Fact Sheet

AUTOMOTIVE REGIONS ALLIANCE (ARA) European Committee of the Regions

The Automotive Regions Alliance is a political network of regions committed to the successful transition of the European automotive and supply industry. It aims to bring together regions with a strong automotive and supply sector that want to play an active role in decarbonizing the transport sector and to contribute to the objectives of the European Green Deal, while strengthening regional industrial ecosystems and value creation.

The goal of the Alliance is to ensure that the sustainable transformation of road transport and the automotive sector in the EU leaves no region behind and to secure economic and social cohesion in every European region impacted by the transition.

The Alliance was founded in June 2022 on the initiative of the European Committee of the Regions. Since then, it is working closely together with the Committee of the Regions Automotive Intergroup on a successful transformation of the automotive sector.
