

Migration | PayPal Plus → PayPal Checkout

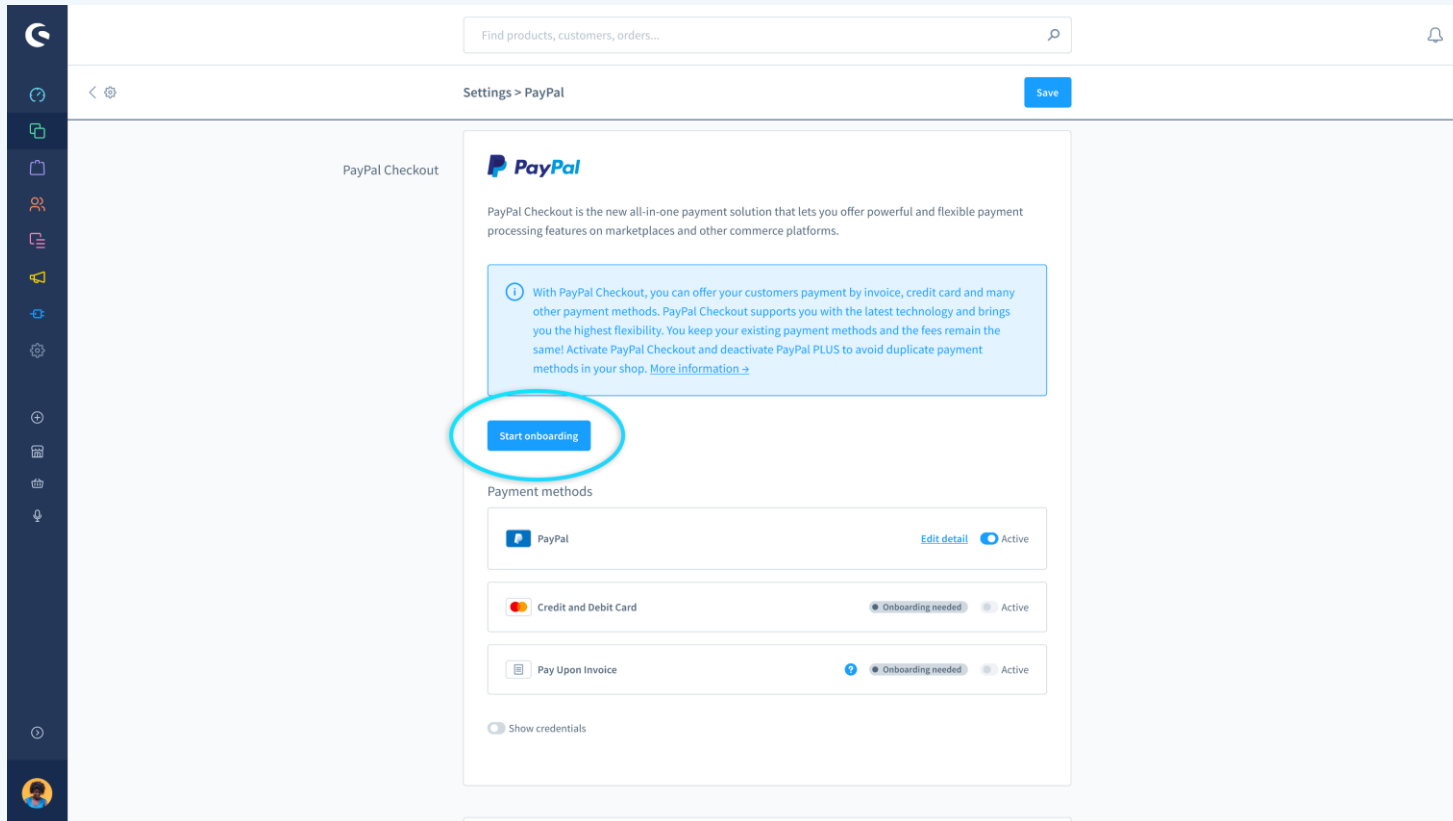

# Step 1

✓ Open the "Extensions" section in the settings of your shop and select "PayPal".

i To use PayPal Checkout, you must have installed the latest version of the PayPal plug-in in your shop and have a PayPal account.

