ADVANCING **AMERICAN** FREEDOM

**“WHERE THERE IS NO VISION,  
THE PEOPLE PERISH...”**

---

PROVERBS 29:18

ADVANCING AMERICAN FREEDOM

The uniquely American idea that all men are created equal and endowed by their Creator with unalienable rights to life, liberty, and the pursuit of happiness – American Freedom – has created, by any measure, the greatest and most prosperous country in the history of the world. Over the past 240 years, American innovation has created the greatest advancements in science, health, commerce, computing, communications, defense, travel, and transportation (including in space) – more than the people of the world could ever have imagined. Additionally, the American people are the most generous in the world, having shared American innovation, wealth, and knowledge for centuries.

Unfortunately, today American Freedom is under attack. Big Tech, Big Media, Big Government, and even Big Business have locked arms to advance a pernicious “woke” ideology designed to control the American people and destroy the American Dream. The ruling elites have never been more detached from the experiences of the average American – yet they have never worked harder to dictate what Americans can think, say, and do. They’ve already said, “You can’t go to work, you can’t go to school, and you can’t go to church.” They’ve exploited a pandemic to increase their power over our lives, and they aim to keep that power long after the pandemic is gone.

Over many decades, liberal policies have created one disaster after another. Currently, our borders are under siege, our citizens have been betrayed, our allies have been abandoned, our currency has been debased through inflation, our schools have been transformed into indoctrination centers, our energy independence has been sacrificed on the altar of climate alarmism, and our great economy has been brought to a screeching halt by the radical Left’s big-government socialism. When patriotic Americans dare to stand for freedom, justice, and truth, the Left uses racial attacks to silence them and eventually erase them from public life.

President Reagan said, "Freedom is never more than one generation away from extinction. We didn't pass it on to our children in the bloodstream. It's to be fought for, protected, and handed down to them to do the same."

That's exactly what the Trump-Pence Administration did every day. The Trump-Pence team fought for and protected American liberty for every American of every race, color, and creed. In 48 months, the Trump-Pence Administration achieved the lowest unemployment, the highest household incomes, the most energy production, the most pro-American trade deals, the most secure border, and the strongest military in the history of the world.

The U.S. Constitution begins with "We the People," and We the People have had enough of destructive policies. We must return to the pro-freedom policies of Presidents Reagan and Trump. What follows are some ideas for how – together – we can advance American culture, American opportunity, American leadership, and ultimately Advance American Freedom once again.

# We the People

*Of the United States,  
in Order to form a more perfect Union,  
establish Justice, insure domestic Tranquility,  
provide for the common defence,  
promote the general Welfare, and secure  
the Blessings of Liberty to ourselves and  
our Posterity, do ordain and establish this  
Constitution for the United States of America.*

# 1

AMERICAN  
**CULTURE**

# THE FREEDOM AGENDA

---

Americans are proud of our culture and believe that it is worth protecting for future generations. As Americans, we believe that every human being is created in the image of God, and we are endowed by our Creator with the unalienable rights to life, liberty, and the pursuit of happiness. To secure life, the sanctity of human life must be restored to the center of American law. To secure liberty, patriotic education must replace political indoctrination in our public schools. To secure happiness, every American, in every city, should feel safe in his or her home, at work, and on the street.

## **A | Honor the God-given worth and dignity of all people.**

- i. End federal taxpayer-funding for abortion once and for all.
- ii. End all taxpayer funding of the largest abortion provider in America – Planned Parenthood.
- iii. End the assault on faith-based adoption and foster care agencies that will only place children into families with one male father and one female mother.
- iv. Work with state and local governments, churches, and other non-profit organizations to promote adoption, foster care, and crisis pregnancy centers.
- v. Support embryo adoption.
- vi. End all federal funding for destructive fetal tissue research. Support ethical, non-destructive research using adult stem cells.
- vii. Permanently ban foreign aid funding for abortions.

