

# TENNESSEE INFLUENZA

WEEK  
21

## WEEKLY REPORT

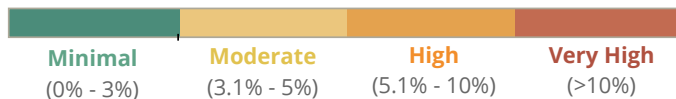

May 19, 2024 - May 25, 2024

### INFLUENZA ACTIVITY SNAPSHOT

SURVEILLANCE INDICATOR	TREND	CURRENT WEEK	PREVIOUS WEEK
 <b>ILLNESS</b> Percentage of outpatient visits due to influenza-like illness (ILI)	▶	<b>1.9%</b>	<b>2.0%</b>
 <b>LABORATORY</b> Percentage of positive specimens & predominant strain of influenza	▶	<b>1.3%</b> <i>Flu A (H1N1)</i>	<b>1.3%</b> <i>Flu A (unsubtyped)</i>
		NEWLY REPORTED	SEASON TOTAL
		<i>during week of May 19, 2024</i>	<i>since October 1, 2023</i>
 <b>OUTBREAKS</b> 2 or more ill persons of a shared setting		<b>0</b>	<b>16</b>
 <b>DEATHS</b> Newly reported and season total pediatric influenza-associated deaths in TN		<b>0</b>	<b>6</b>

### INFLUENZA-LIKE ILLNESS (ILI)

#### Percent of Outpatient Visits for Influenza-Like Illness Week 21

The U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) monitors outpatient visits for respiratory illness referred to as influenza-like illness (ILI). Tennessee has approximately 100 sentinel providers across the state that contribute this data weekly from a variety of healthcare setting such as primary care, pediatrics, county health departments, student health centers, and emergency departments.

ILI is defined as a fever plus cough or sore throat, not laboratory-confirmed influenza. Therefore these data may capture respiratory illness visits due to infection with any pathogen that can present with similar symptoms, including influenza, SARS-CoV-2, and RSV.

TN State Average	<b>1.9%</b>
Chattanooga/Hamilton County Metro	<b>2.0%</b>
East Region	<b>1.5%</b>
Jackson/Madison County Metro	<b>1.2%</b>
Knox County Metro	<b>0.6%</b>
Memphis/Shelby County Metro	<b>2.5%</b>
Mid Cumberland Region	<b>1.7%</b>
Nashville/Davidson County Metro	<b>1.8%</b>
Northeast Region	<b>2.7%</b>
Southeast Region	<b>1.4%</b>
South Central Region	<b>0.0%</b>
Sullivan County Metro	<b>1.9%</b>
Upper Cumberland Region	<b>0.0%</b>
West Region	<b>0.6%</b>

# TENNESSEE INFLUENZA

## WEEKLY REPORT

May 19, 2024 - May 25, 2024

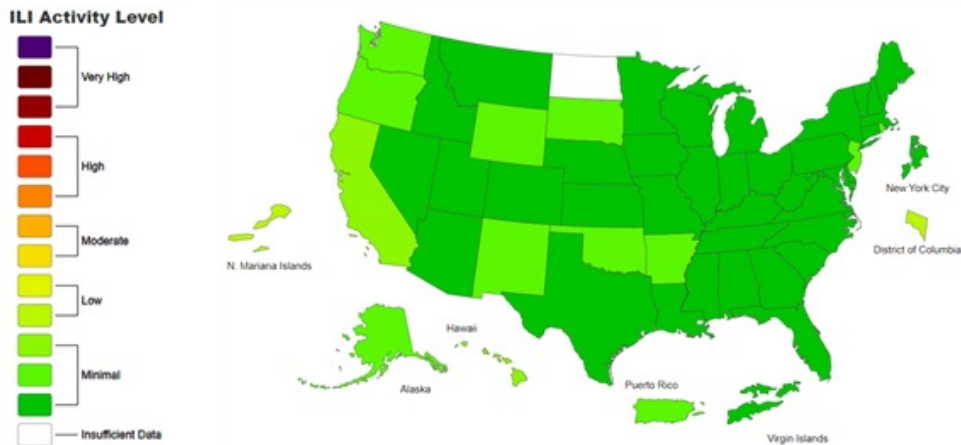

### INFLUENZA-LIKE ILLNESS (ILI)

ILI is defined as a fever plus cough or sore throat, not laboratory-confirmed influenza. Therefore these data may capture respiratory illness visits due to infection with any pathogen that can present with similar symptoms, including influenza, SARS-CoV-2, and RSV.

\*CDC develops state-specific baselines by calculating the mean percentage of patient visits for ILI during non-influenza weeks for the most recent two seasons and adding two standard deviations (2021-2022 and 2022-2023). A non-influenza time period (e.g., a "non-influenza week") is defined as two or more consecutive weeks in which each week accounted for less than 2% of the season's total number of specimens that tested positive for influenza in public health laboratories.

### National ILI Activity Week 21

Map prepared by CDC's Influenza Division and visualizes outpatient respiratory illness activity determined by data reported to ILINet. To access original source, visit: <https://gis.cdc.gov/grasp/fluview/main.html>

# TENNESSEE INFLUENZA

## WEEKLY REPORT

May 19, 2024 - May 25, 2024

### LABORATORY

**Positive Tests by Influenza Type/Subtype and Percent Positivity  
Among Tennessee Clinical & Public Health Laboratories**

### Week 21

**Total # Specimens Tested** 79

**Positive specimens by type/subtype**

Flu A H1N1	1
Flu A H3	0
Flu B	0
Unsubtyped Flu A	0

**Percent Positive** 1.3%

*Influenza testing in Tennessee is represented as a combination of data from the state public health laboratory and two commercial laboratories that serve clinics across the state.*

### OUTBREAKS & DEATHS

**Flu Outbreaks  
Currently Open by Region**

During the week of May 19, 2024, there were **0** open influenza outbreaks reported.

**Influenza-Associated Pediatric Mortality  
Season Total, Statewide**

There have been **6** pediatric influenza-associated deaths reported in Tennessee this season (began October 1, 2023).
