

Sentinel Provider Influenza-Like Illness (ILI)¹ Surveillance Summary (health.state.tn.us/TNflu_report_archive.htm)

For the Week of Sep. 23-29, 2012 (Week 39) revised 10/12/2012

Summary for	# Providers reporting	Total Providers	Total Regional ILI	Total Regional Patients	% ILI	Comparison to State ²
Hamilton County (Chattanooga)	3	4	0	544	0.0%	
East Tennessee Region	8	9	20	3235	0.6%	higher
Jackson-Madison County	0	1	0	0	0.0%	
Knoxville-Knox County	4	4	2	1781	0.1%	
Mid-Cumberland Region	7	10	7	1142	0.6%	
Shelby County (Memphis)	3	10	1	883	0.1%	
Nashville-Davidson County	5	6	8	1743	0.5%	
Northeast Region	2	3	0	215	0.0%	
South Central Region	3	3	1	267	0.4%	
Southeast Region	4	4	2	829	0.2%	
Sullivan County (Tri-Cities)	2	2	0	558	0.0%	
Upper Cumberland Region	3	5	0	498	0.0%	
West Tennessee Region	5	6	0	273	0.0%	
State of Tennessee	49	67	41	11968	0.34%	

Note to Sentinel Providers:

Sentinel Providers are reminded to submit specimens on all patients meeting the ILI case definition (up to 10 per week).

Please use the new TDH specimen submission form.

The percentage of patients with ILI reported in Week 39 was 0.34%, compared with 0.28% in Week 38. To date, 18 specimens from Week 39 have been tested; 1 was positive for influenza B virus. No cases of novel influenza A/H3N2v have been detected in Tennessee to date. CDC reported no new cases this week. For information see: www.cdc.gov/flu/swineflu/influenza-variant-viruses-h3n2v.htm. A clinician with a patient with ILI and recent swine contact or contact with a confirmed H3N2v case should collect an appropriate nasopharyngeal specimen for viral testing and contact public health.

State Public Health Laboratory
Respiratory Viral Panel

Number of Positive Specimens, by week

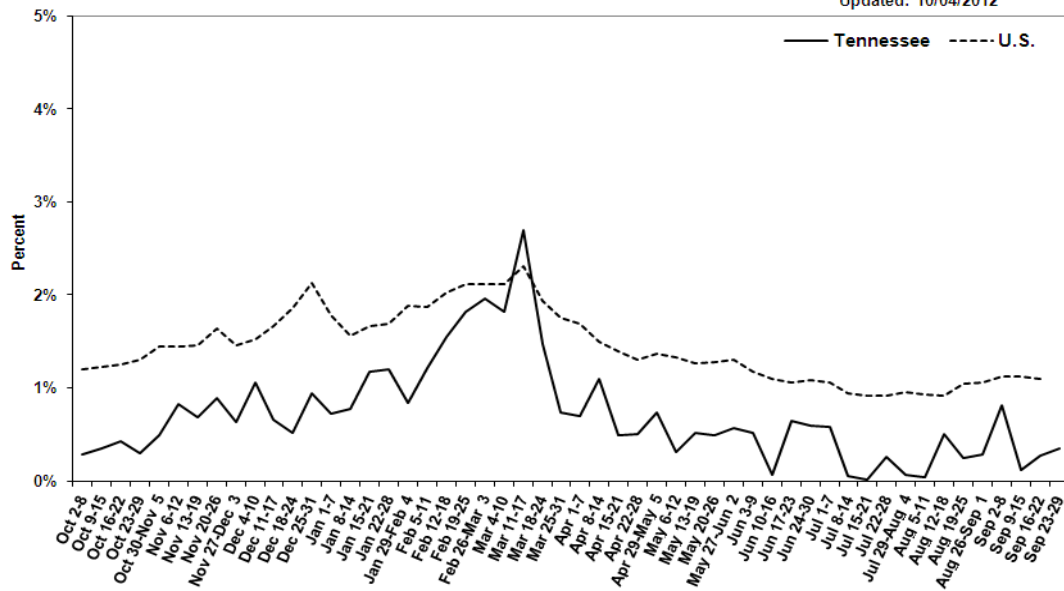

Month	Sep				Aug
Week	Current	38	37	36	35
Total specimens tested	18	21	12	18	23
Influenza A 2009 H1N1	0	0	0	0	0
Influenza A H3N2	0	0	0	0	0
Influenza B	1	0	0	0	0
Respiratory Syncytial Virus A	0	0	0	0	0
Respiratory Syncytial Virus B	0	0	0	0	0
Parainfluenza 1	0	0	0	0	0
Parainfluenza 2	0	0	0	0	0
Parainfluenza 3	0	0	0	0	0
Rhinovirus	0	0	0	0	0
Metapneumovirus	0	0	0	0	0
Adenovirus	0	0	0	0	0

Correction:

The surveillance report for Week 38 (Sep. 22-29, 2012), three specimens were classified as influenza positive, but were later confirmed as negative. The corrected copies of Weeks 38 and 39 reports will be posted at health.state.tn.us/TNflu_report_archive.htm.

