A wind gust of 58 knots was reported at North Bay.

TIDAL POTOMAC INDIAN HD TO COBB IS MD COUNTY --- BABAR POINT (BAB) [38.31, -77.03]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/06/17 14:45 EST		0	Marine Thunderstorm Wind (MG 38 kt)
	04/06/17 15:00 EST		0	Source: Buoy

Wind gusts of 34 to 38 knots were reported at Baber Point.

TIDAL POTOMAC INDIAN HD TO COBB IS MD COUNTY --- CUCKOLD CREEK (CCK) [38.31, -76.93]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/06/17 15:02 EST		0	Marine Thunderstorm Wind (MG 36 kt)
	04/06/17 15:02 EST		0	Source: Buoy

A wind gust of 36 knots was reported at Cuckold Creek.

TIDAL POTOMAC COBB IS MD TO SMITH PT VA COUNTY --- COBB POINT (COB) [38.24, -76.83]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/06/17 15:18 EST		0	Marine Thunderstorm Wind (MG 41 kt)
	04/06/17 15:18 EST		0	Source: Buoy

A wind gust of 41 knots was reported at Cobb Point.

CHESAPEAKE BAY N BEACH TO DRUM PT MD COUNTY --- GOOSSES REEF BUOY (44062) [38.56, -76.41]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/06/17 15:50 EST		0	Marine Thunderstorm Wind (MG 35 kt)
	04/06/17 15:50 EST		0	Source: Buoy

A wind gust of 35 knots was reported at Gooses Reef.

TIDAL POTOMAC INDIAN HD TO COBB IS MD COUNTY --- QUANTICO (KNYG) [38.51, -77.30]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/06/17 16:42 EST		0	Marine Thunderstorm Wind (MG 34 kt)
	04/06/17 16:42 EST		0	Source: AWOS

A wind gust of 34 knots was reported at Quantico.

Cutoff low pressure was over the Ohio Valley. Another area of low pressure strengthened overhead on the occluded boundary. Warm and moist air from the south lead to an unstable atmosphere. Strong shear profiles were in place due to the cutoff low to the west. Strong lift associated with the developing low combined with strong shear and enough instability to produce severe thunderstorms.

TIDAL POTOMAC INDIAN HD TO COBB IS MD COUNTY --- POTOMAC LIGHT 33 (LT3) [38.34, -76.99]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/21/17 15:53 EST		0	Marine Thunderstorm Wind (MG 35 kt)
	04/21/17 15:53 EST		0	Source: Buoy

A wind gust of 35 knots was reported at Potomac Light.

	04/21/17 19:06 EST	0		Source: Buoy
A wind gust of 43 knots was reported at Piney Point.				
EASTERN BAY COUNTY --- 12.7 SSE STEVENSVILLE (D2030) [38.78, -76.25]				
	04/21/17 19:22 EST	0		Marine Thunderstorm Wind (EG 34 kt)
	04/21/17 19:22 EST	0		Source: Mesonet
A wind gust in excess of 30 knots was reported at Mount Pleasant.				
TIDAL POTOMAC COBB IS MD TO SMITH PT VA COUNTY --- LEWISSETTA MD (LWTV2) [38.00, -76.47]				
	04/21/17 19:30 EST	0		Marine Thunderstorm Wind (EG 34 kt)
	04/21/17 19:30 EST	0		Source: Buoy
A wind gust in excess of 30 knots was reported at Lewissetta.				

A cold front moved through the area. Ahead of the boundary, a southwest flow led to warm and humid conditions. The unstable atmosphere from warm and humid conditions along with stronger winds aloft caused some storms to produce gusty winds.

Storm Data and Unusual Weather Phenomena - April 2017

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA COUNTY --- 1.3 S BOLLING AFB [38.83, -77.02], 0.8 E BOLLING AFB [38.85, -77.01]				
	04/06/17 12:41 EST		0	Tornado (EF0, L: 1.56 mi , W: 25 yd)
	04/06/17 12:43 EST	1	0	Source: NWS Storm Survey

The National Weather Service in Baltimore MD/Washington DC has confirmed an EF-0 tornado initiating in Joint Base Anacostia Bolling and continuing into Anacostia DC on April 6, 2017. On the two mile path, the weak tornado caused several small and midsized trees to be snapped and uprooted on base in a convergent manner. Flags were stripped off their posts in the central roundabout. A large soccer net was thrown from the athletic field. Shingle damage was noted to one of the buildings. As the tornado crossed over Interstate 295 it likely lifted off the ground. Trees were snapped higher up on the trunks on the hill just east of the interstate. An apartment complex was unroofed on Stanton Rd SE. Media reported one person was injured by flying drywall.

