## The AZEK® Company Unveils New Product Innovations for 2024, Expanding its Industry-Leading Outdoor Living and Home Exteriors Portfolio

**Chicago, Nov. 17, 2023 /Business Wire/** -- [The AZEK Company Inc.](#) (NYSE: AZEK) ("AZEK" or the "Company"), the industry-leading manufacturer of beautiful, low-maintenance and environmentally sustainable outdoor living products, announces a new suite of offerings from its TimberTech®, AZEK Exteriors® and StruXure™ brands, including the debut of an innovative aluminum framing product, new decking and porch colors, expanded railing offerings, a new siding product, and a Cabana X® model now available with a modular design.

"We are excited to announce the addition of several new and innovative decking, railing and exteriors products to the AZEK portfolio for 2024, supporting customer demand for more style, design and performance options while also keeping contractor productivity and efficiency top of mind," said Jesse Singh, CEO of The AZEK Company. "Notably, we have expanded our offering of products with Class A Flame Spread – the best possible fire rating – and products that comply with the California Wildland Urban Interface building codes. Our new TimberTech Aluminum Framing product combined with our TimberTech Advanced PVC Vintage Collection® decking now offers homeowners a complete decking and framing solution for those living in fire prone regions and offers contractors a framing option that is easier, more predictable and more efficient to install than wood."

Many of AZEK's distributor, dealer and contractor partners were given an advanced preview of the new products during events held in conjunction with this year's TimberTech Championship, a PGA TOUR Champions event, in Boca Raton, Florida. The new products are already available in some geographic markets and will be broadly and commercially available starting in 2024.

"We are strengthening our already strong position with pro contractors and supporting homeowners in every step of their journey to create beautiful, low-maintenance and sustainable outdoor living spaces. We believe that our commitment to new product development combined with our unmatched material science expertise and proprietary production technologies continues to drive our position as the industry leader in innovation, design, best-in-class aesthetics and performance," continued Singh.

### **TimberTech Composite Terrain+ Collection™ – New and Improved**

Through proprietary technology, TimberTech material scientists have developed more sophisticated aesthetics featuring multi-color variegation and more realistic emboss patterns, while still maintaining the superior, scratch-resistant durability of the original Terrain® Collection. Featuring protective 4-sided capping, the Terrain+ Collection will continue to stand out as a superior choice in scalloped-back decking for contractors, dealers and consumers. The palette includes three new on-trend colors, including Weathered Oak, Natural White Oak, and Dark Oak – each delivering a sophisticated, versatile and natural wood look. TimberTech's Composite decking is sustainably manufactured with up to 85% recycled content.

## **TimberTech Aluminum Framing – New Portfolio Addition**

A modern, better performing alternative to traditional wood framing for decks, TimberTech's Aluminum Framing offers notable benefits to both deck builders and homeowners. Homeowners get a solid deck substructure that will not split, rot or decay, meaning a long life and 25-year limited product warranty. Builders are provided a full solution with engineered components designed to work together and install easily. Compatible with all TimberTech Decking and Railing systems, TimberTech's Aluminum Framing is made in part from recycled aluminum and can be reused or recycled at end of life. And, because it's made of aluminum, it's a better choice for fire-prone regions than wood framing.

## **TimberTech Advanced PVC Porch Collection – New Colors Available**

The TimberTech Advanced PVC Porch Collection features an innovative tongue-and-groove installation that allows for smaller gaps between boards, which delivers a traditional hardwood flooring look that is perfect for any homeowner's porch surface. The popular English Walnut® and Cypress® colors in TimberTech's Advanced PVC Vintage Collection® of decking will now be available in both standard width (3.125") and wide-width (5.5") tongue-and-groove profiles for porch applications.

## **TimberTech Advanced PVC Riser Board - New Portfolio Addition**

As an alternative to using fascia or wide-width decking, TimberTech's new Advanced PVC Riser Boards can provide a finished, cohesive look to any deck. Built to withstand the elements just like TimberTech's Advanced PVC Decking, our Riser Boards offer enhanced durability and unparalleled aesthetics.

## **Collated Cortex® Plugs for TimberTech Composite Decking – New Portfolio Addition**

The most aesthetically pleasing, top-down hidden fastening system is now even more convenient. With material-matched plugs made of the same decking as the surface boards and pre-aligned grain patterns to completely blend in, collated Cortex plugs are now available for use in all TimberTech full-profile Composite collections and colors.

## **TimberTech Railing Horizontal Cable Infill for Impression Rail Express® – New Portfolio Addition**

Made from powder-coated aluminum, TimberTech's Impression Rail Express delivers a durable, corrosion-resistant aluminum design with stylish, wrought-iron-inspired aesthetics. Plus, with its pre-assembled, panelized design, TimberTech's aluminum railing is simple and straightforward to install. With the highly desired Horizontal Cable infill option and no exposed hardware, homeowners can enjoy an almost unobstructed view.

## **TimberTech Invite Collection™ Lounge Rocker – New Portfolio Addition**

The TimberTech Invite Collection of outdoor furniture has a new member, and it is sure to become an instant classic. Introducing the new Lounge Rocker, a stylish evolution of the Adirondack Chair, perfected in a rocking chair format and made with a minimum of 25% post-consumer recycled material. Like all TimberTech products, the focus is on beauty, longevity, and sustainability. With TimberTech's Invite Collection, homeowners and consumers can expect comfort, no special maintenance, and years of enjoyment.