# Step 2

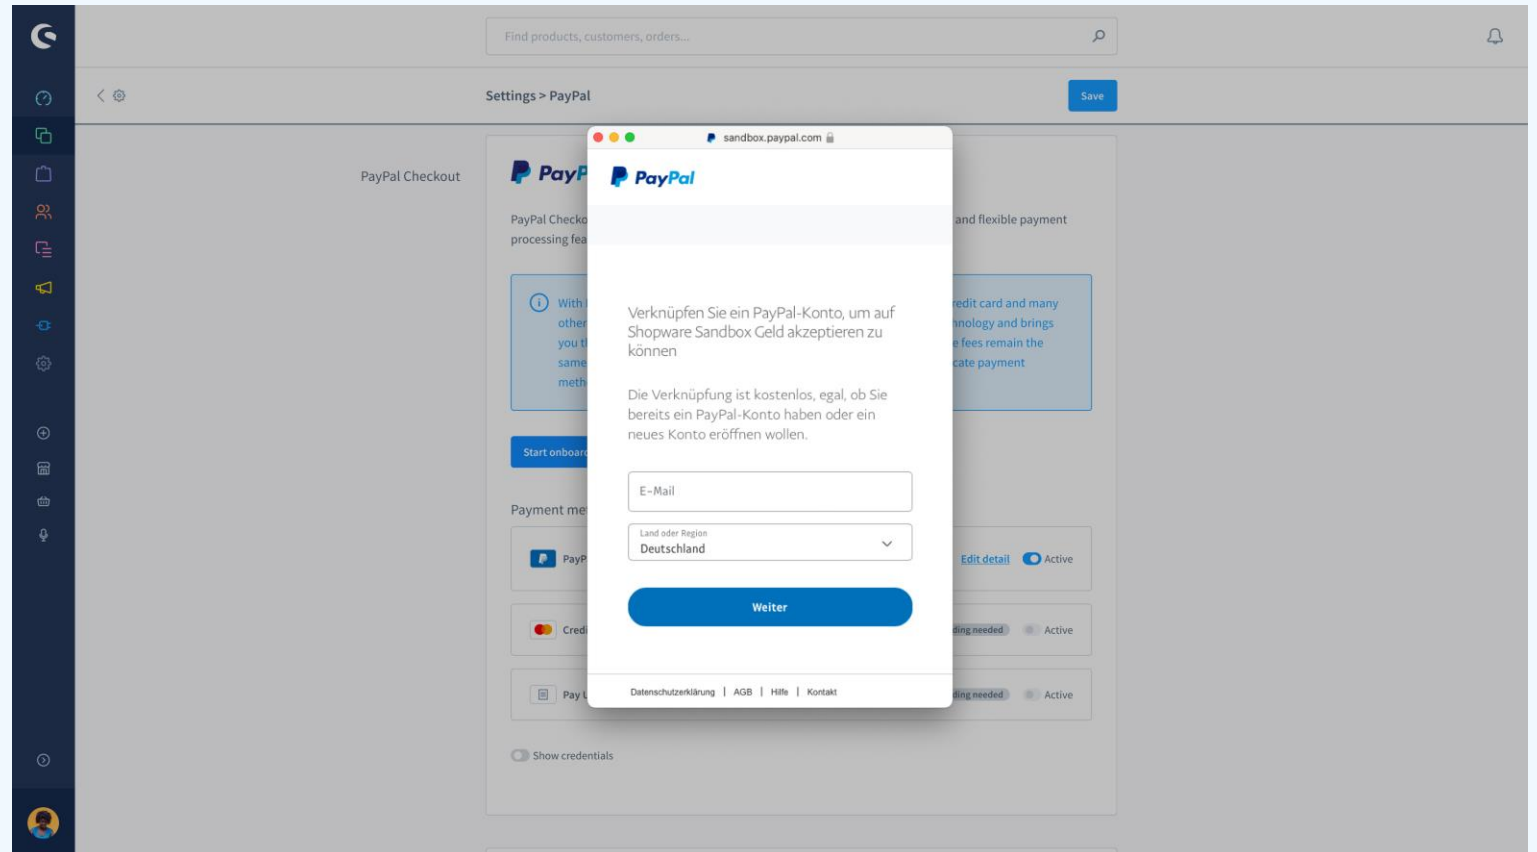

✓ Among other features you will see a new section called "PayPal Checkout".

Start the onboarding by clicking on "Start onboarding".

