My Commission Expires May 14, 1993

Objections must be filed with the Clerk of the Superior Court in and for Maricopa County, Maricopa County Courthouse Annex, 3345 W. Durango Street, Phoenix, AZ 85009, on or before May 18, 1992.

STATEMENT OF THE OBJECTION

The following the are main categories of the typical Watershed File Report (Zone 2 Well Reports and some Watershed File Reports lack certain categories). Please check the category(ies) to which you object, and state the reason for the objection on the back of this form.

- ☐ 1. I object to the description of **Land Ownership**
- ☐ 2. I object to the description of **Applicable Filings and Decrees**
- ☐ 3. I object to the description of **DWR's Analysis of Filings and Decrees**
- ☐ 4. I object to the description of **Diversions** for the claimed water right(s)
- ☐ 5. I object to the description of **Uses** for the claimed water right(s)
- ☐ 6. I object to the description of **Reservoirs** used for the claimed water right(s)
- ☐ 7. I object to the description of **Shared Uses & Diversions** for the claimed water right(s)
- ☐ 8. I object to the **PWR (Potential Water Right) Summary** of the claimed water right(s)
- ☐ 9. I object to the description of **Quantities of Use** for the claimed water right(s)
- ☐ 10. I object to the **Explanation** provided for the claimed water right(s)
- ☒ 11. Other Objections (please state volume, page and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

CATEGORY NUMBER

11a DWR has included my groundwater uses in this stream adjudication. Groundwater should not be included.

11b The adjudication process in general and the objection process in particular is too confusing to participate in effectively. ~~My rights~~ should not be determined or denied until a mechanism is devised to place private claimants on equal footing with ~~the government and~~ institutional claimants.

11c The small claimants have no ability to generate the funds necessary to ~~compete with the government and institutional claimants~~ on complex legal and scientific issues. My rights should not be determined or denied until a mechanism is ~~devised to provide technical~~ and legal backup to private claimants.

11d ~~Determining my rights in Maricopa County is too ex~~pensive and cumbersome for me to effectively participate. DWR and the court should arrange for ~~local services including the ability to file papers~~ locally, hold hearingslocally, hold public workshops locally and have DWR staff ~~available locally to answer questions.~~

11e The format of the hydrographic survey report was too confusing for me to ~~understand my own claim or object to others.~~

11f The hydrographic survey report implies that my existing water use is ~~the extent of my water rights. Under Arizona law~~ I have the right to drill more wells, increase my water usage and change both the type and place of use.

11g DWR has classified my well as Zone 1. It is not withdrawing appropriable water and should be excluded from ~~both this zone a~~nd the adjudication.

11h DWR underestimated my current water usage and failed to recognize that my groundwater rights are much lager than my ~~curre~~nt level of usage.

STATEMENT OF THE OBJECTION

The following are the main categories of the typical Watershed File Report (Zone 2 Well Reports and some Watershed File Reports lack certain categories). Please check the category(ies) to which you object, and state the reason for the objection on the back of this form.

[ ] 1. I object to the description of LAND OWNERSHIP

[ ] 2. I object to the description of APPLICABLE FILINGS AND DECREES

[X] 3. I object to the description of DWR'S ANALYSIS OF FILINGS AND DECREES

[ ] 4. I object to the description of the DIVERSIONS for the claimed water right(s)

[ ] 5. I object to the description of the USES for the claimed water right(s)

[ ] 6. I object to the description of RESERVOIRS used for the claimed water right(s)

[ ] 7. I object to the description of SHARED USES & DIVERSIONS for the claimed water right(s)

[X] 8. I object to the PWR (POTENTIAL WATER RIGHT) SUMMARY of the claimed water right(s)

[X] 9. I object to the description of the QUANTITIES OF USE for the claimed water right(s)

[ ] 10. I object to the EXPLANATION provided for the claimed water right(s)

[ ] 11. Other Objections (please state volume number, page number and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

CATEGORY NUMBER	
	SEE ATTACHMENT 1
	In this attachment the uniform code designated by the
	Special Master in accordance with Case Management
	Order No. 1 is shown in parenthesis following each
	objection statement.

ATTACHMENT 1

Portions of the following objection are also relevant to the Pomerene Water Users Association. The corresponding major user number for the Pomerene Water Users Assocation is 1253.

