- 4) The use of the water claimed depletes water for senior federal and Indian water rights (1150).
- 9) HSR does not show a claimed water use rate (1000).
- 2) HSR does not show Water Rights Registration for each Zone 1 Potential Water Right (420).
- 2) HSR does not show a Quantity of water in AFA for pre-filing(s) (430).
- 4) Impoundment of water interferes with senior federal and Indian water rights (1150).
- 2) HSR shows that claim dates from filing(s) and/or pre-filing(s) are inconsistent (478)(430).
- 10) Claimed uses were not found by DWR (830).

ATTACHMENT 1

WFR CATEGORY 8 - PWR SUMMARY

The Salt River Project objects to the apparent date of first use assigned to this Potential Water Right (PWR). Previous filings, particularly notices of appropriation, are the evidentiary foundation for the date of priority associated with a water right. Where two or more notices of appropriation and a Water Rights Registration Act filing have been matched to the same PWR but suggest different dates of priority, the date evidenced by the oldest notice should form the basis for the apparent date of first use, unless sufficient historical evidence indicates a contrary date.

The Watershed File Report fails to articulate sufficient historical evidence to refute the priority date evidenced by the oldest notice of appropriation matched to this PWR. In the absence of such evidence, the apparent date of first use assigned to this PWR should be the date evidenced by the oldest notice (0920). This objection applies to: SW001.

WFR CATEGORY 9 - QUANTITIES OF USE

The Salt River Project objects to the failure of DWR to assign a quantity of use to this Potential Water Right (PWR). All water rights subject to the court's jurisdiction must be quantified in accordance with A.R.S. § 45-257(B). This PWR is no exception (1010). This objection applies to: SW001.

CATEGORY NUMBER

3,4,5  
6,8,9,  
10,

This Watershed File Report contains many claims, most of which relate to each other, but which may conflict in some significant way. Also, the DWR analysis is often flawed. For instance, the DWR reports "no-use" when on-site inspection confirms a use. It would be impossible to incorporate all objections, comments and corrections to this WFR on this form. In order to present a comprehensive picture of all claims related to each specific "place of use" or "point of diversion," the objector developed a form entitled "C-Spear Ranch - Water Rights Summary." Each separately submitted C-Spear form incorporates all comments, claims and objections for one "place of use" or "point of diversion." The submitted forms attached to this objection for WFR 113-12-011 incorporate all water claims incident to this Watershed File Report. Finally, pursuant to Rule 6.08, Rules of Procedure Before the Special Master, the objector preserves its objections to all issues currently on interlocutory appeal to the Arizona Supreme Court.

<b>DESCRIPTION OF WATER USE:</b> (e.g. irrigation of 30 acres of pasture or stockwatering)  Stockwatering		<b>DATE OF FIRST DIVERSION OR USE:</b>  1879
<b>NOMINAL FLOW RATE:</b>	<b>AVERAGE ANNUAL DIVERSION AMOUNT:</b>  1.6 acre ft/yr	<b>WATERSHED FILE</b> 113-12-007 113-12-010
<b>COMMENTS:</b>  On-site inspection confirms this use. Watershed file does not recognize. Apparently incorrect legal placed this in WFR 113-12-010. It should be in WFR 113-12-007, and legal is as above. There is a small water trough which collects the water for stockwatering. This claim concerns two springs in extremely close proximity. Both have horizontal wells, but only the Salas Springs well operates. The Eureka spring flows but not from the pipe. This is not the same Eureka spring represented by claim 39-619.
