### RELIABILITY

Utilise flexible deep tech solutions that are powerful, scaling with systems ready to expand to any size.

INTELYGENZ

# MERGING TRADITIONAL BANKING WITH FINTECH INNOVATION\_

In the fast-paced financial world, the complexities of the rapidly evolving digital landscape open up more opportunities and challenges for banking and fintech, and we ensure all our deep tech solutions that we deliver offer a tangible ROI.

Our goal is to make banks more agile and customer-focused like fintechs, while also enhancing fintechs with the stability and compliance of banks, so we are making banking more fintech and fintech more banking.

## Uncovering our expertise

BUILD LEADING AI WITH DATA DRIVEN ARCHITECTURES

We specialize in creating data-driven architecture, designed to be agile and scalable within the complex modern banking landscape.

STREAMING AI INTO DAILY OPERATIONS

From automating routine tasks to enhancing decision making, AI transforms vast streams of data into actionable insights, empowering operational excellence.

HUMAN-EXPERIENCE CENTRIC SOLUTIONS

By placing humans at the center of our technology solutions, we ensure that our partners can deliver services that are intuitive, secure and trustworthy.

CASE STUDY

## ACHIEVING FEE FREE BANKING THROUGH AUTOMATION\_

An entrepreneurial bank identified an opportunity in the US banking industry – they wanted to fill a gap between consumer banking and large enterprise banking services to better serve the growing market of freelancers and small companies.

### What we did:

Our key objectives were to develop product functionalities including powerful self-serve tools, personalization and authentication, and seamless integration with the bank's customer focused operational processes. These capabilities would enable our client to attract users to the new digital offering and build an initial customer base.
