1969

BUDGET MESSAGE

Mr. Speaker, Mr. President, Members of the 66th Session of the Minnesota Legislature,

As required by Minnesota Statutes, I present to you today the budget recommendations for the 1969-70 biennium. I have the burden to recommend and you have the burden to decide the course we take for the next two years. Despite our increased economic sophistication, systematized planning, and flashing computers, we still must rely on our best judgment in trying to predict the future.

Every family knows how difficult it is to plan its own budget a month in advance. We are asked to plan what a state with three and one-half million people is going to spend and what it is going to receive for a 24-month period.

Budgeting two years in advance has its problems. No one can argue that in June, 1967, the Legislature should have known that in January, 1969 we would have such a snow cover that the Conservation Department would need another \$100,000 to keep the wild deer and pheasants alive.

As I made my budget decisions, two facts were always on my mind.

First, the needs of our people. This budget is designed for:

Guaranteeing quality education to the student,

Protecting the life and property of our people,

Improving safety and health services,

Enhancing our environment,

Helping our senior citizens,

Securing human rights, and

Increasing job opportunities and economic growth.

In short, this budget is aimed at improving the total quality of life for all Minnesotans.

A second, ever-present thought was the keen awareness of the heavy burden of taxation our people bear. Therefore, I did not honor \$80 Million of the requests that came to me. Historically, Minnesotans have willingly invested in their state a greater proportion of their income than do the citizens of most other states. Such courage and dedication has made our quality of life second to only one other state in the nation.

Yet, we must not presume that we can continually impose a greater and greater tax burden on our people, without accelerating the out-migration of some of our most talented people.

The facts of life are that inflation plus an expanding population which lives longer and demands more, particularly in the area of education and welfare, necessitates increased state expenditures. I feel we are rapidly approaching the point where the states are making the maximum effort to be expected.

In Minnesota we now tax income, property and sales.

The sales tax is used to give property tax relief to homeowners and aid to local government and school districts. It is not a source of revenue for state needs.

The real estate tax is exclusively for the use of local government. Too few people realize that the state has gotten out of the real estate tax field. Therefore, increases in real estate taxes are for rising demands of local government and give no revenue to the state for its purposes.

That leaves the principal source of the state's revenue coming from

our income tax where the rates are high compared to most other states.

Between 1950-66, average state government spending in the United States went up 247%. In the last two years, the burden on the states has become even heavier. California accepted a billion-dollar tax increase. New York is facing a tax increase of \$340 Million along with a 5% cutback on expenditures. Reports indicate that Illinois must raise \$750 Million and Connecticut, \$420 Million in order to balance their budgets.

Every day I sit in the Governor's chair, I become more firmly convinced that the states cannot escape a fiscal crisis unless they get some form of federal-state tax sharing. Now that the federal government is predicting a three to four billion-dollar surplus, such a plan need not wait until after the close of the Viet Nam war. I know of no better way of using that surplus than returning it to the states whence it came and thereby relieve what almost every state faces . . . the need of additional revenue.

According to the 1966 figures, Washington collected 64¢ out of every tax dollar and the states got 19¢ and the local government 17¢. The tax most responsive to economic growth, the personal income tax, is securely in the grasp of the federal government. It collects 93% of all personal income taxes paid in this country. The federal government has long pretended it must act because the states will not. But often the states cannot . . . strangled by the federal government's grip on the jugular vein of revenue flow.

Furthermore, our state and most others return the majority of what they collect to local government. Minnesota returns over 60% of its

revenue directly to local government.

Even so, I am fully cognizant that there are extreme pressures on local government for additional revenue. If local governments want to use other sources of revenue instead of being solely limited to the property tax, they should have that option. Therefore, I urge that enabling legislation be adopted to permit local government greater flexibility.

If the federal government would follow to only a small degree the principal of sharing with state government in the same way that state government shares with local government, the states could meet most of the demands placed upon them without onerous tax increases on their citizens. Without a better distribution of resources, the unique American experiment to disperse government power and initiative is doomed.

