

Let America Be What America Was Intended To Be

By Ethan Cramer

Let America be what America was intended to be

Where you don't judge a person by how they look but by how they act

Let America be as free as the bird that represents it

The brave Eagle that makes America its home

The land where people don't hide what makes them unique

Let America be the land of the free and not suffocated

By medical bills and college debt

Where everyone has an equal opportunity to be successful in life

Where life is not built on success but on the joy of a little kid waking up on

Christmas morning to open gifts and drink hot chocolate

Let America be the place where no matter how much wealth or power

Each person will be tried fairly and face the consequences

Where no one can simply pay their way to freedom

Let America be what it was intended to be where the people who live within it are

as free as the soaring eagle that represents it
