

IOM UKRAINE

OBLAST PROFILES

GENERAL POPULATION SURVEY

JULY 2024

INTRODUCTION

The Oblast Profiles draw from data collected during Round 16 of IOM Ukraine's [General Population Survey](#) (GPS), with an emphasis on demographics & displacement, the adoption of coping strategies to meet needs, employment & income, and housing. These granular insights, categorized by population group at the oblast level, aim to inform strategic, programmatic, and operational decision-making.

The results presented are representative at a minimum confidence level of 90% and have a margin of error of 12.2%. Any results with a higher margin of error were excluded from the analysis and are marked as '-'. In some oblasts with lower populations of internally displaced persons (IDPs) and returnees, it was not always possible to gather enough data to provide representative results at the oblast level. As a result, the data from these oblasts may not meet the required confidence level and margin of error criteria and thus are not displayed.

TABLE OF CONTENTS

CHERNIHIVSKA OBLAST	1
DNIPROPETROVSKA OBLAST	4
KHARKIVSKA OBLAST	7
KYIV CITY	10

INTRODUCTION

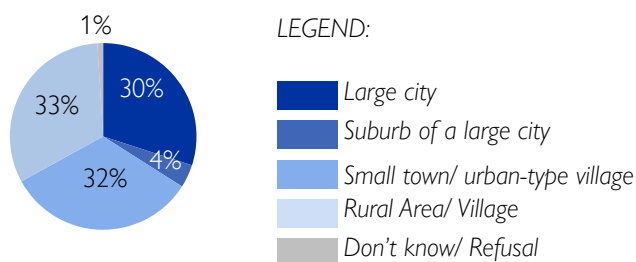

The Oblast Profiles draw from data collected during Round 16 of IOM Ukraine's General Population Survey (GPS), with an emphasis on demographics & displacement, the adoption of coping strategies to meet needs, employment & income, and housing. These granular insights, categorized by population group at the oblast level, aim to inform strategic, programmatic, and operational decision-making.

The results presented are representative at a minimum confidence level of 90% and have a margin of error of 12.2%. Any results with a higher margin of error were excluded from the analysis and are marked as '-'. In some oblasts (regions) with lower populations of internally displaced persons (IDPs) and returnees, it was challenging to gather enough data to provide representative results at the oblast level. As a result, the data from these areas may not meet the required confidence level and margin of error criteria and thus are not displayed.

HOUSEHOLD CHARACTERISTICS

ALL RESPONDENTS

Figure 1: Household characteristics for all respondents¹

36% of individuals reported at least one person with disabilities in their current household

48% of individuals reported at least one chronically ill person in their current household

IDP RESPONDENTS ONLY

Figure 3: Household characteristics for IDP respondents

- of IDPs reported at least one person with disabilities in their current household

- of IDPs reported at least one chronically ill person their current household

DEFINITIONS

Population Types	
De facto IDPs	People who have been forced to flee or to leave their homes or who are staying outside their habitual residence due to the full-scale invasion in February 2022, regardless of whether they hold registered IDP status.
Returnees	People who have returned to their habitual residence after a significant period of displacement (minimum of two weeks since February 2022), whether from abroad or from internal displacement within Ukraine.
Non-displaced population	People residing in their habitual residence who have not left it due to the ongoing war for a period of two weeks or more, as well as people who are temporarily outside their place of habitual residence for reasons not in connection with the ongoing full-scale war.

¹The percentage of the number reported is rounded based on the appropriate number of decimal places to ensure ease of use.

