

HINDUSTAN
INSTITUTE OF TECHNOLOGY & SCIENCE
(DEEMED TO BE UNIVERSITY)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

CURRICULUM AND SYLLABUS

(Applicable for Students admitted from Academic Year 2021-22)

M.Tech (COMPUTER SCIENCE AND ENGINEERING)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

SCHOOL OF COMPUTER SCIENCES

HINDUSTAN INSTITUTE OF TECHNOLOGY & SCIENCE
VISION AND MISSION

Motto:

To Make Every Man a Success and No Man a Failure

VISION :

“TO MAKE EVERY MAN A SUCCESS AND NO MAN A FAILURE”

MISSION

- To create an ecosystem that promotes learning and world class research.
- To nurture creativity and innovation.
- To instill highest ethical standards and values.
- To pursue activities for the development of the Society.
- To develop national and international collaborations with institutes and industries of eminence.
- To enable graduates to become future leaders and innovators.

VALUE STATEMENT

- Integrity, Innovation, Internationalization

DEPARTMENT OF COMPUTER SCIENCE

VISION AND MISSION

VISION

To excel in Computer Science and Engineering education, research and project management by empowering the students with strong conceptual knowledge.

MISSION

M1. To educate the students with basic foundation blocks of core and allied disciplines of Computer Science and Engineering.

M2. To provide practical skills in the advancements of the Computer Science and Engineering field required for the growing dynamic IT and ITES industries.

M3. To sculpt strong personal, technical, research, entrepreneurial, and leadership skills.

M4. To inculcate knowledge in lifelong learning, professional ethics and contribution to the society.

M.Tech (COMPUTER SCIENCE AND ENGINEERING)

PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

The program is expected to enable the students to

PEO I Excel in their professional career by applying advanced knowledge and/or pursue higher education including research by applying the knowledge of Computer Science and Engineering.

PEO II Asses the industry requirements and provide tangible solutions with social consciousness and ethical values.

PROGRAM OUTCOMES (ALIGNED WITH GRADUATE ATTRIBUTES) (PO)

At the end of this program, graduates will be able to

- PO1 Scholarship of knowledge:** Acquire in-depth knowledge of specific discipline or professional area, including wider and global perspective, with an ability to discriminate, evaluate, analyses and synthesize existing and new knowledge, and integration of the same for enhancement of knowledge.
- PO2 Critical Thinking:**Analyze complex engineering problems critically, apply independent judgement for synthesizing information to make intellectual and/or creative advances for conducting research in a wider, theoretical, practical and policy context.
- PO3 Problem Solving:** Think laterally and originally, conceptualize and solve engineering problems, evaluate a wide range of potential solutions for those and arrive at feasible, optimal solutions after considering public health and safety, cultural, societal and environmental factors in the core areas of expertise.
- PO4 Research Skill:** Extract information pertinent to unfamiliar problems through literature survey and experiments, apply appropriate research methodologies, techniques and tools, design, conduct experiments, analyze and interpret data, demonstrate higher order skill and view things in a broader perspective, contribute individually / in group(s) to the development of scientific of scientific / technological knowledge in one or more domains of engineering.
- PO5 Usage of modern tools:** Create, select, learn, and apply appropriate techniques, resources, and engineering and IT tools, including prediction and modeling, to complex engineering activities with an understanding of the limitations.
- PO6 Collaborative and multidisciplinary work:** Process knowledge and understanding of group dynamics, recognize opportunities and contribute positively to collaborate-multidisciplinary scientific research, demonstrate a capacity for self-management and teamwork, decision—making based on open-mindedness, objectivity and rational analysis in order to achieve common goals and further the learning of themselves as well as others.

- PO7 Project Management and Finance:** Demonstrate knowledge and understanding of engineering and management principles and apply the same one's own work, as a member and leader in a team, manage projects efficiently in respective disciplines and multidisciplinary environments after consideration of economic and financial factors.
- PO8 Communication:** Communicate with engineering community, and with society at large, regarding complex engineering activities confidentially and effectively, such as, being able to comprehend and write effective reports and design documentation by adhering to appropriate standards, make effective presentations, and give and receive clear instructions.
- PO9 Life-Long Learning:** Recognize the need for, and have the preparation and ability to engage in life-long learning independently, with a high level of enthusiasm and commitment to improve knowledge and competence continuously.
- P10 Ethical Practices and Social Responsibility:** Acquire professional and intellectual integrity, professional code of conduct, ethics of research and scholarship, consideration of the impact of research outcomes on professional practices and an understanding of responsibility to contribute to the community for sustainable development of society.
- P11 Independent and Reflective Learning:** Observe and examine critically the outcomes of one's actions and make corrective measures subsequently, and learn from mistakes without depending on external feedback

PROGRAM SPECIFIC OUTCOMES (PSO)

- PSO1** To impart knowledge in Advanced Operating System, Advance Data Base Technology, Advanced Data Structures & Algorithms for analyzing and the solving complex problem.
- PSO2** To develop the skill set of the students especially in Data Science and Engineering, Software Engineering and Information Security.
- PSO3** To inculcate the analytical knowledge in the students for innovative system design using modern tools and techniques.