The states must be revitalized. They must be innovators, planners, coordinators, and protectors. My budget envisions an active role for state government. I do not want Minnesota to miss its chance for a piece of the action even though I recognize we could take a bigger bite if we had federal-state tax sharing.

In presenting my budget, some will say I should have recommended more; others will say, less.

It is most difficult to strike the proper balance between expenditure and taxation . . . and perhaps the proper balance does not even exist . . . who is to determine what is proper? Time does not permit an elaborate discussion of the more than 100 beneficiaries of state appropriations. I shall not dwell on the on-going necessary departmental responsibilities. Rather, I shall underscore the highlights of new and special concerns.

Here, then, is my budget recommendation . . . a judgment on what is necessary for Phase II of the Decade of Decision.

COMBATTING CRIME

As we are well aware, "There is much crime in America, more than is ever reported, more than is ever solved, far too much for the health of this nation."¹ We must act . . . not in the hope of instant victory but in the patient commitment for a long struggle. Out of such a commitment I recommend:

\$500,000 for the Governor's Crime Commission to fulfill the state's share and enable the state and local government to take advantage of the federal action and planning grants to improve crime prevention, law enforcement, the administration of justice and corrections.

Funding for an enlarged police training program,

Provision for 80 additional highway patrolmen to curb one of the greatest crimes, the fact that one out of four cars will have blood on it,

A 149% increase for the Bureau of Criminal Apprehension, one-tenth of the increase to be picked up by federal funds. This appropriation enables major changes within the department. It foresees:

A division to fight organized crime,

A new narcotic unit to crack down on the illegal traffic in drugs,

Twelve new field investigators to strengthen state aid to local sheriffs and police departments,

A computerized crime information system (MINCIS) which is a communications chain with our 87 counties and ties into the Federal Crime Information Center. (This project is already underway.)

(1) President's Crime Commission Report

But apprehending the criminal without rehabilitating him is a hollow victory.

Consequently, to improve our correctional program, I suggest a 35% or \$9 Million increase in the budget for the Corrections Department. Much of this increase will be channeled into more intensive treatment for juvenile offenders.

For the first time in Minnesota corrections history, I want to begin a program of specialized case loads. Therefore, I recommend 29 new parole agents, a portion of which will specialize in parolees who are narcotic and alcohol addicts, and sex offenders.

I ask for an increase in the work release program since our experience so far indicates that it has been successful and that an expansion in the program would be a good investment.

I have spelled out improvements for each of the correctional institutions as well. Despite the significant decline in Stillwater's population, I am recommending a 15% increase for this institution, including new rehabilitative, educational and medical support.

This aggressive, broadly-based program should give this state the tools to fulfill its first responsibility . . . to protect the lives and property of its people.

ENHANCING ENVIRONMENT

The second major concern of this budget is to give us the tools to enhance our environment. This is an emergency issue. Man's mastery of the earth will pay him the greatest tribute when he learns to leave some of it alone and keep all of it clean.

Three weeks ago, I outlined a Crystal Waters program. This budget provides for a twenty million dollar bonding program to accelerate the construction of sewage treatment plants. Presently building is stymied because the federal government is 4-F . . a federal failure to furnish funds.

It also gives substantial increases for lake rehabilitation projects and creates a position of natural resource conservation education coordinator in the Department of Education.

It expands the service of the Minnesota Pollution Control Agency in abating air and water pollution and disposing of solid waste, by giving it a 54% increase.

In addition, \$33 Million is recommended for the Conservation Department in order to move ahead its total program, with \$400,000.00 earmarked for the development of snowmobile and multiple use trails.

Provision in the budget is made for a ten million dollar bonding program for the acquisition of parks and open space. If we wait longer, the areas desired will not be available and future generations will be deprived of recreational opportunities.

Let us sincerely pursue this program for environmental improvement. Let our children honor our wisdom rather than curse our neglect.