Percentage of Outpatient Visits Reported by the U.S. and Tennessee Outpatient Influenza-like Illness Surveillance Network (ILINet) as Influenza-like Illness, 2011-2012

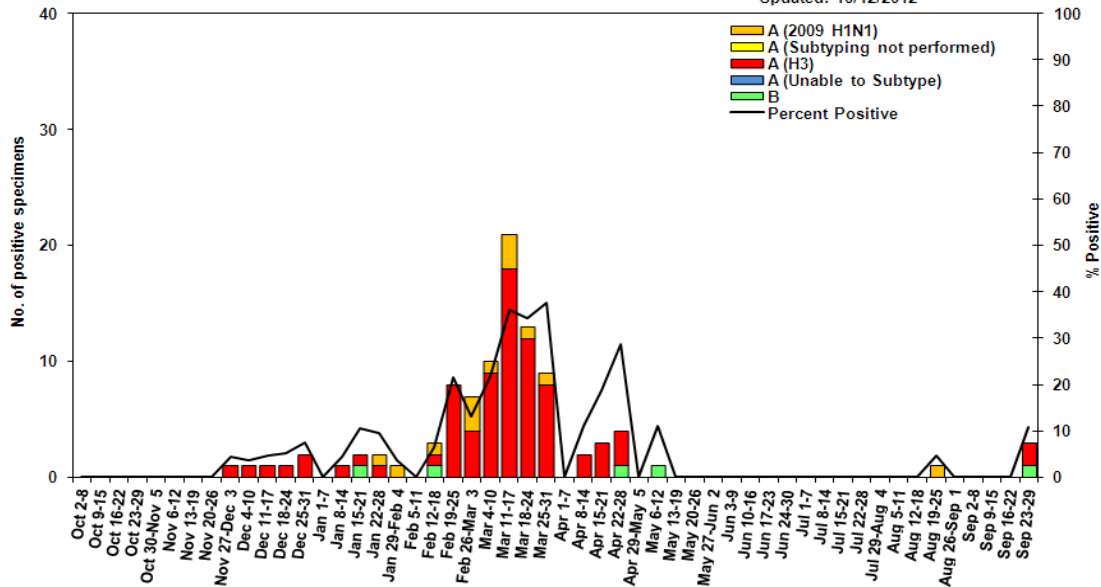

Updated: 10/04/2012

Week (Oct. 2, 2011 - Sep. 29, 2012)

Influenza Positive Tests Submitted to TN Dept. of Health Laboratory Services, Tennessee, 2011-2012

Updated: 10/12/2012

Week (Oct. 2, 2011 - Sep. 29, 2012)

Reference Information for Sentinel Provider Network

1 Influenza-like illness (ILI) is defined as fever > 100°F (37.8°C) plus cough and/or sore throat, in the absence of a known cause (other than influenza). Classification of ILI is based upon symptoms only and does not require any test.

2 The % of patients with ILI seen in each region is compared to the statewide average. Regions with % statistically-significantly different from the state average are noted as “higher” or “lower.” The CDC reports that the percentage of patients visiting outpatient healthcare providers in the Sentinel Provider Network (SPN) with influenza-like-illness (ILI) when influenza viruses are not circulating is expected to fall at or below a specific SPN baseline [nationwide = 2.2%, East South Central region (AL, TN, MS, KY) = 2.3%]. When the percentage of patients with ILI exceeds this baseline, this suggests that influenza viruses may be circulating.

Important information for Sentinel Providers

Sentinel Providers report ILI by the end of Tuesday following the end of the reporting week (www2a.cdc.gov/ilinet) and collect and ship specimens from ILI cases Monday through Thursday (maximum 10/week per provider). All Sentinel Provider specimens MUST be accompanied by the Influenza and Respiratory Viral Panel Submission form or testing will not be done. The Respiratory Viral Panel is only validated for nasopharyngeal (NP) specimens. Specimens collected from other sites cannot be tested.

Additional laboratory supplies can be obtained by completing the lab order supply form. To ensure the order is filled, please include the CDC Provider ID Code.