M.Tech - COMPUTER SCIENCE AND ENGINEERING

| Course Description | This course serves as an introduction to the world of Statistical models. It describes how to use forecasting methods to support managerial, financial, and operational. |
| Course Objective | <ol style="list-style-type: none"> In-depth knowledge in the mathematical, probabilistic, and statistical foundations. Programming software engineering skills. Ability to apply statistical analysis and modeling to reason from data in a principled manner. Combined theoretical and technical skills to use for real-world applications. |
| Course Outcome | Upon completion of this course, the students will be able to |

| | <ol style="list-style-type: none"> 1. Develop statistical models for business analytics 2. Perform marketing analytics using statistical models. 3. Analyze customer data for customer acquisition, retention, and profitability. 4. Analysis time series analysis. 5. Analysis of variance. | | | | | | | | | | | | | | |

| 1: Weakly related, 2: Moderately related and 3: Strongly related | | | | | | | | | | | | | | | |
| MODULE 1: PROBABILITY | | | | | | | | | | | | | | (12) | |
| <p>Introduction to probability–Bayes theorem-Random variables-discrete random variable (Binomial, Poisson, Geometric), Continues random variable (Uniform, Exponential and Normal distribution). Moment generating unction.</p> <p>Suggested Activities: Basic knowledge on probability</p> <p>Suggested sources: Introduction to probability</p> | | | | | | | | | | | | | CO-1 BTL-2 | | |
| MODULE 2: TWO DIMENSIONAL RANDOM VARIABLES | | | | | | | | | | | | | | (12) | |
| <p>Joint distribution –Marginal and conditional distribution covariance –correlation and regression (linear and Multiple). Central limit theorem, Chebyshev’s inequality.</p> <p>Suggested Activities: Basic knowledge on probability</p> <p>Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan</p> | | | | | | | | | | | | | CO-2 BTL-2 | | |
| MODULE3: THEORY OF SAMPLING AND TEST OF HYPOTHESIS (12) | | | | | | | | | | | | | | | |
| <p>Introduction to hypothesis, large and small samples test-mean and variance (single and double), test, Independent of attributes and contingency table.</p> <p>Suggested Activities: Basic knowledge of sampling</p> | | | | | | | | | | | | | CO-3 BTL-3 | | |

| | | |
|---|---|--|
| Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan | | |
| MODULE4: TIME SERIES ANALYSIS | | (12) |
| <p>Introduction to Stochastic process, Time series as a discrete stochastic process. Stationarity, Main characteristics of stochastic process (mean, auto covariation and auto correlation function). Autoregressive models AR(p), Yull-Worker equation Auto regressive moving average models ARMA. Seasonality in Box–Jenkins model.</p> <p>Suggested Activities: Basic knowledge of Time series analysis</p> <p>Suggested sources: Time series-Maurice George kendall,j.k.Ord</p> | | <p>CO-4</p> <p>BTL-2</p> |
| MODULE 5: DESIGN OF EXPERIMENTS (12) | | |
| <p>Analysis of variance (one way & two ways) classification – completely randomized design –randomized block design – Lattin square design.</p> <p>Suggested Activities: Basic knowledge of design of experiments</p> <p>Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan</p> | | <p>CO-5</p> <p>BTL-3</p> |

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE1: INTRODUCTION (9)

Abstract DataTypes-Time and Space Analysis of Algorithms-Big Oh and Theta Notations- Average, best- and worst-case analysis-Simple recurrence relations-Mappings.

Suggested Activities: Find the time and space complexities of the following algorithms

1.Sum of n numbers 2. Factorial of n3. Matrix multiplication 4. Insertion sort

Suggested sources:

<https://nptel.ac.in/courses/106105164/><https://nptel.ac.in/courses/106105085/18>

CO-1

BTL-2

MODULE 2: HEAPSTRUCTURES (9)

Min-maxheaps-Heaps-Leftistheaps-Binomialheaps-Fibonacciheaps-Skewheaps-Lazy-binomialheaps.

Suggested Activities:ImplementthefollowingHeapstructuresusingC, C++, Java or Python

1. Max-min Heap 2. Binomial Heap 3. Fibonacci Heap

Suggested sources: [https://nptel.ac.in/courses/106102064/20, 21](https://nptel.ac.in/courses/106102064/20,21)

CO-2

BTL-2

MODULE3: SEARCHSTRUCTURES (9)

Binarysearchtrees-AVLtrees-2-3trees-2-3-4trees-Red-blacktrees-B-trees-splaytrees-k-d trees, Tries.

Suggested Activities: Implement the following tree structures using C, C++, Java or Python

1.AVLTree 2.Red-Blacktree 3. Splay Trees 4. K-d Trees5. Tries

Suggested sources: [https://nptel.ac.in/courses/106102064/11, 12,14,15,18](https://nptel.ac.in/courses/106102064/11,12,14,15,18)

| Course Description | This course is designed to understand the research problem, literature studies, plagiarism and ethics, To get the knowledge about technical writing, to analyze the nature of intellectual property rights and new developments | | | | |
| Course Objective | <ol style="list-style-type: none"> To give an overview of the research methodology and explain the technique of defining a research problem To explain the functions of the literature review in research. To explain carrying out a literature search, its review, developing theoretical and conceptual frameworks and writing a review. To explain various research designs and their characteristics. | | | | |

| | |
|-----------------------|--|
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Understand research problem formulation. 2. Understand the way of doing Literature review and to write proposal in an effective way. 3. Understanding the data collection, sampling techniques used in the statistical analysis for effective data analysis. 4. Understand that IPR protection provides an incentive to inventors for further research work and investment in R & D, which leads to creation of new and better products, and in turn brings about, economic growth and social benefits. 5. Understand the nature of Intellectual property rights in national and international level collaborations |

MODULE1: DISTRIBUTED OPERATING SYSTEM

(12)

Synchronization Mechanisms: Introduction – concept of a process – concurrent process – the critical section problem – Synchronization problems – language mechanisms for

