

**SUMMARY PROSPECTUS**  
OCTOBER 1, 2023

# Pet Care ETF

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated October 1, 2023, and Statement of Additional Information, dated October 1, 2023, and as each hereafter may be supplemented, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at [ProShares.com/resources/prospectus\\_reports.html](https://ProShares.com/resources/prospectus_reports.html); by calling 866-PRO-5125 (866-776-5125); or by sending an email request to [info@ProShares.com](mailto:info@ProShares.com). The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

## **Receive investor materials electronically:**

Shareholders may sign up for electronic delivery of investor materials. By doing so, you will receive the information faster and help us reduce the impact on the environment of providing these materials. To enroll in electronic delivery,

1. Go to [www.icsdelivery.com](http://www.icsdelivery.com)
2. Select the first letter of your brokerage firm's name.
3. From the list that follows, select your brokerage firm. If your brokerage firm is not listed, electronic delivery may not be available. Please contact your brokerage firm.
4. Complete the information requested, including the e-mail address where you would like to receive notifications for electronic documents.

Your information will be kept confidential and will not be used for any purpose other than electronic delivery. If you change your mind, you can cancel electronic delivery at any time and revert to physical delivery of your materials. Just go to [www.icsdelivery.com](http://www.icsdelivery.com), perform the first three steps above, and follow the instructions for cancelling electronic delivery. If you have any questions, please contact your brokerage firm.

## Investment Objective

ProShares Pet Care ETF (the “Fund”) seeks investment results, before fees and expenses, that track the performance of the FactSet Pet Care Index (the “Index”).

## Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.50%
Other Expenses	<u>0.00%</u>
<b>Total Annual Fund Operating Expenses</b>	<b><u>0.50%</u></b>

**Example:** This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$51	\$160	\$280	\$628

The Fund pays transaction and financing costs associated with the purchase and sale of securities. These costs are not reflected in the table or the example above.

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. During the most recent fiscal year, the Fund’s annual portfolio turnover rate was 38% of the average value of its portfolio.

## Principal Investment Strategies

The Fund invests in financial instruments that ProShare Advisors believes, in combination, should track the performance of the Index.

The Index consists of U.S. and non-U.S. companies that potentially stand to benefit from interest in, and resources spent on, pet ownership. The Fund intends to hold each security in approximately the same proportion as its weighting in the Index.

The Index consists primarily of companies whose principal business is pet care-related (i.e., they derive significant revenue from pet care-related products or services), as determined in accordance with the Index methodology. The Index is owned and administered by FactSet Research Systems, Inc. (the “Index Provider”). In order to be included in the Index, a company must be included in at least one of eight FactSet® Revere Business Industry Classification System sub-industries (“RBICS sub-industries”). The eight RBICS sub-industries are Pet Food Manufacturing, Pet Supplies Manufacturing, Pet and Pet Supply Stores, Veterinary Pharmaceuticals, Veterinary Diagnostics, Veterinary Product Distributors, Veterinary Services, and Internet Pet and Supply Retail. The Index also may include companies whose principal business is pet care-related, but for which an appropriate RBICS sub-industry has not yet been created. For example, the Index may include insurance companies that provide coverage for pets. Pet insurance currently is not an RBICS sub-industry. The Index will include a minimum of 21 companies. In order to be included in the Index, a company’s shares must be listed for trading on a U.S. or non-U.S. stock exchange and must meet certain market capitalization, liquidity and other requirements.

The Index classifies companies into one of two tiers based on revenue generated from pet care-related products or services. Companies generating 50% or more of their revenue from pet care-related products or services comprise Tier 1; companies generating \$1 billion or greater in revenue from pet care-related products or services, but less than 50% of their revenue from such products or services comprise Tier 2. 82.5% of the Index weight is allocated to Tier 1 companies and 17.5% to Tier 2 companies. The percentage weight of companies in each Tier is based on their respective float adjusted market capitalizations. Larger companies are more heavily weighted, and the weight of any single company is capped at 10% for Tier 1 and 4.5% for Tier 2. The percentage of the Index allocated to Tier 1 and Tier 2 (i.e., 82.5% and 17.5%), along with the percentage weight and capped amount of each company within its respective Tier, is set at the annual index reconstitution and as of each monthly rebalance date. These percentages are allowed to fluctuate between monthly rebalance dates and may be higher or lower than the indicated amounts until they are reset at the next Index rebalance date. The Index is published under the Bloomberg ticker symbol “PETCARE.”

Under normal circumstances, the Fund will invest at least 80% of its total assets in component securities of the Index or in instruments with similar economic characteristics.

The Fund will invest principally in the financial instruments listed below.

