

# Dietrich School District No. 314

2000

## INSTRUCTION

### Goals

Dietrich School District recognizes the importance of the Idaho State Standards and the Curriculum Alignment process. The incorporation of the Standards/Curriculum Alignment Process into the instructional program of the Dietrich School District will proceed in a manner consistent with sound educational practices.

The academic program will place a strong emphasis on:

- Communication skill
- Technology education
- Work force skills
- Math applications
- Basic curriculum (foreign languages, social studies, health, and science.)

The goal of this process is increased student achievement.

Objectives for educational programs are:

- To foster self-discovery, self-awareness, and self-discipline.
- To develop awareness of and appreciation for cultural diversity.
- To stimulate intellectual curiosity and growth.
- To provide fundamental career concepts and skills.
- To help students develop sensitivity to the needs and values of others and respect for individual and group differences.
- To help each student strive for excellence and instill a desire to reach his or her fullest potential.
- To develop a base of fundamental skills for lifelong learning.
- To be free of any sexual, cultural, ethnic, or religious bias.

Administrative personnel are responsible for apprising the Board on the current and future status of the District's educational programs. The Superintendent should prepare periodic reports including:

- A review and evaluation of the present curriculum;
- A projection of curriculum and resource needs;
- An evaluation of, and plan to eliminate, any sexual, cultural, ethnic, or religious bias that may be present in the curriculum or instructional materials and methods;
- A plan for new or revised instructional program implementations; and
- A review of present and future facility needs.
