This video is a step-by-step process in assembling the Razer Iskur gaming chair.

To start, take out all the components on the chair from the box.

The gaming chair is heavy. Please lift it with caution.

Take the screws "L" and hex key "P".

Attach the backrest "A" to seat "C".

Use the hex key "P" to fasten the screws "L" on the support brackets.

Repeat for both sides.

Using the screws "K", fasten the side covers "F" and "G" with the hex key.

Repeat for both sides.

Cover the screws "K" with plastic screw caps "O" and "N".

Repeat for both sides.

With the chair turned upside down, clip the lumbar cord and slide in the lumbar support lever to its holder.

Using the screws "K" and "M", fasten the tilt mechanism "H" on seat "C".

Prepare the caster wheels "E".

Push each caster wheel "E" on the slots of the wheelbase "B" to click in.

Flip the wheelbase.

Insert the cylinder "J" on the wheelbase and cover it with the cylinder cover "I".

Attach and tighten the wheelbase to the chair.

Fasten the strap of the head cushion "D" to backrest "A".

There you have it. You have now assembled the Razer Iskur gaming chair.