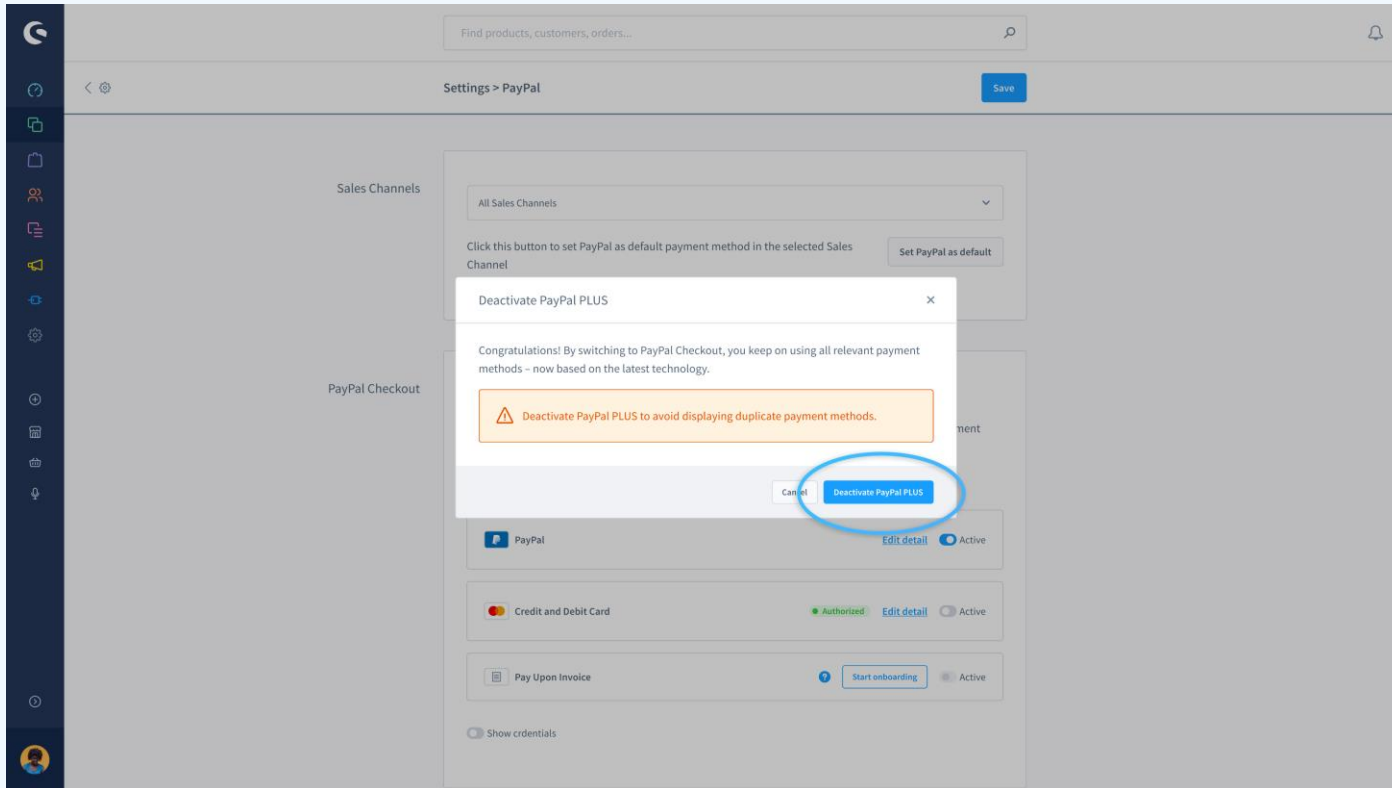

i You have to pass a one-time onboarding process to activate PayPal Checkout and the associated payment methods.

# Step 3

- ✓ Go through the onboarding process of PayPal. You will then be taken back to your store.
- 💡 The onboarding starts in a new mini browser window.
- 💡 You will need your PayPal login data.
- ! Make sure that your browser does not block pop-ups.

# Step 4

After completing the onboarding process, you will be given the option to deactivate PayPal PLUS.

We recommend deactivating PayPal PLUS immediately, as otherwise, your customers may be offered payment methods such as "purchase upon invoice" more than once.

To do this, click on "Deactivate PayPal PLUS".

After deactivation, you can not reactivate PayPal PLUS.

# Step 5

✓ You then have the option of activating or deactivating individual PayPal Checkout payment methods for your shop.

💡 If an individual payment method could not be onboarded for you, you can start the process again here.

📘 If a payment method cannot be onboarded for you, don't hesitate to contact PayPal.
