Hello.

Welcome to your new MacBook Pro.
Let us show you around.

This guide shows you what's on your Mac, helps you set it up, and gets you up and running with tips for the apps you'll use every day.

Your battery is charged and ready to go, so you can start using your Mac straight out of the box. When you do recharge the battery, you'll know it's fully charged when the orange light on your power connector turns green.

Security slot

SuperDrive
Reads and writes CDs and DVDs

Multi-Touch trackpad

To learn more about the battery, go to www.apple.com/au/batteries.

Let's get started

Press the power button to start up your MacBook Pro, and Setup Assistant guides you through a few simple steps to get you up and running. It walks you through connecting to your Wi-Fi network and creating a user account. And it can transfer your documents, email, photos, music and movies to your new Mac from another Mac or PC.

Sign in with your Apple ID in Setup Assistant. This sets up your account in the Mac App Store and the iTunes Store, and in apps like Messages and FaceTime, so they're ready the first time you open them. It also sets up iCloud, so apps such as Mail, Contacts, Calendar and Safari have all your latest information. If you don't have an Apple ID, create one in Setup Assistant.

To learn more about transferring files to your new Mac, go to support.apple.com/en-au/HT6408.

Control your Mac with Multi-Touch gestures
You can do a lot on your MacBook Pro using simple gestures on the trackpad.
Here are some popular gestures. To learn more, choose System Preferences
in the Dock, and then click Trackpad.

●   **Click**
    Press anywhere on the trackpad.

●● **Secondary click (right click)**
    Click with two fingers to open shortcut menus.

↑↑ **Two-finger scroll**
    Brush two fingers along the trackpad to scroll up,
    down, or sideways.

↔   **Swipe to navigate**
↔   Swipe with two fingers to flip through web pages,
    documents and more.

Get to know your desktop

The desktop is where you can find everything and do anything on your Mac. The Dock at the bottom of the screen is a place to keep the apps you use most. It's also where you can open System Preferences, which lets you customise your desktop and other settings. Click the Finder icon to get to all your files and folders.

The menu bar at the top has useful information about your Mac. To check the status of your wireless Internet connection, click the Wi-Fi icon. Your Mac automatically connects to the network you chose during setup. You can also find anything on your Mac and look up information using Spotlight.

Help menu   Menu bar   Wi-Fi   Spotlight

Finder   Dock   System Preferences

Find the app you want
Your Mac comes with great apps you can use to make the most of your photos, create documents, browse the web and more. Use Launchpad to easily find all the apps on your Mac. Arrange apps any way you want and even group them in folders.

Find new apps on the Mac App Store. When you download an app you like, it appears in Launchpad. The Mac App Store lets you know when app and OS X updates are available, and can update them automatically.

Open Launchpad
Click the icon
in the Dock.

Folders
Group apps by dragging
one on top of another.

Browse the Mac App Store
Click the icon in the Dock.

MacBook Pro

Your data, up to date, on all your devices
iCloud lets you access your music, photos, calendars, contacts, documents and more from your Mac, iOS devices, and even your PC. It keeps everything up to date automatically.

Create a Pages document, take a photo or buy a song with one device, and it's instantly available on all the others. With iCloud Drive, you can store your files in iCloud and organise them any way you like. Family Sharing makes it easy to share family members' iTunes Store, App Store and iBooks Store purchases. iCloud helps you locate and protect your Mac if you misplace it. To choose the iCloud features you want, click System Preferences in the Dock, then click iCloud.

Use your Mac and iOS devices together

When you sign in to iCloud on your Mac and iOS devices,* they recognise when they're near each other, enabling amazing features. You can make and receive iPhone calls on your Mac, using your Mac as a speakerphone. SMS messages sent to your iPhone appear in Messages on your Mac, so you can keep track of all your conversations. With Instant Hotspot, your Mac can automatically use the personal hotspot on your iPhone. And with Handoff, you can start an activity on your Mac and pick it up where you left off on your iOS device — and vice versa.

iPhone calls
Make an iPhone call or send a text message by clicking a phone number on your Mac.

Handoff
An app icon appears in the Dock when an activity is handed off to your Mac.

![Safari icon] **Safari**

Safari is the best way to surf the web on your Mac. Just click in the Smart Search field and see icons for your favourite websites, or type a search term or web address — Safari knows the difference and will send you to the right place. You can save web pages to your Reading List to read later, and pin the websites you visit often, so they are open, up to date and easy to access. The Tab view organises all your tabs and makes it easy to locate the one you're looking for.

Sidebar
Your bookmarks, Reading List and Shared Links appear in the Sidebar.

Favourites view
Click the Smart Search field to see icons for your favourite websites.

Share
Easily send web pages or share them with your social networks.

Mail

Mail lets you manage all your email accounts from a single, ad-free inbox. It works with popular email services like iCloud, Gmail, Yahoo Mail and AOL Mail. With Mail Drop, large attachments are automatically uploaded to iCloud. And Markup

lets you fill out and sign forms or annotate a PDF. You can even delete or mark messages as read or unread with a swipe on your trackpad. The first time you open Mail, Setup Assistant helps you get started.

One-stop email
View all your accounts in Mail.

Swipe to manage
Swipe with two fingers to manage your inbox.

Search
Quickly narrow search results to find exactly what you want.

Calendar

JUN 8

Keep track of your busy schedule with Calendar. You can create separate calendars — one for home, another for school and a third for work. See all your calendars in a single window, or choose to see just the ones you want. Create and send invitations to events, then see who has responded. Add a location to an event, and Calendar will include a map and the weather forecast, calculate travel time, and alert you when it's time to leave. Use iCloud to automatically update calendars on all your devices or share calendars with other iCloud users.