DISTRICT OF COLUMBIA COUNTY --- 1.3 NW BOLLING AFB [38.86, -77.04], 1.5 NNE US CAPITOL [38.90, -77.01]				
	04/06/17 12:42 EST		0	Tornado (EF0, L: 2.98 mi , W: 50 yd)
	04/06/17 12:45 EST		0	Source: NWS Storm Survey

The waterspout then moved onshore near the George Mason Memorial at the Tidal Basin at approximately 1:41 PM EDT. Here, multiple large softwood and hardwood trees, including several ornamental cherry trees, had large branches downed and/or were uprooted around the Tidal Basin. While some minor tree damage was evidenced near the George Mason Memorial on the southwest side of the Tidal Basin, the most concentrated damage was in the grove of trees directly adjacent to the parking lot of the Tidal Basin Marina.

The last damage reported to the NWS was to the roof of the St. Aloysius Church at the intersection of North Capitol and I Streets NW at 145 PM EDT.

Cutoff low pressure was over the Ohio Valley. Another area of low pressure strengthened overhead on the occluded boundary. Warm and moist air from the south lead to an unstable atmosphere. Strong shear profiles were in place due to the cutoff low to the west. Strong lift associated with the developing low combined with strong shear and enough instability to produce severe thunderstorms and isolated tornadoes.

DISTRICT OF COLUMBIA COUNTY --- 1.4 N BROOKLAND [38.95, -77.00]				
	04/21/17 15:58 EST		0	Hail (1.00 in)
	04/21/17 15:58 EST		0	Source: Trained Spotter

Quarter sized hail was reported.

DISTRICT OF COLUMBIA COUNTY --- 1.6 N BROOKLAND [38.95, -77.00]				
	04/21/17 15:58 EST		0	Thunderstorm Wind (EG 50 kt)
	04/21/17 15:58 EST		0	Source: Trained Spotter

There was damage to roof shingles of a house at the 300 Block of Hamilton Street Northeast.

DISTRICT OF COLUMBIA COUNTY --- 1.6 N BROOKLAND [38.95, -77.00]				
	04/21/17 16:02 EST		0	Hail (1.00 in)
	04/21/17 16:02 EST		0	Source: Trained Spotter

Quarter sized hail was reported.

DISTRICT OF COLUMBIA COUNTY --- 1.6 SW NATIONAL ARBORETUM [38.90, -76.99]

Storm Data and Unusual Weather Phenomena - April 2017

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/21/17 16:07 EST		0	Hail (1.00 in)
	04/21/17 16:07 EST		0	Source: Trained Spotter

Quarter sized hail was reported.

A cold front moved through the area. Ahead of the boundary, a southwest flow led to warm and humid conditions. The unstable atmosphere from warm and humid conditions along with stronger winds aloft caused some storms to become severe.

MARYLAND, Central

PRINCE GEORGE'S COUNTY --- 0.9 SE OAK CREST [39.07, -76.84], 0.9 SE OAK CREST [39.07, -76.84], 0.8 SE OAK CREST [39.07, -76.84], 0.9 SE OAK CREST [39.07, -76.84]

04/06/17 12:42 EST	5K	Flood (due to Heavy Rain)
04/06/17 15:42 EST	0	Source: Broadcast Media

There was a car stranded in high water on Brock Bridge Road.

BALTIMORE COUNTY --- 0.8 SSW GLENCOE [39.54, -76.64], 0.4 N SPARKS [39.54, -76.65], 1.1 ESE PINEY HILL [39.56, -76.65], 0.9 NW GLENCOE [39.56, -76.64], 0.3 W GLENCOE [39.55, -76.64]

04/06/17 15:39 EST	0	Flood (due to Heavy Rain)
04/06/17 20:02 EST	0	Source: River/Stream Gage

The stream gauge at Glencoe at Gundpowder Falls reached flood stage of 7 feet. The river level peaked at 9.17 feet at 17:30 EST. Sparks Road began to flood as well as portions of Upper Glencoe Road and Lower Glencoe Road.

