of the total service long run incremental cost of providing the service for the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions. Basic telephone service shall not be subject to a price floor.

(5) The price for a new regulated retail telecommunications service introduced by a telecommunications carrier within four years after the date the carrier elects to be subject to this section and ORS 759.405 shall be subject to a price floor test by the commission to ensure that the service is not priced below the sum of the total service long run incremental cost of providing the service for the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions. Beginning on the date four years after September 1, 1999, the price of a new telecommunications service shall be subject to a price floor test by the commission to ensure that the service is not priced below the total service long run incremental cost of providing the service, without regard to whether the service is considered essential or nonessential.

(6) A telecommunications carrier that elects to be subject to this section and ORS 759.405 may package and offer any of its retail telecommunications services with any other service at any price, provided the following conditions apply:

(a) Any regulated telecommunications service may be purchased separately at or below the maximum price.

(b) The price of the package is not less than the sum of the price floors of each regulated retail telecommunications service included in the package.

(c) The price of a package that is comprised entirely of regulated retail telecommunications services does not exceed the sum of the maximum prices for each of the services.

(d) The price of a package comprised of regulated and unregulated retail telecommunications services does not exceed the sum of the maximum prices established under this section for regulated services and the retail price charged by the carrier for the individ-

ual unregulated services in the package. A telecommunications carrier subject to regulation under this section shall provide notice to the commission within 30 days of a change in the price of an unregulated telecommunications service contained in the package.

(7) Nothing in this section or ORS 759.405 is intended to limit the ability of a telecommunications carrier to seek deregulation of telecommunications services under ORS 759.052.

(8)(a) Notice of a price change authorized under subsection (4) of this section, of the introduction of a new regulated telecommunications service or of the packaging of services, must be given to the commission within 30 days following the effective date of the price change, new service or packaged service. Notice of a new regulated telecommunications service shall indicate the retail price charged by the carrier for the service.

(b) The commission may investigate any price change authorized under subsection (4) of this section, the price of a new regulated telecommunications service or the price of a package of services to determine that the price complies with the provisions of this section and any other applicable law. If the commission determines that the price of the service or package of services does not comply with the provisions of this section or other applicable law, the commission may order the telecommunications carrier to take such action as the commission determines necessary to bring the price into compliance with this section or other applicable law.

(9) Nothing in this section affects the authority of a city or municipality to manage the public rights of way or to require fair and reasonable compensation from a telecommunications carrier, on a competitively neutral and nondiscriminatory basis, under ORS 221.420, 221.450, 221.510 and 221.515.

(10) Notwithstanding any other provision of this section, the commission shall establish prices for extended area service in a manner that allows a telecommunications carrier that elects to be subject to this section and ORS 759.405 to recover all costs and lost net revenues attributable to implementing new extended area service routes. The provisions of this subsection apply to telecommunications service provided on a flat or measured basis between exchanges defined by exchange maps filed with and approved by the commission. **759.415 Order in rate proceeding filed prior to January 1, 1999, to establish maximum rate for affected telecommunications services; dismissal of rate proceeding filed after January 1, 1999.** (1) In a rate proceeding brought by a telecommuni-

cations carrier that elects to be subject to ORS 759.405 and 759.410, or by the Public Utility Commission against an electing telecommunications carrier, prior to January 1, 1999, that is on appeal on September 1, 1999, a final rate for a telecommunications service implemented as a result of the final judgment and order or negotiated settlement shall become the maximum rate for purposes of ORS 759.410.

(2) A rate proceeding brought by or against an electing telecommunications carrier, after January 1, 1999, that is pending on the effective date of the carrier's election to be subject to ORS 759.405 and 759.410, shall be dismissed by the commission or by the court if on appeal, provided the carrier elects to be subject to regulation under ORS 759.405 and 759.410 within the later of:

(a) Ninety days from the commencement of the proceeding; or

(b) Ninety days from September 1, 1999.

(3) Notwithstanding subsection (2) of this section, the parties to a rate proceeding brought by or against an electing telecommunications carrier, after January 1, 1999, that is pending on the effective date of the carrier's election to be subject to ORS 759.405 and 759.410, may agree to continue the proceeding. [1999 c.1093 §27]

**759.420 Application of ORS 759.400 to 759.455 to wholesale transactions regulated under federal law.** Nothing in ORS 759.400 to 759.455 is intended to affect, alter or in any way modify wholesale transactions regulated by the federal Telecommunications Act of 1996 (Public Law 104-104) as in effect on September 1, 1999, and regulations adopted thereunder. [1999 c.1093 §26]

#### (Universal Service Fund)

**759.425 Universal service fund; transfer of moneys to Broadband Fund; commission to establish price for basic telephone service; universal service surcharge; application to cellular services; rules.** (1)(a) The Public Utility Commission shall establish and implement a competitively neutral and nondiscriminatory universal service fund. The commission shall:

(A) Use the universal service fund to ensure basic telephone service is available at a reasonable and affordable rate; and

(B) Transfer from the universal service fund to the Oregon Business Development Department for deposit in the Broadband Fund established under ORS 285A.167, an amount per year that is equal to the lesser of:

(i) \$5 million; or

(ii) The remainder of moneys deposited in the universal service fund that are unobligated after making the designation required in paragraph (b) of this subsection.

(b) The commission shall designate the amount of moneys deposited annually in the universal service fund to be used to ensure basic telephone service. The amount designated under this paragraph may not exceed \$28 million per year.

(c) The commission may:

(A) Adopt rules to conform the universal service fund to section 254 of the federal Telecommunications Act of 1996 (P.L. 104-104), and to related regulations adopted by the Federal Communications Commission, to the extent that the Public Utility Commission determines conforming the rules is appropriate; and

(B) In addition to using the universal service fund to ensure basic telephone service, use the universal service fund to encourage broadband service availability and to provide support to telecommunications carriers that provide both basic telephone service and broadband service.

(2)(a) The commission shall establish the price a telecommunications utility may charge its customers for basic telephone service. The commission shall periodically review and evaluate the status of telecommunications services in the state and designate the services included in basic telephone service. The commission shall periodically review and adjust as necessary the price a telecommunications utility may charge for basic telephone service.

(b) The provisions of this subsection do not apply to the basic telephone service provided by a telecommunications utility described in ORS 759.040.

(3)(a) The commission shall establish a benchmark for basic telephone service as necessary for the administration and distribution of the universal service fund. The universal service fund shall provide explicit support to an eligible telecommunications carrier that is equal to the difference between the cost of providing basic telephone service and the benchmark, less any explicit compensation received by the telecommunications carrier from federal sources specifically used to recover local loop costs and less any explicit support received by the telecommunications carrier from a federal universal service program.

(b) The commission shall periodically review the benchmark established under paragraph (a) of this subsection and adjust the benchmark as necessary to reflect:

(A) Changes in competition in the telecommunications industry;

(B) Changes in federal universal service support; and

(C) Other relevant factors as determined by the commission.

(c) Except for a telecommunications utility described in ORS 759.040, the commission shall seek to limit the difference between the price a telecommunications utility may charge for basic telephone service and the benchmark.

(4)(a) There is imposed a universal service surcharge on the sale in this state of all:

(A) Retail telecommunications services;

(B) Retail commercial mobile radio services; and

(C) Retail interconnected voice over internet protocol services.

(b) A retail commercial mobile radio service provider shall identify the intrastate revenues subject to the universal service surcharge based on the inverse of the percentage of interstate revenues utilized for purposes of federal universal service contributions or based on any other method approved by the Public Utility Commission. A retail commercial mobile radio service provider may rely upon the sourcing rules set forth in the Mobile Telecommunications Sourcing Act (P.L. 106-252) to identify revenues attributable to Oregon.