IMPROVING SAFETY AND HEALTH SERVICES

No doubt a few days ago many of you read the story about a small town celebration. A picture next to the story showed a man seated in a crowd, head down, hand over his eyes, a carnation pinned on his lapel. He, the guest of honor, was obviously moved by the town's tribute. Four Hundred and Fifty people gathered in the Belgrade High School Auditorium to present skits, a

four-day vacation to Las Vegas, and their appreciation to the town's only doctor. The message was clear, Belgrade did not want to lose its family physician.

Other communities have not been so fortunate nor had such foresight. Long ago they watched their doctors leave.

One of the urgent needs of our people is to provide more doctors, dentists and paramedical personnel. Recognizing this fact, I recommended and you appropriated funds for a planning study on the proposed Health-Science Center at the University. The study has concluded that the Center should be built in three stages, the first stage costing \$25 Million, \$13 Million in federal funds, \$12 Million in state money.

The Center would give impetus to the special department for training general practitioners in addition to dental, basic science, pharmaceutical and paramedical education. Therefore, I recommend . . . conditioned on the fact that the federal government shall not be 4-F again and will allocate its share of the costs, that you proceed with the authorization for the state's share.

This recommendation should not be construed as a substitute for a second medical school in Minnesota. Several groups are studying the feasibility of a second medical school. And should such a school materialize, it is, nevertheless, a prerequisite that the Health-Science Center at the University proceed with all dispatch.

Health needs have long been a priority concern of this administration.

We formed the state's first action program totally devoted to alcoholism in the Commission on Alcoholism. This biennium I recommend an increase of nearly 85% for the Commission to enable it to expand its service and to

include a drug education unit so desperately needed. This state led the nation in one of the first comprehensive health planning studies. We initiated a new program of multi-purpose institutions to give patients the best in medical attention. We accelerated the community care concept, with an increase of 125% in the number of mentally retarded served by day care centers in the last biennium.

No accomplishment gives me greater satisfaction than to see that in the Quality of Life Study, Minnesota ranked first in the nation in providing health and welfare services.

One of my strong concerns in the health field is mental illness.

Mental illness has faced three revolutions. The first one unshackled the insane.

The second revolution introduced new medical therapy on a one-to-one basis.

The third revolution is just beginning to break . . . it is the community care concept. I would like to see the day when old, huge dormitory institutions could stand empty, relics of a former day. We must provide places in the community where the mentally distressed person can go in time of deep need. Therefore, I am recommending a 30% increase for mental health clinics.

At the same time, I insist we must provide the best care possible for those in our institutions. The population at our state institutions for both mentally ill and mentally retarded is steadily declining. The population in state hospitals for the mentally ill was estimated at 5,240 in fiscal 1969 and 4,325 for fiscal 1970. However, I have maintained the staff complement

which will further improve the staff-patient ratio, bringing it to 1 to 1.37 in fiscal 1971 for the mentally ill. I also have made provisions for increase in the quality and variety of food, for special equipment for personal funds for indigent patients and salaries for working patients.

In regard to care for the mentally retarded, I am convinced that their treatment is vastly improved if it is closer to home and the community. Therefore, to encourage the local care for the retarded, I propose the state pay one half the county's cost in caring for the retarded if he is in a private facility. This proposal bears an estimated cost of \$1.9 Million for the biennium.

I recommend doubling the appropriation for daytime activity centers for the retarded. The community care revolution for the mentally ill and retarded is long overdue. We cannot tolerate further delay.

Another important health problem is nursing home care. State costs for such care are expected to increase \$13 Million in this next biennium. I want to help the residents of nursing homes in two ways: one, to provide excellent care for them; two, to protect them from unnecessary expenses and charges.

Therefore, we have had an outside consulting firm study what nursing home costs should be. I hope that their work will be helpful in setting up guidelines for these costs in the future. It will give all those interested in nursing home care an idea of the kind of charges they should be paying.

This budget also includes an increase of \$8 Million in aid to dependent children, an increase of \$2.8 Million for old age assistance and an increase of \$2.2 Million in aid to the disabled.

