

Revised Rejection procedure for immediate coverage and endorsement requests;

Acceptable submissions for Immediate Coverage and endorsement are made effective the date they are received by the Association or a later date, if specifically requested. Submissions must include all pages of the endorsement or Immediate Coverage application(s) and all required signatures. If the submission for immediate coverage or endorsement is rejected by us the effective date will remain the original date of receipt, unless a later date has been requested, provided the re-submission is received by the Association within ten days of the date of our Application Return Notice and includes the information requested that renders it acceptable under the Association's rules and underwriting standards.

The Association reserves the right to amend the effective date of Immediate Coverage and endorsement submissions rejected by us in the following circumstances:

- The initial submission for immediate coverage or endorsement is rejected by us, as it did not include all pages of the endorsement or Immediate Coverage application(s) and all required signatures.
- The submission for immediate coverage or endorsement is rejected by us and the re-submission does not include the information requested that renders it acceptable.