## **B | Celebrate religious freedom.**

- i. Allow religious leaders to publicly talk about politics and policy without retribution from the IRS.
- ii. Ensure that the Department of Justice and other federal agencies respect and do not interfere with our First Amendment right to free exercise of religion.
- iii. Prevent government agencies from placing unconstitutional barriers before religious organizations seeking access to disaster and pandemic relief.
- iv. Stand up for religious freedom and the rights of religious minorities around the world.

## **C | Promote safety in our homes and our communities.**

- i. Support local law enforcement and vigorous prosecution of violent crimes.

- ii. Surge resources for law enforcement personnel and prosecutors in higher crime areas.
- iii. Promote multijurisdictional efforts to combat criminal gangs and violent crime.
- iv. Remove from office prosecutors who refuse to enforce the law.
- v. Support smarter, safer, and more effective ways to reform our criminal justice system without simply letting criminals out of jail.

1. Repeal “bail reform” laws that are allowing violent and dangerous criminals back on the streets to commit additional crimes.

2. Support prison ministries and expand other faith-based programs that make repeat crimes less likely.

3. Provide post-incarceration “reentry” opportunities for those who have served their time and paid their debts to society.

## **D | Secure the southern border of the United States and end illegal immigration.**

- i. Finally finish building the border wall.
- ii. Immediately deport all illegal alien criminals and gang members.
- iii. End asylum fraud that allows millions of aliens to illegally enter and remain in the United States – and require that people seeking asylum or other entry wait in Mexico or elsewhere outside the United States while their cases are pending.
- iv. Pass a nationwide ban on sanctuary cities.
- v. Oppose all forms of amnesty, whether legislative or administrative.
- vi. End chain migration for all but the nuclear family and advance merit-based immigration reform.

- vii. Make the granting of H1B visas and other work visas conditional on employers creating training programs for American workers.
- viii. Require employers to use E-Verify to ensure all employees are authorized to work in the U.S. The federal government should reimburse businesses for the cost of implementation.
- ix. Ensure all immigrants, before entering America, are financially stable and capable of providing for themselves and their families, rather than relying on taxpayers.
- x. Promote the patriotic assimilation of immigrants through the immigration and naturalization process.

## **E | Promote patriotic education.**

- i. State and local jurisdictions should require high school students to pass testing on their knowledge of the Declaration of Independence, the U.S. Constitution, and the Federalist Papers prior to graduation to ensure that high school students are graduating with a basic knowledge of America's most important founding documents and ideals.
- ii. Reject the racism of quotas and set-asides. Insist on Reverend Martin Luther King, Jr.'s admonition that we should all be judged by the content of our character, not the color of our skin.
  - 1. Teach Frederick Douglass' "What the Black Man Wants" speech.
- iii. Oppose radical political indoctrination – including the teaching of anti-American racist ideologies like Critical Race Theory – in our schools and universities (as well as businesses and government agencies).
  - 1. Support maximum curriculum transparency so that parents have all the information necessary to pick and monitor schools that best fit the needs of their families.

## **F | Protect the exercise and expression of private beliefs without fear of reprisal or censorship.**

- i. Advance strong conscience protections. Physicians should never be forced to provide abortions or sex-change surgeries. Owners should be able to operate their businesses consistent with their faith.
- ii. Shield professionals from being fired for wrong-think, families from government intrusion in their homes or children's lives, and churches from needing government permission slips in order to meet.
- iii. Protect free speech, privacy, association, and civic engagement by ensuring privacy for donors to charities and civic groups.

## **G | Protect American freedom and democracy by ensuring the integrity of the democratic election process at all levels.**

- i. Make in-person voting the primary method of voting, encouraged and supported by all levels of government and election administration. Mail-in voting should be rare and only for a very limited set of circumstances, with clear guidelines and procedures for requesting, receiving, casting, validating, and auditing mail-in ballots.
- ii. Always require voter identification.
- iii. Prohibit early in-person voting – when allowed at all – more than ten days before Election Day.