CO-1

| | |
|---|-----------------------------|
| synchronization: Monitors. System Architecture types – issues in distributed operating systems – communication networks – communication primitives. Theoretical Foundations: inherent limitations of a distributed system – lamport logical clocks – vector clocks – casual ordering of messages – global state – cuts of a distributed computation – termination detection. | BTL-2 |
| MODULE 2: DISTRIBUTED DEADLOCKDETECTION | (12) |
| Deadlock handling strategies in distributed systems – issues in deadlock detection and resolution – control organizations for distributed deadlock detection – centralized and distributed deadlock detection algorithms – hierarchical deadlock detection algorithms. Agreement protocols – introduction-the system model, a classification of agreement problems, solutions to the Byzantine agreement problem, applications of agreement algorithms. | CO-2 BTL-2 |
| MODULE 3: DISTRIBUTEDSHAREDMEMORY | (12) |
| Architecture– algorithms for implementing DSM – memory coherence and coherence protocols – design issues. Distributed Scheduling: introduction – issues in load distributing – components of a load distributing algorithm – stability – load distributing algorithm – performance comparison – selecting a suitable load sharing algorithm – requirements for load distributing -task migration and associated issues. Failure Recovery and Fault tolerance: introduction – basic concepts – classification of failures – backward and forward error recovery approaches - recovery in concurrent systems – synchronous and asynchronous check pointing and recovery – check pointing for distributed database systems - recovery in replicated distributed databases systems. | CO-3 BTL-3 |
| MODULE4:MULTIPROCESSOROPERATINGSYSTEM | (12) |
| Basic multiprocessor system architectures – basic multiprocessor system architecture - inter connection networksfor multiprocessor systems – caching – hypercube architecture – structures of multiprocessor operating system -operating system design issues – threads management- process synchronization – processor scheduling–Memory management- The Mac OS. | CO-4 BTL-2 |
| MODULE 5: DATABASE OPERATING SYSTEM | (12) |
| Requirements of a database operating system Concurrency control: theoretical aspects - introduction, database systems - a concurrency control model of database systems- the | CO-5 |

| | |
|---|--|
| <p>problem of concurrency control - Serializability theory- distributed database systems, concurrency control algorithms - introduction, basic synchronization primitives, lock based algorithms-timestamp based algorithms, optimistic algorithms - concurrency control algorithms, data replication.</p> | <p>BTL-2</p> |
| <p>PRACTICES</p> | |
| <ol style="list-style-type: none"> 1. Implementation of semaphores for multiprocessor OS 2. Implementation of multithreading for multiprocessor OS 3. Implementation of multiple sleeping barbers problem for synchronization in distributed OS 4. Implementation of network operating system. 5. Design a real time operating system to control the temperature of a boiler. 6. Implementation of transactions and concurrency in Database operating system. 7. Implement a banking application using distributed Operating system. | |

| Course Description | In this course, students will develop the scientific and technical reading, writing and presentation skills they need to understand and construct research articles. | | | | | | | | | | | | | | | |
| Course Objective | <ol style="list-style-type: none"> 1. To develop the skills in doing literature survey, technical presentation and report preparation 2. To Selecting a subject, narrowing the subject into a topic 3. To Link the papers and preparing a draft of the paper. 4. To Stud the papers and understanding the authors contributions and critically analysing each paper. | | | | | | | | | | | | | | | |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Acquired the basic skills to for performing literature survey and paper presentation 2. Provide students better communication skills. 3. Describe the current topics in computer science and related areas based on current publications. 4. Prepare the report | | | | | | | | | | | | | | | |

1: Weakly related, 2: Moderately related and 3: Strongly related

GUIDELINES

1. For seminar, a student under the supervision of a faculty member, shall collect the literature on a topic and critically review the literature and submit it to the department in a report form and shall make an oral presentation before the Departmental Academic Committee consisting of Department PG Coordinator, Supervisor and two other senior faculty members of the department.
2. Each student will make a seminar presentation using audio/visual aids for a duration of 20-25 minutes and submit the seminar report prepared in Latex only
3. For Seminar there will be only internal evaluation.
4. Out of the total allocated marks distribution of marks shall be 30% for the report, 50% for presentation and 20% for the queries.
5. A candidate has to secure a minimum of 50% of marks to be declared successful.
6. If the student fails to fulfill minimum marks, the student has to reappear during the supplementary examinations.
7. There shall be no semester end examinations for the seminar.

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE 1: FUNDAMENTALS OF SENSOR NETWORKS

(12)

Introduction and Overview - Overview of sensor network protocols, architecture, and applications, Challenges, Main features of WSNs; Research issues and trends, Platforms- Standards and specifications-IEEE802.15.4/ Zigbee, Hardware: Telosb, Micaz motes, Software: Overview of Embedded operating systems-Tiny OS, Introduction to Simulation tools- TOSSIM, OPNET, Ns-2.

CO-1
BTL-2

Practical component: Simulate WSN using simulations tools.

Suggested Readings: Wireless sensor network platform

MODULE 2: COMMUNICATION CHARACTERISTICS AND DEPLOYMENT MECHANISMS(12)

Wireless Communication characteristics - Link quality, fading effects, Shadowing, Localization, Connectivity and Topology - Sensor deployment mechanisms, Coverage issues, Node discovery protocols.

CO-2
BTL-2

Practical component: Develop a framework for Node discovery and localization

Suggested Readings: Communication architecture

MODULE 3: MAC LAYER

(12)

Fundamentals of Medium access protocol- Medium access layer protocols - Energy efficiency, Power allocation and Medium access control issues

CO-3
BTL-3

Practical component: MAC protocol simulation for wireless sensor Network.

Suggested Readings: Survey on performance evaluation of various MAC Protocols

MODULE 4: NETWORK LAYER AND TRANSPORT LAYER

(12)

Network layer protocols-Data dissemination and processing, multichip and cluster based routing protocols- Energy efficient routing- Geographic routing, Transport layer- Transport protocol Design issues- Performance of Transport Control Protocols.