WFR CATEGORY 3 - DWR's ANALYSIS OF FILINGS AND DECREES

The Salt River Project objects to the failure of DWR to match previous filings made by the Pomerene Water Users' Association (PWUA) to this PWR. Table 5-20 in Volume 1 of the HSR indicates that this PWR was formerly supplied by diversions from PWUA's delivery system. PWUA's DV01, described in WFR No. 112-17-089, has been matched to four notices of appropriation and a Water Rights Registration Act filing. These filings were made by PWUA on behalf of its users and members. Since this PWR was formerly served by DV01, DWR should have matched PWUA's previous filings to this PWR (0450). This objection applies to: IR001.

WFR CATEGORY 8 - PWR SUMMARY

The Salt River Project objects to the apparent date of first use assigned to this Potential Water Right (PWR). Previous filings, particularly notices of appropriation, are the evidentiary foundation for the date of priority associated with a water right. Where a notice of appropriation and one or more Water Rights Registration Act filings have been matched to the same PWR but suggest different dates of priority, the date evidenced by the notice should form the basis for the apparent date of first use, unless sufficient historical evidence indicates a contrary date.

The Watershed File Report (WFR) fails to articulate sufficient historical evidence to refute the priority date evidenced by the notice of appropriation matched to this PWR. In the absence of such evidence, the apparent date of first use assigned to this PWR should be the date evidenced by the notice (0920). This objection applies to: IR002 and IR003.

* * * *

WFR CATEGORY 8 - PWR SUMMARY (continued)

The Salt River Project objects to the apparent date of first use assigned to this Potential Water Right (PWR). Previous filings, in this case, filings made pursuant to the Water Rights Registration Act (WRRA), are the evidentiary foundation for the priority date associated with a water right. Where two or more WRRA filings have been matched to the same PWR but claim different priority dates, the WRRA filing claiming the earliest date should form the basis for the apparent date of first use, unless sufficient historical evidence indicates a contrary date.

The Watershed File Report (WFR) fails to set forth sufficient historical evidence to refute the earliest date of priority claimed in the WRRA filings matched to this PWR. In the absence of such evidence, the apparent date of first use for this PWR should be the earliest date claimed in the WRRA filings (0920). This objection applies to: SR001.

* * * *

The Salt River Project objects to the weight placed upon aerial photography in determining the apparent date of first use for this Potential Water Right (PWR). Where DWR concludes that no use exists on a parcel as of a given photo date, it does not follow that a claimant either had no water right to start with or abandoned that right by nonuse. Scattered photos reflecting occasional periods of nonuse over a fifty-year time span should not be interpreted by DWR to refute the priority date or dates evidenced by a claimant's previous filings (0910). This objection applies to: IR002, IR003 and SR001.

* * * *

The Salt River Project objects to the apparent date of first use assigned to this Potential Water Right (PWR). The Watershed File Report indicates that the data source for the apparent date of first use was "Pomerene Water Users' Association (PWUA) Information." However, the apparent date of first use assigned to this PWR is later than the date evidenced by PWUA's previous filings and assigned to PWUA's diversion PWR. Since DWR purportedly relied upon "PWUA information" in determining the apparent date of first use for this PWR, the apparent date of first use assigned to this PWR should be the date evidenced by PWUA's previous filings and assigned to PWUA's diversion PWR (0950). This objection applies to: IR001.

WFR CATEGORY 9 - QUANTITIES OF USE

The Salt River Project objects to the lack of specificity of the quantity of use assigned to this storage Potential Water Right (PWR). The Watershed File Report fails to indicate whether the volumetric quantity assigned to this PWR implies a continuous fill, one fill per year, or one fill only. Unless evidence from previous filings, or other sufficient historic evidence, indicates a clear intention to the contrary, the quantity of use assigned to a storage PWR should be sufficient to permit continuous filling of the storage reservoir (1050). This objection applies to: SR001.

* * * *

The Salt River Project objects to the quantities of use assigned to this Potential Water Right (PWR). The maximum observed and regional methods used by DWR for determining quantities of use for certain agricultural irrigation PWRs are inconsistent with the Arizona doctrine of prior appropriation; these methods are also technically inaccurate. The maximum potential method used by DWR for determining quantities of use is consistent with Arizona law; however, several technical corrections are necessary. For an additional discussion of the problems associated with DWR's methods of quantification for this type of PWR, see the Salt River Project's Volume 1 objections to these methods, a copy of which is attached to this objection and incorporated herein by reference (1020). This objection applies to: IR001, IR002 and IR003.

