Address 2:

City:

State:

Zip Code:

Phone Number:

Email Address:

I understand that Colorado state law requires the owners of certain buildings to provide certain information regarding energy use of their buildings to the Colorado Energy Office. I understand that in order to comply with the statute, building owners need to obtain the information from utility companies like United Power. I understand that, in accordance with state law, the information provided by United Power for multi-customer buildings is aggregated for the entire building and therefore does not disclose the energy data for individual utility customers.

I understand that because my building has fewer than four utility customers, United Power requires the owner of my building to obtain my consent prior to United Power releasing my information to the building owner. The information that United Power may release to the building owner may include, but is not limited to, (i) the building's monthly energy use (ii) annual maximum electricity demand; and (iii) monthly peak electricity demand from your United Power meter.

I hereby consent to United Power sharing the above energy use data with the owner of my building.