CO-4
BTL-3

Practical component: Modify Transport Protocol for effective QoS

Suggested Readings: Routing Table of a network.

| MODULE 5: MIDDLEWARE AND SECURITY ISSUES | | (12) |
|--|---|---------------------------------|
| Middleware and Application layer -Data dissemination, Data storage, Query processing, Security - Privacy issues, Attacks and Countermeasures. Practical component: Develop a real world WSN application Suggested Readings: Security threats | | CO-5 BTL-3 |

MODULE 1: INTRODUCTION AND AGILE DEVELOPMENT (12)

| | |
|---|-------------------------------------|
| <p>Software and Software Engineering-Process Model-Agile Development- What is Agility? -Agile Process-Extreme Programming-Adaptive Software Development-Scrum-Dynamic System Development Method-Crystal-FDD-LSD-Agile Modelling- Agile Unified Process- Tool set for Agile Process</p> <p>Practical component: Explore the tools related to Agile Development and develop a small project using this technology</p> <p>Suggested Readings: Compare the historic models with agile for a business requirement and justify</p> | <p>CO-1 BTL-2</p> |
| <p>MODULE 2: UNDERSTANDING SOFTWARE REQUIREMENTS (12)</p> | |
| <p>Requirements Engineering-Establishing the Groundwork-Eliciting Requirements-Developing Use Cases-Building the requirements Model-Negotiating, validating Requirements-Requirements Analysis-Requirements Modeling on Scenarios, Information -Flow, Behaviors, Patterns and Web apps</p> <p>Practical component: Use any open source software for requirements elicitation, requirements analysis and requirements validation.</p> <p>Suggested Readings: Identify the functional and nonfunctional requirements of a business requirements, justify how to negotiate the requirements when needed for a business requirement</p> | <p>CO-2 BTL-3</p> |
| <p>MODULE 3: SOFTWARE DESIGN CONCEPTS (12)</p> | |
| <p>Design Concepts- Design Process-Design Model-Architectural design- Alternate Architectural Design- Architectural Mapping using data flow- Component level design- component based development-user interface design-webapp interface design-pattern based software design</p> <p>Practical component: Design an architecture diagram and brief its transactional flow for a business requirement. Design a business requirement using UML</p> <p>Suggested Readings: Case Study on Component Based Software Architecture</p> | <p>CO-3 BTL-6</p> |
| <p>MODULE 4: QUALITY MANAGEMENT (12)</p> | |

| | |
|---|---|
| <p>Quality Concepts-Review Techniques- Software Quality Assurance-Software Testing Strategies- Testing Conventional applications- Testing object oriented applications- Testing web applications- Verification and Validation-Software Configuration Management.</p> <p>Practical component: Justify the quality of a web application using the latest testing tools, Identify and demonstrate the role of SCM Manager on a business project</p> <p>Suggested Readings: Classic model of cost of software quality</p> | <p>CO-4</p> <p>BTL-5</p> |
| <p>MODULE 5: MANAGING SOFTWARE PROCESS (12)</p> | |
| <p>Project Management Concepts-Estimation for software Projects-Project Scheduling –Risk Management-Software Reengineering- Reverse Engineering- Software Process Improvement-CMMI- People CMM-Emerging trends in software engineering</p> <p>Practical component: Estimate the budget for the business and conduct project bidding among groups</p> <p>Suggested Readings: Software Process Assessment.</p> | <p>CO-5</p> <p>BTL-6</p> |

| Course Description | Cloud Computing covers the concepts, technology and architecture of Cloud Computing, different cloud service providers, storage infrastructure and Cloud Management, concepts as cloud virtualization technology and cloud, SOA and infrastructure benchmarking | | | | |
| Course Objective | <ol style="list-style-type: none"> 1. To understand the basics of Cloud services and deploy cloud application using cloud platforms 2. To introduce Cloud Models and develop cloud-based applications 3. To provide knowledge in different techniques of Cloud Analytics 4. To Illustrate the use of various cloud system design approaches 5. To evaluate various solutions for cloud computing 6. To be aware of Infrastructure Benchmarking | | | | |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Develop and deploy cloud application using popular cloud platforms 2. Design and develop highly scalable cloud-based applications by creating and configuring virtual machines on the cloud and building private cloud. 3. Explain and identify the techniques of big data analysis in cloud. 4. Compare, contrast, and evaluate the key trade-offs between multiple approaches to cloud system design, and Identify appropriate design choices when solving real-world cloud computing problems. 5. Write comprehensive case studies analysing and contrasting different cloud computing solutions. 6. Understand and use Infrastructure Benchmarking | | | | |

Prerequisites: CSB4218 - Operating Systems, CSB4217 - Computer Networks

CO, PO AND PSO MAPPING

| CO-4 | 2 | 3 | | 1 | 2 | - | | - | 2 | 2 | | - | 1 | 1 | 3 |
| CO-5 | 2 | 2 | 3 | 1 | 2 | | | | 2 | | | - | | 1 | 2 |
| CO-6 | 2 | | 3 | 1 | | | | | 2 | | | | | 1 | |

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE 1: INTRODUCTION (12)

Introduction - Essentials - Benefits - Business and IT Perspective - Cloud and Virtualization - Cloud Services Requirements - Cloud and Dynamic Infrastructure - Cloud Computing Characteristics - Cloud Adoption. Cloud Models - Cloud Characteristics - Measured Service - Cloud Models - Security in a Public Cloud - Public versus Private Clouds - Cloud Infrastructure Self Service.

Practical component: Develop Cloud security solutions

Suggested Readings: Case study on Open Source and Commercial Clouds

**CO-1
BTL-2**

MODULE 2: CLOUD SERVICES AND SOLUTIONS (12)

Gamut of Cloud Solutions - Principal Technologies - Cloud Strategy - Cloud Design and Implementation using SOA - Conceptual Cloud Model - Cloud Service Defined. Cloud Solutions - Introduction - Cloud Ecosystem - Cloud Business Process Management - Cloud Service Management - Cloud Stack - Computing on Demand (CoD) – Cloud sourcing.