Population Statistics		Percentage	Est. Population
Estimated population presence	Hosted IDPs	6%	68,000
	Returnee	19%	201,000
	Non-Displaced	75%	820,000
Displacement and Return Dynamics			
Hosted IDPs displaced from within the oblast ²		-	-
Hosted IDPs displaced from another oblast in Ukraine ³		-	-
Hosted IDPs ⁴ previously displaced abroad returning to internal displacement		-	-
IDPs who have been recently displaced (up to 3 months)		-	-
Returnees who have recently returned (time since return <=3 months)		4%	9,000
Short-term Mobility Intentions			
Estimated population planning to relocate within 3 months	IDPs	-	-
	Returnee	3%	6,000
	Non-Displaced	0%	0
	Total	1%	6,000
Hosted IDPs planning to return within 3 months	IDPs	-	-
Coping Strategies (individuals in households having adopted or exhausted coping strategies to meet basic needs)			
Estimated population in households who spent savings	IDPs	-	-
	Returnee	70%	142,000
	Non-Displaced	69%	570,000
	Total	71%	771,000
Estimated population in households who reduced essential health expenditures (including drugs or medicines)	IDPs	-	-
	Returnee	39%	79,000
	Non-Displaced	47%	387,000
	Total	47%	512,000
Estimated population in households who used degrading sources of income, illegal work, or high risk jobs	IDPs	-	-
	Returnee	13%	26,000
	Non-Displaced	11%	91,000
	Total	11%	122,000
Estimated population in households who depended on humanitarian assistance to meet basic needs	IDPs	-	-
	Returnee	32%	65,000
	Non-Displaced	25%	205,000
	Total	28%	307,000
Estimated population in households who moved to poorer quality dwelling	IDPs	-	-
	Returnee	6%	11,000
	Non-Displaced	0%	0
	Total	2%	26,000
Estimated population in households who skipped paying rent	IDPs	-	-
	Returnee	10%	20,000
	Non-Displaced	6%	46,000
	Total	7%	74,000
Estimated population in households who reduced usage of utilities (wood, coal, electricity, gas)	IDPs	-	-
	Returnee	49%	99,000
	Non-Displaced	58%	479,000
	Total	57%	618,000

² The proportions of those displaced from within their oblast or from another oblast may not add up to 100%, as the current oblast or oblast of origin were not always reported.

³ Ibid.

⁴ IDPs previously displaced abroad returning to internal displacement can either have returned to their oblast of origin or to another oblast. They may therefore be part of both the above groups - IDPs displaced within the oblast and IDPs displaced from another oblast.

Employment and Income			
Estimated active labour force (individuals aged 18 to 70 reporting having been employed, self-employed, or unemployed and actively looking for a job)	IDPs	-	-
	Returnee	73%	130,000
	Non-Displaced	62%	456,000
	Total	63%	615,000
Estimated population unemployed and actively looking for a job (total population assessed)	IDPs	-	-
	Returnee	8%	17,000
	Non-Displaced	3%	23,000
	Total	5%	51,000
Estimated population reporting their combined monthly household income per person as less than UAH 6,025 (monthly subsistence minimum as per the State Budget of Ukraine for 2023)	IDPs	-	-
	Returnee	52%	105,000
	Non-Displaced	78%	638,000
	Total	74%	803,000
Housing		UAH	
For those renting, median reported monthly household income in UAH since the beginning of the war	IDPs	-	-
	Returnee	-	-
	Non-Displaced	-	-
	Total	-	-
For those renting, monthly household expenditure on utilities and rent	IDPs	-	-
	Returnee	-	-
	Non-Displaced	-	-
	Total	-	-
Estimated population living in a damaged or severely damaged house, being homeless or staying in a non-residential building	IDPs	-	-
	Returnee	24%	48,000
	Non-Displaced	18%	148,000
	Total	19%	202,000

General Population Survey (GPS) Methodology

The International Organization for Migration (IOM) commissioned Multicultural Insights for data collection in GPS Round 16 (R16). Phone-based screening interviews were conducted with 20,000 individuals.

For Round 16, in-depth follow-up interviews were conducted with 1,428 IDPs, 1,639 returnees, and 2,266 residents (data collected between 10 March and 11 April 2024). All interviews were conducted using a random-digit-dial (RDD) and computer-assisted telephone interviewing (CATI) approach. At a minimum, results presented in the profiles are representative at a confidence level of 90% and with a margin of error of 12.2%. Any results with a higher margin of error were excluded (denoted as '-' above). Percentage results are rounded for ease of use. Population estimates, rounded to the nearest 1,000, are based on the GPS results and UNFPA baseline data. Unless specified

otherwise, all the results are calculated out of the total population stock for each population group respectively. While population group results are not always presented separately due to high margins of error, total population figures include all three groups: IDPs, returnees and non-displaced population.

