

October 1, 2021 - September 30, 2022

To help improve the Department of Veterans Affairs (VA) contact center customer experience, VA established the Enterprise Contact Center Council (ECCC) in 2018. This effort arose after customers reported a confusing, inconsistent response when navigating over 1,000 VA toll-free numbers and multiple VA contact centers.

The ECCC improves touchpoints with military service members, Veterans, their families, caregivers, and survivors by modernizing VA contact centers—a dynamic multi-year journey that considers new information along the way while continually learning, growing, evolving, and improving customer experience.

Some VA contact center Fiscal Year (FY) 2022 customer experience improvements include:

- Expanded available communication options (omnichannel) by launching [VA's Chatbot](#) and [Ask VA](#).
- As part of VA contact center modernization efforts, deployed an updated telephone system and software tools in eight VA contact centers.
- Transitioned the Veterans Crisis Line to a new three-digit number (988), offering Veterans an easy-to-remember way to access crisis support.
