How to use this data book

This data book describes the methods and provides the detailed survey data from the East Metro Pulse, Volume 3 survey. This survey was conducted in summer 2021 by Wilder Research for the Saint Paul & Minnesota Foundation.

The purpose of this data book is to help readers understand how we did the study and to demonstrate the rigor of the survey methods. This data book can also be used by leaders and policymakers, nonprofit organizations, community groups and others in the East Metro (Dakota, Ramsey and Washington counties) who want to understand more about a particular geographic area or demographic subgroup in the East Metro.

Each table in the data book breaks out the survey results by the following groups: gender, age, education level, household income, housing status, home language and race/ethnicity.

Introduction

In February 2016, Wilder Research was contracted by the Saint Paul & Minnesota Foundation to conduct a survey of residents in the East Metro, including Dakota, Ramsey, and Washington counties. In addition to the survey, Wilder Research staff from the Minnesota Compass team compiled population-level data, primarily from the U.S. Census Bureau. This was the East Metro Pulse, Volume 1.

The Foundation committed to conducting this study regularly to learn more about East Metro residents' backgrounds, experiences, opinions and needs in a number of areas, including community connectedness, economic opportunity and security, education, health, housing and transportation. Wilder Research supported the completion of East Metro Pulse, Volume 2 in 2018.

This data book describes the methods and provides the detailed results from the East Metro Pulse, Volume 3 survey, which was conducted by Wilder Research on behalf of the Saint Paul & Minnesota Foundation in summer 2021. These results can and should be used by the Foundation, other funders, nonprofits, government agencies and service providers and community groups to better understand the needs, strengths and experiences of East Metro residents.

Methods

Survey instrument

Wilder Research worked with the Saint Paul & Minnesota Foundation to develop a survey instrument and study design for the East Metro Pulse, Volume 3 to answer the key research questions from key geographic areas and groups of interest.

After the key research questions were finalized, Wilder Research updated the survey instrument to address the research questions and sought feedback from the Foundation. Once the survey was finalized, Wilder Research programmed the survey into our web survey program, Voxco's Acuity. See the Appendix for the final English survey instrument.

We translated the survey into Hmong, Somali, and Spanish. Wilder contracted with an external professional translation service to complete the translations and then our bilingual staff reviewed the translations and updated the surveys as needed.

The survey materials included information about how respondents could contact Wilder Research to speak to a trained staff member who could answer questions, help them to complete the survey over the phone, or assist with bilingual survey administration (including language-specific phone lines and voicemail messages for Hmong, Somali, and Spanish).

Survey sample

Wilder Research purchased a list of 8,000 randomly sampled residential addresses from Dakota, Ramsey, and Washington counties. The Ramsey County sample included a representative subset of addresses from the City of Saint Paul and another subset for suburban Ramsey County. Additionally, Wilder Research oversampled nearly 10,000¹ addresses that were randomly selected from census block groups that have higher concentrations of American Indian, Black/African American, Asian, and Hispanic/Latino (all together referred to as BIPOC, which stands for Black, Indigenous, and people of color) residents to aim to collect more completed surveys from these demographic groups. The list was obtained from a national sampling vendor, Marketing Systems Group.

¹ We purchased a total of 9,995 addresses that were oversampled to target Black, Indigenous, and people of color (BIPOC) East Metro residents, including 9,545 addresses from census tracts with an above-average concentration of BIPOC households plus 450 listings that were specifically targeted as American Indian households by the sampling vendor.

Survey administration

This survey was administered using a multi-mode approach including an initial survey packet including a paper survey with a link to the online version of the survey for respondents who prefer that mode of survey administration, and a postage-paid return envelope. This initial mailing, sent on June 15, 2021, was followed by a reminder postcard that was sent to all sampled households after one week, on June 22, 2021. The postcard directed respondents to the URL for the online survey and included a unique ID number for each respondent to access the survey. After another three weeks, on July 13, 2021, all sampled addresses that had not yet completed the survey were sent a full survey packet that included a similar invitation letter with URL link, a paper version of the survey, and a postage-paid return envelope.