Practical component: Deploy cloud applications

Suggested Readings: On-demand self- service

**CO-2
BTL-3**

MODULE 3: CLOUD OFFERINGS AND CLOUD MANAGEMENT (12)

Cloud Offerings - Information Storage, Retrieval, Archive and Protection - Cloud Analytics - Testing under Cloud - Information Security - Virtual Desktop Infrastructure - Storage Cloud. Cloud Management - Resiliency - Provisioning - Asset Management - Cloud Governance - High Availability and Disaster Recovery - Charging Models, Usage Reporting, Billing and Metering

**CO-3
BTL-3**

| | | |
|---|---|-------------------------------|
| Practical component: Deployment and Configuration options in Amazon | | |
| Suggested Readings: Data security and Storage | | |
| MODULE 4: CLOUD VIRTUALIZATION TECHNOLOGY | | (12) |
| Virtualization Defined - Virtualization Benefits - Server Virtualization - Virtualization for x86. Architecture - Hypervisor Management Software - Logical Partitioning (LPAR) - VIO Server - Virtual Infrastructure Requirements - Storage virtualization - Storage Area Networks - Network-Attached storage - Cloud Server Virtualization - Virtualized Data Center | | CO-4 BTL-3 |
| Practical component: Hands on virtualization using XenServer | | |
| Suggested Readings: Data virtualization | | |
| MODULE 5: CLOUD, SOA AND INFRASTRUCTURE BENCHMARKING | | (12) |
| SOA and Cloud - SOA Defined - SOA and IaaS - SOA-based Cloud Infrastructure Steps - SOA Business and IT Services. OLTP Benchmark - Business Intelligence Benchmark - e-Business Benchmark - ISV Benchmarks Cloud Performance Data Collection and Performance Monitoring Commands Benchmark Tools | | CO-5,6 BTL-3 |
| Practical component: Build cloud infrastructure | | |
| Suggested Readings: The Business case for going to the Cloud. | | |

| 1: Weakly related, 2: Moderately related and 3: Strongly related | | | | | | | | | | | | | | | | |
| MODULE 1: INTRODUCTION (12) | | | | | | | | | | | | | | | | |
| Human Computer Interaction –Background – Importance of Human Computer Interaction – Software development and Human Computer Interaction – Display devices – Models of interaction –context of interaction. Practical component: Model the Human Computer Interaction Suggested Readings: Human factors involved in the acceptance of computer interfaces. | | | | | | | | | | | | | CO-1 BTL-2 | | | |
| MODULE 2: USER CAPABILITIES (12) | | | | | | | | | | | | | | | | |
| Users’ physical capabilities – Cognition – Design considerations – Memory - guidelines for interfaces – Memory and learning – Computer Human Systems. Practical component: Develop of comprehensive, friendly and usable human-computer interfaces Suggested Readings: Tangible and embodied user interactions | | | | | | | | | | | | | CO-2 BTL-3 | | | |
| MODULE 3: INTERFACE DESIGN (12) | | | | | | | | | | | | | | | | |
| Principles of Interface Design – Classification of Interaction Styles – Linguistic manipulations – Design Considerations – User Classification and User Types – Design process – Strategies for design representation - Dialogue design notations – Case Studies Practical component: Develop a user interface for games Suggested Readings: Study of standard user interfaces on the Internet | | | | | | | | | | | | | CO-3 BTL-3 | | | |
| MODULE 4: TESTING AND EVALUATION (12) | | | | | | | | | | | | | | | | |
| Importance of Evaluation – Evaluation Techniques –Usability Engineering – Usability Process – Usability Metrics - Socio Technical Design - Ergonomics, Health and Safety – Social Implications Practical component: Apply usability metrics to critically evaluate commercial products Suggested Readings: Evaluation tools | | | | | | | | | | | | | CO-4 BTL-3 | | | |
| MODULE 5: VARIETIES OF INTERACTION (12) | | | | | | | | | | | | | | | | |
| Modeling rich Interactions – Sensor based interactions – Ubiquitous Computing – Virtual and Augmented Reality – Information Visualization. - Multimedia User Interface Design - Mobile Interaction - Human–Computer Interaction and the Web - Human-Centered Design of | | | | | | | | | | | | | CO-5 BTL-3 | | | |

| | |
|--|---|
| <p>Decision- Support Systems -Online Communities -Virtual Environments -Privacy, Security, and Trust: Human– Computer Interaction Challenges and Opportunities</p> <p>Practical component: Develop a modern GUI</p> <p>Suggested Readings: To carry out research on latest human interaction systems and the related technology.</p> | |

| MODULE 1: INTRODUCTION (12) | | | | | | | | | | | | | | | | |
| Introduction: Introduction and Overview of Cyber Crime, Nature and Scope of Cyber Crime, Types of Cyber Crime Social Engineering, Categories of Cyber Crime, Property Cyber Crime. Practical component: Demonstrate using CyberCheckSuite Suggested Readings: Emerging digital crimes. | | | | | | | | | | | | | CO-1 BTL-2 | | | |
| MODULE 2: CYBER CRIME ISSUES (12) | | | | | | | | | | | | | | | | |
| Cyber Crime Issues: Unauthorized Access to Computers, Computer Intrusions, white collar Crimes, Viruses and Malicious Code Internet Hacking and Cracking, Virus Attacks. Practical component: Develop a intrusion detection system Suggested Readings: Credit card and ATM frauds | | | | | | | | | | | | | CO-2 BTL-3 | | | |
| MODULE 3: SOFTWARE PIRACY AND LAWS (12) | | | | | | | | | | | | | | | | |
| Software Piracy, Pornography, Intellectual Property, Mail Bombs, Exploitation, Stalking and Obscenity in Internet, Digital laws and legislation, Law Enforcement Roles and Responses. Practical component: Live Case Studies Suggested Readings: Workload of law enforcement | | | | | | | | | | | | | CO-3 BTL-3 | | | |
| MODULE 4: CYBER CRIME INVESTIGATIONS (12) | | | | | | | | | | | | | | | | |
| Introduction to Cyber Crime Investigation, Investigation Tools, eDiscovery, Digital Evidence Collection, Evidence Preservation. Practical component: Authenticate the evidence Suggested Readings: Multimedia evidence | | | | | | | | | | | | | CO-4 BTL-3 | | | |
| MODULE 5: E-MAIL INVESTIGATION (12) | | | | | | | | | | | | | | | | |
| Investigation: E-Mail Investigation, E-Mail Tracking, IP Tracking, E-Mail Recovery, Hands on Case Studies. Encryption and Decryption Methods, Search and Seizure of Computers, Recovering Deleted Evidences, Password Cracking. Practical component: Develop a intrusion detection system Suggested Readings: Time, registry & password recovery. | | | | | | | | | | | | | CO-5 BTL-3 | | | |