- **Equity Securities** – Common stock issued by public companies.
- **Depository Receipts** – The Fund may invest in depository receipts, which principally include:

- **American Depositary Receipts (ADRs)**, which represent the right to receive securities of foreign issuers deposited in a bank or trust company and are an alternative to purchasing the underlying securities in their national markets and currencies
- **Global Depositary Receipts (GDRs)**, which are receipts for shares in a foreign-based corporation traded in capital markets around the world.

ProShare Advisors uses a mathematical approach to investing in which it determines the type, quantity and mix of investment positions that it believes, in combination, the Fund should hold to produce returns consistent with its investment objective. The Fund seeks to remain fully invested at all times in financial instruments that, in combination, provide exposure consistent with the investment objective, without regard to market conditions, trends or direction. The Fund will generally use a “replication strategy” to achieve its investment objective, meaning that it will invest in all of the component securities of the Index in approximately the same proportion as the Index. However, the Fund may also use a “representative sampling” strategy to invest in or gain exposure to only a representative sample of the securities in the Index or to securities not contained in the Index or in financial instruments, with the intent of obtaining exposure with aggregate characteristics similar to those of the Index. For example, the Fund may utilize a representative sampling strategy when the Advisor believes a replication strategy might be detrimental or disadvantageous to shareholders, such as when buying each security in an Index is impracticable or inefficient, or when there are practical difficulties or additional costs involved in replicating an Index. The Fund also may use representative sampling if the Advisor believes one or more securities in the Index becomes illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

### Principal Risks

- **Pet Care Industry Risk** – The Fund is subject to the risks faced by companies in the pet care industry. Although the pet care industry has historically been resilient to economic downturns, this trend may not continue or may reverse. Future growth of the pet care industry, if any, is largely dependent upon increases in pet ownership and the dollar amount spent on pets and pet-related products and services. Declines in pet ownership or the level of spending on pet related products or services may have a negative impact on the performance of the companies in the Index, and therefore, the performance of the Fund. Levels of disposable household income and spending for pet related products and services will fluctuate due to, among other things, economic conditions, limitations on discretionary spending, and consumer preferences. Some companies in the pet

care industry are smaller, independent producers and retailers. Smaller companies face intense competition from larger companies that may have more significant resources and have well established suppliers and distribution channels. A number of companies in the pet care industry are not publicly listed for trading and their performance is not reflected in the Index. Pet care industry manufacturers, such as providers of food, medicine and other products and services, are also facing increased regulatory scrutiny and products liability risk as the U.S. and some international regulatory regimes focus on pet food and product safety. Many well-known pet brands and pet care-related businesses are offered by companies that are owned by, or subdivisions of, large corporate entities. These companies may be substantially exposed to other industries or sectors of the economy and, therefore, the Index and Fund may be adversely affected by negative developments impacting these companies, industries or sectors. If a company no longer meets the criteria for inclusion in the Index, the Fund may need to reduce or eliminate its holdings of that company and increase its holdings of other companies in the Index. This could have an adverse impact on the liquidity of the Fund’s investment portfolio and on Fund performance as there are a limited number of companies that meet the current Index requirements. Each of these factors could have a negative impact on the performance of the companies in the Index and the performance of the Fund.

- **Equity and Market Risk** – Equity markets are volatile, and the value of equity securities and other instruments correlated with equity markets may fluctuate dramatically from day to day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market.
- **Foreign Investments/Emerging Market Risk** – Exposure to securities of foreign issuers may provide the Fund with increased risk. Foreign investments may be more susceptible to political, social, economic and regional factors than may be the case with U.S. securities. In addition, markets for foreign investments are usually less liquid, more volatile and significantly smaller than markets for U.S. securities, which may affect, among other things, the Fund’s ability to purchase or sell foreign investments at appropriate times and prices. Because of differences in settlement times and/or foreign market holidays, transactions in a foreign market may take place one or more days after the necessary exposure to these investments is determined.

Because the Fund’s foreign investment exposure may include issuers domiciled in developing or “emerging market” countries, all the aforementioned factors are heightened. Investments in emerging markets are considered speculative.

- **Correlation Risk** – A number of factors may affect the Fund’s ability to achieve a high degree of correlation with the

Index. Fees, expenses, transaction costs, among other factors, will adversely impact the Fund's ability to meet its investment objective. In addition, the Fund's exposure may not be consistent with the Index. For example, the Fund may not have exposure to all of the securities in the Index, its weighting of securities may be different from that of the Index, and it may invest in instruments not included in the Index.

