Ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to receive the most recently declared dividend.

Record Date is the date on which a Fund reviews its books to determine its "shareholders of record." Investors listed as shareholders of record on this date will receive the Fund's dividend payment.

Payable date is the date on which a Fund pays a dividend to its shareholders of record.

Distributions paid in January, but declared by a Fund in October, November or December of the previous year, payable to shareholders of record in such a month, may be taxable to you in the previous year.

Important Risk Information

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETF's net asset value. Brokerage commissions and ETF expenses will reduce returns.

The ETFs listed above have historically paid dividends to investors and/or invest in the securities of dividend paying issuers; however, there is no guarantee that these ETFs will consistently pay dividends to investors in the future or will appreciate in value. Investors could lose money by investing in ETFs.

Investing involves risk including the risk of loss of principal.