The survey included all of Ukraine, excluding the Crimean Peninsula and the areas of Donetsk, Luhanska, Khersonska, and Zaporizka Oblasts under the temporary military control of the Russian Federation where phone coverage by Ukrainian operators is not available. All interviews were anonymous, and respondents were asked for consent before starting the interview. The teams consisted of male and female interviewers, and the interviews were conducted in Ukrainian and Russian, with language selection based on the preference of each respondent.

DEFINITIONS

Population Types	
De facto IDPs	People who have been forced to flee or to leave their homes or who are staying outside their habitual residence due to the full-scale invasion in February 2022, regardless of whether they hold registered IDP status.
Returnees	People who have returned to their habitual residence after a significant period of displacement (minimum of two weeks since February 2022), whether from abroad or from internal displacement within Ukraine.
Non-displaced population	People residing in their habitual residence who have not left it due to the ongoing war for a period of two weeks or more, as well as people who are temporarily outside their place of habitual residence for reasons not in connection with the ongoing full-scale war.

¹The percentage of the number reported is rounded based on the appropriate number of decimal places to ensure ease of use.

Population Statistics		Percentage	Est. Population
Estimated population presence	Hosted IDPs	11%	343,000
	Returnee	32%	1,027,000
	Non-Displaced	57%	1,835,000
Displacement and Return Dynamics			
Hosted IDPs displaced from within the oblast ²		<1%	2,000
Hosted IDPs displaced from another oblast in Ukraine ³		99%	339,000
Hosted IDPs ⁴ previously displaced abroad returning to internal displacement		14%	48,000
IDPs who have been recently displaced (up to 3 months)		4%	13,000
Returnees who have recently returned (time since return <=3 months)		3%	30,000
Short-term Mobility Intentions			
Estimated population planning to relocate within 3 months	IDPs	2%	5,000
	Returnee	1%	12,000
	Non-Displaced	1%	11,000
	Total	1%	28,000
Hosted IDPs planning to return within 3 months	IDPs	1%	3,000
Coping Strategies (individuals in households having adopted or exhausted coping strategies to meet basic needs)			
Estimated population in households who spent savings	IDPs	70%	242,000
	Returnee	58%	596,000
	Non-Displaced	51%	928,000
	Total	55%	1,766,000
Estimated population in households who reduced essential health expenditures (including drugs or medicines)	IDPs	57%	195,000
	Returnee	31%	318,000
	Non-Displaced	37%	675,000
	Total	37%	1,187,000
Estimated population in households who used degrading sources of income, illegal work, or high risk jobs	IDPs	20%	68,000
	Returnee	7%	68,000
	Non-Displaced	9%	169,000
	Total	10%	305,000
Estimated population in households who depended on humanitarian assistance to meet basic needs	IDPs	56%	192,000
	Returnee	11%	113,000
	Non-Displaced	17%	306,000
	Total	19%	611,000
Estimated population in households who moved to poorer quality dwelling	IDPs	25%	86,000
	Returnee	3%	30,000
	Non-Displaced	4%	74,000
	Total	6%	189,000
Estimated population in households who skipped paying rent	IDPs	16%	55,000
	Returnee	8%	86,000
	Non-Displaced	10%	190,000
	Total	10%	330,000
Estimated population in households who reduced usage of utilities (wood, coal, electricity, gas)	IDPs	55%	187,000
	Returnee	43%	442,000
	Non-Displaced	41%	759,000
	Total	43%	1,389,000

² The proportions of those displaced from within their oblast or from another oblast may not add up to 100%, as the current oblast or oblast of origin were not always reported.

³ Ibid.

⁴ IDPs previously displaced abroad returning to internal displacement can either have returned to their oblast of origin or to another oblast. They may therefore be part of both the above groups - IDPs displaced within the oblast and IDPs displaced from another oblast.

