The USGS stream gage on the Potomac River at Edwards Ferry went just above the 15 foot flood stage on April 18th. Areas near Whites Ferry were flooded and ferry service was suspended.

Low pressure and its associated cold front passed through during the early morning hours of April 16th. Heavy rain of 1 to 3 inches fell in portions of the state, causing flooding mainly in Montgomery and Harford Counties. Upstream water from this same event then moved downstream, causing flooding along the Potomac River on the 18th.

The USGS stream gauge on the Potomac River at Shepherdstown exceeded the 15 foot flood stage, flooding River Road in parts of Jefferson County. The river crested at 15.30 feet at 1215 AM EDT on April 18th.

Low pressure and its associated cold front passed through during the early morning hours of April 16th. Heavy rain of 2 to 4 inches fell in portions of the state, causing flooding mainly in Grant, Pendleton, and Hardy Counties. This water then moved downstream, causing flooding of larger rivers on the 17th and 18th.