* * * *

The Salt River Project objects to the failure of DWR to calculate a diversion rate for this Potential Water Right (PWR). All PWRs assigned a point or points of diversion should be assigned a separate diversion rate for each point of diversion. Diversion rates should be calculated at the point of diversion and should include conveyance losses (1010). This objection applies to: IR001, IR002, IR003 and SR001.

EXCERPT FROM
SALT RIVER PROJECT OBJECTIONS TO
VOLUME 1 OF THE SAN PEDRO RIVER HSR

IRRIGATION QUANTITY ESTIMATES

(page numbers refer to Volume 1)

INTRODUCTION

The Salt River Project objects to DWR's estimation methods and results for irrigation water quantities for the following reasons:

First, the Salt River Project objects to DWR's estimation of water duty under both the "maximum observed" and "regional" methods. In the absence of decreed rights, which must be accepted by the court in the absence of abandonment, Arizona law requires that the extent of an appropriative right be measured according to the quantity of water that the appropriator diverted for beneficial use since the time of the appropriation. A.R.S. § 45-141(B) ("Beneficial use shall be the basis, measure and limit to the use of water"). Neither the "maximum observed" or "regional" quantification methods employed by DWR properly estimate maximum actual historical beneficial use as required by law.

The Salt River Project supports DWR's estimation of water duty using the "maximum potential" method since, in the absence of sufficient historical records, this method properly estimates maximum actual historical beneficial use.

Second, DWR's method to compute maximum observed water duty does not accurately estimate maximum actual historical beneficial use since it incorporates inaccurate crop irrigation requirements, deficit irrigation, five years or less of crop history, or overly high efficiency estimates.

Third, although DWR has developed new terminology in reporting regional water duties, DWR still uses the Arizona Groundwater Code method of "areas of similar farming conditions" (ASFC), now termed "regional farming conditions" (RFC). The RFC method assigns a weighted <u>average</u> consumptive use requirement to the water duty equation based upon the types of crops <u>recently</u> grown by appropriators in a designated area. Historical information or records evincing an individual claimant's actual cropping patterns and the quantities of water actually used to cultivate such crops since the time of appropriation are not considered. In fact, the Court noted that "[average efficient use] is not directly related to what is the property's water right[s] . . . " (Entitlement Order at 6). Under the prior appropriation doctrine, an appropriator who has grown alfalfa on his property historically is entitled to a water duty that will support alfalfa, regardless of the crops that he or his neighbors are currently growing. Under DWR's "averaging" approach, an appropriator in this situation would be assigned an apparent entitlement inadequate to meet crop needs.

Additionally, under the RFC concept, the efficiency of various irrigation methods is averaged among appropriators, thus further exacerbating the inadequate water duty for the appropriator who does not have a system with above-average efficiency.

Fourth, there are a number of technical errors in DWR's calculation of crop consumptive use including the use of a five year crop history, adjusted weather data, relative humidity, growing season, effective precipitation, crop coefficients, alfalfa stand establishment, deficit irrigation, and efficiency estimates.

Five Year Crop History
pp. 146-151, C-18, C-19, C-68 through C-78

The Salt River Project objects to DWR's use of its five year investigation period for computing acreages irrigated for maximum observed quantification and for computing crop irrigation water requirements for both maximum observed and regional quantifications. Indeed, it appears that DWR has relied heavily on a single year (1990) of crop survey data. The information developed from a single year, or five year period, cannot be used to properly estimate actual historical beneficial use since low consumptive use crops or no crop may be present during the period. Thus, historical cropping practices or completion of a crop rotation are not reflected.

Adjusted Weather Data
pp. C-6 through C-19

The Salt River Project objects to DWR's adjustment of weather station temperatures from recorded values and relative humidities from estimated values. The temperature and relative humidity adjustment procedure is intended for prediction of crop water requirements for large, new irrigation developments where the current observations are from a nearby non-irrigated area. Because of the "clothesline" configuration of San Pedro irrigated areas in relation to the extremely arid surrounding environment, it is extremely doubtful there is any moderating effect due to surrounding irrigated land or to the San Pedro River.

Relative Humidity
pp. C-9, C-17, C-25, C-29, C-34, C-92

The Salt River Project objects to DWR's failure to specify whether it used <u>minimum</u> relative humidity as specified in Food and Agricultural Organization (FAO) Paper 24. Minimum relative humidity is not reported by Sellers and Hill. Furthermore, their 6 p.m. (1800 hours) data must be adjusted downward to reflect lower humidity in mid-afternoon. The proper publication date for <u>Arizona Climate, 1931-1972</u>, by Sellers and Hill, is 1974.