Employment and Income			
Estimated active labour force (individuals aged 18 to 70 reporting having been employed, self-employed, or unemployed and actively looking for a job)	IDPs	71%	226,000
	Returnee	78%	757,000
	Non-Displaced	70%	1,139,000
	Total	73%	2,122,000
Estimated population unemployed and actively looking for a job (total population assessed)	IDPs	6%	21,000
	Returnee	2%	24,000
	Non-Displaced	2%	42,000
	Total	3%	87,000
Estimated population reporting their combined monthly household income per person as less than UAH 6,025 (monthly subsistence minimum as per the State Budget of Ukraine for 2023)	IDPs	47%	161,000
	Returnee	36%	365,000
	Non-Displaced	34%	622,000
	Total	36%	1,148,000
Housing		UAH	
For those renting, median reported monthly household income in UAH since the beginning of the war	IDPs	20,000	
	Returnee	29,000	
	Non-Displaced	-	
	Total	20,000	
For those renting, monthly household expenditure on utilities and rent	IDPs	11,000	
	Returnee	12,000	
	Non-Displaced	-	
	Total	11,000	
Estimated population living in a damaged or severely damaged house, being homeless or staying in a non-residential building	IDPs	6%	21,000
	Returnee	5%	50,000
	Non-Displaced	4%	74,000
	Total	5%	145,000

General Population Survey (GPS) Methodology

The International Organization for Migration (IOM) commissioned Multicultural Insights for data collection in GPS round 16 (R16). Phone-based screening interviews were conducted with 20,000 individuals.

For Round 16, in-depth follow-up interviews were conducted with 1,428 IDPs, 1,639 returnees, and 2,266 residents (data collected between 10 March and 11 April 2024). All interviews were conducted using a random-digit-dial (RDD) and computer-assisted telephone interviewing (CATI) approach. At a minimum, results presented in the profiles are representative at a confidence level of 90% and with a margin of error of 12.2%. Any results with a higher margin of error were excluded (denoted as '-' above). Percentage results are rounded for ease of use. Population estimates, rounded to the nearest 1,000, are based on the GPS results and UNFPA baseline data. Unless specified

otherwise, all the results are calculated out of the total population stock for each population group respectively. While population group results are not always presented separately due to high margins of error, total population figures include all three groups: IDPs, returnees and non-displaced population.

The survey included all of Ukraine, excluding the Crimean Peninsula and the areas of Donetsk, Luhanska, Khersonska, and Zaporizka Oblasts under the temporary military control of the Russian Federation where phone coverage by Ukrainian operators is not available. All interviews were anonymous, and respondents were asked for consent before starting the interview. The teams consisted of male and female interviewers, and the interviews were conducted in Ukrainian and Russian, with language selection based on the preference of each respondent.

INTRODUCTION

The Oblast Profiles draw from data collected during Round 16 of IOM Ukraine's General Population Survey (GPS), with an emphasis on demographics & displacement, the adoption of coping strategies to meet needs, employment & income, and housing. These granular insights, categorized by population group at the oblast level, aim to inform strategic, programmatic, and operational decision-making.

The results presented are representative at a minimum confidence level of 90% and have a margin of error of 12.2%. Any results with a higher margin of error were excluded from the analysis and are marked as '-'. In some oblasts (regions) with lower populations of internally displaced persons (IDPs) and returnees, it was challenging to gather enough data to provide representative results at the oblast level. As a result, the data from these areas may not meet the required confidence level and margin of error criteria and thus are not displayed.

	Total	16%	182,000

General Population Survey (GPS) Methodology

The International Organization for Migration (IOM) commissioned Multicultural Insights for data collection in GPS round 16 (R16). Phone-based screening interviews were conducted with 20,000 individuals.

For Round 16, in-depth follow-up interviews were conducted with 1,428 IDPs, 1,639 returnees, and 2,266 residents (data collected between 10 March and 11 April 2024). All interviews were conducted using a random-digit-dial (RDD) and computer-assisted telephone interviewing (CATI) approach. At a minimum, results presented in the profiles are representative at a confidence level of 90% and with a margin of error of 12.2%. Any results with a higher margin of error were excluded (denoted as '-' above). Percentage results are rounded for ease of use. Population estimates, rounded to the nearest 1,000, are based on the GPS results and UNFPA baseline data. Unless specified

otherwise, all the results are calculated out of the total population stock for each population group respectively. While population group results are not always presented separately due to high margins of error, total population figures include all three groups: IDPs, returnees and non-displaced population.