As these figures indicate, the rise in the welfare budget is substantial . . \$49 Million for the biennium. Some of the increases are mandated by our participation in federal programs. Others arise because of our state's commitment to provide proper and modern health care for all Minnesotans.

PROMOTING HUMAN RIGHTS

"The problem of justice for the Negro has gnawed on the national conscience ever since this nation was founded. It is, in an important sense, the American problem. If any problem is especially and peculiarly ours, with roots in our history and scars in our memory, this is it.

"No other modern problem touches more profoundly the values we profess to cherish. And history has handed our generation the task of solving it."¹

It will not be solved by the violence or the hatred of either black or white. It will be resolved by the steady, determined efforts of the vast majority of all Americans.

In the quality of life study, Minnesota ranked first in the nation in providing individual equality. We must continue to set the pace. Therefore, to enable us to expand our programs and carry out the work of the Women's Division, I am recommending the budget for the Department of Human Rights be doubled.

INCREASING JOB OPPORTUNITIES AND SAFETY

In a time of economic well-being, it may seem strange to place special importance on developing job opportunities. Yet it is somewhat of a paradox that while the hours of work are declining, the significance of working is increasing.

(1) John W. Gardner

Traditionally we have equated a job with income . . . that's all. Suddenly we are beginning to appreciate it can also mean an identity.

Economic growth generating job opportunities is an important goal for this administration.

Therefore, I recommend investing a 62% increase or an additional \$1.5 Million in the Department of Economic Development with special emphasis on the Rural Renaissance program, which means substantial increases for state matching funds to regional tourist associations and industrial development organizations.

I am recommending a 66% increase for the Governor's Commission on Employment of Handicapped Persons since the Commission has expanded to become an agency referral center for handicapped persons throughout the state.

Equally as important as job opportunity is job safety . . . a goal which has been for too long a mere afterthought for this state.

Our safety investigators, hampered by meager travel allowances, have sometimes had to hitchhike rides to the site of an accident. Labor unions have had to purchase safety manuals for the department so the department could train its own inspectors. Inferior equipment has forced some department personnel to buy their own typewriters, chairs and lamps.

I recommend increased appropriations for 18 new inspectors in five divisions, for additional personnel and new quarters in Minneapolis for workmen's compensation hearings, making a 45% increase in the budget of the Department of Labor and Industry.

HELPING SENIOR CITIZENS

As I have said on many occasions, I have a deep concern for the

financial plight of our senior citizens. It was one of the eleven high priority items in my speech to you three weeks ago. I applaud the House and Senate for the quick action on introducing and hearing bills to more than triple the tax relief to those of our senior citizens who are on fixed incomes. I have included funds for this purpose in the budget.

GUARANTEEING QUALITY EDUCATION

One of the first concerns of our people and the largest claim on the state's budget is education. It was in making education not only common to all but compulsory for all that the destiny of this nation was cast. Minnesotans have helped to fashion that destiny with one of the most open and diverse educational systems in the country, producing the lowest drop-out rate in the nation. We intend to continue to be in the forefront because this year I am recommending \$826 Million for education. And this does not include, mind you, what is spent for education in the Department of Welfare and the Department of Corrections. This means the total expenditures for education more than equal the entire state budget for all purposes just four years ago.

Enrollments in our public school systems have been increasing at every level, but the rate of increase among levels of education is most uneven. Based on enrollment projections of the Higher Education Coordinating Commission, we anticipate enrollments in our junior colleges will increase in the next biennium 40% . . . 40% in two years.

Our state colleges face an increase of over 13%.

At the same time enrollments appear to be leveling off at the University of Minnesota, which anticipates a 10% increase.

The State Department of Education estimates there will be only a very slight increase in pupil units in elementary and secondary schools. Less than 1% spread over 1011 school districts.

Enrollment estimates are a major factor that must be kept in mind for making appropriations.