## **H | Honor and protect the Second Amendment.**

- i. Consistently appoint and confirm conservative judges to the federal bench who will uphold the God-given liberties in our Constitution and say no when states run by liberal politicians enact restrictions on constitutionally protected gun ownership and use.
- ii. Enact right-to-carry laws.
- iii. Oppose efforts to pass “red flag” or “extreme risk protection order” legislation. Liberal versions of these laws are a threat to law-abiding citizens, as they can result in the denial, without due process, of an individual’s Second Amendment rights. Also oppose the use of community violence intervention (CVI) programs to fund red flag orders or gun buy-backs.

## **I | Save and protect women’s sports.**

- i. Preserve and protect female athletic competition by ensuring that sports competitions are between those who share their God-given gender.

A woman in a white t-shirt and blue shorts is running on a paved path, holding a large American flag on a tall pole. To her right, a man in a dark t-shirt and light shorts is riding a bicycle, wearing a cape that is an American flag. The background shows a beach, the ocean, and a clear blue sky. A wooden bench is visible behind the woman. A large, semi-transparent red number '2' is overlaid on the right side of the image.

# AMERICAN **OPPORTUNITY**

# THE FREEDOM AGENDA

---

The American free enterprise system is the most powerful economic engine in the history of mankind. No other system has created more wealth, lifted more people out of poverty, or improved mankind's quality of life to a greater degree. To restore American freedom and greatness, the free market must be unleashed from the shackles of high taxes, overregulation, and big-government socialism. Our immigration system must be retooled to serve the interests of the American people. Government spending must be brought under control. And every American must be equipped with the skills and knowledge to succeed in the workplace of tomorrow. "It was freedom, not socialism, that gave us the most prosperous economy in human history," Vice President Pence has said. "It was freedom, not socialism, that ended slavery, won two world wars and that stands as a beacon of hope for all the world."

## **A | Reestablish policies that promote not just American energy independence, but also American energy dominance.**

i. Advance regulatory reforms that develop our rich natural resources, regain American energy independence, and secure American energy dominance.

1. Eliminate mandates, regulations, and special tax breaks that put a thumb on the scale for politically favored energy sources over other forms of American energy.

ii. Expedite permits and approvals for oil and gas production as well as pipeline construction.

iii. Expand exploration and drilling on energy-rich federal lands, on and offshore.

iv. Facilitate the export of American liquified natural gas through fast approvals of export terminals, among other measures.

v. Maintain a neutral and flexible energy mix by rejecting government mandates, lopsided regulations, and carve-outs.

vi. End market-distorting subsidies for any energy source.

vii. Fight policies that discriminate against technology that uses American energy – like coal and petroleum – and favor energy technology that relies on resources from foreign countries, like minerals from China and Congo to make the batteries for electric cars.

## **B | Foster a thriving free market economy.**

i. Advance the free enterprise system – the economic engine that has created more wealth and lifted more people out of poverty than any economic system in history – by reducing regulations and taxes to encourage individual economic freedom over big-government socialism.

1. Eliminate at least two regulations for every new federal regulation.

ii. Combat “woke” corporate culture and advance policies that allow American businesses to focus on performance over politics. Ensure that businesses and investment managers place the economic interests of Americans – particularly their workers and pension beneficiaries – over progressive political and social policy goals.

iii. Promote urban revitalization through economic growth and entrepreneurship to create safe, clean, vibrant, and thriving cities.

## **C | Give American families the opportunity to achieve the American dream by having the freedom to pursue the best education options for their children.**

i. Support universal school choice. Fund education scholarship accounts that parents and children can use for the school of their choice and/or accredited and supplemental learning outside of the classroom.

ii. Empower parents so they are always in control of how their children are educated. This should include allowing students to attend the public school of their choice and providing credit for learning outside of the classroom.

iii. Eliminate the U.S. Department of Education and convert some of its current budget to grants to states and localities, providing maximum flexibility in how to deploy federal dollars.

iv. Advance 21st century vocational education and training.