(c) A retail interconnected voice over internet protocol service provider may identify, in accordance with federal guidelines, the intrastate revenues subject to the universal service surcharge based on any one of the following:

(A) The inverse of the interstate safe harbor percentage established by the Federal Communications Commission for interconnected voice over internet protocol service for federal universal service contribution purposes, as the interstate safe harbor percentage may be revised from time to time;

(B) A traffic study specific to the interconnected voice over internet protocol service provider that allocates revenues between federal and state jurisdictions; or

(C) Another methodology for accurately apportioning interconnected voice over internet protocol service revenues between federal and state jurisdictions.

(d) For any service provider subject to the universal service surcharge that provides, to multiple locations, shared simultaneous voice channel capacity configured to provide local dial in different states, the revenue subject to the surcharge shall be only the portion of the shared capacity in this state as identified:

(A) By information itemizing, on the billing statements provided to customers, the charges subject to the surcharge, as may be identified by individual end-user location, the total number of end users and the number of end users at each end-user location; or

(B) If information described in subparagraph (A) of this paragraph does not exist, by the service provider's billing system books and records.

(e) Unless otherwise provided by the Public Utility Commission by rule, the universal service surcharge must be a uniform percentage of the sale of services subject to the surcharge in an amount sufficient to support the purposes of the universal service fund established under subsection (1) of this section, provided that the percentage does not exceed six percent of the sale of services subject to the surcharge.

(f) The universal service surcharge may be listed by a telecommunications carrier as a separate line item in billing statements provided to customers, as prescribed by the commission by rule or order. The commission may not prescribe whether, or the manner by which, a commercial mobile radio services provider or an interconnected voice over internet protocol services provider may list the surcharge in billing statements provided to customers.

(g) A service provider required to collect the universal service surcharge shall:

(A) Transmit amounts collected pursuant to this section to the commission in accordance with a schedule adopted by the commission; and

(B) Provide the commission with information requested by the commission as necessary for the commission to implement this section.

(5) The commission shall deposit moneys transmitted to the commission pursuant to subsection (4) of this section in the universal service fund established under subsection (1) of this section.

(6) The universal service fund established under subsection (1) of this section is separate and distinct from the General Fund. The universal service fund shall consist of all universal service surcharge moneys collected by service providers required to collect the surcharge and transmitted to the commission for deposit in the universal service fund. The universal service fund may be used only for the purposes described in this section and for payment of expenses incurred by the commission or a third party appointed by the commission to administer this section. All moneys in the universal service fund are continuously appropriated to the commission to carry out the provisions of this section.

Interest on moneys deposited in the universal service fund shall accrue to the universal service fund.

(7) A pay telephone provider may apply to the commission, on a form developed by the commission, for a refund of the universal service surcharge imposed on the pay telephone provider under subsection (4) of this section for the provision of pay telephone service.

(8) Nothing in this section is intended to grant the commission the authority to impose any requirement or condition, or to exercise any regulatory authority, with respect to commercial mobile radio services or interconnected voice over internet protocol services other than as expressly provided for in this section. [1999 c.1093 §28; 2001 c.966 §3; 2003 c.14 §§455,456; 2007 c.353 §1; 2009 c.885 §16; 2011 c.189 §1; 2017 c.32 §1; 2020 s.s.1 c.17 §2]

Projects funded from a telecommunications carrier's Telecommunications Infrastructure Account shall be completed by the carrier and shall be substantially for the benefit of the carrier's customers. Plans approved by the commission must be consistent with the purpose of the fund as described in ORS 759.405. The commission shall give priority to projects that provide increased bandwidth

between communities, route diversity and access to advanced telecommunications services in an expedited manner. The commission shall seek to ensure that an approved project is the most technically appropriate means of addressing the circumstances presented in a project plan. The commission shall review recommendations and analysis from the Connecting Oregon Communities Advisory Board established in subsection (2) of this section prior to approving a plan. Project plans may be submitted by local communities including but not limited to local governments, community institutions, citizen groups, public and private educational institutions and business groups.

(b) Under the policies and guidance of the commission, the Oregon Business Development Department shall adopt rules for the submission of project plans by telecommunications carriers and other persons, including criteria for approval of such plans. The rules shall include criteria to determine if the telecommunications carrier reasonably should be expected to make the investment based on an economic analysis of the project. Projects that are determined to meet the criteria but are not economically self-supporting or would not be undertaken in the time frame proposed shall be given priority over similar projects that would be economically self-supporting or likely would be completed in the time frame proposed. The rules shall provide for review of the economic benefits of the proposed plan to the affected community and the potential for the proposed plan to leverage other funding sources including but not limited to federal, state and private sources.

(c) The commission also shall approve expenditures from the Public Access Account of the Connecting Oregon Communities Fund established in ORS 759.445 (4).

(2) There is established within the Oregon Business Development Department the Connecting Oregon Communities Advisory Board consisting of five members appointed by the commission. The commission shall seek advice from the Governor prior to making an appointment to the advisory board.

(6) The purpose of the advisory board is to review and make recommendations to the Oregon Business Development Commission for approval of and modifications to projects funded by a telecommunications carrier's Telecommunications Infrastructure Account under this section and ORS 759.405. The advisory board shall seek advice and comment on plans submitted by a telecommunications carrier from affected local communities including but not limited to local governments, citizens and businesses. The advisory board also shall seek advice and comment from state and federal agencies when appropriate to ensure that investments will maximize statewide public benefits and are consistent with the needs and desires of the local communities. The advisory board shall consider the needs of and impact on education, health care, economic development and the delivery of state and local governmental services when evaluating a plan.

(7) The advisory board also shall review proposals submitted to the commission under ORS 759.445 (5) and make recommendations to the commission regarding approval, modification or denial of the proposals.

### SERVICE QUALITY STANDARDS AND PROHIBITED ACTS

**759.450 Minimum service quality standards; rules; customer impact indices; factors; wholesale services; improvement plan; penalties; exceptions.** (1) It is the intent of the Legislative Assembly that every telecommunications carrier and those telecommunications utilities and competitive telecommunications providers that provide wholesale services meet minimum service quality standards on a nondiscriminatory basis.

(2) The Public Utility Commission shall determine minimum service quality standards that relate to the provision of retail telecommunications services to ensure safe and adequate service. Except as provided in subsections (8) and (9) of this section, minimum service quality standards adopted under this section shall apply to all telecommunications carriers. The commission by rule shall review and revise the minimum service quality standards as necessary to ensure safe and adequate retail telecommunications services.

(3) The minimum service quality standards for providing retail telecommunications services adopted by the commission shall relate directly to specific customer impact indices including but not limited to held orders, trouble reports, repair intervals and carrier inquiry response times. In adopting minimum service quality standards, the commission shall, for each standard adopted, consider the following:

(a) General industry practice and achievement;

(b) National data for similar standards;

(c) Normal operating conditions;

(d) The historic purpose for which the telecommunications network was constructed;

(e) Technological improvements and trends; and

(f) Other factors as determined by the commission.

(4) Consistent with the federal Telecommunications Act of 1996 (Public Law 104-104), as amended and in effect on September 1, 1999, the commission may establish minimum service quality standards related to providing wholesale, interconnection, transport and termination services provided by a telecommunications carrier and those telecommunications utilities and competitive telecommunications providers that provide wholesale telecommunications services.

