1:10	22	12.7	13.6	14.7	15.8	17.2	18.7	20.4
1:11	23	12.7	13.6	14.6	15.8	17.1	18.6	20.3
2: 0	24	12.7	13.6	14.6	15.7	17.0	18.5	20.3

WHO Child Growth Standards

Note: If a child aged less than 2 years is measured standing up, change the height to length by adding 0.7 cm BEFORE calculating BMI, because the BMI-for-age for Birth to 2 years is based on length. For children 2 to 5 years measured lying down, convert length to height by subtracting 0.7 cm BEFORE calculating BMI for application of the BMI-for-age chart.
