

UL 1995 Transition to UL 60335-2-40

UL 60335-2-40, first edition published

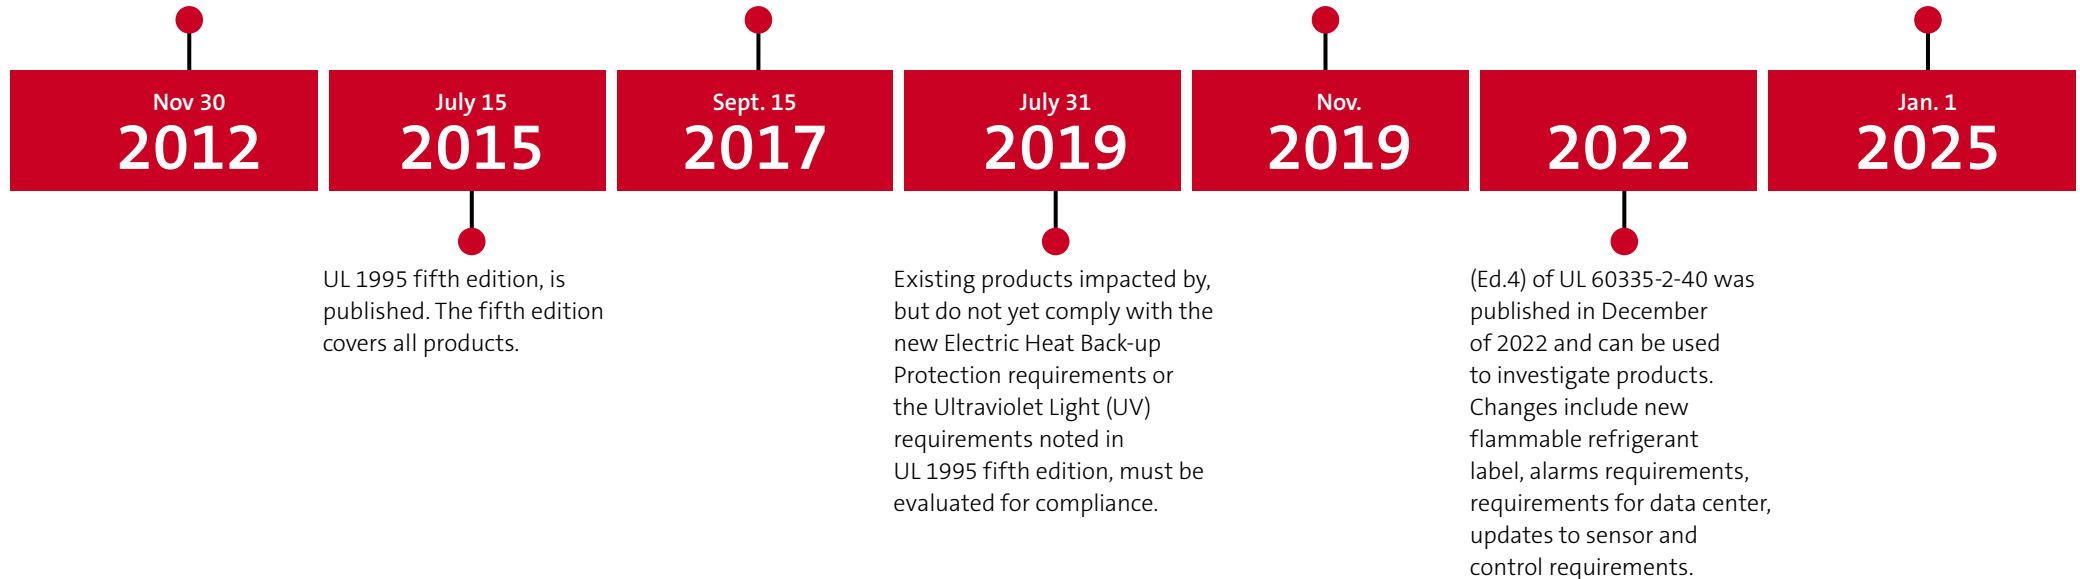

- Covers products rated less than 600 Volts.
- Does not include requirements for the use of A2 and A3 (flammable) refrigerants.

UL 60335-2-40 second edition, is published

- Includes requirements for air-conditioners rated up to 15 kV, partial units, and revised electric heat requirements.
- Includes requirements for the use of A2 and A3 (flammable) refrigerants.

UL 60335-2-40 third edition is published. This edition contains A2L refrigerant specific requirements. The scope aligns with UL 1995

- After Jan. 1, 2025 the American Innovation and Manufacturing (AIM) Act will prohibit the manufacturing and importing of products containing refrigerants and blends with a GWP of greater than 700.
- All A2L products shall be evaluated with UL 60335-2-40.
- Products may be UL Listed to either UL 1995 or UL 60335-2-40 from now up until this date.

Currently, manufacturers may have UL 1995 Certified products evaluated to UL 60335-2-40. UL 1995 will remain a valid certification standard through January 1, 2025. At that time, UL 1995 will no longer be used to certify new products.
