Hints:

1. To see the altitude as high-over-ground in Google Earth select Menu Edit->Properties click on the last pane (Altitude) and select „relative to ground"

2. To see the values from your track as altitude profile select Menu Edit->Show altitude profile.
   Here you can click on the particular values from your device like:

   - Altitude (over ground)
   - Climb-rate
   - Gps-Accuracy
   - My Speed

   and review your journey.