Growing Season
pp. C-20, C-24

The Salt River Project objects to DWR's use of field observations during one or just a few years to estimate the length of growing season for perennial crops. A few field observations of irrigation dates do not define the water use period because water use occurs both before and after irrigation and because growing seasons vary from year to year. Growing seasons can best be determined for perennial crops by a relationship between plant growth and mean temperature or mean date of low temperatures over an extended period of record.

Effective Precipitation
pp. C-38, C-40 through C-49

The Salt River Project objects to DWR's method of estimating non-growing season effective precipitation. The procedure used neglects runoff, uses soil constant values that are highly variable and not well quantified, and is unclear about assumptions of initial soil moisture conditions for each month. Published methods can be used to estimate non-growing season effective precipitation for the winter months, the relevant period for most crops. Furthermore, the Salt River Project objects to DWR's use of a 50 percent probability of precipitation, which results in an inadequate supply in one-half of the years. A 50 percent probability indicates that average effective precipitation is subtracted from crop consumptive use when DWR calculates the irrigation requirement. This means that in years of below-average precipitation, irrigation users would be unable to replace the lack of precipitation with additional irrigation water. The amount of precipitation that is available 80 percent of the time for field crops and 90 percent of the time for orchards and vegetables is appropriate.

Crop Coefficients
p. C-33

The Salt River Project objects to DWR's use of 0.8 as the kc for Winter Pasture. Winter Pasture is a cool-season grass mixture that has a higher crop coefficient than a warm-season grass. SRP also objects to DWR's use of the mean of kc1 and kc3 as a value for kc2, instead of interpolation. Both FAO-24 and University of California Leaflet 21427 specify interpolation.

Alfalfa Stand Establishment
p. C-37

The Salt River Project objects to DWR's failure to include water for alfalfa stand establishment as an "Other Need."

Deficit Irrigation
pp. C-4, C-5, C-54 through C-68

The Salt River Project objects to DWR's use of deficit irrigation values for the maximum observed quantification for water right entitlements. As noted above, maximum actual historical beneficial use is the proper measure of a water right entitlement, not current practice.

Efficiency Estimates
pp. 138-140, C-51 through C-54

The Salt River Project objects to DWR's omission of the effect of a rotation delivery system on On-Farm Irrigation Efficiency. A rotation delivery system reduces On-Farm Irrigation Efficiency below that which can be achieved if irrigation water is available on demand.

The Salt River Project also objects to DWR's use of average estimated values of irrigation efficiency for regional quantification. The use of average efficiencies understates entitlements for one-half of all irrigated acres on this basis alone.

Objections must be filed with the Clerk of the Superior Court in and for Maricopa County, Maricopa County Courthouse Annex, 3345 W. Durango Street, Phoenix, AZ 85009, on or before May 18, 1992.

STATEMENT OF THE OBJECTION

The following are the main categories of the typical Watershed File Report (Zone 2 Well Reports and some Watershed File Reports lack certain categories). Please check the category(ies) to which you object, and state the reason for the objection on the back of this form.

- 1. I object to the description of **Land Ownership**

X 2. I object to the description of **Applicable Filings and Decrees**

- 3. I object to the description of **DWR's Analysis of Filings and Decrees**

X 4. I object to the description of **Diversions** for the claimed water right(s)

X 5. I object to the description of **Uses** for the claimed water right(s)

- 6. I object to the description of **Reservoirs** used for the claimed water right(s)

- 7. I object to the description of **Shared Uses & Diversions** for the claimed water right(s)

- 8. I object to the **PWR (Potential Water Right) Summary** of the claimed water right(s)

X 9. I object to the description of **Quantities of Use** for the claimed water right(s)

- 10. I object to the **Explanation** provided for the unclaimed water right(s)

- 11. Other Objections (please state volume, page and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attached supporting information and additional pages as necessary. The following objection(s) are based upon information and belief:

CATEGORY NUMBER	
4	The use of the water claimed depletes water for senior federal and Indian water rights (1150).
2	HSR does not show a well registration filing (420).
2	HSR does not show a claimed water use rate (1000).
4	This well takes water directly from the flow of the river under state standards (500) (532) (1132) (1137).
9	HSR does not show the apparent annual volume of water used (1000).
2	Not all wells have applicable statement of claimants (475).
5	Claimed uses were not found by DWR (830).

