

## Sentinel Provider Influenza-Like Illness (ILI)<sup>1</sup> Surveillance Summary for the Week of Jan. 14-20, 2018 (Week 3)

<https://www.tn.gov/health/cedep/immunization-program/ip/flu-in-tennessee.html>

Summary for	# Sites reporting	Total Sites	Total Regional ILI	Total Regional Patients	% ILI	Compared to State <sup>2</sup>
Hamilton County (Chattanooga)	2	4	2	331	0.6%	lower
East Tennessee Region	7	9	331	2347	14.1%	higher
Jackson-Madison County	1	1	15	447	3.4%	lower
Knoxville-Knox County	3	3	107	1421	7.5%	
Mid-Cumberland Region	9	15	4	648	0.6%	lower
Shelby County (Memphis)	1	4	2	127	1.6%	lower
Nashville-Davidson County	3	10	26	316	8.2%	
Northeast Region	4	5	5	274	1.8%	lower
South Central Region	3	3	0	86	0.0%	lower
Southeast Region	2	4	23	326	7.1%	
Sullivan County (Tri-Cities)	2	3	26	243	10.7%	
Upper Cumberland Region	4	4	1	235	0.4%	lower
West Tennessee Region	6	6	0	141	0.0%	lower
State of Tennessee	47	71	542	6942	7.81%	

### Influenza activity in Tennessee

- The percentage of outpatients with ILI visiting the state's Sentinel clinic sites was 7.81%. The CDC's baseline rate is 2.2%.
- 23.8% of specimens tested positive for influenza viruses .
- 61 of 95 Tennessee counties have had at least one confirmed influenza-positive result in recent weeks.

*The percentage of patients with ILI reported in Week 3 was 7.81%, up from 5.70% in Week 2. To date, 483 specimens from Week 3 have been tested by TDH Laboratory Services and two commercial laboratories that serve clinics and hospitals across Tennessee; 115 (23.8%) tested positive for influenza viruses. A map of counties with recent influenza-positive results is included. Tennessee requires reporting of influenza-related deaths among children and pregnant women. So far this season, Tennessee has reported 4 influenza-related deaths in children <18 years and one influenza-related death of a pregnant woman.*

*SPN sites should submit specimens year-round from ALL patients meeting the ILI case definition: Fever > 100°F (37.8°C) plus cough and/or sore throat, in the absence of a known cause (other than influenza). Case definition is not dependent on any test. If you have questions, contact your regional or state SPN representative. The TDH specimen submission form dated September 2015 should be used.*

*Specimens are critical to be able to track the geographic spread and intensity of seasonal influenza viruses, to detect the emergence of novel virus and/or antiviral resistance and provide data for vaccine strain selections.*

### Respiratory Viral Panel

*Number of Positive Specimens, by week*

Month/Week	#	Flu A (H1N1)	Flu A (H3)	Unsub. Flu A	Flu B	RSV A	RSV B	Paraflu 1	Paraflu 4	Rhino	Meta-pneumo	Adeno	Corona OC43	Corona HKU1
<b>January</b>														
Current	483	24	37	32	22	1	1	0	0	1	1	0	0	0
2	707	35	61	52	10	1	2	0	0	1	2	0	1	1
1	549	42	52	27	14	0	2	0	0	2	3	1	0	0
<b>December</b>														
52	517	31	37	33	9	1	1	1	0	4	2	1	0	0
51	545	62	33	32	9	0	3	0	0	9	1	1	0	0

### Percentage of Outpatient Visits Reported by the U.S. and Tennessee Outpatient Influenza-like Illness Surveillance Network (ILINet) as Influenza-like Illness, 2017-2018

Updated: January 26, 2018

### Influenza Positive Tests Submitted to TN Dept. of Health Laboratory Services Tennessee, 2017-2018

Updated: January 26, 2018

## Reference Information for Sentinel Provider Network

**1** Influenza-like illness (ILI) is defined as fever > 100°F (37.8°C) plus cough and/or sore throat, in the absence of a known cause (other than influenza). Classification of ILI is based upon symptoms only and does not require any test.

**2** The % of patients with ILI seen in each region is compared to the statewide average. Regions with % statistically-significantly different from the state average are noted as “higher” or “lower.” The CDC reports that the percentage of patients visiting outpatient healthcare providers in the Sentinel Provider Network (SPN) with influenza-like-illness (ILI) when influenza viruses are not circulating is expected to fall at or below a specific SPN baseline [nationwide = 2.2%, East South Central region (AL, TN, MS, KY) = 2.3%]. When the percentage of patients with ILI exceeds this baseline, this suggests that influenza viruses may be circulating.

### Important information for Sentinel Providers

Sentinel Providers report ILI by the end of Wednesday following the end of the reporting week (<https://wwwn.cdc.gov/ilinet/>) and collect and ship specimens from ILI cases Monday through Thursday (maximum 10/week per provider). All Sentinel Provider specimens MUST be accompanied by the Influenza and Respiratory Viral Panel Submission form or testing will not be done. The Respiratory Viral Panel is only validated for nasopharyngeal (NP) specimens. Specimens collected from other sites cannot be tested.

Additional laboratory supplies can be obtained by completing the lab order supply form. To ensure the order is filled, please include the CDC Provider ID Code.

### Contact Information

**Submit weekly reports to:** <https://wwwn.cdc.gov/ilinet/> OR Fax 888-232-1322

**State Lab:** Bryan Mason (Virology, Respiratory Viral Panel) 615-262-6300

### **SPN Questions:**

**State:** Robb Garman 800-404-3006 OR 615-741-7247
