

Shipping Cryoprecipitated AHF in an E-120ARC

1. **Examine the shipping container for the following:**
 - The exterior is in good condition and has minimal repairs.
 - The inner lid and interior insulated liner do not have breaks, punctures, or other damage that might impact the container's ability to maintain acceptable temperatures.
 - No evidence of a blood spill

2. **Place one sheet of absorbent material (folded to fit) on the bottom of the shipping container.**

3. **Place dry ice on the bottom of the shipping container.**

If the expected transit time is...	Then place...
24 hours	Minimum of 6 lbs. of dry ice on the bottom
24 to 48 hours	Minimum of 7 lbs. of dry ice on the bottom

The dry ice may be placed in a ventilated plastic bag/liner.

Packing & Shipping

4. Place 1-inch bubble wrap on the bottom and on all sides of the shipping container's walls.

5. Place product inside in the shipping container on top of the bubble wrap.

6. Fold the top of the bubble wrap (from the sides of the shipping container) over the cryo.

- If there is excess space that may allow movement during shipping... then use bubble wrap to fill the excess space on the sides of the container.

Caution: Do not add additional bubble wrap on top.

7. Add dry ice to the shipping container.

- Place a dry ice tray in the shipping container.
- Place dry ice inside the dry ice tray according to the table below.

If the expected transit time is...	Then place...
24 hours	Minimum of 8 lbs of dry ice in the dry ice tray
24 to 48 hours	Minimum of 13 lbs of dry ice in the dry ice tray

The dry ice may be placed in a ventilated plastic bag/liner.

Warning: Inadequate ventilation may cause a package to explode.

8. Place two sheets of 1-inch bubble wrap on top of the dry ice.

- Put the lid on the shipping container, ensuring the lid lies flat.
- Place the packing slip on top of the lid.
- Close and label the shipping container.
- Add Class 9 UN Dry Ice label
- Tape the lid closed in a manner that allows the vapors to escape from the shipping container and does not obscure any required labels.

Warning: Airtight seals may cause the shipping container to explode.