To thank residents for their time and participation, each respondent was provided with a \$10 gift card. Respondents were offered a choice of both plastic gift cards and e-gift cards to a number of venues, including local BIPOC-owned (Black, Indigenous people of color) restaurants.

Survey respondents

We received a total of 3,133 completed surveys and exceeded our target number of completes for each geographic area. These respondents are statistically representative of the geographic areas they were sampled from; the margin of error, which is based on the sample size, indicates how much potential error there is in these estimates for the entire population. The final sample sizes and margins of error are shown in Figure 1.

1. Population-based sample and survey respondents by geographic area

| | Number of addresses sampled | Target number of completed surveys | Actual number of completed surveys received | Number of completed surveys from BIPOC respondents | Margin of Error (adjusted for weighting) |

| East Metro Overall | 17,995 | - | 3,133 | 799 | 3.3 |

*Note. The City of Saint Paul and Suburban Ramsey County are subsets of the overall Ramsey County sample.

Data analysis and weighting

Wilder Research checked all completed surveys as they were returned. After the paper surveys were entered into an electronic file and the paper and web survey data sets were combined, the survey data were weighted to produce reliable estimates of population parameters for each of the sampling areas: Dakota, Ramsey, and Washington counties. Ramsey County was further divided into the City of Saint Paul and suburban Ramsey County. Weighting compensates for practical limitations of a survey sample, such as differential nonresponse among different demographic groups. For example, it is very common for women to respond to surveys at a higher rate than men. By using demographic information about the target population, weighting reduces the bias of survey estimates.

The weighting process entails three steps. The first step consists of the computation of *design* or *base weights* to reflect the number of adults in the sampled household. In the second step, base weights are adjusted so that the weights result in a sample whose demographic characteristics correspond to the demographic characteristics for the target population based on age, gender, education, household income, and race/ethnicity. For this study, survey weights were calculated using *Iterative Proportional Fitting*, which is commonly referred to as “*raking*.” Survey data for these demographic questions included some missing values. Missing values were replaced, where feasible, by logical inference. A hot-deck imputation procedure was used to attempt to impute the remaining missing values. This resulted in 3,133 cases eligible to be weighted. The data were weighted against the U.S. Census Bureau, ACS 2015-2019 5-year PUMS estimates: <http://factfinder2.census.gov/>. Finally, the adjusted weights were put through a series of quality control checks to detect extreme outliers (weights were truncated so no one respondent counts too strongly in the analysis) and to prevent any computational or procedural errors. This is a standard practice used to improve the efficiency of the weighting process and add stability to survey estimates. However, this important gain in precision is achieved at the expense of introducing some minor diversions between weighted survey data totals and their corresponding population benchmarks.

Wilder Research also coded and analyzed the open-ended survey responses. Once the codebook was tested, our internal quality control process was employed to ensure inter-rater reliability across the individuals coding completed surveys. The final codebook is included in the appendix. The coded responses are included in the tables in this data book, but the raw open-ended comments from respondents are not included to protect respondent confidentiality (and because there are thousands of comments).

After the data was cleaned, coded, and weighted, Wilder Research produced the data tables that are included in this data book. There is a table for every question in the survey, with results broken out by subgroups of interest (see next section).

Wilder Research also worked with the Saint Paul & Minnesota Foundation to complete additional cross-tabs and other analyses as requested to ensure that all of the key research questions were answered.

