

Centre for Health Informatics Pakistan

Our mission is to Promote Health Informatics Excellence in Pakistan.

We are Pakistani health informaticians working around the world and have established this centre for the purpose of promoting best practices for implementing e-Health.

We work directly with our clients through resident staff in 11 countries and specialize in Healthcare, Emergency Services Command & Control Systems, Enterprise Mobile Apps and Geo Spatial Systems. With over 300 experienced Software Developers and Project Managers we are able to undertake complex enterprise product development globally.