1. Advance support for career and technical education, skill attainment, and apprenticeships for all ages to offer people evolving opportunities in a time of modernizing technologies.

2. For those who don't graduate from college, state-level workforce development systems should make it easier to determine which types of certifications and skills are highly valued in nearby locales.

3. Make public resources that target workforce development more flexible by creating relocation vouchers, so Americans can easily relocate to places of greater opportunity.

4. Authorize lifelong education savings accounts to better meet the needs of a changing workforce.

## **D | Liberate the American people from oppressive taxation, tyrannical bureaucracy, and overregulation.**

i. Cut individual and corporate taxes so families can save money and businesses can invest in jobs.

1. Permanently extend the Trump/Pence tax cuts that helped create 5 million jobs and are set to expire in 2025.

2. Eliminate special-interest tax breaks and move toward a fairer and flatter tax code.

a. Use the revenue from removing special tax breaks to lower tax rates elsewhere.

3. Eliminate special tax breaks for high-spending, high-taxing states and use the revenue to cut taxes for working Americans.
  4. End the tax on inflation when calculating the capital gains tax.
- ii. Slash federal spending and require a balanced federal budget within five years.
  - iii. Pay down the federal debt now so that future generations are not saddled with unsustainable interest payments.
  - iv. Drastically overhaul the federal permitting process so large energy, infrastructure, and other development projects don't take years to complete because of government hurdles.

## **E | Unleash American innovation and make America the most attractive place to do business by reducing barriers and creating a favorable climate for job creation.**

- i. Reshore American jobs by identifying, targeting, and addressing critical gaps in advanced manufacturing that were exposed during the pandemic supply chain collapse, including electronics, communications infrastructure, and pharmaceuticals.
- ii. Strengthen our patent system to better protect intellectual property and encourage increased American-based innovation.
- iii. Break away from President Biden's global tax policy that puts American companies at a disadvantage to foreign companies and incentivizes moving jobs overseas.
- iv. Invest in critical infrastructure projects that are actually needed by states and localities, as opposed to boondoggle "infrastructure" projects that are little more than liberal priorities and unrelated social justice initiatives.

## **F | Pursue reciprocal trade agreements that benefit American workers, manufacturers, and farmers by opening up new markets for their products, linking supply chains with key allies and spreading U.S. standards and values around the world.**

- i. Negotiate more win-win trade agreements with our allies and partners around the world, including Great Britain, Japan, other Indo-Pacific nations, and Africa modeled on the United States-Mexico-Canada Agreement (USMCA), where American interests are not secondary to foreign interests.
- ii. Advance security and resilience in the supply chain by strengthening ties with allies and partners and reducing reliance on strategic competitors.
- iii. Revamp the World Trade Organization (WTO) so that it works for America or seek to create a new institution with allies that counters China's unfair practices.

## **G | Advance labor policies that allow people to choose the jobs they want.**

- i. Allow insurance portability.
- ii. Expand health savings accounts.
- iii. Protect flexibility in modern labor markets by protecting gig-economy workers from overregulation and promoting innovative approaches to entrepreneurship.
- iv. Advance work requirements for welfare programs so that Americans are not trapped in a cycle of dependence or penalized for marriage and work.
  1. When jobs are not available, allow people to meet work requirements through reskilling and job training.

