Collective Office accelerates contemporary architectural design to clients with 5G

collectiveoffice

Challenges

- Only connectivity option was twisted pair copper, which was inadequate

- Routinely sharing large design files and drawings to clients and printers

- Network outages and bandwidth limitations while focusing on design projects and deadlines

- Relying on mobile hotspots and tethering for supplementary bandwidth when video conferencing, etc...

Solutions

- Deployed 5G Business Internet on premises for network coverage to the entire building

Benefits

- Freedom and peace-of-mind to focus on the core design business without having to plan around bandwidth issues

- Single fast, reliable, and secure connection that meets bandwidth needs for professional and personal off-hour use

- Eliminated the reliance on multiple makeshift solutions to meet deadlines

"**Reliable, seamless, in the background, things [just] work—which is what it is now for us with 5G Business Internet** "

Jeff Klymson
Founding Principal, Architect

Die-Cut Products Co. adopts 5G technologies to help continually improve customer satisfaction.

die-cut products co.

Challenges

- Increasing customer satisfaction through faster response and fulfillment times for machined components in the aerospace and healthcare industry

- Migrated entirely to cloud solutions for ERP and storage that replaced costly on site servers

- Needed reliable connectivity with low latency that was mission critical when operating on remotely hosted virtual machines

- Frequent network outages with local providers interfered with shipping, invoicing, and customer communications

Solutions

- 5G Business Internet was professional installed with a Samsung receiver for primary connectivity to the entire building

- Bundled with five Verizon One Talk lines for concurrent voice service

Benefits

- Single 5G connectivity backbone to support the entire business and next generation cloud applications

- Helped resolve impeding network reliability issues and reallocated efforts to fulfilling client needs

- Helped improve user experience for staff with twice the bandwidth for concurrent applications after switching to 5G Business Internet

- 10-year price guarantee for cost predictability

" Since switching to 5G Business Internet, we've had very reliable service where our last provider would go out for hours."

Ari Jay Comet
President, Die-Cut Products Co