- **Industry Concentration Risk** – The Index may have a significant portion of its value in issuers in an industry or group of industries. The Fund will allocate its investments to approximately the same extent as the Index. As a result, the Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries. As of May 31, 2023, the Index had a significant portion of its value in issuers in the health care, consumer discretionary, and consumer staples industry groups.
  - **Consumer Discretionary Industry Risk** – Companies in this industry may experience: impact of changing economic conditions, interest rates, competition and consumer confidence; heavy dependence on disposable household income and consumer spending; severe competition; and changes in demographics and consumer tastes.
  - **Consumer Staples Industry Risk** – Companies in this industry may be affected by: governmental regulation; new laws or litigation that may adversely affect tobacco companies; fads, marketing campaigns and other factors affecting supply and demand.
  - **Health Care Industry Risk** – Companies in this industry may experience: heavy dependence on patent protection; litigation and product liability expense; the long and costly process for obtaining new product approval by the Food and Drug Administration; and product obsolescence.
- **Geographic Concentration Risk** – Because the Fund focuses its investments in one or more foreign countries, an investment in the Fund may be more volatile than a more geographically diversified fund. The performance of the Fund will be affected by the political, social and economic conditions in those foreign countries and subject to the related risks. As of May 31, 2023, the Index had a significant portion of its value in issuers in the United Kingdom.
  - **United Kingdom Investments Risk** – The United Kingdom has one of the largest economies in Europe, and the United States and other European countries are substantial trading partners. As a result, the British economy

may be impacted by changes to the economic condition of the United States and other European countries.

- **Non-Diversification Risk** – The Fund has the ability to invest a relatively high percentage of its assets in the securities of a small number of issuers. This may increase the Fund's volatility and increase the risk that the Fund's performance will decline based on the performance of a single issuer.
- **Index Performance Risk** – The Index used by the Fund may underperform other asset classes and may underperform other similar indices. The Index is maintained by a third party provider unaffiliated with the Fund or ProShare Advisors. There can be no guarantee that the methodology used by the third-party provider to identify companies whose business is pet care related will achieve its intended result. Further, there can be no guarantee that the methodology underlying the Index or the daily calculation of the Index will be free from error.
- **Market Price Variance Risk** – Investors buy and sell Fund shares in the secondary market at market prices. Market prices may be different from the NAV per share of the Fund (i.e., the secondary market price may trade at a price greater than NAV (a premium) or less than NAV (a discount)). The market price of the Fund's shares will fluctuate in response to changes in the value of the Fund's holdings, supply and demand for shares and other market factors.
- **Early Close/Late Close/Trading Halt Risk** – An exchange or market may close early, close late or issue trading halts on specific securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Please see "Investment Objectives, Principal Investment Strategies and Related Risks" in the Fund's Prospectus for additional details.

## Investment Results

The bar chart below shows how the Fund's investment results have varied from year to year, and the table shows how the Fund's average annual total returns for various periods compare with a broad measure of market performance. This information provides some indication of the risks of investing in the Fund. Past results (before and after taxes) are not predictive of future results. Updated information on the Fund's results can be obtained by visiting the Fund's website ([www.proshares.com](http://www.proshares.com)).

## Annual Returns as of December 31

Best Quarter (ended 6/30/2020): 26.23%

Worst Quarter (ended 6/30/2022): -20.66%

Year-to-Date (ended 6/30/2023): 7.86%

## Average Annual Total Returns

As of December 31, 2022

	One Year	Since Inception	Inception Date
Before Tax	-40.14%	4.36%	11/5/2018
After Taxes on Distributions	-40.21%	4.29%	—
After Taxes on Distributions and Sale of Shares	-23.71%	3.38%	—
FactSet Pet Care Index <sup>1</sup>	-40.07%	4.90%	—

<sup>1</sup> Reflects no deduction for fees, expenses or taxes. Adjusted to reflect the reinvestment of dividends paid by issuers in the Index. "Since Inception" returns are calculated from the date the Fund commenced operations, not the date of inception of the Index.

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-

deferred arrangements, such as a retirement account. After-tax returns may exceed the return before taxes due to a tax benefit from realizing a capital loss on a sale of shares.

## Management

The Fund is advised by ProShare Advisors. Alexander Ilyasov, Senior Portfolio Manager, and Eric Silverthorne, Portfolio Manager, have jointly and primarily managed the Fund since August 2020 and March 2023, respectively.

## Purchase and Sale of Fund Shares

The Fund will issue and redeem shares only to Authorized Participants (typically broker-dealers) in exchange for the deposit or delivery of a basket of assets (securities and/or cash) in large blocks, known as Creation Units. Shares of the Fund may only be purchased and sold by retail investors in secondary market transactions through broker-dealers or other financial intermediaries. Shares of the Fund are listed for trading on a national securities exchange and because shares trade at market prices rather than NAV, shares of the Fund may trade at a price greater than NAV (premium) or less than NAV (discount). In addition to brokerage commissions, investors incur the costs of the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). The bid-ask spread varies over time for Fund shares based on trading volume and market liquidity. Recent information, including information about a Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund's website ([www.proshares.com](http://www.proshares.com)).

## Tax Information

Income and capital gains distributions you receive from the Fund generally are subject to federal income taxes and may also be subject to state and local taxes. The Fund intends to distribute income, if any, quarterly, and capital gains, if any, at least annually.
