

INSTALLATION GUIDE: PAINTED UNDER ICE LOGO

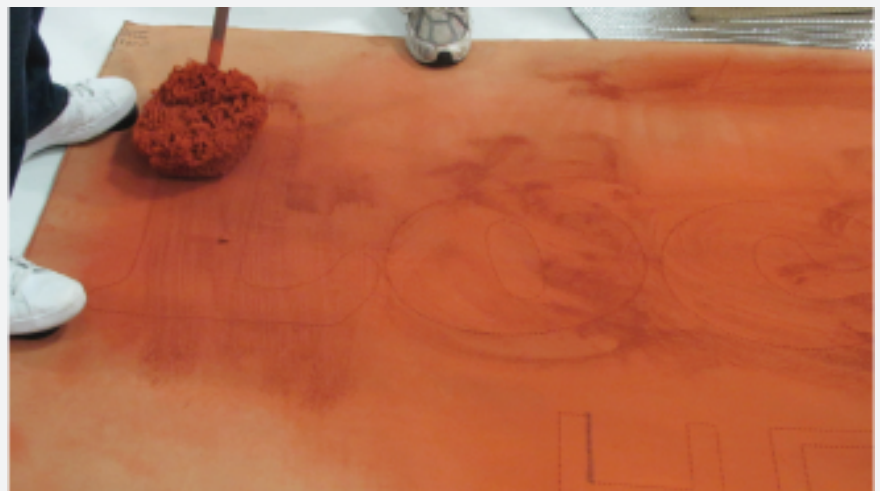

1

Measure for proper placement of the stencil on the ice.

2

Apply chalk over top of the stencil to create a template on the ice below.

3

Carefully lift and remove the stencil once the chalk has been thoroughly applied.

4

Check all areas of the template to ensure chalk transfer.

5

Paint the template of the logo with the appropriate color ice paint. Let dry before ice install.
