Quality Improvement Process Worksheet

•	Date Initiated:
Department:	Date of Report:
	1. What do you want to improve?
	2. Who are the team members?
PROJECT IDENTIFICATION	3. What is your benchmark data? Document it. Benchmark data is your "starting point" for this QI project. It must clearly illustrate a problem and a need for improvement. It is also mandatory for tracking the efficacy of the intervention(s) that will be implemented, and the overall impact of this QI project.
	4. What goal are you trying to achieve?
	5. What QI methodology will you use? (PDCA, DMAIC, etc.)
	During the Analysis Phase, you will identify what's really happening <u>now</u> . Ways to analyze include brainstorming, flow charting the process, gathering data via the registry or chart reviews, and developing logs & tick sheets so that you have #'s.
ANALYSIS	6. Describe the current situation. (Attach data, charts, process flow)
	7. What does your data tell you?
	8. What are the root causes for the current situation?
50001515	9. Can you remove time, steps, or dollars?
POSSIBLE SOLUTIONS	9. Can you remove time, steps, or dollars?10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions).
	10. Based on the analysis, brainstorm with your team and make a list of possible
	10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions).
	10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions).11. Prioritize these solutions in order to create an action plan.
SOLUTIONS	 10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions). 11. Prioritize these solutions in order to create an action plan. 12. Describe your action plan. (Who will do what, when) 13. Determine what data point(s) and variables will be tracked to monitor
SOLUTIONS	 10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions). 11. Prioritize these solutions in order to create an action plan. 12. Describe your action plan. (Who will do what, when) 13. Determine what data point(s) and variables will be tracked to monitor change/impact. 14. Create a timeline for implementing each step of your action plan, and how often
SOLUTIONS	 10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions). 11. Prioritize these solutions in order to create an action plan. 12. Describe your action plan. (Who will do what, when) 13. Determine what data point(s) and variables will be tracked to monitor change/impact. 14. Create a timeline for implementing each step of your action plan, and how often you will monitor/re-check data.
SOLUTIONS	 Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions). Prioritize these solutions in order to create an action plan. Describe your action plan. (Who will do what, when) Determine what data point(s) and variables will be tracked to monitor change/impact. Create a timeline for implementing each step of your action plan, and how often you will monitor/re-check data. Implement your plan. What will you measure to show the impact of your interventions, and determine whether or not any improvement has been made? DATA MUST BE USED TO DOCUMENT THE RESULTS OF THE QI PROJECT AND
SOLUTIONS	 10. Based on the analysis, brainstorm with your team and make a list of possible solutions (Interventions). 11. Prioritize these solutions in order to create an action plan. 12. Describe your action plan. (Who will do what, when) 13. Determine what data point(s) and variables will be tracked to monitor change/impact. 14. Create a timeline for implementing each step of your action plan, and how often you will monitor/re-check data. 15. Implement your plan. 16. What will you measure to show the impact of your interventions, and determine whether or not any improvement has been made?