| First Periodical Assessment | Second Periodical Assessment | Seminar/ Assignments/ Project | Surprise Test / Quiz | Attendance | ESE |
| 15% | 15% | 10% | 5% | 5% | 50% |
| Course Description | The aim of the course is to study the fundamental techniques for developing HPC applications, the commonly used HPC platforms, the methods for measuring, assessing and analyzing the performance of HPC applications, and the role of administration, workload and resource management in an HPC management software. | | | | |
| Course Objective | <ol style="list-style-type: none"> 1. Provide systematic and comprehensive treatment of the hardware and the software high performance techniques involved in current day computing. 2. Introduce the fundamentals of high-performance computing with the graphics processing units and many integrated cores using their architectures and corresponding programming environments. | | | | |

| | |
|--|---|
| | <ol style="list-style-type: none"> 3. Introduce the learner to fundamental and advanced parallel algorithms through the GPU and MIC programming environments 4. Provide systematic and comprehensive treatment of the components in the pipeline that extract instruction level parallelism. 5. Provide a strong foundation on memory hierarchy design and tradeoffs in both uniprocessor and multiprocessors. |
|--|---|

| | |
|-----------------------|---|
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. The learner will be able to design, formulate, solve and implement high performance versions of standard single threaded algorithms 2. The learner will know and will be able to demonstrate the architectural features in the GPU and MIC hardware accelerators. 3. The learner will be able to design programs to extract maximum performance in a multicore, shared memory execution environment processor 4. The learner will be able to design and deploy large scale parallel programs on tightly coupled parallel systems using the message passing paradigm |
|-----------------------|---|

Prerequisites: Computer Architecture, Design and analysis of Algorithms

CO, PO AND PSO MAPPING

| CO | PO -1 | PO -2 | PO- 3 | PO- 4 | PO- 5 | PO- 6 | PO- 7 | PO- 8 | PO- 9 | PO - 10 | PO- 11 | PO- 12 | PSO- 1 | PSO- 2 | PSO- 3 |

| | |
|--------------------|--|
| Course Description | This course unit introduces students to basic and advanced approaches to formally build verified trustworthy software systems, where trustworthy comprise five attributes: reliability, availability, safety, resilience and security. |
|--------------------|--|

| | |
|-------------------------|---|
| Course Objective | <ol style="list-style-type: none"> 1. Learn how and why (certain) software defenses can be bypassed 2. Familiarize with exploit development techniques, in order to better understand the boundaries of protection mechanisms and argue about their effectiveness |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Explain software security fundamentals 2. Do code review with a tool 3. Perform Security Testing 4. Identify the Security Gap 5. Analyze the files both statically and dynamically |

Prerequisites: Security Software Engineering

CO, PO AND PSO MAPPING

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE 1: SOFTWARE SECURITY FUNDAMENTALS (9)

Defining a discipline: Security Problems in Software - The three pillars of software security -
The rise of security engineering - Risk Management framework.

Suggested Activity: Study about the common security issues of software

**CO-1
BTL-2**

MODULE 2: TOUCH POINT SOFTWARE SECURITY

(9)

Introduction to software security touch points -Code review with a tool

Suggested Activity: Identify the Seven Touchpoints for Software Security

**CO-2
BTL-3**

MODULE 3: SECURITY TESTING (9)

Software penetration Testing - Risk Based Security Testing - Abuse Cases - Software Security meets security operations

**CO-3
BTL-3**

| | | |
|---|---|-----------------------------|
| Suggested Activity:Experiment with any one of the Penetration Testing Software | | |
| MODULE 4:SOFTWARESECURITYGAP(9) | | |
| Enterprise Software Security Program -Knowledge for software security - Taxonomy of coding errors Suggested Activity:Study about various coding errors | | CO-4 BTL-3 |
| MODULE 5: ANALYSIS OF FILES | | |
| Static and Dynamic analysis of files. Static analysis methods - feature selection, feature extraction and dataset creation - Dynamic analysis methods (use procmon) Suggested Activities:Perform dynamic analysis of malware using procmon | | CO-5 BTL-3 |

| Course Description | This course introduces concepts, metrics, and models in software quality assurance. The course covers components of software quality assurance systems before, during, and after software development. It also discusses the standards and certifications required to assess the Software Quality. | | | | | | | | | | | | | |
| Course Objective | <p>The course enables the students to</p> <ol style="list-style-type: none"> 1. Learn the Software Quality challenges and to develop the Quality Plans. 2. Understand the Quality assurance components in the Project Life cycle. 3. Know the Quality Infrastructure Components. 4. Acquire the knowledge in Quality Metrics. 5. Familiar with the standards and certifications required to assess the Software Quality. | | | | | | | | | | | | | |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Relate to quality assurance plan 2. Apply quality assurance tools & techniques in their project 3. Explain the quality management principles 4. Apply Procedures and work instructions in software organizations 5. Describe the Quality certification Procedure and standards | | | | | | | | | | | | | |
| Prerequisites: Software Engineering | | | | | | | | | | | | | | |

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE1:IMAGEFORMATIONANDIMAGEPROCESSING (9)

Introduction to computer vision-Geometric primitives-2D and 3D transformations-3D to 2D projections- Image formation- Lighting- Reflective and Shading. Histogram Equalization-Linear filtering- Non-Linear Filtering-Morphology-Distance transforms-Interpolation- Decimation.