## **H | Limit government, empower federalism, and respect individual liberty and economic freedom.**

- i. Reform the federal spending process to make it easier to cut spending, harder to increase spending, and impossible to fund something that has not first been authorized by Congress.
- ii. Write laws to give maximum control over spending and regulatory decisions to legislators and not to judges or bureaucrats.
- iii. End the gamesmanship around government shutdowns by automatically continuing federal spending at current levels when Congress or the President misses spending deadlines.
- iv. Reverse federal overreach by ceding rightful authority back to the states.
  1. Sell or donate millions of acres of federal land to the states.
  2. Restore the division of governmental responsibilities between the federal government and the states so that, as often as possible, the federal government merely supports state and local management and execution.
  3. Protect federalism by requiring federal agencies to assess and report how their actions will impact states.
  4. Oppose excessive use of eminent domain and enact legislation to ensure that property owners are fairly compensated when the government deprives them of the use of that property.
  5. Advance state and local authority over common shared resources, public lands, and water rights.
    - a. Allow longer timeframes for Congress to disapprove a rule issued by a federal agency.
    - b. Oppose any form of federal land-grabbing and fight every type of overreach by the federal government that encroaches upon the ability of states and private property owners to cultivate the land and care for our waters. Legislation or agency actions which seek to continually extend federal control over land and water, such as the 30x30 plan, should be rejected if they threaten private property rights.

v. End the COVID national emergency and return freedom to the people.

1. Oppose federal mandates (such as vaccination and mask requirements) and empower states and localities to respond to the needs of their residents.

2. Reform the Centers for Disease Control and Prevention, which mismanaged guidance on testing, surveillance, masks, and social distancing.

vi. Ensure accountability by making it easier to hire and fire government employees.

vii. Support judges who will uphold the Constitution's governing principles and the rule of law.

viii. End the adversarial role the government takes against law-abiding citizens and end the IRS's attacks on nonprofits.

## I | **Advance freedom in health care.**

i. Unleash free market principles of competition and innovation across health care to increase quality and accessibility, while lowering costs to improve the health of the American people. This includes individual and employer market reforms, as well as the continued and expanded use of telehealth.

ii. Empower patients with the transparent information they need to take ownership of their health and to become active consumers of health care, shopping for the providers that offer the best combination of value and results to their patients.

iii. Realign our health care system to focus on improving health and health outcomes at a lower cost, rather than focusing on services provided.

iv. Right-size the government's role in health care to focus on basic fundamentals, promote the health and safety of our citizens, and ensure that decisions and choices about health and health care remain the right of the individual.

v. Modernize Medicare by ensuring more choice and competition within the program and allowing for easy, voluntary exit from it.

vi. Empower states by giving them maximum flexibility to run their Medicaid programs while holding them accountable for delivering value for beneficiaries in terms of both costs and quality.

vii. Build upon the success of Operation Warp Speed and implement reforms to get lifesaving therapeutics and treatments to patients more quickly.

## **J | Reform Big Tech to align it with our democratic and free enterprise system.**

- i. Prevent censorship in the modern public square by requiring that Internet companies live under the same liability framework as traditional print and broadcast media companies.
- ii. Advance free speech and end digital surveillance without meaningful consent.
- iii. Champion increased ownership and portability of private data.

3

AMERICAN  
**LEADERSHIP**

# THE FREEDOM AGENDA

---

American Freedom means peace at home and stability abroad. While America must never go “abroad, in search of monsters to destroy,” in the words of John Quincy Adams, we must promote freedom through the power of our example and stand faithfully with our allies in defense of our common values and interests. After inheriting a United States military that was drastically overextended and underfunded, the Trump-Pence Administration invested \$2.2 trillion to rebuild our armed forces – even while working to end the endless wars and bring our troops home. In this period of strength and prosperity, Americans saw what true leadership can accomplish. We destroyed the ISIS caliphate in Iraq and Syria and stood with our cherished ally, Israel, by reshaping the Middle East through the Abraham Accords. Today, our country needs strong leadership more than ever. America must stand up to the Chinese Communist Party (CCP), building a global coalition of partners willing to stand up to the CCP’s expansionism. The playing field in international trade must be leveled, and jobs must be brought back home to the USA. We must seek and achieve burden-sharing by our allies and partners, both in Europe and Asia. America must lead by example, standing up for international religious freedom around the world.