(5) The commission shall require a telecommunications carrier, telecommunications utility or competitive telecommunications provider that is not meeting the minimum service quality standards to submit a plan for improving performance to meet the standards. The commission shall review and approve or disapprove the plan. If the carrier, utility or provider does not meet the goals of its improvement plan within six months or if the plan is disapproved by the commission, penalties may be assessed against the carrier, utility or provider on the basis of the carrier's, utility's or provider's service quality measured against the minimum service quality standards and, if assessed, shall be assessed according to the provisions of ORS 759.990.

(6) Prior to commencing an action under this section and ORS 759.990, the commission shall allow a telecommunications carrier, telecommunications utility or competitive telecommunications provider an opportunity to demonstrate that a violation of a minimum service quality standard is the result of the failure of a person providing telecommunications interconnection service to meet the person's interconnection obligations.

(7) Total annual penalties imposed on a telecommunications utility under this section shall not exceed two percent of the utility's gross intrastate revenue from the sale of telecommunications services for the calendar year preceding the year in which the penalties are assessed. Total annual penalties imposed on a competitive telecommunications provider under this section shall not exceed two percent of the provider's gross revenue from the sale of telecommunications services in this state for the calendar year preceding the year in which the penalties are imposed.

(8) The provisions of this section do not apply to:

(a) Radio communications service, radio paging service, commercial mobile radio service, personal communications service or cellular communications service; or

(b) A cooperative corporation organized under ORS chapter 62 that provides telecommunications services.

(9) Telecommunications utilities and groups of affiliated telecommunications utilities that serve fewer than 50,000 access lines in Oregon are exempt from any minimum service quality standard adopted under this section that would require the utility or group to measure carrier inquiry response time. [1999 c.1093 §29; 2001 c.95 §1]

**759.455 Prohibited acts; commission action on allegation of violation; penalties; judicial review.** (1) Unless exempt from compliance under section 251(f) of the federal Telecommunications Act of 1996 (47 U.S.C. 251(f)), a telecommunications utility shall not:

(a) Discriminate against another provider of retail telecommunications services by unreasonably refusing or delaying access to the telecommunications utility's local exchange services.

(b) Discriminate against another provider of retail telecommunications services by providing access to required facilities on terms or conditions less favorable than those the telecommunications utility provides to itself and its affiliates. A telecommunications facility, feature or function is a required facility if:

(A) Access to a proprietary facility, feature or function is necessary; and

(B) Failure to provide access to the facility, feature or function would impair a telecommunications carrier seeking access from providing the services the carrier is seeking to provide.

(c) Unreasonably degrade or impair the speed, quality or efficiency of access or any other service, product or facility provided to another provider of telecommunications services.

(d) Fail to disclose in a timely and uniform manner, upon reasonable request and pursuant to a protective agreement concerning proprietary information, all information reasonably necessary for the design of network interface equipment, services or software that will meet the specifications of the telecommunications utility's local exchange network.

(e) Unreasonably refuse or delay interconnections or provide inferior interconnections to another provider of telecommunications services.

(f) Use basic exchange services rates, directly or indirectly, to subsidize or offset the cost of other products or services offered by the telecommunications utility.

(g) Discriminate in favor of itself or an affiliate in the provision and pricing of, or extension of credit for, any telephone service.

(h) Fail to provide a service, product or facility in accordance with applicable contracts, and tariffs and rules of the Public Utility Commission.

(i) Impose unreasonable or discriminatory restrictions on network elements or the resale of its services, except that:

(A) The telecommunications utility may require that residential service not be resold as a different class of service; and

(B) The commission may prohibit the resale of services the commission has approved for provision to a not-for-profit entity at rates below those offered to the general public.

(j) Provide telephone service to a person acting as a telecommunications provider if the commission has ordered the telecommunications utility to discontinue telephone service to the person.

(2) A complaint alleging a violation of subsection (1) of this section shall be heard by the Public Utility Commission or, at the commission's discretion, by an Administrative Law Judge designated by the commission. A hearing under this subsection shall be conducted in an expedited manner consistent with the following:

(a) The complaint shall be served upon the telecommunications carrier and filed with the commission.

(b) An answer or other responsive pleading to the complaint shall be filed with the commission not more than 10 days after receipt of the complaint. Copies of the answer or responsive pleading shall be served upon the complainant and upon the commission.

(c) A prehearing conference shall be held not later than 15 days after the complaint is filed. Hearing on the complaint shall commence not later than 30 days after the complaint is filed. Within 45 days after the complaint is filed, the commission shall either prepare a final decision or approve as final the decision of the Administrative Law Judge. The final decision shall be issued as an order of the commission in the manner provided under ORS 756.558.

(3) If the commission or Administrative Law Judge finds that a violation of this section has occurred, the commission shall, within five business days, order the telecommunications utility to remedy the violation within a specified period of time. The commission may prescribe specific action to be taken by the utility, including but not limited to submitting a plan for preventing future violations. If the violation continues

beyond the time period specified in the commission's order, the commission on its own motion or upon the motion of an interested party may seek penalties as provided in ORS 759.990 or otherwise may seek enforcement under ORS 756.160 or 756.180, or both.

(4) Total annual penalties imposed on a telecommunications utility under this section and ORS 759.450 shall not exceed two percent of the utility's gross intrastate revenue from the sale of telecommunications services for the year preceding the year in which the violation occurred.

(5) An order of the commission under this section is subject to judicial review in the manner provided by ORS 756.610.

(6) The Court of Appeals shall give proceedings brought before the court under this section priority over all other matters before the court. [1999 c.1093 §38; 2005 c.638 §17; 2017 c.312 §11]

## ALLOCATION OF TERRITORIES (Generally)

**759.500 Definitions for ORS 759.500 to 759.570.** As used in ORS 759.500 to 759.570, unless the context requires otherwise:

(1) "Allocated territory" means a geographic area for which the Public Utility Commission has allocated to no more than one person the authority to provide local exchange telecommunications service, the boundaries of which are set forth on an exchange map filed with and approved by the commission.

(2) "Person" includes:

(a) An individual, firm, partnership, corporation, association, cooperative or municipality; or

(b) The agent, lessee, trustee or referee of an individual or entity listed in paragraph (a) of this subsection.

(3) "Local exchange telecommunications service" has the meaning given that term in ORS 759.005, except that "local exchange telecommunications service" does not include service provided through or by the use of any equipment, plant or facilities:

(a) For the provision of telecommunications services that pass through or over but are not used to provide service in or do not terminate in an area allocated to another person providing a similar telecommunications service;

(b) For the provision of local exchange telecommunications service, as defined in ORS 759.005, commonly known as "private lines" or "farmer lines"; or

(c) For the provision of shared telecommunications service. [1987 c.447 §53; 2005 c.232 §24; 2007 c.825 §2]

**759.505** [1987 c.447 §54; repealed by 2005 c.232 §32]

**759.506 Purpose of allocated territory laws; carrier of last resort obligations; exemptions from obligations; reinstatement of obligations.** (1) The purpose of establishing allocated territories under ORS 759.500 to 759.570 is to ensure that telecommunications utilities, cooperative corporations and municipalities certified by the Public Utility Commission to provide local exchange telecommunications service:

(a) Provide adequate and safe service to the customers of this state; and

(b) Serve all customers in an adequate and nondiscriminatory manner.

(2) The obligations described in this section may be referenced as carrier of last resort obligations.

