# Escape the ordinary

Enjoy life-changing adventures in the outdoors, which bring out the potential in every child.

Combining a variety of activity sessions, from aerial adventures to fun problem-solving initiatives, you'll enjoy a daily programme that encourages your pupils to bond and work together as a team. We'll build your programme from our range of physically and mentally challenging activities, tailored to the age of your pupils to provide you with an exciting and memorable outdoor adventure.

At the core of every Kingswood programme are three learning outcomes: confidence, resilience, and life skills. These are designed to support the Ofsted framework and allow teachers to demonstrate character development as part of their broad and balanced curriculum.

**Skills Builder**

Practising  
essential skills

2023-24

## Skills Builder-accredited

Our key programmes for schools have been awarded Skills Builder Impact Level 3. This means we successfully deliver development of all eight skills deemed essential for success in education, work and life: listening, speaking, problem solving, creativity, staying positive, aiming high, leadership and teamwork. Most importantly, we understand the lifelong impact that a Kingswood experience can have on young people, and so our staff are fully trained to deliver activities that are matched to specific learning outcomes.

## Backed by research

For over 40 years, Kingswood has been harnessing and perfecting the power of outdoor adventure education, using the great outdoors as a vehicle for personal development. We are partnered with academic bodies to drive forward pedagogic research that inform our programme design and delivery.

“Kingswood is an outstanding venue for a school trip. We are always made to feel so welcome, the children have an amazing experience and always come away with memories that will last forever. We would highly recommend Kingswood to any school.”