## **A | Ensure a military force ready for great power competition with the Chinese Communist Party and a resurgent Russia, and posture to defend both NATO's eastern flank and Taiwan.**

- i. Pass robust defense budgets focused on current and future threats that provide all our military personnel with the training and equipment they need—wherever and whenever they need it—and that root out waste and inefficiencies in the Defense Department.
- ii. End “woke” culture in the military.
- iii. Build up the Navy to a 350-ship fleet.
- iv. Develop and maintain offensive, deterrence-based cyber capabilities.
- v. Make record investments in new technology.
- vi. Advance American leadership and security in space through the United States Space Command and the United States Space Force.

## **B | Stand strong against Russia.**

Under the control of Vladimir Putin, Russia harms American interests by threatening American allies and invading its neighbors, conducting cyber attacks, imprisoning American citizens, leveraging European allies' reliance on Russian natural gas, backing China's geopolitical ambitions, and aiding and abetting corrupt, anti-American and terrorist-sponsoring regimes in Iran, Syria, and Cuba. Putin undermines freedom and democracy at home and abroad, while jeopardizing stability by threatening the sovereignty of Russia's neighbors.

- i. Stand strong against Russian aggression and rally our Western allies in defense of freedom.
- ii. Create a massive, private-sector-led global energy production and export initiative among democratic countries centered around the export of American-produced natural gas to end Europe's dependence on Russia for its energy security.

- iii. Use all available means to halt the use of the Nord Stream 2 pipeline, including, if necessary, imposing sanctions against companies in allied countries involved in its operation.
- iv. Ensure all unlawfully imprisoned Americans in Russia are returned home.
- v. Increase investment in our cyberinfrastructure and enhance our ability to counter and respond to Russian cyberattacks, cyber criminals, and influence operations.

## C | **Confront Communist China.**

American leaders must recognize that the greatest threat to American prosperity, security, and values is the Chinese Communist Party (CCP). The United States must confront and counter the CCP as an existential threat to American Freedom. The Trump-Pence Administration successfully changed the global outlook on China, recognizing the CCP as a leading threat to peace and world stability.

### i. Treat China as a security threat.

1. Bolster our strategic presence in the region, including by reinforcing strategic alliances with partners in East Asia, Southeast Asia, and South Asia.
2. Aggressively utilize export control laws to block the sale of sensitive technologies to China. Coordinate with our allies a tough approach through export controls, sanctions, and investment screening tools.
3. Block or unwind arrangements by which large volumes of sensitive U.S. data flow to China, whether through medical records, digital apps, or other channels—all of which are currently subject to uneven standards. Democratic allies must also work together to promote data sharing amongst themselves while limiting flow to China.
4. Counter the way China exploits and weaponizes other U.S. resources, like our capital markets, including ending the self-destructive flow of U.S. dollars into China's military and global surveillance apparatus.
5. End the policy of dependence on China for rare earths and other critical minerals necessary for national defense and build up a U.S. domestic supply chain to secure these strategic resources.

### ii. Treat China as an economic threat.

1. Pass legislation that revokes China's "permanent normal trade relations" status with the United States and requires the President to certify each year—subject to a congressional resolution of disapproval—that China deserves to receive "most favored nation" trading status.
2. Work with all other large economies—like Trump-Pence did with 5G and Huawei—to stop China's technological and intellectual property theft, predatory tactics in the critical mineral supply chain, and other economic espionage and trade fouls. Coordinate with our allies and potential allies on a tough approach to China on these issues utilizing export controls, sanctions, and investment screening tools.

3. Maintain the tariffs imposed by President Trump on imported Chinese goods and services and rally our allies to counter China's unfair practices and force China to the negotiating table to create a level playing field with their Chinese controlled and subsidized industries.

iii. Treat China as a massive human rights violator.

1. Hold China accountable for genocide in Xinjiang and for persecuting faith adherents all across their country.

2. Continue to support democracy and valiant pro-democracy leaders in Hong Kong and sanction leaders in Beijing who prosecute activists and roll back civil liberties.

iv. Treat China as the originator of the COVID-19 pandemic.