Cutoff low pressure was over the Ohio Valley. Another area of low pressure strengthened overhead on the occluded boundary. Warm and moist air from the south lead to an unstable atmosphere. Showers and thunderstorms led to heavy rain at times and led to a river gauge reaching flood stage in northeast MD.

	04/06/17 14:06 EST	0		Source: AWOS
A wind gust of 59 mph was reported near Perryman.				
Cutoff low pressure was over the Ohio Valley. Another area of low pressure strengthened overhead on the occluded boundary. Warm and moist air from the south lead to an unstable atmosphere. Strong shear profiles were in place due to the cutoff low to the west. Strong lift associated with the developing low combined with strong shear and enough instability to produce severe thunderstorms.

Storm Data and Unusual Weather Phenomena - April 2017

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

The National Weather Service in Baltimore MD/Washington DC has confirmed a tornado near Unionville in Orange County Virginia on April 6, 2017.

The tornado caused extensive convergent tree damage intermittently along its path, along with some minor structural damage. The first instances of uprooted and snapped trees occurred near the intersection of Everona Road and Deertrail Lane. The tornado continued north-northeast, causing additional tree damage on Signal Hill Lane.

The most extensive impacts occurred along US Route 522 near Ida Mae Lane, where many of the trees in the concentrated path of the tornado were either snapped or uprooted in differing directions. At least two trees fell on structures. Metal roofing and siding were removed from a business on the sides of the building opposing storm motion. Some of this material was lofted and landed in a yard 0.4 miles away. The wall of an outbuilding was displaced several inches off its foundation. Several homes received minor damage to shingles, gutters, and siding. Two residents in this area witnessed the tornado and observed debris being lofted and swirling in the air. The survey concluded that this concentrated tornadic damage was embedded within a larger area of very strong straight-line winds, as numerous trees were downed in unidirectional fashion along a 0.7 mile stretch of US 522.

The next observable damage occurred on Pine Stake Road near Clover Hill Farm Lane. Trees were downed in a convergent pattern along a narrow path, and a wooden fence sustained damage. The tornado lifted after this point, as no further damage was observed to the north-northeast.

The National Weather Service would like to thank the Orange County Emergency Management Agency and the residents interviewed for their assistance in this survey.

ORANGE COUNTY --- 0.5 ENE THORNHILL [38.15, -77.97]

<p>The National Weather Service in Baltimore MD/Washington DC has confirmed a tornado southwest of Warrenton in Fauquier County Virginia on April 6, 2017.</p> <p>An extensive area of tree damage was noted along a several mile long path in west-central Fauquier County. Embedded within this straight-line wind damage was a small concentrated area of convergent tree damage consistent with an EF-0 tornado.</p> <p>A row of trees just north of Harts Mill Road was blown down towards the west-northwest, while several other trees just south of the road were snapped and fell towards the northeast. A similar pattern of tree damage was found at a residence on Woodbourne Lane a quarter mile to the northeast, where several dozen hardwood trees were uprooted, mainly falling towards the east but a couple fell towards the west.</p> <p>Further southwest and to the northeast of the tornadic damage, hardwood and softwood trees were snapped and uprooted but all falling to the northeast over a nearly mile-wide swath, indicating straight-line wind damage. It is notable that the straight-line wind damage was more severe than that caused by the brief tornado.</p> <p>The National Weather Service would like to thank the Fauquier County Emergency Management Agency and the residents interviewed for their assistance in this survey.</p>

The National Weather Service in Baltimore MD/Washington DC has confirmed a tornado near Airlie in Fauquier County Virginia on April 6, 2017.

The tornado caused a nearly continuous path of convergent tree damage. Large to mid sized trees were snapped and uprooted. The most intense of which was the result of estimated wind speeds of 85 mph that snapped several large trees on Airlie Road between Artillery Road and The Rainforest Trust. The first trees downed were noted just west of US 17. After crossing Airlie Road, the tornado snapped and uprooted trees all along Blantyre Road. Continuous damage stopped just prior to Interstate 66.

The National Weather Service would like to thank the Fauquier County Emergency Management Agency and the residents interviewed for their assistance in this survey.