(3) The commission, upon petition from a telecommunications utility, cooperative corporation or municipality, may exempt the telecommunications utility, cooperative corporation or municipality from the obligations described in this section if the commission finds, for a property with four or more single-family dwellings, that the owner or developer of the property, or a person acting on behalf of the owner or developer:

(a) Permits an alternative service provider to install its facilities or equipment used to provide local telecommunications service based on a condition of exclusion of the telecommunications utility, cooperative corporation or municipality during the construction phase of the real property;

(b) Accepts or agrees to accept incentives or rewards from an alternative service provider that are contingent upon the provision of any or all local telecommunications services by one or more alternative service providers to the exclusion of the telecommunications utility, cooperative corporation or municipality; or

(c) Collects from the occupants or residents of the property mandatory charges for the provision of any local telecommunications service provided to the occupants or residents by an alternative service provider in any manner, including, but not limited to, collection through rent, fees or dues.

(4) If the commission, upon petition from any interested person located within the property for which the commission has waived the carrier of last resort obligations under subsection (3) of this section, finds that the existing public convenience and necessity requires reinstatement of the carrier of last resort obligations, then the commission has the power to assign the obligations to a telecommunications utility, cooperative corporation or municipality after a public hearing. The commission shall determine

how the costs of serving the customers are allocated so that the telecommunications utility, cooperative corporation or municipality will be allowed an opportunity to recover reasonable and prudent costs that exceed the costs that would have been incurred to initially construct or acquire facilities to serve customers of the territory. The determination of cost allocation by the commission must also divide the costs allowed equitably among all customers of the territory to which service is being reinstated. [2005 c.232 §26; 2009 c.124 §1]

**759.510** [1987 c.447 §55; repealed by 2005 c.232 §32]

**759.515** [1987 c.447 §56; repealed by 2005 c.232 §32]

**759.520** [1987 c.447 §57; repealed by 2005 c.232 §32]

**759.525** [1987 c.447 §58; 2005 c.22 §509; repealed by 2005 c.232 §32]

**759.530** [1987 c.447 §59; repealed by 2005 c.232 §32]

**759.535 Application to serve unserved territory; hearing; notice.** (1) A telecommunications utility, cooperative corporation or municipality that desires to provide local exchange telecommunications service in a territory that is not served by another person providing a similar local exchange telecommunications service may apply to the Public Utility Commission for an order allocating the territory to the applicant. The application shall include an exchange map that shows the unserved territory that the applicant is requesting to serve.

(2) The commission shall within 30 days after the filing of the application give notice of the filing. If the commission chooses, or if a customer requests a hearing on the matter within 30 days of the notice, the commission shall hold a hearing by telephone or in person. The commission shall give notice of the hearing within 30 days of the request. The notice shall set the date and place of hearing. The hearing shall be held at a place within or conveniently accessible to the territory covered by the application. Notice of the filing shall be by publication in a newspaper or newspapers of general circulation in the territory covered by the application and shall be published at least once weekly for two successive weeks. Written notice of the filing shall be given to providers of similar local exchange telecommunications service in adjacent territory. [1987 c.447 §60; 2005 c.232 §28]

**759.540** [1987 c.447 §61; repealed by 2005 c.232 §32]

**759.545** [1987 c.447 §62; repealed by 2005 c.232 §32]

**759.550** [1987 c.447 §63; repealed by 2005 c.232 §32]

**759.555** [1987 c.447 §64; repealed by 2005 c.232 §32]

**759.560 Assignment or transfer of allocated territory; rules.** (1) The rights acquired by an allocation of territory may only be assigned or transferred with the approval of the Public Utility Commission after a

finding that the assignment or transfer is not contrary to the public interest.

(2) The commission may approve a transfer of territory previously allocated only upon receipt of an application for allocation that is jointly filed by the transferor and the transferee. The application shall include exchange maps that show how the applicants want the commission to allocate the territory. The commission shall enter an order either approving or disapproving the application as filed, or as amended, together with findings of fact supporting the order.

(3)(a) An order approving an allocation of territory may not be construed to confer any property right.

(b) Notwithstanding paragraph (a) of this subsection, upon the death of an individual to whom territory was allocated or who was an applicant under an approved order, the executor or administrator of the estate of the individual shall continue the operation of local exchange telecommunications service for the purpose of transferring territorial allocation rights. The executor or administrator shall continue the operation for a period not to exceed two years from the date of death.

(4) In the event the property of a person serving an allocated territory is condemned, no value shall be claimed or awarded by reason of the contract or order making the allocation.

(5) The commission may by rule establish requirements for notice to affected persons of the assignment or transfer of allocated territory. [1987 c.447 §65; 2005 c.232 §29]

**759.565 Injunction against unauthorized provision of service.** In the event an allocated territory is served by a person that is not authorized by the Public Utility Commission to provide local exchange telecommunications service in the territory, an aggrieved person or the commission may file an action in the circuit court for any county in which is located some or all of the allocated territory allegedly involved in the unauthorized provision of service, for an injunction against the alleged unauthorized provision of service. The trial of the action shall proceed as in an action not triable by right to a jury. Any party may appeal to the Court of Appeals from the circuit court's judgment, as in other equity cases. The remedy provided in this section shall be in addition to any other remedy provided by law. [1987 c.447 §66; 2003 c.576 §562; 2005 c.232 §30]

**759.570 Application of law to local government.** (1) ORS 759.500 to 759.570 may not be construed or applied to restrict the powers granted to cities to issue franchises or to restrict the exercise of the power of condemnation by a municipality. If a munic-

ipality condemns or otherwise acquires equipment, plant or facilities from another person for rendering local exchange telecommunications service, the municipality acquires all of the rights of the person whose property is condemned to serve the territory served by the acquired properties.

(2) ORS 759.500 to 759.570 may not be construed to restrict the right of a municipality to provide local exchange telecommunications service for street lights, fire alarm systems, airports, buildings and other municipal installations regardless of their location.

(3) ORS 759.500 to 759.570 may not be construed to confer upon the Public Utility Commission any regulatory authority over rates, service or financing of cooperatives or municipalities. [1987 c.447 §67; 2005 c.232 §31]

**759.575** [1987 c.447 §68; repealed by 1993 c.204 §5]

#### (Unservd Territory)

**759.580 Power of commission to require service to unserved territory.** The Public Utility Commission has power to require any telecommunications utility, after a public hearing of all parties interested, to extend its line, plant or system into, and to render service to, a locality not already served when the existing public convenience and necessity requires such extension and service. However, no such extension of service shall be required until the telecommunications utility has been granted such reasonable franchises as may be necessary for the extension of service and unless the conditions are such as to reasonably justify the necessary investment by the telecommunications utility in extending its line, plant or system into such locality and furnishing such service. [1987 c.447 §4]

**759.585 Definitions for ORS 759.585 to 759.595.** As used in ORS 759.585 to 759.595, "unserved person" means a person:

(1) Who does not have local exchange telecommunications service;

(2) Who is applying for residential service or business service with five or fewer lines; and

(3) Who, for the initiation of such service, would be required to pay line extension charges. [1989 c.574 §2; 1991 c.307 §1]

**759.590 Application for service by unserved person; rules.** (1) An unserved person may file an application with the Public Utility Commission for an order directing another telecommunications utility to provide local exchange service to the unserved person.

(2) The commission shall adopt rules which prescribe the form of an application filed under subsection (1) of this section and which provide for reasonable notice and op-

portunity for hearing to all telecommunications utilities affected by an application. [1989 c.574 §3; 1991 c.307 §2]

**759.595 Criteria for granting application for service; effect on other territorial allocation.** (1) The Public Utility Commission shall grant an application filed under ORS 759.590 if the commission finds that:

(a) The telecommunications utility in whose territory the unserved person is located has declined to serve without line extension charges;

(b) Another telecommunications utility has agreed to provide local exchange telecommunications service to the unserved person with no line extension charge or with line extension charges lower than those offered by the telecommunications utility in whose territory the unserved person is located; and

(c) Approval of the application is not contrary to the public interest.