Objections must be filed with the Clerk of the Superior Court in and for Maricopa County, Maricopa County Courthouse Annex, 3345 W. Durango Street, Phoenix, AZ 85009, on or before May 18, 1992.

STATEMENT OF THE OBJECTION

The following are the main categories of the typical Watershed File Report (Zone 2 Well Reports and some Watershed File Reports lack certain categories). Please check the category(ies) to which you object, and state the reason for the objection on the back of this form.

- 1. I object to the description of **Land Ownership**

X 2. I object to the description of **Applicable Filings and Decrees**

- 3. I object to the description of **DWR's Analysis of Filings and Decrees**

X 4. I object to the description of **Diversions** for the claimed water right(s)

- 5. I object to the description of **Uses** for the claimed water right(s)

- 6. I object to the description of **Reservoirs** used for the claimed water right(s)

- 7. I object to the description of **Shared Uses & Diversions** for the claimed water right(s)

- 8. I object to the **PWR (Potential Water Right) Summary** of the claimed water right(s)

X 9. I object to the description of **Quantities of Use** for the claimed water right(s)

- 10. I object to the **Explanation** provided for the unclaimed water right(s)

- 11. Other Objections (please state volume, page and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attached supporting information and additional pages as necessary. The following objection(s) are based upon information and belief:

CATEGORY NUMBER	
4	The use of the water claimed depletes water for senior federal and Indian water rights (1150).
2	HSR does not show a well registration filing (420).
9	HSR does not show a claimed water use rate (1000).
2	HSR does not show a quantity for pre-filing(s) (430).
2	Claim date from filing(s) and/or pre-filing(s) are inconsistent (478)(430).
2	Quantities from filing(s) and/or pre-filing(s) are inconsistent (478)(430).

STATEMENT OF THE OBJECTION

The following are the main categories of the typical Watershed File Report (Zone 2 Well Reports and some Watershed File Reports lack certain categories). Please check the category(ies) to which you object, and state the reason for the objection on the back of this form.

[ ] 1. I object to the description of **Land Ownership**.

[XX] 2. I object to the description of **Applicable Filings and Decrees**.

[ ] 3. I object to the description of **DWR's Analysis of Filings and Decrees**.

[XX] 4. I object to the description of **Diversions** for the claimed water right(s).

[ ] 5. I object to the description of **Uses** for the claimed water right(s).

[ ] 6. I object to the description of **Reservoirs** used for the claimed water right(s).

[ ] 7. I object to the description of **Shared Uses & Diversions** for the claimed water right(s).

[XX] 8. I object to the **PWR (Potential Water Right) Summary** of the claimed water right(s).

[XX] 9. I object to the description of **Quantities of Use** for the claimed water right(s).

[ ] 10. I object to the **Explanation** provided for the claimed water right(s).

[ ] 11. Other Objections (please state volume, page and line number for each objection).

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

2. The claimant and/or ADWR fail(s) to associate this claim with a pre-adjudication water filing as required by Arizona statute. (SM 420) (W01; W02; W03)

   The amount claimed, as described by ADWR, exceeds a reasonable amount required for beneficial use. (SM 478)

   The use of water listed under this Watershed File Report is challenged because it interferes with downstream federal reserved rights and is contrary to state and federal law. (SM 560)

   One or more of the POD legal descriptions listed in the WFR is too general. (SM 623) (1002221591100)

   One or more of the POU legal descriptions listed in the WFR is too general. (SM 720) (3600273160000; 3600273190000; 3900043060000)

   There is no quantity amount listed for a pre-filing and/or filing under this WFR. (SM 1000) (3600273190000)

   Applicable or potentially applicable filings indicate a volume of actual or claimed use less than the volume estimated by ADWR (both maximum observed and regional use for irrigation PWR's). The claimant is not entitled to more than actually used or claimed. (SM 1000)

4. The diversion is not associated with a POU. It may be unused, discontinued or not applicable and should not be assigned a water right. (SM 600)

8. The claimant and/or ADWR fail(s) to associate this claim with a pre-adjudication water filing as required by Arizona statute. (SM 420) (W01; W02; W03)

The use of water listed under this Watershed File Report is challenged because it interferes with downstream federal reserved rights and is contrary to state and federal law. (SM 560)