The survey included all of Ukraine, excluding the Crimean Peninsula and the areas of Donetsk, Luhanska, Khersonska, and Zaporizka Oblasts under the temporary military control of the Russian Federation where phone coverage by Ukrainian operators is not available. All interviews were anonymous, and respondents were asked for consent before starting the interview. The teams consisted of male and female interviewers, and the interviews were conducted in Ukrainian and Russian, with language selection based on the preference of each respondent.

INTRODUCTION

The Oblast Profiles draw from data collected during Round 16 of IOM Ukraine's General Population Survey (GPS), with an emphasis on demographics & displacement, the adoption of coping strategies to meet needs, employment & income, and housing. These granular insights, categorized by population group at the oblast level, aim to inform strategic, programmatic, and operational decision-making.

The results presented are representative at a minimum confidence level of 90% and have a margin of error of 12.2%. Any results with a higher margin of error were excluded from the analysis and are marked as '-'. In some oblasts (regions) with lower populations of internally displaced persons (IDPs) and returnees, it was challenging to gather enough data to provide representative results at the oblast level. As a result, the data from these areas may not meet the required confidence level and margin of error criteria and thus are not displayed.

DEFINITIONS

Population Types	
De facto IDPs	People who have been forced to flee or to leave their homes or who are staying outside their habitual residence due to the full-scale invasion in February 2022, regardless of whether they hold registered IDP status.
Returnees	People who have returned to their habitual residence after a significant period of displacement (minimum of two weeks since February 2022), whether from abroad or from internal displacement within Ukraine.
Non-displaced population	People residing in their habitual residence who have not left it due to the ongoing war for a period of two weeks or more, as well as people who are temporarily outside their place of habitual residence for reasons not in connection with the ongoing full-scale war.

¹The percentage of the number reported is rounded based on the appropriate number of decimal places to ensure ease of use.

Population Statistics		Percentage	Est. Population

General Population Survey (GPS) Methodology

The International Organization for Migration (IOM) commissioned Multicultural Insights for data collection in GPS round 16 (R16). Phone-based screening interviews were conducted with 20,000 individuals.

For Round 16, in-depth follow-up interviews were conducted with 1,428 IDPs, 1,639 returnees, and 2,266 residents (data collected between 10 March and 11 April 2024). All interviews were conducted using a random-digit-dial (RDD) and computer-assisted telephone interviewing (CATI) approach. At a minimum, results presented in the profiles are representative at a confidence level of 90% and with a margin of error of 12.2%. Any results with a higher margin of error were excluded (denoted as '-' above). Percentage results are rounded for ease of use. Population estimates, rounded to the nearest 1,000, are based on the GPS results and UNFPA baseline data. Unless specified

otherwise, all the results are calculated out of the total population stock for each population group respectively. While population group results are not always presented separately due to high margins of error, total population figures include all three groups: IDPs, returnees and non-displaced population.

The survey included all of Ukraine, excluding the Crimean Peninsula and the areas of Donetsk, Luhanska, Khersonska, and Zaporizka Oblasts under the temporary military control of the Russian Federation where phone coverage by Ukrainian operators is not available. All interviews were anonymous, and respondents were asked for consent before starting the interview. The teams consisted of male and female interviewers, and the interviews were conducted in Ukrainian and Russian, with language selection based on the preference of each respondent.

INTRODUCTION

The Oblast Profiles draw from data collected during Round 16 of IOM Ukraine's General Population Survey (GPS), with an emphasis on demographics & displacement, the adoption of coping strategies to meet needs, employment & income, and housing. These granular insights, categorized by population group at the oblast level, aim to inform strategic, programmatic, and operational decision-making.

The results presented are representative at a minimum confidence level of 90% and have a margin of error of 12.2%. Any results with a higher margin of error were excluded from the analysis and are marked as '-'. In some oblasts (regions) with lower populations of internally displaced persons (IDPs) and returnees, it was challenging to gather enough data to provide representative results at the oblast level. As a result, the data from these areas may not meet the required confidence level and margin of error criteria and thus are not displayed.

