Investing involves risk, including the possible loss of principal. This ProShares ETF is subject to certain risks, including the risk that the fund may not track the performance of the index and that the fund's market price may fluctuate, which may decrease performance. This fund is exposed to the stocks of large cap companies, which tend to go through cycles of outperformance or underperformance lasting up to several years relative to other segments of the stock market. As a result, large cap returns may trail the returns of the overall stock market or other market segments. Please see the summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