(2) Any order of the commission issued under subsection (1) of this section shall not have the effect of changing any territory allocated under ORS 758.400 to 758.475 that is being provided with local exchange telecommunications service. [1989 c.574 §4; 1991 c.307 §3]

**759.600** [1989 c.574 §5; repealed by 1991 c.307 §4]

### ATTACHMENT REGULATION

**759.650 Definitions for ORS 759.650 to 759.675.** As used in ORS 759.650 to 759.675, unless the context requires otherwise:

(1) "Attachment" means any wire or cable for the transmission of intelligence by telegraph, telephone or television (including cable television), light waves or other phenomena, or for the transmission of electricity for light, heat or power, and any related device, apparatus or auxiliary equipment, installed upon any pole or in any telegraph, telephone, electrical, cable television or communications right of way, duct, conduit, manhole or handhole or other similar facility or facilities owned or controlled, in whole or in part, by one or more public utility, telecommunications utility or people's utility district.

(2) "Licensee" means any person, firm, corporation, partnership, company, association, joint stock association or cooperatively organized association which is authorized to construct attachments upon, along, under or across the public ways.

(3) "People's utility district" means any concern providing electricity organized pursuant to ORS 261.010 and includes any entity cooperatively organized or owned by federal,

state or local government or a subdivision of state or local government.

(4) "Public utility" has the meaning for that term provided in ORS 757.005, and does not include any entity cooperatively organized or owned by federal, state or local government or a subdivision of state or local government.

(5) "Telecommunications utility" means any telecommunications utility as defined in ORS 759.005 and does not include any entity cooperatively organized or owned by federal, state or local government, or a subdivision of state or local government. [1987 c.447 §22; 1989 c.5 §18]

**759.655 Authority of commission to regulate attachments.** The Public Utility Commission of Oregon shall have the authority to regulate in the public interest the rates, terms and conditions for attachments by licensees to poles or other facilities of telecommunications utilities. All rates, terms and conditions made, demanded or received by any telecommunications utility for any attachment by a licensee shall be just, fair and reasonable. [1987 c.447 §23]

**759.660 Fixing charges or rates; criteria; costs of hearing.** (1) Whenever the Public Utility Commission of Oregon finds, after hearing had upon complaint by a licensee or people's utility district or a telecommunications utility that the rates, terms or conditions demanded, exacted, charged or collected in connection with attachments or availability of surplus space for such attachments are unjust or unreasonable, or that such rates or charges are insufficient to yield a reasonable compensation for the attachment and the costs of administering the same, the commission shall determine the just and reasonable rates, terms and conditions thereafter to be observed and in force and shall fix the same by order. In determining and fixing such rates, terms and conditions, the commission shall consider the interest of the customers of the licensee, as well as the interest of the customers of the telecommunications utility or people's utility district which owns the facility upon which the attachment is made.

(2) When the order applies to a people's utility district, the order also shall provide for payment by the parties of the cost of the hearing. The payment shall be made in a manner which the commission considers equitable. [1987 c.414 §166d; 1987 c.447 §24; 1989 c.5 §19]

**759.665 Considerations in determining just and reasonable rate.** A just and reasonable rate shall assure the telecommunications utility or people's utility district the recovery from the licensee of not less than all the additional costs of providing and

maintaining pole attachment space for the licensee nor more than the actual capital and operating expenses, including just compensation, of the telecommunications utility or people's utility district attributable to that portion of the pole, duct or conduit used for the pole attachment, including a share of the required support and clearance space in proportion to the space used for pole attachment above minimum attachment grade level, as compared to all other uses made of the subject facilities and uses which remain available to the owner or owners of the subject facilities. [1987 c.447 §25]

**759.670 Presumption of reasonableness of rates set by agreement.** Agreements regarding rates, terms and conditions of attachments shall be deemed to be just, fair and reasonable unless the Public Utility Commission finds upon complaint by a telecommunications utility, people's utility district or licensee party to such agreement and after hearing, that such rates, terms and conditions are adverse to the public interest and fail to comply with the provisions hereof. [1987 c.447 §26; 1989 c.5 §20]

**759.675 Regulatory procedure.** The procedures of the Public Utility Commission for petition, regulation and enforcement relative to attachments, including any rights of appeal from any decision thereof, shall be the same as those applicable to the commission. [1987 c.447 §27; 1989 c.5 §21]

## OPERATOR SERVICE PROVIDERS

**759.680 Operator service provider duties to service users; rules.** (1) As used in this section:

(a) "Call aggregator" means a person who furnishes a telephone for use by the public, including but not limited to hotels, hospitals, colleges, airports, public pay station owners and pay station agents.

(b) "Contract" means an agreement between an operator service provider and a call aggregator to automatically connect users of telephones to the operator service provider when certain operator-assisted long distance calls are made.

(c) "Operator service" includes but is not limited to billing or completion of third-number, person-to-person, collect or credit card calls.

(d) "Operator service provider" means a person who furnishes operator service under contract with a call aggregator.

(2) Each operator service provider shall:

(a) Notify all callers at the beginning of the call of the provider's name.

(b) Disclose rate and service information to the caller when requested.

(c) Maintain a current list of emergency numbers for each service territory it serves.

(d) Transfer an emergency call to the appropriate emergency number when requested.

(e) Transfer a call to, or instruct the caller how to reach, the originating local exchange company's operator service upon request of the caller, free of charge.

(f) Not transfer a call to another operator service provider without the caller's notification and consent.

(g) Not bill or collect for calls not completed to the caller's destination. Where technical limitations of the network prevent the identification of incomplete calls, each operator service provider shall issue credits for such calls upon the request of the caller.

(3) Each call aggregator who has a contract with an operator service provider shall post in the immediate vicinity of each telephone available to the public the name of the operator service provider, a toll-free customer service number, a statement that rate quotes are available upon request and instructions on how the caller may access other operator service providers.

(4) Neither the operator service provider nor the call aggregator shall block or prevent a telephone user's access to the user's operator service provider of choice. In order to prevent fraudulent use of its services, an operator service provider or a call aggregator may block access if the provider obtains a waiver for such purpose from the Public Utility Commission.

(5) The provisions of this section shall be carried out in such manner as the commission, by rule, may prescribe. [Formerly 759.690]

## RESIDENTIAL SERVICE PROTECTION FUND

### (Generally)

**759.685 Surcharge assessed on retail telecommunications subscribers; rules.**

(1)(a) In order to fund the program described in ORS 759.693 to 759.698, the Public Utility Commission shall develop and implement a system for assessing a surcharge in an amount not to exceed 35 cents per month against each paying retail subscriber who has telecommunications service, or who has interconnected voice over internet protocol service, with access to a telecommunications relay service. The commission shall apply the surcharge on a telecommunications circuit designated for a particular subscriber. One subscriber line must be counted for each circuit that is capable of generating usage on the line side of the switched network regardless of the quantity of customer premises equipment connected to each circuit. For

providers of central office based services, the surcharge must be applied to each line that has unrestricted connection to the telecommunications relay service or, for lines that have restricted access to the telecommunications relay service, on the basis of software design. For cellular, wireless or other radio common carriers, the surcharge must be applied on a per instrument basis and only to subscribers whose place of primary use, as defined and determined under 4 U.S.C. 116 to 126, is within this state.