Practical Component:

- 1.Download and install the latest release of OpenCV. Compile it in debug and release mode
- 2.write a simple OpenCV program that loads an image from disk and displays it on the screen

CO-1
BTL-2

MODULE 2: FEATUREDETECTIONANDTRACKING(9)

Invariance-key points and 3D flow vectors- RANSAC-SIFT, SURF, ORB- Feature evaluation. Tracking and feature updation-Lucas-Kanade tracker-Kalman filter.

Practical Component:

1. write a simple OpenCV program for playing a video file from disk/
2. write a Program to add a trackbar slider to the basic viewer window

CO-2
BTL-2

MODULE 3: SEGMENTATIONANDALIGNMENT(9)

Segmentation- Active contours, Graph based segmentation- Mean shift- Normalized cut. 2D feature based alignment-Least squares-Iterative algorithms-3D alignment -Pose estimation- Geometric intrinsic calibration.

Practical Component:

- 1.Write a program for Loading and then smoothing an image before it is displayed on the screen
- 2.Create a new image that is half the width and height of the input image Using cvPyrDown()

CO-3
BTL-3

MODULE 4: STRUCTURE FROM MOTION AND DENSEMOTIONANALYSIS(9)

Structure from motion (sfm)-Triangulation- Two frame sfm - Bundle adjustment.3Dmotion and 2Doptical flow-The Horn Schunck algorithm-Lucas-Kanade Algorithm-Performance evaluation of optical flow results.

Practical Component:

CO-4
BTL-2

| | | |
|---|---|-----------------------------|
| 1. Write a program to read in a color video and write out the same video in grayscale 2. Create a three-channel RGB image of size 100-by-100. | | |
| MODULE 5: RECOGNITION | | (9) |
| Object detection- Face detection -Pedestrian detection- Face recognition- Eigenfaces- Active appearance and 3D shape models. Category recognition-Bag of words-Part-based models, Recognition with segmentation-Context and scene understanding. Practical Component: Make an application that reads and displays a video and is controlled by sliders. | | CO-5 BTL-3 |

| Course Description | The blockchain technology course allows the students to explore the driving force behind the cryptocurrency Bitcoin. Along with the Decentralization, Cryptography, Bitcoins with its alternative coins, Smart contracts and outside of currencies. | | | | | | | | | | | | | |
| Course Objective | The course will enable the students to 1. Understand how blockchain systems (mainly Bitcoin and Ethereum) work 2. To securely interact with them 3. Design, build, and deploy smart contracts and distributed applications 4. Integrate ideas from blockchain technology into their own projects. | | | | | | | | | | | | | |
| Course Outcome | Upon completion of this course, the students will be able to 1. State the basic concepts of blockchain 2. Paraphrase the list of Consensus 3. Demonstrate and interpret working of Hyperledger Fabric 4. Implement SDK composer tool 5. Demonstrate the supply chain and explain the Digital identity for government | | | | | | | | | | | | | |
| Prerequisites: Basic idea in Networking, finance, Supply chain, Cryptography, Network Security | | | | | | | | | | | | | | |
| CO, PO AND PSO MAPPING | | | | | | | | | | | | | | |
| CO | PO -1 | PO -2 | PO -3 | PO -4 | PO -5 | PO -6 | PO -7 | PO- 8 | PO -9 | PO -10 | PO- 11 | PSO- 1 | PSO- 2 | PSO-3 |

| 1: Weakly related, 2: Moderately related and 3: Strongly related | | | | | | | | | | | | | | |
| MODULE1: INTRODUCTIONTOBLOCKCHAIN (9) | | | | | | | | | | | | | | |
| History: Digital Money to Distributed Ledgers -Design Primitives: Protocols, Security, Consensus, Permissions, Privacy: Blockchain Architecture and Design-Basic crypto primitives: Hash, Signature-Hashchain to Blockchain-Basic consensus mechanisms | | | | | | | | | | | | CO-1 BTL-2 | | |
| Suggested Activity: | | | | | | | | | | | | | | |
| 1. Study about blockchain tools in the Market | | | | | | | | | | | | | | |
| MODULE 2: CONSENSUS(9) | | | | | | | | | | | | | | |
| Requirements for the consensus protocols-Proof of Work (PoW)-Scalability aspects of Blockchain consensus protocols: Permissioned Blockchains-Design goals-Consensus protocols for Permissioned Blockchains | | | | | | | | | | | | CO-2 BTL-2 | | |
| Suggested Activity: | | | | | | | | | | | | | | |
| Implementing consensus algorithm | | | | | | | | | | | | | | |
| MODULE 3: HYPERLEDGERFABRIC(9) | | | | | | | | | | | | | | |
| Decomposing the consensus process-Hyperledger fabric components-Chaincode Design and Implementation: Hyperledger Fabric II:-Beyond Chaincode: fabric SDK and Front End-Hyperledger composer tool | | | | | | | | | | | | CO-3 BTL-3 | | |
| Suggested Activity: | | | | | | | | | | | | | | |
| Practice with simple experiment on Hyperledger | | | | | | | | | | | | | | |
| MODULE 4: USECASEI(9) | | | | | | | | | | | | | | |
| Blockchain in Financial Software and Systems (FSS): -Settlements, -KYC, -Capital markets-Insurance- Use case II: Blockchain in trade/supply chain: Provenance of goods, visibility, trade/supply chain finance, invoice management/discounting | | | | | | | | | | | | CO-4 BTL-2 | | |
| Suggested Activity: | | | | | | | | | | | | | | |
| Implement Digital Identity using smart contract | | | | | | | | | | | | | | |
| MODULE 5: USECASEII(9) | | | | | | | | | | | | | | |
| Blockchain for Government: Digital identity, land records and other kinds of record keeping between government entities, public distribution system / social welfare systems : Blockchain Cryptography : Privacy and Security on Blockchain | | | | | | | | | | | | CO-5 BTL-3 | | |
| Suggested Activity: | | | | | | | | | | | | | | |

