Exporting Marked Records to Reference Management Applications

1. Mark Your Records

After running your search, use the check-boxes to the left of individual records, or the **Mark** selections at the top of each page of records to indicate which records you'd like to export:

More detailed information on searching TRID and explanation of fields is available at trid.trb.org/help.aspx and https://www.trb.org/InformationServices/ResourcesfortheTRISDatabases.aspx.

2. Save Marked Records

Click **Save** in the **Marked Records** functionality below the search bar
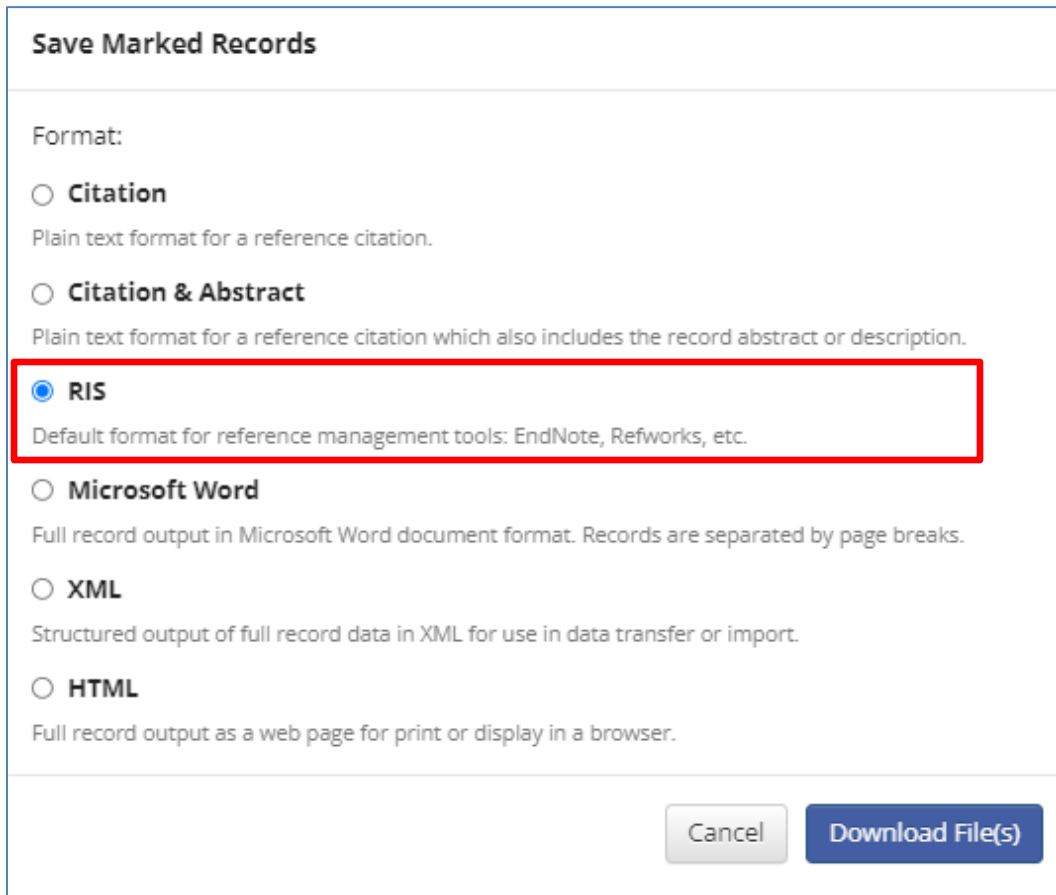

NATIONAL

Medicine

TRB TRANSPORTATION RESEARCH BOARD

3. RIS – Default Format for Reference Management Tools

Regardless of which reference management tool you are using, whether it is installed on your desktop or web-based, this is the option you want to choose when you see the dialog below:

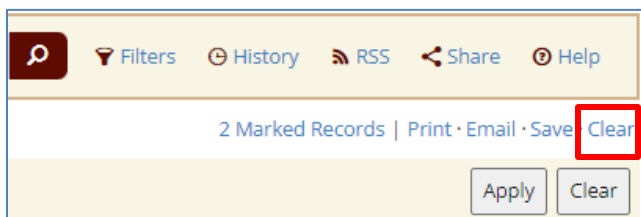

Click the **Download** button to initiate.

If you have associated **RIS** files with your desktop reference management tool in your computer's operating system, you may be able to import the references directly to your open library/collection/database. If necessary, you should be able to manually import the downloaded RIS file.

4. Clear Your Marked Records before Your Next Export

Records that you have marked are retained in the **Marked Records** feature until you clear them out. Click **Clear** when you are ready to perform a fresh export.