(b) For purposes of this subsection, the commission shall adopt by rule the definition for “interconnected voice over internet protocol service.” The rule defining “interconnected voice over internet protocol service” must be consistent with the definition for “interconnected VoIP service” in 47 C.F.R. 9.3.

(2) The surcharge imposed by subsection (1) of this section does not apply to:

(a) Services upon which the state is prohibited from imposing the surcharge by the Constitution or laws of the United States or the Constitution or laws of the State of Oregon.

(b) Interconnection between telecommunications utilities, telecommunications cooperatives, competitive telecommunications services providers certified under ORS 759.020, radio common carriers and interexchange carriers.

(3) The commission annually shall review the surcharge and the balance in the Residential Service Protection Fund established under ORS 759.687 and may make adjustments to the amount of the surcharge to ensure that the fund has adequate resources, provided that the fund balance does not exceed six months of projected expenses.

(4) Moneys collected pursuant to the surcharge may not be considered in any proceeding to establish rates for telecommunication service.

(5) The commission shall direct telecommunications public utilities to identify separately in bills to customers for service the surcharge imposed under this section.

(6) Notwithstanding ORS 314.835 and 314.840, the Department of Revenue may disclose information received under ORS 403.200 to 403.230 to the commission to carry out the provisions of ORS 759.693 to 759.698.

(7) The commission may disclose information obtained pursuant to ORS 759.693 to 759.698 to the department to administer the tax imposed under ORS 403.200 to 403.230. [1987 c.290 §7; 1991 c.622 §2; 1991 c.872 §8; 1993 c.231 §1; 1995 c.79 §387; 1995 c.451 §1; 2001 c.408 §2; 2011 c.78 §1; 2017 c.237 §1; 2017 c.434 §3]

**759.687 Residential Service Protection Fund.** The Residential Service Protection Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by moneys in the fund shall be credited to the fund. All moneys in the fund are appropriated to the Public Utility Commission to carry out the provisions of chapter 290, Oregon Laws 1987. [1987 c.290 §8; 1989 c.966 §74; 1991 c.622 §3; 1991 c.872 §1; 1993 c.231 §2]

#### (Residential Service Protection)

**Note:** Sections 2 to 6 and 16, chapter 290, Oregon Laws 1987, provide:

**Sec. 2.** The Legislative Assembly declares that it is the policy of this state to assure that adequate, affordable residential telecommunication service is available to all citizens of this state. [1987 c.290 §2]

**Sec. 3.** In carrying out the provisions of section 2 of this 1987 Act, the Public Utility Commission may require telecommunications public utilities to assure that time payment plans for deposits and installation charges or such other options as may be appropriate for a particular telecommunications public utility are made available. [1987 c.290 §3]

**Sec. 4.** In carrying out the provisions of section 2 of this 1987 Act the Public Utility Commission may:

(1) Notwithstanding ORS 757.310, approve a different rate for local exchange residential telecommunication service for low income customers than the rate charged to other residential customers. However, any such rate is subject to all other provisions of this chapter [ORS chapter 759].

(2) Establish plans, or require telecommunications public utilities to establish plans, to educate customers regarding the options available for obtaining telecommunication services. [1987 c.290 §4]

**Sec. 5.** (1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, the Public Utility Commission shall establish rules to prohibit the termination of local exchange residential service when such termination would significantly endanger the physical health of the residential customer.

(2) The commission shall provide by rule a method for determining when the termination of local exchange residential service would significantly endanger the physical health of the residential customer.

(3)(a) The commission shall require that each telecommunications public utility:

(A) Accept medical statements by licensed physicians, naturopathic physicians and licensed nurse practitioners as sufficient evidence of significant endangerment of health; and

(B) Establish procedures for submitting and receiving such medical statements.

(b) A medical statement submitted under this subsection shall be valid for such period as the commission, by rule, may prescribe.

(4) Rules adopted by the commission pursuant to this section shall not apply to telecommunication service other than local exchange residential service.

(5) A customer submitting a medical certificate as provided in this section is not excused from paying for telecommunication service. Customers are required to enter into a time payment agreement with the utility if an overdue balance exists. Local exchange service is subject to termination if a customer refuses to enter into or fails to abide by terms of a payment agreement.

(6) Nothing in this section prevents the termination of local exchange residential service if the telecommunications public utility providing the service does not

have the technical ability to terminate toll telecommunication service without also terminating local exchange telecommunication service. [1987 c.290 §5; 2017 c.356 §104]

**Sec. 6.** (1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, and to support broadband internet access service, the Public Utility Commission shall establish a plan to provide assistance to low income customers through differential rates or otherwise. The plan of assistance may be in addition to the available funding offered by the Federal Communications Commission. The plan established by the Public Utility Commission shall prescribe the amount of assistance to be provided and the time and manner of payment.

(2) For the purpose of establishing a plan to provide assistance to low income customers under this section, the commission shall require all public utilities, cooperative corporations and unincorporated associations providing local exchange telecommunication service to participate in the plan, except as provided in subsection (3) of this section.

(3) In lieu of participation in the commission's plan to assist low income customers, a public utility, cooperative corporation or unincorporated association providing local exchange telecommunication service may apply to the commission to establish an alternative plan for the purposes of carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, and supporting broadband internet access service for its own customers. The commission shall adopt standards for determining the adequacy of alternative plans.

(4) The commission may contract with any governmental agency to assist the commission in the administration of any assistance plan adopted pursuant to this section.

(5) As used in sections 2 to 6, chapter 290, Oregon Laws 1987, "low income customer" has the meaning given that term by the commission by rule. [1987 c.290 §6; 1991 c.622 §1; 2007 c.29 §1; 2009 c.599 §25; 2011 c.77 §1; 2013 c.29 §1; 2019 c.91 §1; 2021 c.66 §1]

**Sec. 16.** (1) Sections 1, 2, 3, 4 and 15, chapter 290, Oregon Laws 1987, are repealed on January 1, 2030.

(2) Section 5, chapter 290, Oregon Laws 1987, as amended by section 104, chapter 356, Oregon Laws 2017, is repealed on January 1, 2030.

(3) Section 6, chapter 290, Oregon Laws 1987, as amended by section 1, chapter 622, Oregon Laws 1991, section 1, chapter 29, Oregon Laws 2007, section 25, chapter 599, Oregon Laws 2009, section 1, chapter 77, Oregon Laws 2011, section 1, chapter 29, Oregon Laws 2013, section 1, chapter 91, Oregon Laws 2019, and section 1 of this 2021 Act, is repealed on January 1, 2030.

(4) Section 2, chapter 204, Oregon Laws 2005, as amended by section 359, chapter 70, Oregon Laws 2007, is repealed on January 1, 2030. [1987 c.290 §16; 1991 c.622 §4; 1997 c.481 §1; 2001 c.408 §1; 2009 c.544 §1; 2017 c.434 §4; 2021 c.66 §2]

**Note:** Sections 1 and 2, chapter 204, Oregon Laws 2005, provide:

**Sec. 1.** Section 2 of this 2005 Act is added to and made a part of sections 2 to 6, chapter 290, Oregon Laws 1987. [2005 c.204 §1]

**Sec. 2.** (1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, the Public Utility Commission shall adopt rules to prohibit the termination of local exchange residential service if the termination would significantly endanger a customer, or a person in the household of the customer, who is:

(a) At risk of domestic violence, as defined in ORS 135.230;

(b) At risk of unwanted sexual contact, as defined in ORS 163.305;

(d) An elderly person, as defined in ORS 124.005, who is at risk of abuse, as defined in ORS 124.005 (1)(a), (d) or (e); or

(e) A victim of stalking, as described in ORS 163.732.