The more students you have, the more faculty you need but that does not necessarily require a reduction in the teacher-student ratio. In all educational requests increased salaries and reduced pupil-teacher ratios, as well as more clerical and student assistance to the faculty are sought. Since no one has yet produced a reliable comprehensive study that the quality of education to the student is impaired by a 1, 2, or 3 point difference in the ratio, and since money is not available to do all three at the same time, I have placed the emphasis on adequate teacher salaries. With good pay, a continuation of the present ratio should not be too objectionable.

JUNIOR COLLEGES

Our state operated junior college system received its first appropriation from the 1965 Legislature. In the four years since that time we have developed a junior college system of which we can all be justly proud.

In the last four years enrollment in our junior colleges has increased 91% and it is estimated it will increase another 40% in the next two years.

To meet this tremendous pressure on our junior colleges, I am recommending an appropriation of \$27.5 Million or an increase of \$12.7

Million which is 85% above the present level. This appropriation enables a generous salary increase made mandatory because of the financial drawing power of high school salaries. It also includes \$1.2 Million for catch-up equipment over the normal equipment appropriation.

Provision has also been made for planning money for the first phase of junior colleges to be constructed.

STATE COLLEGES

As you members of the Legislature well know, the pressure for educational expenditure is enormous. We must find new ways to use our facilities to save our taxpayers' dollars. One such excellent innovation is the State College Common Market Plan, proposed by Chancellor Mitau for greater use of talent and a reduction in cost. We need more such ideas.

Yet we cannot ignore harsh realities. In order to meet enrollment increases, retain and recruit faculty and provide equipment and library books, I recommend for the biennium an increase of 56% for the state college system.

Two years ago when we compared Minnesota's state college salaries with 43 comparable colleges, our schools ranked between 21st and 26th.

Today, all six state colleges rank above 14th and four of them are in the top ten. A remarkable achievement . . . which will again be improved.

In addition, \$2,240,000 for library books and equipment as a special addition to the regularly budgeted items should substantially improve the quality of education in our state colleges.

UNIVERSITY OF MINNESOTA

Minnesotans traditionally are proud of their university, a pride built on service. I am not about to cash in my faith in a century of

accomplishment because of a 24-hour incident. I believe students should be permitted to protest and to gripe to the university faculty or administration but in doing so, I do not condone the use of force, violence or duress. Yet, we cannot impair the education of 46,000 students because of the acts of 70.

I am recommending an increase of nearly \$42 Million for the university. In addition, I have already concurred with the Legislative Building Commission's recommendations of \$33.2 Million for new buildings and equipment at the University of Minnesota over and above the Health-Science Center.

Students at some of the libraries of this great university should not have to reserve a spot on the floor in order to study.

You will be interested to know that because of funds given to the university, the average salaries for our professors and associate professors now considerably exceed the average of the state-supported big ten universities, while the salaries at the assistant professor and instructor level at the University of Minnesota are below the average. Therefore, I recommend a general faculty salary increase of 7½% the first year and 7% in the second year. Because the Legislature cannot designate the categories to be increased, it is my opinion that this increase will generate enough funds for the university to raise salaries at the assistant professor and instructor rank sufficiently to bring them up to the average of these other schools.

In addition to salary increases, I am recommending:

Increased support positions for the faculty,

Expanded funds for student help,

Provisions for modern equipment and supplies,

A 70% increase in appropriation for research programs, bringing

the total supported by the state to \$16 Million, which is in addition to the more than \$30 Million of research funds furnished by the federal government.

A 71% increase for Crookston Technical Institute.

I suggest this Session initiate action to transform the Waseca School of Agriculture from a high school level program to a two-year collegiate technical school.

To bring focus to this mass of figures, let me point out that, not even considering building appropriations, in my four years as Governor I will have recommended a 73% increase in the university budget while enrollment in the same period will have expanded only 11%. Four years ago the appropriations were \$98 Million, today I am recommending \$170 Million.

STATE SCHOLARSHIPS

In order that no qualified person shall be deprived of an education because of financial hardship, I recommend a ten-fold increase or \$2.75 Million be appropriated for the State Scholarship Program for the needy, qualified high school graduates. Because of insufficient funds this biennium, only 1% of the graduates eligible were able to get state scholarships.