Add an event
Click + to quickly create a calendar event.

Event inspector
Calendar shows an event's location on a map and calculates travel time.

Calendar view
Select the view you prefer — day, week, month or year.

Messages

Just log in with your Apple ID, and you can send and receive both iMessage and SMS messages, including text, photos, videos and more, to your friends on a Mac, iPad, iPhone or iPod touch. With iMessage, you can even start a conversation on one device and pick it up on another. You can easily start and manage group conversations, including adding a title and new participants. And if you want to talk to someone face to face, you can start a FaceTime video call* from a conversation in Messages.

Replies in progress
Three dots mean your friend is typing a reply.

Manage conversations
Click Details to start a FaceTime call or see the attachments from your conversation.

Delivery receipts
See when your message has arrived.

*Requires FaceTime-enabled device for both caller and recipient. Not available in all areas.

![Maps icon] **Maps**

Explore new destinations and get directions on your Mac with Maps. View locations using standard or satellite imagery, or use Flyover to soar through selected cities in photorealistic 3D. You can look up information for local points of interest like restaurants and hotels, and Maps shows you phone numbers, photos and Yelp reviews. Once you find your destination, Maps provides point-to-point directions for driving, walking, or even public transport (in selected cities) that you can send to your iPhone for navigation on the go.

Directions
Maps provides detailed directions, including traffic information.

Transport
Map your route using bus, train, subway or ferry.

Send to iPhone
Send directions to your iPhone for voice navigation on the way there.

Spotlight

Spotlight is an easy way to find anything on your Mac — documents, contacts, apps, messages and more. No matter what you're doing on your Mac, you can access Spotlight through its menu icon or by using the Command-Space keyboard shortcut. Just start typing, and

Spotlight shows you rich previews of your results. You can use Spotlight to look up information from sources like Wikipedia, Bing, Maps, movies, weather, stocks, sports and more,* and to convert currencies and units of measure.
Results
See Spotlight results on the left and scroll through them.

Previews
Interact with previews right from Spotlight.

Easy access
Click the Spotlight icon in the menu bar or press Command-Space.

*Not all features are available in all areas.

![iTunes icon] **iTunes**

iTunes makes it easy to enjoy your music, movies, TV shows and more. The iTunes app on your Mac includes the iTunes Store, where you can discover classics or new favourites.

It also features Apple Music — a revolutionary music service, Beats 1 live radio, and Connect, where fans can interact with their favourite artists.
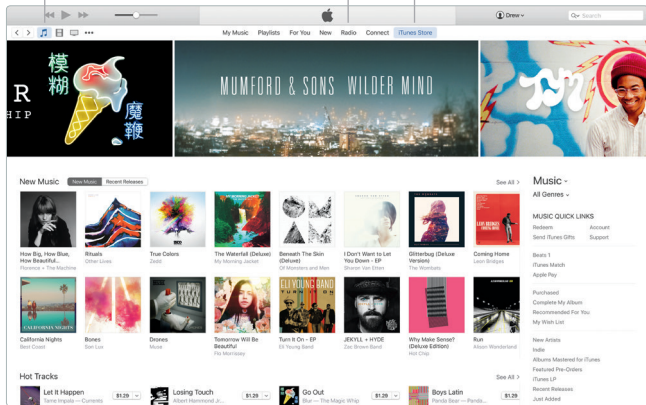

Your library
Organise and enjoy your music, movies, TV shows, podcasts and more.

Apple Music
Subscribe to choose from millions of songs. Listen to Beats 1 live radio. Connect with your favourite artists.

iTunes Store
Discover and buy new music, movies, TV shows and more.

Photos, iMovie and GarageBand

Photos, iMovie and GarageBand give you amazing ways to create and share your photos, movies and music. Photos automatically keeps your library organised and helps you create gorgeous photo books, cards and calendars. And with iCloud Photo Library, you can keep your entire collection of photos and videos in iCloud and view them on all your devices. iMovie lets you turn your home videos into beautiful movies and epic Hollywood-style trailers. And GarageBand has everything you need to learn to play an instrument, write music or record a song.

Photos
Photos are automatically organised by date and location.

Projects
Easily create and order personalised books, cards and calendars.

Share
Post your favourites to Facebook or share them with iCloud or Messages.

Photos

Pages, Numbers and Keynote

Create stunning documents, spreadsheets and presentations on your Mac. Beautiful templates give you a great head start — simply add your own words and photos. And customising everything is a snap with the context-sensitive Format Panel. You can even open and edit Microsoft Office files. And you can quickly and easily share a link to your work with Mail or Messages, straight from your toolbar.

Add graphics and more
Create media-rich documents with images, movies, charts and more.

Share
Easily share a link to your work with Mail or Messages.

Format Panel
Your tools are just a click away with the intelligent Format Panel.

Pages

Back up your data

You can back up your MacBook Pro using Time Machine with an AirPort Time Capsule (sold separately). Open System Preferences and click the Time Machine icon to get started.

An important note

Please read this document and the safety information in the *Important Product Information Guide* carefully before you first use your computer.

Learn more

You can find more information, watch demos and learn even more about MacBook Pro features at www.apple.com/au/macbook-pro.

Help

You can find answers to your questions, as well as instructions and troubleshooting information, in Mac Help. Click the Finder icon, click Help in the menu bar, and choose Mac Help or "Get to know your Mac".

OS X Utilities

If you have a problem with your Mac, OS X Utilities can help you restore your software and data from a Time Machine backup or reinstall OS X and Apple apps. If your Mac detects a problem, open OS X Utilities by restarting your computer while holding down the Command and R keys.