(2) A customer may establish that termination of local exchange residential service would significantly endanger the customer, or a person in the household of the customer, by providing a telecommunications public utility with an affidavit signed by the customer stating that termination would place the customer, or a person in the household of the customer, at significant risk of domestic violence, as defined in ORS 135.230, or of unwanted sexual contact, as defined in ORS 163.305. The customer must attach to the affidavit a copy of an order issued under ORS 30.866, 107.700 to 107.735, 124.005 to 124.040 or 163.738 that restrains another person from contact with the customer, or a person in the household of the customer, or a copy of any other court order that restrains another person from contact with the customer, or a person in the household of the customer, by reason of a risk described in subsection (1) of this section or by reason of stalking.

(3) The commission shall require that each telecommunications public utility establish procedures for submitting and receiving affidavits under subsection (2) of this section.

(4) This section does not apply to termination of any telecommunication service other than local exchange residential service.

(5) A customer submitting an affidavit as provided by subsection (2) of this section is not excused from paying for telecommunication service. Customers are required to enter into a reasonable payment agreement with the telecommunications public utility if an overdue balance exists. Local exchange residential service may be terminated if a customer refuses to enter into or fails to abide by the terms of a reasonable payment agreement.

(6) Nothing in this section prevents the termination of local exchange residential service if the telecommunications public utility providing the service does not have the technical ability to terminate toll telecommunication service without also terminating local exchange residential service. [2005 c.204 §2; 2007 c.70 §359]

(8) “Disability” means a physical condition, as determined by a licensed physician, physician assistant, nurse practitioner or vocational rehabilitation counselor of the Department of Human Services, other than hearing or speech impairment that requires use of adaptive equipment to utilize the telephone.

(9) “Hard of hearing” means a hearing loss, as determined by an audiologist, licensed physician, physician assistant, nurse practitioner, hearing aid specialist or vocational rehabilitation counselor of the Department of Human Services, that requires use of an assistive telecommunication device to communicate effectively on the telephone.

(11) “Nurse practitioner” has the meaning given that term in ORS 678.010.

(12) “Physician” means an applicant’s primary care physician or a medical specialist who is able to determine an applicant’s disability and to whom the applicant was referred by the primary care physician.

(20) "Telecommunications relay service" means a telephone transmission service that provides the ability for an individual who is deaf, deaf-blind, hard of hearing or speech impaired to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing or speech disability to communicate using voice communication services by wire or radio. "Telecommunications relay service" includes, but is not limited to:

(c) Non-English relay services. [1987 c.290 §9; 1991 c.872 §2; 1995 c.280 §32; 1995 c.451 §2; 1999 c.384 §1; 2007 c.28 §1; 2007 c.70 §353; 2011 c.78 §2; 2011 c.264 §1; 2014 c.45 §83; 2019 c.113 §1; 2023 c.159 §1]

**759.694 Legislative recognition of need.** It is recognized that a large number of people in this state, through no fault of their own, are unable to utilize telecommunication equipment due to the inability to hear or speak well enough or due to other disabilities. It is also recognized that present technology and services are available, but at significant cost, that would allow these people to utilize telecommunication equipment in their daily activities. There is, therefore, a need to make available the technology and services in the form of assistive telecommunication devices, a telecommunications relay service and communication facilitators for people who are deaf, deaf-blind, hard of hearing or speech impaired or adaptive equipment for people with disabilities at no additional cost beyond normal telephone service. The provision of assistive telecommunication devices, a telecommunications relay service, communication facilitators or adaptive equipment would allow those formerly unable to use telecommunication systems to more fully participate in the activities and programs offered by government and other

community agencies, as well as in their family and social activities. The assistive telecommunication devices or adaptive equipment would be provided on a loan basis to each recipient, to be returned if the recipient moves out of the state. [1987 c.290 §10; 1991 c.872 §3; 1999 c.384 §2; 2007 c.70 §354; 2011 c.264 §2; 2019 c.113 §2]

**759.695 Program for assistive telecommunication devices and communication facilitator services; program for adaptive equipment.** (1) With the advice of the Telecommunication Devices Access Program Advisory Committee, the Public Utility Commission shall establish and administer a statewide program to:

(a) Purchase and distribute assistive telecommunication devices to persons who are deaf, deaf-blind, hard of hearing or speech impaired and establish a telecommunications relay service; and

(b) Provide communication facilitator services to persons who are deaf-blind when the services are necessary.

(2) With the advice of the Telecommunication Devices Access Program Advisory Committee, the Public Utility Commission shall establish and administer a statewide program to purchase and distribute adaptive equipment to make telephone service generally available to persons with physical disabilities. [1987 c.290 §11; 1991 c.872 §4; 1999 c.384 §3; 2007 c.70 §355; 2011 c.78 §3; 2011 c.264 §3; 2019 c.113 §3]

**759.696 Telecommunication Devices Access Program Advisory Committee; duties; members.** (1) A Telecommunication Devices Access Program Advisory Committee is established to advise the Public Utility Commission on the general development, implementation and administration of the Telecommunication Devices Access Program.

(C) One who is visually impaired or deaf-blind;

(2) The commission may contract with any governmental agency, or other entity the commission considers to be qualified, to assist the commission in the provision of communication facilitator services or the administration of ORS 759.693 to 759.698. [1987 c.290 §13; 1991 c.872 §6; 1999 c.384 §4; 2019 c.113 §4]

**759.698 Eligibility.** (1)(a) In order to be eligible to receive assistive telecommunication devices, adaptive equipment or communication facilitator services, individuals must be certified as deaf, deaf-blind, hard of hearing or speech impaired by a licensed physician, physician assistant, nurse practitioner, audiologist, hearing aid specialist, speech-language pathologist, rehabilitation instructor for persons who are blind or vocational rehabilitation counselor of the Department of Human Services. Certification implies that the individual cannot use the telephone for expressive or receptive communication.

(b) No more than one assistive telecommunication device or adaptive equipment device may be provided to a household. However, two assistive telecommunication devices or adaptive equipment devices may be provided to a household if more than one eligible person permanently resides in the household. The court may award the greater of three times the actual damages or \$500, or order an injunction or restitution. Except as provided in subsection (2) of this section, the court may award reasonable attorney fees to the prevailing party in an action under this section.

(2) The court may not award attorney fees to a prevailing defendant under the provisions of subsection (1) of this section if the action under this section is maintained as a class action pursuant to ORCP 32.

**CONDEMNATION OF PROPERTY BY  
PRIVATE CORPORATIONS  
GENERALLY**

**772.010 Right of entry for survey of proposed right of way; notice required.** (1) A corporation organized for the construction of a railway, sewer or canal or of any ditch or flume for the conducting of water for irrigation or domestic purposes, or for the purpose of selling water to the public for general purposes for public use, or for conducting potable or waste water by means of pipe laid upon or under the surface of the ground; or desiring to use electrical power in the operation of any railway, shall have a right to enter upon any land, between the termini thereof or elsewhere, for the purpose of examining, locating or surveying the lines of such electric or other railway, sewer, canal, ditch, flume or pipeline, for the purpose of surveying or measuring any lands or rights appurtenant thereto needed for such purposes, doing no unnecessary damage thereby.

