

Stay agile and maintain continuity with reliable internet.

With Verizon Internet Dedicated Services you can combine multiple services to help keep your business up and running flexibly and securely.

Agility and flexibility are fundamental needs to maintain continuity of operations demands quickly. With Internet Dedicated Services, you can meet the growing needs of your critical applications with dedicated bandwidth. This means you can support your organization with reliable connectivity and applications.

Verizon Internet Dedicated Services delivers the reliability, security and flexibility you need to make internet speed, bandwidth and performance changes quickly and in near real time with:

- Dynamic Port
- Distributed Denial of Service (DDoS) Security
- Managed services
- 4G LTE Wireless Backup

Get the speed and bandwidth you need, when you need it

Our Internet Dedicated Services delivers the internet connectivity you can depend on to help you maintain continuity of operations. You don't have to share your connection with others in your area because our solution delivers dedicated, high-speed access and custom bandwidth options directly to your organization.

The Dynamic Port self-service gives you the ability to change bandwidth within minutes via the Verizon Enterprise Center customer portal. This means you can support your organization with reliable communications and applications in near real time. Plus, you can schedule bandwidth changes up to a year in advance to prepare for events with high network demand.

We've got you covered with strong internet security

You get the option of LTE Radio Access Network (RAN) capabilities, quality of service (QoS), priority access and preemption services.

Quickly open new doors and keep them open

Take advantage of the ultrafast, full-duplex connections offered by Internet Dedicated Services that help keep your agency connected. Our single-provider dedicated internet access is supported by an extensive global IP network for all your public IP activity.

When you choose Internet Dedicated Services for your organization, you'll get:

Reliability

- Meet your mission with bandwidth that boosts continuity of operations
- Depend on reliable internet connectivity running on our global IP network
- Choose from self-service options and trusted managed service

Flexibility

- Easily upgrade your network with new technologies that help streamline your business
- Pay only for the bandwidth you need with flexible pricing plans
- Adjust bandwidth on demand as your organization's demands change

Control

- Keep critical data on a dedicated network
- Enjoy access speeds from 1.5 Mbps to 100 Gbps
- Use Verizon Enterprise Center to monitor and control your network

Our Internet Dedicated Services can be combined with equipment purchase options, voice over IP (VoIP), Managed Network Services (MNS), Security Services and other networking solutions.

Why you can rely on Verizon

We offer exceptional service and network performance with our Internet Dedicated Services. And we make it easy on you by providing comprehensive solutions backed by competitive service level agreements (SLAs).

With our broad portfolio of technology solutions, Verizon is the best partner to help you meet your mission goals through your network than ever before. Look to a partner you can trust to ease the complexity associated with dedicated internet implementation and support.