One or more of the POD legal descriptions listed in the WFR is too general. (SM 623) (1002221591100)

The legal description for the place of use of a potential water right listed by ADWR is not fully supported by applicable filings. (SM 720) (IR001000; IR001001; IR001002; IR001003; IR002000; IR002001; IR002002; IR003000; SR001000)

One or more of the POU legal descriptions listed in the WFR is too general. (SM 720) (3600273160000; 3600273190000; 3900043060000)

The Arizona Department of Water Resources has incorrectly assigned an early priority date to this Watershed File Report. The date should be amended to accurately reflect the date that the claimant actually began using water for beneficial purposes. (SM 950) (IR001)

Applicable or potentially applicable filings indicate a volume of actual or claimed use less than the volume estimated by ADWR (both maximum observed and regional use for irrigation PWR's). The claimant is not entitled to more than actually used or claimed. (SM 1000)

9. Applicable or potentially applicable filings indicate a volume of actual or claimed use less than the volume estimated by ADWR (both maximum observed and regional use for irrigation PWR's). The claimant is not entitled to more than actually used or claimed. (SM 1000)

ADWR uses a methodology that overestimates crop water requirements. (SM 1020)

- [x] 11. Other Objections (please state volume, page and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

Category Number: 4, 8 and 11

Magma Copper Company ("Magma") and ASARCO Incorporated ("ASARCO") submit this objection as co-objectors.

Magma and ASARCO object to the inclusion of groundwater in this Adjudication because groundwater is not subject to claims based on federal law (Uniform Objection Code Nos. 561, 562 and 1134). In addition, this objection is intended to preserve this issue until such time as it is resolved by the Arizona Supreme Court. (Uniform Objection Code No. 1130)

While this objection pertains to a specific Zone 2 Well Report number ("Zone 2 Report"), Magma and ASARCO are objecting to each Zone 2 Report that classifies a well as a "Zone 2 Well", that extends federal reserved rights to groundwater pumped from the Zone 2 Well(s), or that otherwise creates a presumption that groundwater withdrawals from the well(s) significantly affect federal reserved rights.

With respect to this particular Zone 2 Report, Magma and ASARCO presently believe that groundwater withdrawn from the subject well(s) does not significantly diminish water otherwise available to a federal reservation and therefore is not subject to the Gila Adjudication. However, should it be determined that groundwater withdrawn from the well(s) does significantly diminish water otherwise available to a federal reservation, Magma and ASARCO object to such use where such groundwater withdrawal interferes with paramount water rights of Magma or ASARCO. (Uniform Objection Code Nos. 1135, 1136 and 1150)

Magma and ASARCO are also filing this objection to obtain notice and an opportunity to be heard on all issues in the event that claims to the groundwater referenced in claimant's Zone 2 Report are adjudicated.

- [ ] 10. I object to the **Explanation** provided for the claimed water right(s)
- [X] 11. Other Objections (please state volume, page and line number for each objection)

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

Category Number: 4, 8 and 11

Magma Copper Company ("Magma") and ASARCO Incorporated ("ASARCO") submit this objection as co-objectors.

Magma and ASARCO object to the inclusion of groundwater in this Adjudication because groundwater is neither appropriable under Arizona law (Uniform Objection Code Nos. 500, 510, 1120 and 1132), nor is it subject to claims based on federal law (Uniform Objection Code Nos. 561, 562, 1120 and 1134). In addition, this objection is intended to preserve these issues until such time as each is resolved by the Arizona Supreme Court. (Uniform Objection Code No. 1130)

While this objection pertains to a specific Watershed File Report ("WFR"), Magma and ASARCO are objecting to each WFR that classifies a well as a "Zone 1 Well" or otherwise employs the "50% - 90 day standard" to create a presumption of a well's diversion of appropriable surface water.

With respect to this particular WFR, Magma and ASARCO presently believe that the subject well(s) is/are taking nonappropriable groundwater not subject to the Gila Adjudication. However, should it be determined that the well(s) is/are taking appropriable surface water, Magma and ASARCO object to such use where such taking is a diversion of surface water without an appropriative right under state law and/or is interfering with the water rights of Magma or ASARCO. (Uniform Objection Code Nos. 600, 610 and 1150)

Magma and ASARCO are also filing this objection to obtain notice and an opportunity to be heard on all issues in the event that claims to the groundwater referenced in claimant's WFR are adjudicated.