The enlargement of the State Scholarship Program to the student will enable him to exercise a choice of attending either a private or public institution.

I also recommend a doubling of the special scholarships for Indians.

AREA VOCATIONAL TECHNICAL SCHOOLS

My budget includes a 67% increase in state aid to area vocational technical schools, bringing the state contribution to \$30 Million for the next biennium. Minnesota's educational philosophy has been, we shall teach

for the sake of the child not educate for the sake of education. Little wonder, then, we have developed an exceptional vocational technical system.

ELEMENTARY-SECONDARY EDUCATION

When I took office two years ago, the percentage the state contributed to the maintenance costs of our elementary-secondary schools was at the lowest point since 1953.

In my campaign and in my first budget, I pledged to move the state towards contributing 50%. During this past biennium, through your generous support, the rate raised to 47½%, the highest it has ever been in our history.

Now to further relieve the local school tax burden on homeowners, I recommend increasing that percentage to 48% on the old basis of computation. This means an increase in the A formula to \$363 in 1970 and to \$378 in 1971 and in the B formula to \$131 and \$135.00. But this old yardstick no longer gives the true picture since the additional aid in the property tax relief law was enacted. We are now over the 50% mark.

The Department of Education advises that the total expenditure this next biennium for maintenance costs for elementary and secondary schools will be \$1,150,000,000.00. I recommend that the state should contribute over \$587 Million of this amount. No matter how you cut it, this is a contribution of over 51% by the state towards these local elementary and secondary school costs.

OVERBURDENED SCHOOLS

Whether urban, suburban or rural, abnormally large enrollments of children from low income, welfare and minority families cause special educational problems that increase costs to a school district. Excessive

enrollments in programs for the handicapped and for the vocationally oriented also increase educational costs that should be helped with special aids.

I urge the Legislature to initiate a responsive new program of special aids to school districts suffering severe financial strain from causes for which now no special aid is available, and I recommend \$6.5 Million be allocated this biennium for such schools from the future increases in the aids available to school districts from the property tax relief funds.

Incidentally, I appreciate having the benefit of the report of the Elementary and Secondary Education Legislative Commission of January 15, 1969 which I have considered in these recommendations.

MINNESOTA STATE ARTS COUNCIL

To disperse cultural opportunity statewide, and to develop the Rural Renaissance Program, I recommend doubling the appropriation to the Minnesota State Arts Council.

CONCLUSION

I have given you too much detail, but I am sure you are interested in the summation.

I take a pardonable pride, which I think you should share with me, in announcing we will wind up the biennium with balances in the three major funds totaling \$115 Million. The cupboard is not bare as we start the next biennium.

The revenue estimates of receipts in these funds are as follows:

In the income tax school fund \$1,058,460,000

In the general revenue fund \$308,343,000

In the property tax relief fund (with state corporate surtax to be continued at the present rate) \$432,800,000.00.

This makes a grand total of opening balances, plus receipts from these three sources of \$1,914,807,000.00.

The estimates of anticipated income for the biennium have assumed a slowing down of inflation and no reenactment of the federal surtax which is scheduled to expire June 30th. The reason for this latter assumption is that it is impossible at this time to predict what Congress will do. If Congress should act before this Session adjourns, I shall make such recommendations as are deemed necessary.

The total recommended appropriations are \$1,952,261,000.00, of which \$584,179,802.00, nearly 30%, is for the property tax relief fund. Included in this fund is allowance for financing the Legislative Building Commission's recommendation to this Session which I have endorsed.

Between the total appropriations and the total receipts, there is a difference of \$37,354,000 Million. To finance this difference, I recommend increasing the cigarette tax by 3¢ per package to produce \$24 Million, increasing the tax on liquor and wines by 15¢ a fifth, to produce \$14.8 Million, and increasing a broad scale of licenses and fees paid to the state which have not been adjusted for from ten to fifty years to produce \$3.5 Million, for a total of \$42.3 Million.

