# *Capture for PTMS*

## Quickly scan tax bills and assessment notices into CSC PTMS®

Increase efficiency by avoiding manual data entry on tax bills and assessment notices.

## Why you need it

CSC Capture for PTMS® utilizes optical character recognition technology to pull data from tax bills and assessment notices and transfer that information into PTMS.

Capture reduces keystrokes and minimizes errors by automatically reconciling tax bills and assessment notices with data in PTMS.

Users have instant access to corresponding scanned images through both PTMS and web-based document management software.