HOUSEHOLD CHARACTERISTICS

ALL RESPONDENTS

Figure 1: Household characteristics for all respondents¹

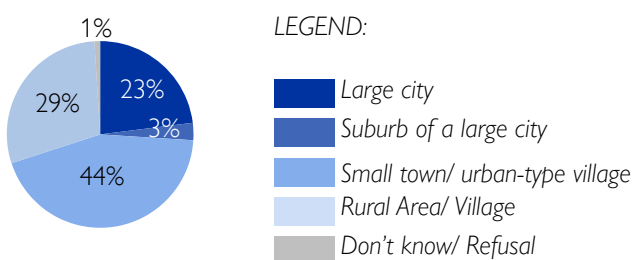

Figure 2: Settlement type for all respondents

46% of IDPs reported at least one person with disabilities in their current household

38% of IDPs reported at least one chronically ill person in their current household

DEFINITIONS

Population Types	
De facto IDPs	People who have been forced to flee or to leave their homes or who are staying outside their habitual residence due to the full-scale invasion in February 2022, regardless of whether they hold registered IDP status.
Returnees	People who have returned to their habitual residence after a significant period of displacement (minimum of two weeks since February 2022), whether from abroad or from internal displacement within Ukraine.
Non-displaced population	People residing in their habitual residence who have not left it due to the ongoing war for a period of two weeks or more, as well as people who are temporarily outside their place of habitual residence for reasons not in connection with the ongoing full-scale war.

¹The percentage of the number reported is rounded based on the appropriate number of decimal places to ensure ease of use.

Population Statistics		Percentage	Est. Population
Estimated population presence	Hosted IDPs	8%	113,000
	Returnee	7%	98,000
	Non-Displaced	85%	1,225,000
Displacement and Return Dynamics			
Hosted IDPs displaced from within the oblast ²		6%	7,000
Hosted IDPs displaced from another oblast in Ukraine ³		94%	106,000
Hosted IDPs ⁴ previously displaced abroad returning to internal displacement		7%	8,000
IDPs who have been recently displaced (up to 3 months)		6%	7,000
Returnees who have recently returned (time since return <=3 months)		-	-
Short-term Mobility Intentions			
Estimated population planning to relocate within 3 months	IDPs	0%	0
	Returnee	-	-
	Non-Displaced	2%	21,000
	Total	1%	21,000
Hosted IDPs planning to return within 3 months	IDPs	2%	2,000
Coping Strategies (individuals in households having adopted or exhausted coping strategies to meet basic needs)			
Estimated population in households who spent savings	IDPs	75%	85,000
	Returnee	-	-
	Non-Displaced	60%	731,000
	Total	62%	888,000
Estimated population in households who reduced essential health expenditures (including drugs or medicines)	IDPs	50%	57,000
	Returnee	-	-
	Non-Displaced	41%	505,000
	Total	42%	609,000
Estimated population in households who used degrading sources of income, illegal work, or high risk jobs	IDPs	6%	7,000
	Returnee	-	-
	Non-Displaced	16%	193,000
	Total	16%	226,000
Estimated population in households who depended on humanitarian assistance to meet basic needs	IDPs	60%	68,000
	Returnee	-	-
	Non-Displaced	10%	118,000
	Total	14%	202,000
Estimated population in households who moved to poorer quality dwelling	IDPs	23%	26,000
	Returnee	-	-
	Non-Displaced	3%	32,000
	Total	4%	61,000
Estimated population in households who skipped paying rent	IDPs	17%	19,000
	Returnee	-	-
	Non-Displaced	5%	64,000
	Total	7%	105,000
Estimated population in households who reduced usage of utilities (wood, coal, electricity, gas)	IDPs	46%	52,000
	Returnee	-	-
	Non-Displaced	53%	645,000
	Total	54%	769,000

² The proportions of those displaced from within their oblast or from another oblast may not add up to 100%, as the current oblast or oblast of origin were not always reported.

³ Ibid.

⁴ IDPs previously displaced abroad returning to internal displacement can either have returned to their oblast of origin or to another oblast. They may therefore be part of both the above groups - IDPs displaced within the oblast and IDPs displaced from another oblast.

Employment and Income			
Estimated active labour force (individuals aged 18 to 70 reporting having been employed, self-employed, or unemployed and actively looking for a job)	IDPs	-	-
	Returnee	-	-
	Non-Displaced	71%	773,000