This will leave a balance of \$4,946,000 which I feel is desirable as a protective cushion and also because it is impossible in this early stage of the Legislative Session to predict what additional programs might be enacted for which I have not provided specific funds.

I am fully aware that my proposal for increasing the cigarette and liquor taxes means these items will be heavily taxed in Minnesota. Yet,

several states tax these items even heavier than I propose and many will be increasing their rates on these items this year. The fact is that they are not necessary or indispensable items, although they may seem to be. I can speak from my own experience. I personally have been a heavy smoker for 35 years. I made a New Year's resolution to quit for the duration of the Legislative Session. If you can complete your business in less than 120 days, I will be very appreciative.

But seriously, Minnesotans spend in excess of \$270 Million during the biennium for cigarettes and \$250 Million during the biennium for liquor. Can we honestly say that we are creating any real hardship if we channel some of this expenditure into education, crime control, a Crystal Waters Program, assuring a safe place to work, caring for the elderly and handicapped, and promoting better human understanding?

What then does this budget do for Minnesotans?

It gives us tools to combat crime, enhance our environment, provide health services, increase job opportunities and safety, promote human rights, help our senior citizens, guarantee quality education and relieve overburdened schools.

And most importantly, we can do all this leaving the property tax exclusively to the local government and without expanding the sales tax and without raising the already high income tax.

As I said many minutes ago, these recommendations for Phase II of the Decade of Decision represent my best judgment. I look forward to your analysis. We must work together, for the great task of our generation is to fashion a society that can fill the senses with beauty, open the mind to truth, and lift the spirit toward justice.

**FUND STATEMENTS,
GRANTS-IN-AID SUMMARY,
AND CHARTS**

THE BUDGET DOCUMENTS

The 1969-71 Biennial Budget is presented in three parts: the "Budget Message and Summary", the "Detailed Estimates" and the Capital Outlay Budget.

The large document containing the detailed estimates is intended as a work book primarily for the use of the Senate Finance and House Appropriations Committees. It includes the Governor's budget recommendations for each account requiring a "direct appropriation." A direct appropriation is defined as one made for a definite amount and period of time. An "open appropriation", on the other hand, continues in force until repealed and usually does not state a definite amount. Open appropriations include such items as property tax relief fund distributions, income tax refunds, school census aid and aid to fire departments. Since they do not require legislative action, detailed estimates are not included in the budget document, but the total expenditures of open appropriations are included in the Fund Statements.

The "Budget Message" contains a statement for each fund or group of funds. The total of receipts and expenditures from all funds is presented in the "Summary of Fund Statements."

The charts and tables included in the "Budget Message" present the highlights of the budget. They provide a comparison of the 1969 recommendations and the 1967 appropriations on the more significant items.

The Consolidated Statement on page 33 shows the combined expenditures from the General Revenue and Income Tax funds by major function. From this information the charts on pages 34 and 35 were developed. It is interesting to note on the General Revenue Fund chart that the amount appropriated for educational purposes has increased from 41.4% of the total in 1967 to 44.4% in 1969.

The comparisons of Grants-in-Aid shown on pages 36, 37 and 38 indicate that aid from direct appropriations increased from \$537,282,520 in 1967-69 to \$622,963,857 in 1969-71. The total grants-in-aid increased from \$1,028,884,714 in 1967-69 to \$1,198,416,523 in 1969-71.

Generally the Legislative and Executive branches of government are most concerned with the direct appropriations. The chart on page 39 compares the relative size of open and direct appropriations and clearly demonstrates that open appropriations which are not subject to periodic legislative review and analysis, comprise 36.8% of the total expenditures as compared to 63.2% for direct appropriations.

The chart on page 40 shows the relative size of the General Revenue Fund and the dedicated funds for the 1967-69 and 1969-71 bienniums. In both periods the Income Tax School Fund is the largest source of state funds.

SUMMARY OF ACTUAL DEBT ACTIVITY 1966-68
