

DRAFTING ASSISTANT FOR TRANSACTIONAL DOCUMENTS

Draft legal documents with greater speed and accuracy

YOUR SECOND SET OF EYES

Even the slightest drafting mistake can have unintended, and sometimes disastrous, consequences. Prevent those mistakes and save hours with Drafting Assistant for transactional documents, the drafting and analysis software tool from Thomson Reuters.

Avoid unintended drafting errors and cut proofing time in half

The Drafting Assistant core analyzer engine, Deal Proof®, works within Microsoft Word to intelligently scan your documents in seconds, alerting you to errors, inconsistencies, missing information, and more. Rapidly identify and assess potential issues such as defined term and cross-reference discrepancies.

A recent U.S. study shows that Drafting Assistant – Transactional take 60% off typical review time.

Protect your client's interests, no matter who's drafting

Use Drafting Assistant as a sword *and* a shield. Run the other side's document through the analyzer to expose and exploit their drafting weaknesses.

Produce documents that reflect the latest market practice

Drafting Assistant for transactional documents integrates with Practical Law Canada to jump-start your drafting. Access hundreds of standard documents and clauses. Quickly benchmark your documents and incorporate best-in-class precedent language, all within Microsoft Word.

Draft faster

Access Practical Law Canada documents or your firm's Contract Express automated templates to quickly generate a first draft directly in Microsoft Word.

EASY TO USE, PLUS HELP WHEN YOU NEED IT

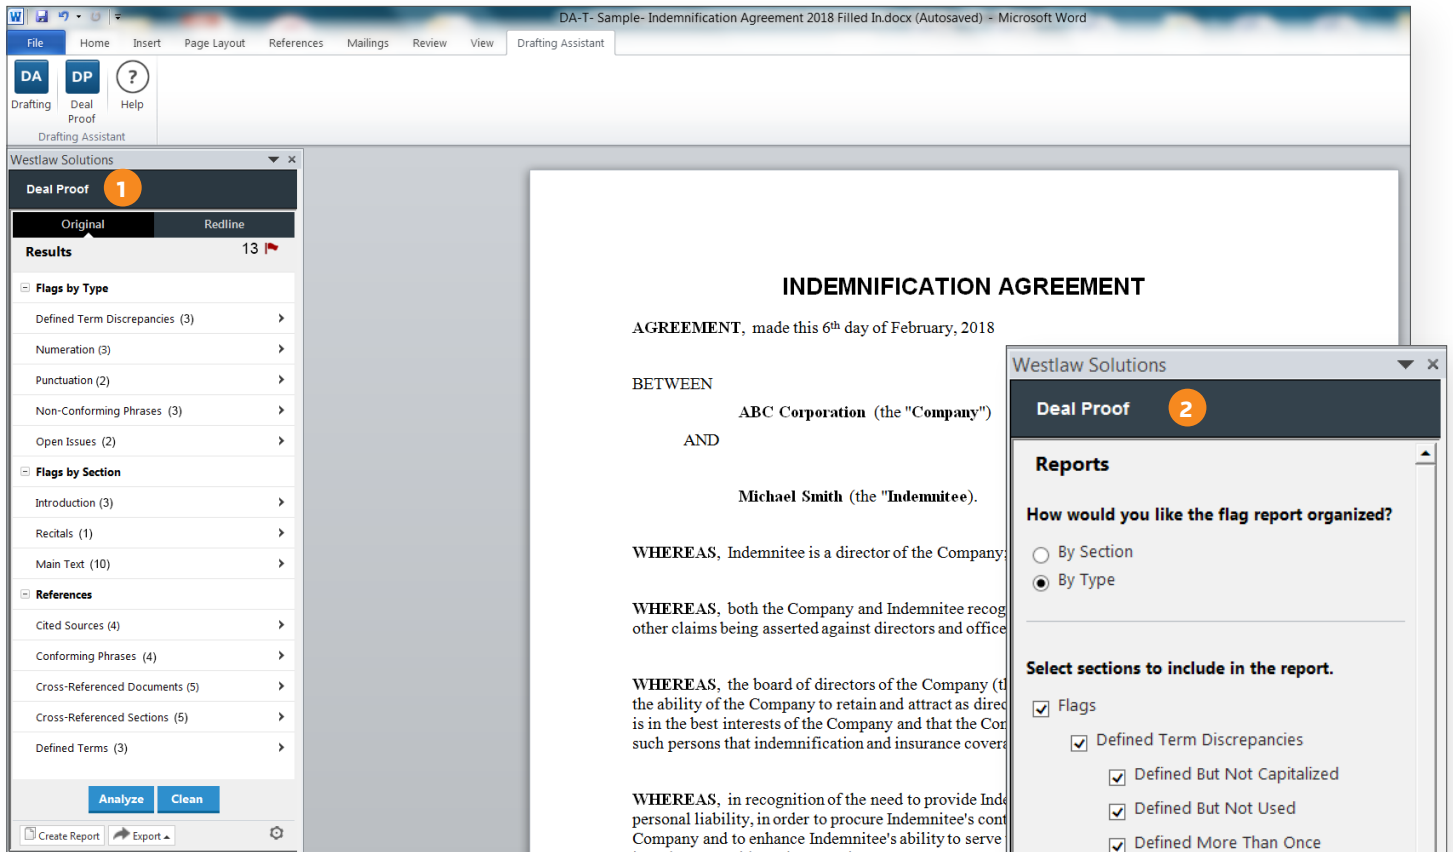

Drafting Assistant for transactional documents is so intuitive you can start using it right away with little or no learning time. Or if you need help, training and support are available 24/7 at no additional cost.