1. Hold China accountable for negligently unleashing and hiding the origins of COVID-19 and demand that they establish a victims compensation and economic recovery fund.

## **D | Stand with Israel and Forge a new Middle East.**

America must remain resolutely committed to the security of our most cherished ally, Israel, and help achieve peace, prosperity, and a brighter future for Israel and the Palestinian people.

i. Forge new security and economic agreements between the United States and Israel, together with Abraham Accords countries and other allies.

ii. Maintain and reinforce the Trump-Pence Administration's policy decisions regarding Judea and Samaria, the Golan Heights, and Jerusalem as Israel's undivided capital.

## **E | Counter Iranian Aggression.**

America must never allow the Iranian regime to gain nuclear weapons, and Iran must also end its destabilizing behavior in the region and its support for terrorism around the world.

- i. Put a stake in the Iran nuclear deal once and for all.
- ii. Reimpose the Trump-Pence sanctions, particularly against individual members and organizations of the regime.
- iii. Support the Iranian people in their struggle to gain freedom from the clutches of a murderous, terrorist regime.

## **F | Fortify Alliances in the Western Hemisphere.**

Within our hemisphere, the people of the United States and Latin America share values of faith, family, community, freedom, hard work, and capitalism. Our interconnected cultural and geographic ties make the region critical to United States prosperity and national security. As such, we must renew and expand our engagement with countries throughout the hemisphere on security, trade, religious freedom, and foreign policy.

- i. Support a prosperous, safe, and democratic region within which the United States can work to advance shared interests, especially via free trade and the relocation of manufacturing from China to our hemisphere.
- ii. Push back against socialist governments in the Western Hemisphere – the type of governments historically known to adopt policies that impoverish their people and limit fundamental rights and freedoms.
- iii. Prevent illegal and uncontrolled migration, smuggling, and trafficking.
- iv. Assertively seek the restoration of human rights and democracy in Venezuela, Cuba, and Nicaragua.

## LOOKING AHEAD

---

America can be as free and prosperous as ever, if we stand firm on our principles and hew to what has always made America the greatest nation in the history of the world. There is no holding back freedom and American prosperity if we lean on the principles and pillars outlined in this agenda – such as a strong national defense, free markets, traditional values, the right to life, school choice, patriotic education, border security, free, fair, and reciprocal trade, confrontation of the Chinese Communist Party’s aggressive agenda – and if we keep faith with our Constitution. Securing these pillars is essential to the survival of freedom. The solution to any problem can be found in strengthening American culture, American opportunity, and American leadership. WE, champions of freedom and the Declaration of Independence, are the last line of defense of the Constitution and our American heritage. For our country and our future, for our children and our grandchildren, we must move forward united and with faith in the One who has ever guided the destiny of our land – move forward to ensure that the best days for the greatest nation on earth are yet to come.

The Freedom Agenda was developed with the input of countless allies. Special thanks to the individuals below, who provided some of the most consistent and impactful contributions to the agenda:

Jessica Anderson  
Nate Bailey  
Gary Bauer  
David Bernhardt  
Ken Blackwell  
Brent Bozell  
Kirk Cameron  
Andeliz Castillo  
Kellyanne Conway  
Kelly Craft  
Ken Cribb  
Jim Daly  
Marjorie Dannenfelser  
Jim DeMint  
Betsy DeVos

Doug Ducey  
Ed Feulner  
David Friedman  
Callista Gingrich  
Newt Gingrich  
Rebecca Hagelin  
Jeb Hensarling  
Kay Coles James  
Robert Jeffress  
Larry Kudlow  
Robert Lighthizer  
Joan Lindsey  
Jolynn Mahoney  
Pat Mahoney  
Jenny Beth Martin

David McIntosh  
Ed Meese  
Lisa Nelson  
Scott Pace  
Star Parker  
Art Pope  
Max Primorac  
Andy Puzder  
Rick Santorum  
Ryan Streeter  
Scott Turner  
Scott Walker  
Andrew Wheeler  
Clete Willems
