Approved by: Sunshine Horses, Inc.
Board of Directors

Title:

Date: 3/6/2021

Purpose	PREVENTION OF COMMON INFECTIOUS and PARASITIC DISEASES IN HORSES
Content	<ul style="list-style-type: none">-Consultation with our Veterinarian to determine the most effective vaccination and parasite control program for our horses.-The specific immunizations needed for our horses are dependent upon environment, age, breed, sex, use, exposure risk, geographic location, and general management-An effective parasite control program focuses on the regular administration of de-wormer as well as manure and pasture management. De-wormers are given in late spring and early fall.