| | | |
|--|---|--|
| Implement a digital bank using Ethereum Blockchain | | |

| Course Description | This course focusses on network security and various cryptographic algorithms. Also focuses on email security, firewalls and intruders. |
| Course Objective | <p>The course will enable the students to</p> <ol style="list-style-type: none"> 1. Know the security architecture. 2. Learn symmetric cryptographic algorithms. 3. Understand the public key cryptography. 4. Acquire knowledge in various authentication schemes. 5. Grasp E-mail and system security practices. |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Explain security architecture, threats and vulnerabilities. 2. Implement symmetric cryptographic algorithms 3. Apply the different cryptographic operations of public key cryptography key 4. Apply the various Authentication schemes to authentication applications 5. Recall various Security practices and System security standards |

Prerequisites: Computer Networks

1: Weakly related, 2: Moderately related and 3: Strongly related

MODULE1:INTRODUCTION (9)

Professional Aspects of Security, Need for Security at Multiple levels, Security Policies – Model of network security – Security attacks, services and mechanisms – OSI security architecture – Classical encryption techniques: substitution techniques, transposition techniques, steganography- Foundations of modern cryptography: perfect security – information theory – product cryptosystem– cryptanalysis.

| Course Description | This course introduces concepts, metrics, and models in software quality assurance. The course covers components of software quality assurance systems before, during, and after software development. It also discusses the standards and certifications required to assess the Software Quality. | | | | |
| Course Objective | The course enables the students to <ol style="list-style-type: none"> 1. Learn the Software Quality challenges and to develop the Quality Plans. 2. Understand the Quality assurance components in the Project Life cycle. 3. Know the Quality Infrastructure Components. | | | | |

| | | | | | | | | | | | | | | |
|--|---|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|--------------|--------------|--|---------------|---------------|
| | <p>4. Acquire the knowledge in Quality Metrics.</p> <p>5. Familiar with the standards and certifications required to assess the Software Quality.</p> | | | | | | | | | | | | | |
| Course Outcome | <p>Upon completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1. Relate to quality assurance plan 2. Apply quality assurance tools & techniques in their project 3. Explain the quality management principles 4. Apply Procedures and work instructions in software organizations 5. Describe the Quality certification Procedure and standards | | | | | | | | | | | | | |

| MODULE1:INTRODUCTION (9) | | | | | | | | | | | | | | |
| <p>Project life cycle models-ISO 9001 model-Capability Maturity Model-Project Planning-Project tracking- Project closure. Evolution of Software Economics – Software Management Process Framework: Phases, Artifacts, Workflows, Checkpoints – Software Management Disciplines: Planning / Project Organization and Responsibilities / Automation / Project Control – Modern Project Profiles.</p> <p>Suggested Activities: Combine group of projects as program</p> <p>Suggested Reading: https://www.greycampus.com/opencampus/project-management-professional/basic-concepts-of-project-management</p> | | | | | | | | | | | | <p>CO-1</p> <p>BTL-2</p> | | |
| MODULE 2: COSTESTIMATION(9) | | | | | | | | | | | | | | |
| <p>Problems in Software Estimation – Algorithmic Cost Estimation Process, Function Points, SLIM (Software Life cycle Management), COCOMO II (Constructive Cost Model)</p> | | | | | | | | | | | | <p>CO-2</p> <p>BTL-3</p> | | |

| | |
|--|---|
| <p>– Estimating Web Application Development– Concepts of Finance, Activity Based Costing and Economic Value Added (EVA) – Balanced Score Card.</p> <p>Suggested Activities: Estimate the cost of a project</p> <p>Suggested Reading: http://www.costmanagement.eu/blog-article/what-is-cost-estimation-we-explain-it-to-you-in-4-steps</p> | |
| <p>MODULE 3: SOFTWARE QUALITY MANAGEMENT(9)</p> | |
| <p>Software Quality Factors – Software Quality Components – Software Quality Plan – Software Quality Metrics – Software Quality Costs – Software Quality Assurance Standard – Certification – Assessment.</p> <p>Suggested Activities: Estimate the cost of a project</p> <p>Suggested Reading: https://www.tutorialspoint.com/software_testing_dictionary/quality_management.htm</p> | <p>CO-3</p> <p>BTL-2</p> |
| <p>MODULE 4: SOFTWARE MANAGEMENT AND METRICS(9)</p> | |
| <p>Software Configuration Management – Risk Management: Risk Assessment: Identification / Analysis / Prioritization – Risk Control: Planning / Resolution / Monitoring – Failure Mode and Effects Analysis (FMEA)– Defect Management – Cost Management. Software Metrics – Classification of Software Metrics: Product Metrics: Size Metrics, Complexity Metrics, Halstead’s Product Metrics, Quality Metrics, and Process metrics. Suggested Reading: https://www.sealights.io/software-development-metrics</p> | <p>CO-4</p> <p>BTL-2</p> |
| <p>MODULE 5: PROJECT EVALUATION AND EMERGING TRENDS(9)</p> | |
| <p>Strategic Assessment–Technical Assessment–Cost Benefit Analysis–Cash Flow Forecasting–Cost Benefit Evaluation Technique–Risk Evaluation–Software Effort Estimation. Emerging Trends: Import of the internet on project Management – people Focused Process Models.</p> <p>Suggested Reading: https://apps.dtic.mil/dtic/tr/fulltext/u2/a196916.pdf</p> | <p>CO-5</p> <p>BTL-2</p> |