(2) Prior to entering upon private land under this section, a person who intends to enter upon the land shall first provide written notice by first class mail to the record owner of the private property of such intent to enter. [Amended by 1971 c.655 §232; 1999 c.629 §1]

**772.015 Condemnation of lands for rights of way and necessary facilities.** Any corporation mentioned in ORS 772.010 may condemn so much land as may be necessary for the lines of such railway, sewer, canal, ditch, flume or pipeline, not exceeding 100 feet in width, besides a sufficient quantity of land for toolhouses, workshops, materials for construction, timber excepted, and a right through such adjacent land to enable such corporation to construct and repair its lines, poles, towers, wires, underground wires, supports and necessary equipment, railway, sewer, canal, ditch, flume or other pipeline, and to make proper drains. [Amended by 1971 c.655 §233; 1999 c.629 §2]

**772.020 Condemnation of additional land for railway purposes.** (1) Any railway corporation mentioned in ORS 772.010 may condemn a sufficient quantity of land in addition to that specified in ORS 772.015, for necessary sidetracks, spur tracks and laterals reasonably necessary for manufacturing establishments, also for depot and water stations, cuttings and embankments, and for the proper construction, security and convenient operation of its road.

(2) Any such railway corporation may cross, intersect, join and unite its railway with any other railway at any point in its

route, and upon the grounds of such other railway corporation, and make the necessary turnouts, sidings, switches and other conveniences in furtherance of the object of its connection and may condemn to make such crossings. The railway which is or may be intersected by new railways, may unite with the owners of such new railways in forming the intersection and connection, and grant the facilities mentioned in this subsection.

**772.025 Approval of railroad crossing, intersection or connection.** (1) Whenever any railroad corporation, authorized by ORS 772.020 to condemn the right to cross or connect with any other right of way or constructed line of railroad, is unable to agree with the owner of the line which it desires to cross, it may apply to the Department of Transportation in the manner provided by ORS 824.228 to 824.232.

(2) Upon such application and upon notice and hearing as provided in ORS chapter 183 for contested cases, the department shall determine the right to crossing, intersection or connection, the mode and manner thereof and the compensation to be paid therefor.

(3) No agreement for the crossing of one railroad by another shall be valid without the approval of the department. [Amended by 1971 c.655 §234; 1995 c.733 §97; 1997 c.275 §23]

(2) Any railroad company authorized by law to condemn property for right of way or any other corporate purpose, may commence an action for condemnation of a right of way through any canyon, pass or defile for the purpose of its railroad, where right of way has already been located, condemned or occupied by some other railroad company through such canyon, pass or defile for the purpose of its railroad.

(3) Thereupon like proceedings shall be had as are provided by the laws of this state for the condemnation of land for right of way and other railroad purposes. At the time of rendering judgment for damages, the court or judge thereof shall enter a judgment authorizing the railroad to occupy and use the right of way, roadbed and track, if necessary, in common with the railroad company already occupying or owning the same, and defining the terms and conditions upon which the same shall be so occupied and used in common. [Amended by 2003 c.576 §564]

**772.035 Acquisition of water rights by corporations for canal, irrigation, domestic or stock purposes.** Any corporation organized in whole or in part for the construction of a canal for navigating or manufacturing purposes or of any ditch or flume for the purpose of conveying water for irrigating, domestic or stock purposes may condemn such waterways, water rights or privileges, or otherwise acquire established water rights or privileges, or those initiated by performing any acts required, provided or permitted by law, as may be necessary or convenient for the purpose of supplying, operating, constructing or maintaining the same.

**772.040 Condemnation rights of pipe corporations.** Except in cities, any corporation organized for conducting water by means of pipe laid upon or under the surface of the ground may, so far as may be necessary for the laying and keeping in repair its water pipes, condemn the use of so much land as may be necessary, and may make whatever cuts and excavations as soon as practicable after condemnation.

(2) Upon construction by the corporation of a county road or highway on the property so acquired in a manner conformable in the material character of the construction of said highways appropriated and upon the same grade or such other grade as may be agreed upon by the corporation and the county court or board of county commissioners of the county in which the road is located, and upon the acceptance by the county court or board of such newly constructed road, and on the conveyance of same to the county, the corporation shall then become the owner and entitled to the possession of so much of the county road or highway so appropriated.

(3) ORS 772.065 and 772.070 do not apply to roads or streets within any platted or incorporated city or town, or any addition thereto.

**772.070 Procedure on dispute between county and corporation.** (1) If the county court or board of county commissioners and corporation cannot agree upon the matters of appropriation under ORS 772.065, the dispute shall be referred to the Public Utility Commission.

**776.510 Declaration of legislative intent relating to liability of licensees, trainees and organizations.** (1) The stimulation and preservation of maritime commerce on the bar and river pilotage grounds of this state are declared to be affected with the public interest and the limitation and regulation of liability of licensees, trainees and organizations of pilots are necessary to such stimulation and preservation of maritime commerce and are deemed to be in the public interest.

(2) To accomplish the stimulation and preservation of maritime commerce it is necessary to establish an optional rate system whereby vessels and persons engaging the services of a licensee have the option of:

(a) Agreeing not to assert any personal liability against any licensee, trainee and organization of pilots to which the licensee or trainee belongs, and to defend, indemnify and save harmless the licensee, trainee and organization of pilots against all claims and demands arising from acts or omissions of the licensee, trainee or organization of pilots which relate, directly or indirectly, to pilotage of the vessel; or

(b) Directing licensees in writing and in sufficient time for insurance to be procured by them, on a "trip" basis, insuring such licensees, trainees and organizations of pilots to which they belong against all claims or demands arising from or relating to, directly or indirectly, pilotage of the vessel, the premium or cost of such insurance to be included in the charges for pilotage services and paid on demand by the vessel.

(3) The Legislative Assembly hereby declares that to effect the ends and purposes listed in this section, and to maintain pilotage fees at reasonable levels on the bar and river pilotage grounds of this state, ORS 776.520, 776.530 and 776.540 are adopted. [1959 c.404 §2; 1983 c.330 §4; 1993 c.796 §17]

**776.520 Tariffs limiting liability of licensees, trainees or organizations.** Licensees and trainees are authorized to limit their liability and the liability of any organization of pilots to which they belong by tariffs approved by the Oregon Board of Maritime Pilots containing substantially the terms and provisions of the following form:

The provisions of ORS 776.510 and 776.540 hereby are incorporated into and made a part of this tariff. By reason of the option granted by ORS 776.510, the rates and charges named in this tariff do not include the cost of marine insurance insuring the licensee, trainee and any organization of pilots to which the licensee or trainee belongs, the

vessel, its owners, agents or operators from the consequences of negligence or errors in judgment of the licensees, trainees or organizations of pilots.

However, upon reasonable notice to the licensees in writing from the vessel, its master, owners, agents or operators, the licensees parties hereto will procure such insurance on a "trip" basis in an amount equal to the value of the vessel and its cargo, or such other amount as may be agreed upon between the licensees and the vessel, its master, owners, agents or operators, insuring the licensees and the organizations of pilots to which they belong against all claims or demands arising from or based upon, directly or indirectly, pilotage of the vessel. The premium for such insurance shall be assessed in addition to the rates and charges specified herein.

The election of the vessel, its master, owners, agents or operators not to request licensees parties hereto to procure such insurance and thereby to elect to have the licensees parties hereto perform services on the rates and charges specified herein shall constitute a binding and irrevocable agreement on the part of the vessel, its master, owners, agents or operators to the terms and conditions of the following:

It is understood and agreed, and is the essence of the contract under which services of the licensee are tendered to and accepted by the vessel, its master, operators and owners, that:
