Getting to know your Echo

Tap detection
(deactivates when
microphones are off)

Microphone on/off

Volume

Action button

Threaded
universal mount
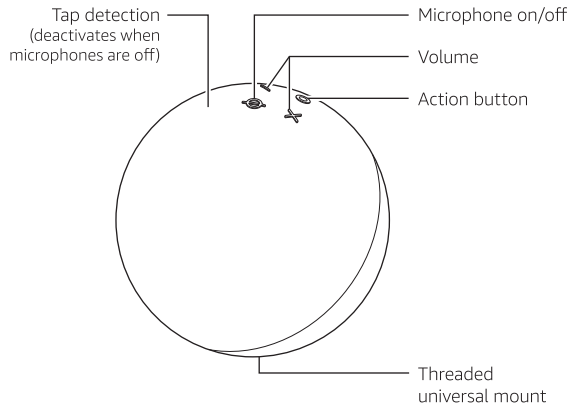

Additional features: built-in smart home hub and temperature sensor.

Alexa is designed to protect your privacy

Wake word and indicators

Alexa doesn't begin listening until your Echo device detects the wake word (for example, "Alexa") or you press the Action button on the device. A blue light indicator lets you know when the device is recording your request to stream to Amazon's secure cloud. If you like, you can also enable an audio tone.

Microphone controls

You can electronically disconnect the microphones with the press of a button.

Voice history

Want to know exactly what Alexa heard? You can view and delete the voice recordings associated with your account in the Alexa app at any time.

These are just a few of the ways that you have transparency and control over your Alexa experience. Explore more at amazon.com.au/alexaprivacy.

## 1. Download the Amazon Alexa app

On your phone or tablet, download and install the latest version of the Alexa app from your app store.

Note: before setting up your device, have your Wi-Fi network name and password ready.

2. Plug in your Echo

Plug your Echo into an electrical socket using the included power adaptor. A blue light ring will spin around the bottom. In about a minute, Alexa will greet you and let you know to complete setup in the Alexa app.

Power port

3.5 mm audio line in/out
(configure in Alexa app)

Light ring

Use the power adaptor included in the original packaging for best performance.

3. Set up your Echo in the Alexa app

Open the Alexa app to set up your Echo. Log in with an existing Amazon account username and password, or create a new account. If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually.

The app helps you get more out of your Echo. It's where you set up calling and messaging, manage music, lists, news and settings.

For help and troubleshooting, go to Help & Feedback in the Alexa app or visit www.amazon.com/devicesupport.

Optional: Set up compatible smart home devices

You can easily connect and control compatible Zigbee devices, like lights and locks, with the built-in smart home hub. When ready to get started, open the Alexa app to add your devices, or say, "Alexa, discover devices".

Give us your feedback

Alexa is always getting smarter and adding new skills. To send us feedback about your experiences with Alexa, use the Alexa app, visit www.amazon.com/devicesupport, or simply say "Alexa, I have feedback".

Things to try with your Echo

Enjoy your favourite music and audiobooks
Alexa, play '90s rock music.
Alexa, play my Audible book.

Get answers to your questions
Alexa, how many kilometres are in a mile?
Alexa, what can you do?

Get news, weather and sport
Alexa, play the news.
Alexa, what's the weather forecast this weekend?

Voice control your smart home

Alexa, turn off the lamp.
Alexa, set living room temperature to 22 degrees.

Stay connected

Alexa, call Dad.
Alexa, announce "dinner is ready."

Stay organised and manage your home
Alexa, reorder paper towels.
Alexa, set an egg timer for 6 minutes.

Some features may require customisation in the Alexa app, a separate subscription or an additional compatible smart home device.

You can find more examples and tips in the Alexa app.