How to Read the Tables in this Data Book

Each table in the data book breaks out the survey results by the following groups:

- ▶▶ East Metro overall, plus the subgeographies of Dakota County; Ramsey County (overall, City of Saint Paul, suburban Ramsey County); Washington County
- ▶▶ Gender: Female, Male (we also asked about Transgender in the survey but we did not receive enough respondents from this group to report these results)
- ▶▶ Results by age group: 18-34, 35-44, 45-54, 55-64, 65+
- ▶▶ Results by education: Less than high school/GED, high school diploma or GED, some college/trade school/Associate degree, Bachelor's degree or higher
- ▶▶ Results by household income: Less than \$20,000; \$20,000 to \$39,999; \$40,000 to \$59,999; \$60,000 to \$79,999; \$80,000 to \$99,999; \$100,000 to \$149,999; \$150,000 or more
- ▶▶ Results by housing status: owner; renter; lives with friends or family, homeless or some other arrangement
- ▶▶ Results by home language: English only, English plus another language, another language only
- ▶▶ Results by race/ethnicity: American Indian, Native American, and Alaska Native; Black, African American, and African; Asian and Asian American; Hispanic and Latino/a; and White

The columns in each table correspond to the response options on the survey. Some answer categories are combined because of the low number of responses in those categories. The last column in each row of the table shows the number of respondents (unweighted) related to the percentages in that row. Data is suppressed in rows with a total number of respondents fewer than 20 to protect respondent confidentiality. Some questions apply only to certain respondents due to skip patterns in the survey.

As mentioned above, some questions were open-ended, i.e., respondents wrote their own answers on a blank line. The responses to these questions were grouped according to theme (i.e., "coded") in order to reveal themes in the data. These themes and the percentage of residents who responded in this way are included in the data book, and are broken down by geography only.

For some questions, including open-ended questions, respondents were allowed to provide more than one answer, so the totals may add up to more than 100%.

Survey instrument (English version)

Dear Community Member,

In exchange for a \$10 gift card to thank you for your time, would you please consider participating in the East Metro Pulse survey? Through it, we aim to learn about your experiences in, and connection to, our community.

About the Survey

This survey, commissioned by the Foundation and conducted by Wilder Research, focuses on residents in Dakota, Ramsey and Washington Counties. The results are used to inform community leaders and policymakers about the opportunities and challenges unique to the East Metro.

The most effective solutions are those informed through community partnerships. **Your input matters, and we hope you will take a moment to share your story.**

How to Complete the Survey (15 minutes)

The survey will take about 15 minutes of your time and can be completed in three different ways:

1. Complete the survey online at:
www.wilderresearch.org/go/EastMetroPulse2021
Access Code: **[PIN]**
2. Fill out the enclosed paper survey and return it in the postage-paid envelope provided.
3. If you would prefer to complete the survey over the phone, please call Wilder Research at 651-280-2800. We can help you complete the survey.

If we receive your completed survey by July 29, 2021, you may select from the following options for the gift card:

- **Target, Cub Foods or Speedway**, received as a plastic card via U.S. mail about 2 weeks after we receive your completed survey, redeemable in-store
- **Local restaurants including Kolap, Afro Deli, or El Burrito Mercado** received as a plastic card via U.S. mail about 2 weeks after the survey is closed in late July, redeemable in-store

Your household was randomly selected. Your participation is voluntary and your responses are confidential. **We assure you that your information will not be shared or used for any other purposes.**

For more information about the East Metro Pulse survey, please visit: www.eastmetropulse.org.

Thank you for sharing your insights!

Sincerely,

Eric J. Jolly, Ph.D.
President and CEO

2021 East Metro Pulse Survey

In this survey, when we say "East Metro" we are referring to all of the cities and communities in Dakota, Ramsey and Washington Counties. You were invited to take this survey because you live in the East Metro. Throughout this survey, when we ask about the "East Metro," think about the community in which you live.

First, we have a couple of questions about the impact of the COVID-19 pandemic on your life.

The Saint Paul & Minnesota Foundation has done this survey since 2016 with the goal of taking a pulse of the current quality of life in the East Metro. We realize that the COVID-19 pandemic has impacted all of us by creating new challenges and amplifying existing struggles.

The East Metro area

1. As a result of the COVID-19 pandemic, has your life...

- ¹ Changed significantly in a positive way
- ² Changed somewhat in a positive way
- ³ Stayed about the same
- ⁴ Changed somewhat in a negative way
- ⁵ Changed significantly in a negative way

2. What are the main areas of your life where COVID-19 has had a negative impact?

¹ Check here if COVID has not impacted your life, OR