FAUQUIER COUNTY --- NEW BALTIMORE [38.77, -77.72], 0.7 N NEW BALTIMORE [38.78, -77.72]				
	04/06/17 12:08 EST		0	Tornado (EF0, L: 0.86 mi , W: 75 yd)

The National Weather Service in Baltimore MD/Washington DC has confirmed a tornado near New Baltimore in Fauquier County Virginia on April 6, 2017.

The tornado caused a continuous path of extensive tree damage, along with some minor structural damage. The first instances of uprooted and snapped trees occurred just northwest of the intersection of Lee Highway and Electric Avenue. The tornado continued north-northeast, generally along Beverlys Mill Road, causing additional damage to just north of Fairview Lane.

Extensive tree damage was found along the tornados path, where many hardwood and softwood trees were either snapped, topped or uprooted in a convergent pattern. Several trees fell on vehicles. Wooded fences were blown down in several locations along its path. A roof was partially removed from a barn. Other metal roofing was removed from smaller outbuildings. Several sheds were either destroyed or severely damaged. Most homes in the path had minor damage to shingles, gutters and siding.

Two residents in the area witnessed the tornado with debris being lofted.

The National Weather Service would like to thank Fauquier County Emergency Management Agency and the residents interviewed for their assistance in this survey.

FAIRFAX COUNTY --- 0.9 SW HERNDON HGTS [38.97, -77.41], 1.0 NNE HERNDON HGTS [38.99, -77.39]				
	04/06/17 12:34 EST		0	Tornado (EF0, L: 1.91 mi , W: 25 yd)
	04/06/17 12:37 EST		0	Source: NWS Storm Survey
A path of sporadic damage, mainly to trees, began just east of Rock Hill Road in between the Dulles Greene and Capstone apartment complexes in Herndon. About a half dozen trees here were either snapped or uprooted in a convergent pattern. One of the trees was thrown into the window of a nearby apartment building.				
The National Weather Service would like to thank Fairfax and Loudoun County Emergency Management Agency and the residents interviewed for their assistance in this survey.				
The tornado continued north-northeast, where additional tree damage was noted near the intersections of Summerfield Drive and Autumn Breeze Court, and Sterling Road (VA-606) and Herndon Parkway. Several trees were downed from east to west, and fencing was blown down north to south.				
It appears the tornado lifted briefly as it continued north-northeast, before touching down again near the intersection of Crestview Drive and Builders Road. Here, nearly a dozen trees were snapped or uprooted, mainly to the north, with fencing blown down towards the trees (to the west).				
FAIRFAX COUNTY --- 1.1 S HERNDON [38.95, -77.38]				
	04/06/17 12:35 EST		0	Thunderstorm Wind (EG 52 kt)

Several tree and power poles were snapped.

ARLINGTON COUNTY --- 1.8 SW SOUTH WASHINGTON [38.85, -77.07], 0.8 SE SOUTH WASHINGTON [38.86, -77.04]

04/06/17 12:39 EST	0	Tornado (EF0, L: 1.93 mi , W: 50 yd)
04/06/17 12:42 EST	0	Source: NWS Storm Survey

Trees were snapped along Interstate 395 adjacent to Army-Navy Country Club at approximately 1:39 PM EDT. Video of a portion of the Pentagon Parking Lot showed a vortex cross between two light poles, ripping off one lamp from the top of the poles. Additional video from the Pentagon showed two rope-like funnel clouds form at the same time, although it could not be determined from the video whether these funnels touched the ground or were attached to the cloud base. Video from the National Park Service National Mall and Memorial Parks showed a waterspout over the Potomac River west of the Tidal Basin; however, it is not clear the vertical extent of this waterspout and whether it was sourced from the cloud base, or an independent vortex associated with the gust front.

Cutoff low pressure was over the Ohio Valley. Another area of low pressure strengthened overhead on the occluded boundary. Warm and moist air from the south lead to an unstable atmosphere. Strong shear profiles were in place due to the cutoff low to the west. Strong lift associated with the developing low combined with strong shear and enough instability to produce severe thunderstorms and isolated tornadoes.

ROCKINGHAM COUNTY --- 1.3 ENE MECHANICSVILLE [38.68, -78.76]

04/20/17 15:55 EST	0	Hail (1.00 in)
04/20/17 15:55 EST	0	Source: Broadcast Media

Quarter sized hail was reported.

High pressure was centered to the south and this allowed warm and moist air to move into the area. An isolated thunderstorm became severe due to the unstable atmosphere.