## **AZEK Exteriors Bevel Siding – New Portfolio Addition**

AZEK's new Bevel Siding continues the brand's expansion into the siding category and perfectly pairs with AZEK's existing & expansive line of Trim & Moulding. When complemented by AZEK Trim, AZEK Bevel delivers a full-wrap solution that mimics the design aesthetic of a classic American home with cedar siding, but now with the truly low-maintenance performance of rot-proof PVC. With a Lifetime Limited Warranty and superior performance benefits, AZEK Bevel Siding is ideal for new custom home construction looking to mimic the traditional look in high-moisture climates, coastal settings and four-season regions, and the best option for repair and remodel of homes with cedar siding.

## **AZEK Exteriors Pre-finished Siding & Trim – Now Available in More U.S. Markets**

AZEK's Pre-finished Siding & Trim is now available in more geographic markets in partnership with some of our largest distribution partners across the mid-west, south central and western regions. The increased availability expands AZEK's footprint in the siding category by offering pre-finished siding which is the preferred installation choice for both repair & remodel and new home construction in various markets. AZEK's Pre-Finished Siding & Trim is made from rot-proof and moisture resistant PVC and enhanced with AZEK's proprietary PaintPro® technology to achieve superior paint adhesion. Automated painting with top-tier, solar reflective coatings are machine applied and cured in a controlled environment. The result: A finish superior to anything painted in the field and a product that performs better than wood, without worries about rot, splintering, and warping. Exclusive color collections are available by region and each product in the collection maintains a Class A Flame Spread Rating, making it a better choice for fire zones.

## **Cabana X MOD – New Portfolio Addition**

Originally launched in 2022, Cabana X is the ultimate high-quality, high-tech, ultra-versatile cabana. The 10' x 10' footprint of Cabana X was designed to go wherever needed and provides protection from the elements via remotely controlled louvers and accessories that deliver both comfort and shelter. Now with the innovation of the Cabana X MOD extensions, you can expand a custom covered space in any direction with the same Cabana X ease and quality. Appropriate for both homeowner and commercial spaces, Cabana X MOD offers adaptive configurations, customizable amenities and flexible layouts as well as simple and straightforward assembly that's permit-free in most locations.

"We are at the forefront of home design trends, inspiring and validating consumer preferences for real wood looks with a portfolio of outdoor living and home exterior products that offer the most convincing aesthetics combined with engineered performance," said Sam Toole, Chief Marketing Officer of The AZEK Company. "Because products across our portfolio are made in part from recycled waste and scrap material, we are supporting consumers' growing desire to live their lives more sustainably while keeping hundreds of millions of pounds of waste and scrap out of landfills each year and revolutionizing our industry."

## SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This release contains or refers to certain forward-looking statements within the meaning of the federal securities laws and subject to the "safe harbor" protections thereunder. Forward-looking statements are statements about future events and are based on our current expectations. These forward-looking statements may be identified by the words "believe," "hope," "expect," "intend," "will," "target," "anticipate," "goal" and similar expressions. Our forward-looking statements include, without limitation, statements about potential new products and product innovation and statements with respect to our ability to meet the future targets and goals we establish, including our environmental, social and governance goals, and the ultimate impact of our actions on our business as well as the expected benefits to the environment, our employees, the communities in which we do business or otherwise. We base our forward-looking statements on information available to us on the date of this release, and undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of changed circumstances, new information, future events or otherwise, except as may otherwise be required by law. Actual future events could also differ materially due to numerous factors that involve substantial known and unknown risks and uncertainties including, among other things, the risks and uncertainties set forth under "Risk Factors" and elsewhere in our reports on Form 10-K and Form 10-Q and the other risks and uncertainties discussed in any subsequent reports that we file with the Securities and Exchange Commission from time to time. Although we have attempted to identify those material factors that could cause actual results or events to differ from those described in such forward-looking statements, there may be other factors that could cause actual results or events to differ from those anticipated, estimated or intended. Given these uncertainties, investors are cautioned not to place undue reliance on our forward-looking statements.

### About The AZEK® Company

The AZEK Company Inc. (NYSE: AZEK) is the industry-leading designer and manufacturer of beautiful, low maintenance and environmentally sustainable outdoor living products, including TimberTech® decking and railing, AZEK® trim and siding, Versatex® trim, and StruXure™ pergolas. Consistently recognized as a market leader in innovation, quality and aesthetics, our products are made from up to 85% recycled material and primarily replace wood on the outside of homes, providing a long-lasting, eco-friendly and stylish solution to consumers. Leveraging the talents of its approximately 2,000 employees and the strength of relationships across its value chain, The AZEK Company is committed to accelerating the use of recycled material in the manufacturing of its innovative products, keeping millions of pounds of waste out of landfills each year, and revolutionizing the industry to create a more sustainable future. The AZEK Company has recently been named one of America's Climate Leaders by USA Today, a Top Workplace by the Chicago Tribune and a winner of the 2023 Real Leaders® Impact Awards. Headquartered in Chicago, Illinois, the company operates manufacturing and recycling facilities in Ohio, Pennsylvania, Idaho, Georgia, Nevada, New Jersey, Michigan and Minnesota.
